Baboo Gopal Chunder Banerjee, B.L., is appointed temporarily to be a Sub-Deputy Collector of the Second Grade at Diamond Harbour, in the 24-Pergunnahs, *vice* Baboo Poorna Chunder Roy.

Baboo Krishna Chunder Das, Extra Assistant Commissioner, Julpigoree, is allowed leave for one month and six days under Section 21, Chapter VI of the Civil Leave Code, with effect from the 9th October next.

Captain Ninian Lowis is appointed to act as Manager of the Chota Nagpore Estate during the absence, on leave, of Mr. G. K. Webster, or until further orders, with effect from the date on which he relieved that officer.

The 25th August 1874.—Mr. Andrew William Cosserat, Extra Assistant Commissioner, is allowed leave for a period not exceeding thirty days, from the 5th August 1874, the date following the day, of his return from furlough, to enable him to join his appointment.

Mr. Albert Champion Mangles, Magistrate and Collector of Patna, is allowed leave for one month under Section 21, Chapter VI of the Civil Leave Code, with effect from the 23rd instant.

Mr. Henry James Newbery is appointed to act as Magistrate and Collector of Patna during the absence, on leave, of Mr. A. C. Mangles, or until further orders.

Baboo Kasi Kinker Sen, Deputy Magistrate and Deputy Collector, Rajshahye, is allowed leave for fifteen days under Section 3, Supplement F of the Civil Leave Code, with effect from the 3rd instant.

Baboo Doorga Mohun Ghose, Sub-Deputy Collector, Mymensingh, is allowed leave for six months under Section 5, Supplement F of the Civil Leave Code.

Mr. W. O. Clark, C.S., on special duty in Tirhoot, is transferred to the Sudder Station of Chumparun.

Baboo Luchmi Narain, Deputy Magistrate and Deputy Collector, Chumparun, is transferred to Shahabad.

POLICE.—*The 24th August* 1874.—Major Quintin Dick Parsons, Assistant Inspector-General, Railway Police, is allowed subsidiary leave for a period not exceeding thirty days to enable him to proceed to Europe on furlough.

EDUCATION.—*The 24th August* 1874.—The following gentlemen are appointed to be members of the District School Committee of Gya, viz.—

Mr. E. Grey, Judge.
,, G. R. K. Meares, District Superintendent of Police.
Baboo Bhup Sen Singh, Government Pleader.
Mirza Dost Mohammed,

MEDICAL.—*The 24th August* 1874.—The services of Third Grade Assistant Surgeon Dwarkanath Sen, a Supernumerary at the Presidency, are placed at the disposal of the Government of the North-Western Provinces.

CUSTOMS.—*The 24th August* 1874.—Captain H. Lawrell, Superintendent of the Preventive Service for the Port of Calcutta, is allowed leave for three months under Section 21, Chapter VI of the Civil Leave Code.

Mr. A. W. Shawe, Inspector, is appointed to act as Superintendent of the Preventive Service for the Port of Calcutta during the absence, on leave, of Captain H. Lawrell, or until further orders.

LOCAL FUND.—*The 24th August* 1874.—Baboo Bogola Prosono Mozoomdar, Sub-Registrar, is appointed to be Vice-Chairman of the District Road Committee of Noakholly.

ROAD CESS.—*The 25th August* 1874.—Baboo Sharoda Prosad Sookul, a Zemindar of Nattore, is appointed, under Section 49, Act X (B.C.) of 1871, to be a member of the Rajshahye District Road Cess Committee, *vice* Baboo Kishory Lal Roy, who has left the district.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

NOTIFICATION.

The 24th August 1874.—In continuation of the Notification of the 28th July 1874, published in the *Calcutta Gazette* of the 29th idem, the name of Mr. Samuel Simpson Jones, Assistant Magistrate and Collector, Moorshedabad, is noted as entitled to be considered as passed by the Higher Standard, *subject to his fully qualifying and passing in Bengali and Hindustani by that Standard within one year from his release from famine duty.*

RESOLUTION.

GENERAL DEPARTMENT.

SECTION B.

Calcutta, the 22nd August 1874.

READ—

Resolution in the Financial Department of this Government, dated 22nd April 1873, regarding the provision of executive establishments to sub-divisions.

Rules for the Instruction and Examination of Candidates for the Native Civil Service, dated 22nd April 1873.

Report by the Superintendent of the Subordinate Civil Service Examination of the result of the examination held in March last at Hooghly, Patna, Dacca, Cuttack, and Gowhatty.

This office letter to the Director of Public Instruction, dated 10th October last, prescribing the revised rules for the Native Civil Service Examination of 1865, and for the regulation of the Native Civil Service Classes.

LISTS of the candidates who passed at the Native Civil Service Examinations which were held during the month of March last at Hooghly, Patna, Dacca, Cuttack, and Gowhatty, have already been published in the *Calcutta Gazette.*

2. Of 423 candidates who obtained permission, 385 actually appeared and were examined. Of these 67 were declared by the examiners to have passed in the higher grade and 132 in the lower grade. One more candidate has been passed in the lower grade on the recommendation of the Superintendent of the Examinations. The total number of passed candidates is 200.

3. Of the candidates who passed in the lower grade, nine having passed with distinction, have been placed, at the special recommendation of the Superintendent of the Examinations, in the higher grade, making a total of 76. Of these 38 having fulfilled the requirements of paragraph 4, Part II, of the Rules for the Instruction and Examination of Candidates for the Native Civil Service, dated 22nd April 1873, have been placed in Class I and declared eligible for all appointments in the Subordinate Civil Service. The remaining 38 candidates have been placed in Class II, and will become eligible for all such appointments on their serving for one year in appointments of less value than Rs. 100 per mensem, for which they are now declared qualified.

4. The remaining 123 who passed in the lower grade, and the one who has been specially so passed, have been placed in Class III, and are declared qualified to hold appointments of less value than Rs. 100 per mensem.

5. The Commissioners to whose divisions the second class men of the examinations of 1873 were allotted, have been desired to report on their qualifications. If they are found deserving, they will be declared to be eligible for all appointments.

6. Two of the candidates who have passed in the first class are natives of Assam, and are anxious for employment in that province. Their cases will be brought to the notice of the Chief Commissioner of Assam, and a copy of Mr. Grimley's remarks regarding these two candidates in paragraph 6 of his report will be forwarded for the information of the Chief Commissioner.

7. Baboo Nundkishore Dass, Deputy Magistrate and Deputy Collector, and Bhoonya Abdoor Ruhman Khan, Sub-Deputy Collector in Orissa, who were appointed to their respective offices subject to passing the Native Civil Service Examination, and have passed in the higher grade, are now confirmed in their appointments.

8. The Superintendent of the Examinations recommends that a silver medal be awarded to Baboo Lolitmohun Dhur, the first on the list of the passed candidates. The Lieutenant-Governor has already, in recognition of the merits of this native gentleman, conferred on him an appointment of acting Deputy Magistrate and Deputy Collector, and he considers this, under the circumstances, the more appropriate form of reward.

9. Another passed candidate of this year, Baboo Omoollo Churn Mullick, who was formerly a member of the Subordinate Executive Service, but removed for failure to pass the departmental examinations within the prescribed time, has, in accordance with the promise held out to him at the time of his removal, been appointed to act as a Deputy Magistrate and Deputy Collector.

10. Forty other canditates have been appointed temporary Sub-Deputies or Relief Superintendents in connection with the present famine relief operations, since the date of the examination.

11. The following is an abstract of the allotment which has been made of the passed candidates, exclusive of the two passed candidates who will be recommended to the Chief Commissioner of Assam :—

Division	1st class candidates.	2nd class candidates.	3rd class candidates
Burdwan	5	5	14
Presidency	6	6	13
Rajshahye	6	8	13
Cooch Behar	1	0	4
Dacca	4	4	12
Chittagong	2	4	10
Patna	5	3	25
Bhagulpore	3	3	15
Orissa	2	2	7
Chota Nagpore	2	3	11
Total ...	36	38	124

12. A list showing the names of the candidates allotted to the different divisions has been already circulated with this office Circular No. 12E, dated the 14th instant. They are recommended to report themselves to the Commissioners of the divisions to which they are assigned. Any candidates who wish to exchange by mutual arrangement with other candidates placed in the allotment list, may jointly apply to Government for permission to do so within a month of the publication of this resolution. Commissioners who have exhausted their own lists may select men from the other lists with the consent of the Commissioner to whom the candidate has been allotted.

13. The attention of Commissioners is drawn to the following extract from the Native Civil Service Examination Rules now in force :—"Lists of successful examinees will be published in the *Gazette*, so that Commissioners, Magistrates, and Educational Committees, may select for ministerial or other appointments passed candidates for whom vacancies in the Native Civil Service may not be immediately available."

14. Detailed lists showing the past service, the University or other attainments of each candidate, and the special subjects in which he passed, will be forwarded to Commissioners.

15. Unpassed candidates who were temporarily admitted to appointments pending the result of the late examination, or who were appointed subject to passing at that examination, and have failed to do so, should be now replaced

by passed men. The attention of all Commissioners of divisions is requested to this order.

16. It is to be understood that the appointments which have been made or may be made of men who have never before served Government are on probation for a year, and that their confirmation will depend on the practical efficiency shown by them. The District Officers will report on this point through the Commissioner after the expiry of a year. Their attention is drawn to paragraph 18 of the Resolution in Financial Department of 22nd April 1873. The reports now overdue should be submitted at an early date to the address of the Secretary to this Government in the General Department, Section B.

17. The Superintendent of the Examinations has recommended that thirty-seven of the candidates who have failed, but who have attained the passing standard of marks in certain subjects, may, if they appear at the next examination, be exempted from examination in those subjects. The proposal is however opposed to the principle on which these examinations have been hitherto conducted, and does not commend itself to the Lieutenant-Governor.

18. Mr. Grimley has also suggested that Messrs. Swinden, Babanau, and Lloyd, be considered qualified for appointments in the Opium Department, as they have succeeded in passing in some of the subjects which are obligatory for opium candidates. There are, however, other considerations which regulate the special nominations required under the rules for opium appointments, and the Lieutenant-Governor is not prepared to adopt the proposals made in favor of these gentlemen. Their success in the subjects in which they have passed qualify them for the general service, but gives them no claim to be admitted to the Opium Department.

19. As explained in the letter to the Board of Revenue, No. 1157G, dated 28th October 1872, candidates for opium appointments are required to pass in—

1. English.	4. Law (opium laws and rules, &c.).
2. Vernacular.	5. Chemistry.
3. Surveying.	6. Botany.

They are not required to pass in engineering or drawing. Apparently there has been some confusion from a misunderstanding of the rules in the recent examinations. In future when special permissions are given to candidates for the Opium Department, they will be informed of the rules which regulate their examination.

20. Mr. J. W. H. Dalrymple Clark, who was appointed to act as Assistant Superintendent of Police, subject to passing the examination for police appointments, has passed very successfully in criminal law, but has failed in other subjects. He was only nominated in November last, and has had but little time for preparation. He has lately been employed on distant duty in connection with the famine relief operations in Julpigoree, and under these circumstances will retain his present acting appointment subject to the results of the next examination.

21. The total amount of fees received from candidates at the late examinations is Rs. 9,060. The sum of Rs. 3,704-5-3 has already been disbursed, debitable to the receipts on account of fees. The propositions submitted by Mr. Grimley for remunerating the examiners and other gentlemen who have assisted in the late examinations are sanctioned. In addition, it is necessary to provide some remuneration for Mr. Grimley for his share of the work performed by him as Superintendent of the Examination subsequent to the date of his assuming charge of the office of Secretary to the Board of Revenue on the 13th April, when the special allowance, which he had drawn at the rate of Rs. 1,000 a month from the 15th January last, ceased. Mr. Grimley's labors have not been light, and he has performed the duty very satisfactorily. The Lieutenant-Governor is pleased therefore to pass to him a further remuneration of Rs. 500 a month for two months from the 13th April last. The further expenditure thus sanctioned amounts in all to Rs. 4,503, and is shown in detail in the statement appended to this Resolution.

22. The thanks of Government are due to Mr. Grimley and to the gentlemen who were associated with him in conducting the examination; and the Lieutenant-Governor has much pleasure in acknowledging the services which have been again rendered in the matter by Messrs. Sutcliffe and Thwaytes and by other gentlemen in the Educational Department.

23. The Lieutenant-Governor regards the general outturn of these examinations with satisfaction, as showing that the system is duly appreciated by the educated classes, and that increasing numbers are endeavouring to qualify themselves by study and experience.

24. But it must be borne in mind that the result of the past examination, and of those which were held on two previous occasions, has been to render 376 gentlemen eligible for appointments. The appointment to sub-divisions for the first time of subordinate executive officers has enabled Government already to provide almost all those passed on previous occasions with suitable posts, and in this year the necessities of the famine have rendered available a considerable number of appointments for the men who have passed this year's examination. In the future, however, the requirements of the Government service will be on a much smaller scale. Including temporary and officiating appointments, the approximate number of officers of the higher grade in the services for the supply of which these examinations were specially organized is 375, as in the margin. Excluding temporary posts, there are only 100 appointments of the lower grade of such a character as passed candidates would be likely to accept in the sub-divisional establishments. To these must be added whatever appointments Magistrates and Educational Committees may put at their disposal. Taking all these into account, it is not likely that the number of vacancies in appointments of both grades will exceed 15 on an average yearly. And it is to be remembered that under the rules it has been distinctly laid down that a passed candidate is not entitled by his success to an appointment under Government, but is only eligible for such appointments as vacancies arise. It is not, therefore, absolutely obligatory that all the appointments which may fall vacant shall be conferred on the gentleman selected from among the passed candidates. The selection of Government is not entirely limited to the list of those who have succeeded at these examinations. The Lieutenant-Governor though quite desirous of maintaining the principle of the existing rules, yet deems it expedient to state these circumstances, lest expectations should arise to an extent which Government may be unable to fulfil.

Deputy Magistrates and Deputy Collectors ...	232
Sub-Deputy Collectors	114
Subordinate Executive Service in Non-Regulation Provinces	29
Total ...	375

25. From what is above stated, it appears that already there are many more passed candidates for appointments on the Government lists than Government can ordinarily hope to provide for in the next two years. In the rules which have already been published for the examination which is to be held in the early part of next year, some provision has been made with a view to reduce the number of those who can present themselves for examination, and further proposals have been made for effecting this in a greater degree eventually. The Lieutenant-Governor apprehends that it may become necessary to make some limitation of the rule under which candidates obtaining a certain number of marks on different subjects are qualified for appointments, or to adopt for the future the competitive system (with such modifications as may be found expedient), and to limit the number of successful candidates to the number of vacancies which may be previously notified to exist in the several grades. Before finally determining the course to be adopted, His Honor will await the result of the next examination under the rules which have already been published. In the meantime, the standard of proficiency to be exacted at the next examination must be raised; and while candidates who gained one-third marks in each paper and half marks on each subject were passed on previous occasions, on this one it will be an instruction to the examiners to require two-third marks in each paper and subject from the candidates for both the higher and the lower grades.

Statement showing the Remuneration sanctioned to the Examiners and the other Gentlemen who assisted in the late Examination.

Name.	Amount of remuneration.	Subject of examination.
	Rs.	
Mr. W. H. Grimley	1,000	Revenue, criminal, and opium laws, official orders, &c., &c.
„ J. M. Scott	909	Surveying and engineering.

DISTRIBUTION LIST OF CANDIDATES WHO HAVE PASSED SUCCESSFULLY AT THE NATIVE CIVIL SERVICE EXAMINATION HELD IN MARCH 1874.

BURDWAN DIVISION.

Class I.

1. Lolitmohun Dhur.
2. Saradaprasad Sirkar.
3. Kedar Nath Ghose, B.A.
4. Mohendra Nath Bhuttacharjee, M.A., L.L.
5. Mr. Owen.

Class II.

1. Shivaprosunno Sen.
2. Uma Churn Laha.
3. Suttyatarun Mookerjee.
4. Poorno Chunder Guho.
5. Kumal Narain Chuckerbutty.

Class III.

1. Sreenath Sen.
2. Prosunno Kumar Chuckerbutty.
3. J. T. Bobanau.
4. Denonath Ghose.
5. Govind Chunder Mookerjee.
6. Umesh Chunder Mookerjee.
7. Krishna Chunder Bose.
8. Sityakant Biswas.
9. Noni Lal Mookerjee.
10. Afzuluddin Ahmud.
11. Ramdyal Nag.
12. Bedhubhoosun Mookerjee.
13. Jogendro Chunder Chuckerbutty.
14. Romanath Mitter.

PRESIDENCY DIVISION.

Class I.

1. Monomatha Coomar Bose, B.A.
2. Gunganarain Roy, B.A.
3. Jogendranarain Gupta, (*a*.)
4. Dwarkanath Mookerjee, (*b*.)
5. Khoodiram Poddar.
6. Gopal Chunder Banerjee, B.A., B.L.

Class II.

1. Rojonikant Mookerjee.
2. Sachitanund Mookerjee.
3. Beni Madhub Chatterjee.
4. Bhoobun Mohun Gupta.
5. Jogendranath Mookerjee.
6. Jogendranath Gupta, (*c*.)

(*a*.) Son of Gour Hurry Gupta.
(*b*.) Son of Umaprashad Mookerjee.
(*c*.) Son of Isser Chunder Gupta.

Class III.

1. Prankissen Gangooly.
2. J. C. Lloyd.
3. Amrit Lal Banerjee.
4. Kali Coomar Roy Chowdhry.
5. Kumad Chunder Mookerjee.
6. Bishumber Das.
7. Sriram Gangooly.
8. Rojonikanto Bhuttacharjee.
9. Rakhal Chunder Ghose.
10. Kasi Chunder Roy.
11. Gopal Chunder Mookerjee, (*d.*)
12. Khadem Hossein.
13. Poolin Behary Mut.

RAJSHAHYE.

Class I.

1. Gogan Chunder Banerjee, B.A.
2. Gopal Chunder Mookerjee, (*e.*)
3. Nilamber Pal.
4. Abdool Wahab.
5. Abdool Khalek, B.A.
6. Bhoobun Mohun Banerjee, B.A., B.L.

Class II.

1. Iswar Chunder Mozoomdar.
2. Sookmoy Banerjee.
3. Peary Mohun Bose.
4. Sreenath Chatterjee.
5. Gossaine Dass Hazra.
6. Nundolal Mookerjee.
7. Shuja-ut Ali Ahmed.
8. Myeeuddin Ahmed.

Class III.

1. Sreenath Gupta.
2. Potiram Banerjee.
3. Golap Lal Das.
4. Kadernath Banerjee.
5. Abinash Chunder Sen.
6. Jodunath Dey.
7. Nebarun Chunder Mookerjee.
8. Mohima Churn Roy Chowdhry.
9. Abdul Huq.
10. Umanath Mozoomdar.
11. Aghorenath Chatterjee.
12. Kaliprosunno Dutt.
13. Kali Kumar Das.

COOCH BEHAR.

Class I.

Bhabotosh Banerjee.

Class II.

Nil.

Class III.

1. Gour Chunder Das.
2. Taranath Bose.
3. Hem Chunder Dutt.
4. Aghore Nath Roy.

DACCA.

Class I.

1. Petamber Banerjee.
2. Dwarkanath Bose.
3. Ramnarain Banerjee, B.A., B.L.
4. G. Dias.

Class II.

1. Annadaprasad Chatterjee.
2. Brojonath Bhuttacharjee.
3. Bunwari Lall Ghose.
4. Mohendra Nath Seal.

Class III.

1. Nobin Chunder Sen.
2. Anand Chunder Bose.
3. Chunder Mohun Mozoomdar, M.A., B.L.
4. Gyanada Sunker Bose.
5. Bholanath Das.
6. Kanye Lal Nag.
7. Abinash Chunder Neogee.
8. Prosunno Coomar Dutt.
9. Hemunt Coomar Roy.
10. Gostobehary Koondoo.
11. Beer Chunder Das.
12. Kaliprosunno Mookerjee.

CHITTAGONG.

Class I.

1. Hurry Mohun Sandyal
2. Kalisunker Sen.

Class II.

1. Poorno Chunder Sen.
2. Doorganand Das.
3. Gobind Chunder Das.
4. Jogendranath Seal.

Class III.

1. Juggurnath Das.
2. Hurrypuddo Ghose.
3. Nundolal Paramanick.
4. Rajcoomar Sen.
5. Keshub Lal Chatterjee.
6. Shoshi Mohun Talookdar.
7. Kuleemuddin Ahmud.
8. Udoy Chand Palit.
9. Bhugwan Chunder Bose.
10. Kalipuddo Chakravarti.

(*d.*) Son of Hurish Chunder Mookerjee.
(*e.*) Son of Goopee Mohun Mookerjee.

PATNA.

Class I.

1. E. R. T. Tiery, B.A.
2. Sivanundun Lall Roy, B.A.
3. Toolseepershad.
4. Beepinbehary Paramanick.
5. H. Bradbury.

Class II.

1. Grish Chunder Sirkar.
2. Syed Moojibur Ruhman.
3. Abdur Ruheem Khan, (*f.*)

Class III.

1. Syed Ali.
2. Gopeekrishna.
3. Ramnirunjun Pershad.
4. Mohammed Mostanser Billah.
5. Rai Bishen Dutt.
6. Bikramjeet Lal.
7. Nowrungee Lal.
8. Shewshunkur Sing.
9. Bansidhur Pershad.
10. Mohammed Abdul Huq.
11. Sheik Abdool Guni.
12. Syed Basharaut Hossein,
13. Sheikh Hushmut Hossein.
14. Syed Waris Ali.
15. Sheikh Abdool Rahoman, (*g.*)
16. Syed Hasan Rezakhan.
17. Mohammed Waliullah
18. Remat Lal.
19. Sheikh Abdul Rahman, (*h.*)
20. Syed Mahomed Nazir.
21. Syed Golam Mahiuddin.
22. Syed Jowad Hossein.
23. Rameshur Sahoy.
24. Sheik Magfoorul Huq.
25. Kishoonpershad.

BHAGULPORE.

Class I.

1. Sha Mohammed Azim.
2. Omullo Charan Mullick.
3. Daviprashad.

Class II.

1. Imdad Ali.
2. Nujeemuddin Ahmed.
3. Mr. C. H. Swinden.

Class III.

1. Moti Lal.
2. Sajebun Lall.
3. Golam Lillahi.
4. Hurridas Roy.
5. Khoob Lal.
6. Emamoddin Khan.
7. Parmeshwar Dyal.
8. Malik Lateef Hossein.
9. Syed Muxood Hossein.
10. Syed Ahmed Hossein.
11. Sheikh Ahmedoollah.
12. Syed Koowal Ali.
13. Sheikh Nizamut Ahmed.
14. Rahamut Ali Khan.
15. Abdul Aziz.

ORISSA.

Class I.

1. Bhooya Abdur Ruhman.
2. Nund Kissore Das.

Class II.

1. Umacharan Chakravarti.
2. Kumudnath Mookerjee.

Class III.

1. Mohim Chandra Dass.
2. Opendro Chandra Mozoomdar.
3. Golokenath Mookerjee.
4. Doorga Dass Mookerjee.
5. Narain Chandra Naik.
6. Sreenath Banerjee.
7. Mohendranath Mullick.

CHOTA NAGPORE.

Class I.

1. Mr. P. T. Rebello, B.A., L.L.
2. Shamacharan Moitra, B.A.

Class II.

1. Fatic Chandra Das.
2. Hurrynarain Banerjee.
3. Bhoobendranath Roy.

Class III.

1. Prosunno Coomar Moitra.
2. Mohammed Kabeer.
3. Mohammed Medni.
4. Mohammed Furuk.
5. Mohammed Haneef.
6. Buriar Sing.
7. Burmeshurpershad.
8. Syed Fazeelut Hossein.
9. Shumsool Huq.
10. Sheikh Ali Hossein.
11. Goneshpershad.

(*f.*) Son of Fuzlee Ruhman Khan.
(*g.*) Son of Manwar Ali.
(*h.*) Son of Keramut Ali.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 20th August 1874.—In continuation of the notice dated 2nd April 1874, it is hereby notified that the provision opium to be brought forward at the monthly sales of the ensuing year 1875 will consist of 45,000 chests, in the following proportions respectively of Behar and Benares opium :—

	Chests.	Chests.
Behar.		
Reserve of 1872-73	534	
Manufacture of 1873-74	25,266	
		25,800
Benares.		
Reserve of 1872-73	260	
Manufacture of 1873-74	18,940	
		19,200
Total		45,000

2. The above includes the 300 chests to be reserved for the French Government.

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

[First Publication.]

THE Lieutenant-Governor is pleased to order the publication of the following notification for general information :—

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 24th July 1874.—Under instructions from the Government of Bengal, it is hereby notified that from and after the 1st November next all vessels tendering for the conveyance of emigrants from this port will as a rule require to be docked for the purpose of survey. In cases where the Government Surveyor is satisfied that docking is not necessary, he may dispense with it, acting either on his own responsibility or in concurrence with the Master Attendant.

A. BAKER,
Offg. Master-Attendant.

[Second Publication.]

NOTIFICATION.

The 17th August 1874.—Under the provisions of Section 83, Act V (B.C.) of 1870 (An Act to appoint Commissioners for making Improvements in the Port of Calcutta), the following additional Bye-law for the landing and delivery of goods at the jetties, as proposed by the Commissioners, is published for general information :—

BYE-LAW No. 14A.

When iron, drainage-pipes, or other goods, from their want of description or want of proper distinguishing marks, or from any other cause, are landed in a mixed condition, the Master or Agent of the vessel will be allowed two clear days to sort and make over the goods to the Commissioners ; and until the goods have been made over and the usual receipt granted, they will remain on the wharf at the risk of the vessel. Such goods, if not made over to the Commissioners within the two clear days, will at the expiration of that time be subject to wharf-rent at the schedule rates, the rent incurred being payable by the vessel. After receipt of such goods by the Commissioners, consignees will be allowed two clear days to take delivery before incurring wharf-rent charges. This exemption shall not be extended to goods the consignees of which refuse or neglect to forward their invoices within 24 hours after the vessel commences to discharge.

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 25th August 1874.—In supersession of the Notification dated 31st December 1868, published in page 5 of the *Calcutta Gazette* of the 6th January 1869, it is hereby notified that the boundaries of the Town of Kushtea in Nuddea shall be as follows :—

On the north, the old Pudma river and the village Jugra; on the east, part of the Khal Kaligunga and part of the river Goraie; on the south, Rahini, *alias* Lahini, Hari Sankurpore, Molla Teghari, Kumar Garer, and Bartoil; and on the west, the villages Jugra, Kabarbari, Meenparah, and Dhoka, Phulbari, and Chenchera.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 13th August 1874.—The Lieutenant-Governor has been pleased to approve of the following revised boundaries of the Berhampore Municipality. So much of the notification, of the 20th February 1869 as relates to the limits of this Municipality is hereby cancelled.

The Municipality is divided into two blocks—Block A or the Berhampore Block, and Block B or the Gorabazar Block. Block A of the Municipality is bounded on the west by the left bank of the Bhagiruttee river, from a point opposite Kotwallee thana on the road, about 154 yards to the north of the north-western corner of the hospital boundary wall up to a point due west of Mekraj Baboo's house at Koonjoghatta.

The other boundaries then run east along the Koonjoghatta Rajbarree Lane, up the Radhabullhubpara Lane, down the Girjatollah Lane, till it meets the Dayanuggur pucka road; it then runs south along the Dayanuggur road for about 110 yards to a small culvert, thence direct to the tank on the north side of the Chattra Bheel, thence along the north and east bank of that Bheel, down to Joy Chand Khagra Lane, thence westward along the Joy Chand Khagra Lane to Baboo Radhica Churn Sen's garden, thence direct to Sooreeparra, and on to the pucca bridge over the Kalkapore Bheel. The southern bank of the Kalkapore Bheel then forms the boundary, winding round up to the junction of the Jhoukholla pucca road and the Kalkapore pucca road. It then runs north along the Kalkapore pucca road up to a point near the Dutch burial-ground, where five roads meet, then north along the Sahebghatta Lane to the bank of the Adigunga, thence east along the south bank of the Adigunga to a large tank at Dhungurparra, thence direct to a point where three roads meet at the old cemetery, thence along Cossimbazar outpost road, along the southern bank of the Katigunga to a cross road leading to the Nijsripore road, thence westward along the Nijsripore road to Moharanee Surno Moyee's dwelling-house, thence south along the Baboolbona pucca road, thence west along the Punchanund Tollah pucca road to Grant Hall corner, thence north along Khalassibazar road, and west along Berhampore bazar road to Kotwallee thana.

Block B is bounded on the west by the Bhagiruttee river, from a point opposite Koylaghatta at the north-west corner of the College as far as Ojoodhyanuggur Lane, thence east along the Ojoodhyanuggur Lane, north up the Poora Pookur Lane, west along the Wakeelpara Lane to the south of the Judge's Cutchery, thence north along the Koolee Bazar road to the soldiers' cemetery, and thence east along the Koylaghatta road, south of the Military Cantonment, to the north-west corner of the College.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 4th August 1874.—In supersession of the notification dated 17th March 1869, published in the *Calcutta Gazette* of the 24th March 1869, page 635, extending the provisions of Act VI (B.C.) of 1868 to certain villages in the Baraset sub-district, it is

hereby notified that from the 1st October 1874 the boundaries of the Baraset Town for the purposes of the Act shall be as declared below, viz.—

North.—The northern boundaries of the villages of Palpakharah and Shiti.

East.—The road from the Takee road to Shiti, the eastern boundary of the village of Koobeerpore and the dry bed of the Soontee Nuddee.

South.—The southern boundary of the village Moheshurpore.

West.—The western boundary of the villages of Digbariah and Kootoorshahi; the south-west boundary of Rhedoypore, the south-west, west, and north-west boundary of the village of Hurrihurpore, the north-west boundary of the village of Persadpore, and the western boundaries of the villages of Bunnomallipore and Palpokhuriah.

The following villages are comprised within the boundaries above specified, viz.—

Shiti.	Gholla Kuslea.	Raghonathpur.	Badee.
Palpokhuria.	Sreekisenpore.	Bakshatty.	Dakhinhaut.
Ramkrishenpore.	Moollaparah.	Chundunbati.	Digbariah.
Bunnomallipore.	Mushidbati.	Nuggur Anwarpore.	Koobeerpore.
Ooterhaut.	Rhedoypore.	Nalkoorah.	Ichanagari.
Dhakinapara.	Hurrihurpore.	Nuddeebhaug.	Kulleeanpore.
Saugmoorah.	Kootoorshahi.	Kattur.	Gootteetha.
Pershadpore.	Raipore.	Thakoortal.	Khoord Kudumgachee.
Baraset.	Kabasdanga.	Amrahdangah.	Bishenpore.
Harreeberrh.	Mankoosbaugh.	Moheshurpore.	

It is also notified that from 1st October 1874 the operations under Act VI (B.C.) of 1868 will cease to have effect in the villages of Bajitpore, Sridurpore, Matgram, Rungopore, Char, and Shybana, which were formerly included in the Baraset Town.

NOTICE.

THE University Examinations in Arts of 1874-75 will be held on the undermentioned dates:—

Entrance Examination and First Examination in Arts on Monday, the 30th November, and following days.

B. A. Examination on Monday, the 28th December, and following days.

Applications from candidates for admission to the Entrance and First Arts Examination must be lodged with the Registrar before 31st October.

Application from candidates for admission to the B. A. Examination must be lodged wit the Registrar before the 28th November.

By order of the Vice-Chancellor,

SENATE-HOUSE, *July 10th*, 1874. J. SUTCLIFFE, *Registrar.*

BABOO SIVA DASS BHUTTACHARJYE, Deputy Inspector of Schools, in the district of Bankoora, has been allowed leave of absence for ten days, on private affairs, on half pay, and Baboo Ram Tarak Mookerjee, Sub-Inspector of Schools in that district, has been appointed act for him for the above period or until further orders.

The arrangement took effect from the 8th instant.

BURDWAN, the 19th August 1874. C. T. BUCKLAND, *Commissioner.*

IN accordance with the resolution of Government published in the *Calcutta Gazette* of 7th January 1874, para 26, a special class will be established at the Presidency College for a five months' course from 15th September to the 15th of January next, provided 25 candidates enrol themselves for admission before that date. An entrance fee of Rs. 5, with a monthly fee of Rs. 3, is required to be paid by each candidate on admission. No admission to this special class can be made after the 15th September.

The 22nd August 1874. CHARLES H. TAWNEY, *Offg. Principal, Presidency College.*

CANDIDATES for admission to the special class of the Native Subordinate Civil Service, to be opened on the 15th of September next, are requested to apply to the undersigned before the 10th September, and to furnish certificates showing the number of years they have been in Government employ.

PATNA COLLEGE, the 22nd August 1874. J. W. MCCRINDLE, *Principal.*

THE 6th and 7th of October are the dates fixed for the examination of Candidates for Junior Scholarships, who are prepared to qualify in Physical Geography, Surveying, and Drawing.

The following instructions are issued for the guidance of Masters and Candidates:—

1. Candidates from schools in the districts of Hooghly, Howrah, and Burdwan, will present themselves for examination at the Hooghly Normal School. Candidates from schools in the districts of Midnapore, Beerbhoom, and Bankoora, will present themselves at the Midnapore High School and the respective zillah schools.

2. A fee of one rupee will be paid by each candidate to the Head Master of the School to which he belongs. The Head Master will send a nominal list of candidates who have paid fees to the Inspector of Schools, Western Circle, Chinsurah, before the 10th of September, and will credit the fees collected to the school funds.

3. Each Candidate presenting himself for examination must be provided with a certificate of having paid the prescribed fee, and of having studied twelve months at the school from which he presents himself.

4. Head Masters on or before the 1st of October will despatch to the address of Mr. W. H. Wells, C.E., Chinsurah, in registered covers, specimens of each Candidate's survey work and drawing. Each set of specimens should consist of two sheets of drawing, and three specimens of survey work executed with (1) the chain only, (2) with the compass and plane table, and (3) with field-book and compass. The signatures of the Head Master and Survey Master must be attached to each specimen, and it will be understood that the specimens so signed are the genuine work of the Candidate.

5. For the survey paper each Candidate will be allowed to bring into the examination room a scale, a ruler, a protracter, and a pair of compasses.

6. The examination will commence at 11 A.M. each day, and three hours will be allowed for each paper.

No. 2179.—Char Shamnaggur, pergunnah Rajpore; recorded proprietor, J. B. Mackintosh; sudder jumma, Rs. 523-9-8, and road fund Rs. 5-3-10; will be sold for Rs. 12-6-4 on account of Government revenue.

No. 2254.—Char Suksaggur, pergunnah Ukra; registered proprietors, Rajkista Bandopadya and others; sudder jumma, Rs. 506-3 and road fund Rs. 5-1-0; will be sold for recovery of Rs. 19-8-2 on account of Government revenue.

Class I.—Permanently-settled Estate.

No. 3192.—Pergunnah Bhur Futejungpore, pergunnah Bhur Futejungpore; recorded proprietors, Setul Chandra Ghose and others; sudder jumma, Rs. 2,433-1-0. The entire estate will be sold for recovery of Rs. 98-13-9 on account of arrears of Government revenue.

No. 3213.—Jearoki, pergunnah Jearoki; recorded proprietors, Sreekanth Rai and others; sudder jumma, Rs. 559-13-4. The share of Sreekanth Nath Rai, bearing a sudder jumma of Rs. 261-3-10, will be sold for recovery of Rs. 5-12-9, on account of arrears of Government revenue. The share of other proprietors, Luckhimoney Dabia and others, bearing a sudder jumma of Rs. 298-9-6, on account of which separate accounts have been opened, will be exempted from sale.

No. 3213.—Jearoki, pergunnah Jearoki; recorded proprietors, Sreekanth Rai and others; sudder jumma, Rs. 559-13-4. The share of Mothoranath Bandopadia in the estate, bearing a sudder jumma of Rs. 53-10-8, on account of which separate account has been opened in No. 3213-1, will be sold for Rs. 9-6-8 on account of arrears of Government revenue.

NUDDEA COLLECTOR'S OFFICE, the 18th August 1874.

C. C. STEVENS, *Collector.*

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Durrung, will be sold by public auction at the said Deputy Commissioner's office at Tezpore at 11 o'clock A. M., on the 3rd October 1874, unless in the meantime the sale is stopped, or postponed in consequence of claims or objections, under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale, see detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Durrung.

SCHEDULE.

A lot of waste land consisting of 843·97 acres, situated in Mouzah Sakomatha in the district of Durrung, and bounded as follows:—

East.—By a line running from pillar B to C along the Majulighor, measuring 3,375 yards long.

South.—By a line from pillar B to pillar A and by Gorsunga Bheel, measuring 1,155 yards.

West.—By a line from pillar A to pillar D along the Khoraghor and the Dehingijhan, measuring 2,215 yards approximately.

North.—By Bengna Khawa Joory (stream), measuring approximately 2,665 yards.

The pillars are marked A B C D on the map filed in the office of the Deputy Commissioner of Durrung, Assam.

J. M. GRAHAM, *Deputy Commissioner.*

ZILLAH DURRUNG REVENUE DEPUTY COMMISSIONER'S OFFICE, the 16th *May* 1874.

*** The Rig-Veda, the oldest book of Indian literature, has very properly been made one of the principal class-books for those who study Sanskrit in the schools and colleges in India, and though at present a scholar-like knowlege of the Vedic hymns is in the examinations required of the more advanced students only, yet, as soon as editions, translations, grammars, and dictionaries shall have rendered the study of these ancient documents more accessible, I doubt not that the time will come when no one in India will call himself a Sanskrit sholar, who cannot construe the hymns of the ancient Rishis of his country.—*Extract rom Preface.*

(313—3)

Postal Notice.

As it is believed that some public uneasiness is felt in consequence of the discovery in the River Hooghly, on the 6th instant, of a packet of overland letters, the accompanying specification of them is published for general information.

There were thirteen letters in all. The address of the thirteenth was not kept. It was posted at Chittagong. None of the letters had been opened, though the postage labels on all had been removed.

They were transmitted at once to Bombay to be forwarded to their addresses in England with a covering letter directing that no postage was to be levied on them. The stamper who stole the labels has been traced and dismissed.

The next Overland Mail, *viâ* Bombay, will close at the General Post Office on Tuesday, the 1st September 1874.

2. Book-post and pattern packets must be posted on the 31st instant.

Letters, &c., for Mauritius, St. Denis, Réunion, Natal, and Cape of Good Hope, can be sent by this opportunity.

N.B.—The Letter-Box will close at 7 P.M. precisely, after which hour Overland letters, fully prepaid, and bearing extra postage stamp of two (2) annas on each cover, will be received up to 7-30 P.M., or, bearing an extra postage stamp of four (4) annas on each cover, up to 8 P.M., and after 8 up to 9 P.M., by a Post Office Clerk at the East Indian Railway Station, Armenian Ghât.

CALCUTTA, the 25th August 1874. M. PERCY, *Post-Master.*

In Chancery.

In the matter of the Companies Act, 1862,
and
In the matter of the Nowgong Tea Company of Assam, Limited.

WHEREAS a dividend has been declared in the above-named matter by the Official Liquidator of the said Company, and sanctioned and approved of by the Judge, to whose court the winding-up of the said matter is attached by an order dated the 29th day of May 1874, of twelve shillings in the pound, payable to all the creditors of the said Company, who have proved their claims against or been admitted creditors of the said Company. Now this is to give notice that all the creditors of the said Company, who have proved their claims against, or who have been admitted creditors of the said company, are requested to apply to Samuel Lowell Price, the Official Liquidator of the said Company, at his offices, No. 13, Gresham Street, London, England, on or before the first day of February 1875, for payment of such dividend, otherwise they will be excluded from participating in such dividend.

Dated this 14th day of July 1874.

LEWIS MUNNS & LONGDEN, 8, *Old Jewry, London, Solicitors to the Official Liquidator.*

INSOLVENT NOTICES.

Court for the Relief of Insolvent Debtors at Calcutta.

IN the matter of RAJNARAIN PAUL and KISSORY MOHUN PAUL, Insolvents.

On Monday, the 10th day of August instant, it was ordered that the matters of the petition of the said Insolvents be heard on Tuesday, the 1st day of September next, and that the said Insolvents do then attend to be examined before the said Court.

Kally Nath Mitter, *Attorney.*

Chief Clerk's Office, the 18th day of August 1874.

IN the matter of WILLIAM HOLLWAY, an Insolvent.

On Tuesday, the 4th day August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 971-8 to and amongst all the creditors upon the estate of the said Insolvent as a dividend at the rate of Rs. 1-10 per cent. upon such of the debts admitted in the schedule of the said Insolvent and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admitted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, *Official Assignee.*

IN the matter of ALEXANDER DONALD MACLEOD, an Insolvent.

On Tuesday, the 4th day of August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 858-3-9 to and amongst all the creditors upon the estate of the said Insolvent as a dividend at the rate of Rs. 5-4-0 per cent. upon such of the debts admitted in the schedule of the said Insolvent and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admitted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, *Official Assignee.*

In the matter of WILLIAM WOODIN, an Insolvent.

ON Tuesday, the 4th day of August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 2,571-13-11 to and amongst all the creditors upon the estate of the said Insolvent as a dividend at the rate of 12 annas per cent. upon such of the debts admitted in the schedule of the said Insolvent and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admitted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, *Official Assignee.*

IN the matter of KONNOOLOLL BANEYRAM AND CHOTTEELOLL, Insolvents.

On Tuesday, the 4th day of August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 875-1-5 to and amongst all the creditors upon the estate of the said Insolvents as a dividend at the rate of annas 7 per cent. upon such of the debts admitted in the schedule of the said Insolvents and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admitted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, *Official Assignee.*

IN the matter of RUSTOMJEE COWASJEE and MANICKJEE RUSTOMJEE, Insolvents.

On Tuesday, the 4th day of August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 3,327-13-8 to and amongst all the creditors upon the estate of the said Insolvents as a dividend at the rate of 5 annas per cent. upon such of the debts admitted in the schedule of the said Insolvents and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admitted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, *Official Assignee.*

IN the matter of NILMONEY MOOKERJEE, an Insolvent.

On Tuesday, the 4th day of August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 973-12-10 to and amongst all the creditors upon the estate of the said Insolvent as a dividend at the rate of Rs. 7 per cent. upon such of the debts admitted in the schedule of the said Insolvent and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admitted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, *Official Assignee.*

IN the matter of. WILLIAM PATRICK, an Insolvent.

On Tuesday, the 4th day of August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 1,217-4-10 to and amongst all the creditors upon the estate of the said Insolvent as a dividend at the rate of Rs. 8 per cent. upon such of the debts admitted in the schedule of the said Insolvent and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admitted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, *Official Assignee.*

IN the matter of MOORAULEY DHUR NEWGEE, an Insolvent.

On Tuesday, the 4th day of August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 993-13-10 to and amongst all the creditors upon the estate of the said Insolvent as a dividend at the rate of Rs. 4-12 per cent. upon such of the debts admitted in the schedule of the said Insolvent and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admitted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, *Official Assignee.*

IN the matter of RAJNARAIN PAUL, an Insolvent.

On Saturday, the 8th of August instant, it was ordered that the matters of petition of the said Insolvent be heard on Tuesday, the first day of September next, and that the said Insolvent do then attend to be examined before the said Court.

Kallynath Mitter, *Attorney.*

IN the matter of KOONJOLOLL, of No. 26, Banstollah Gully, Burra Bazar, in the Town of Calcutta, carrying on business as merchant at No. 83, Clive Street, in the said Town of Calcutta, an Insolvent.

Notice that the petition of the said Insolvent seeking the benefit of the Act XI Vic., Chap. XXI, was filed in the Office of the Chief Clerk on Monday, the 17th day of August instant, and by an order of the same date the estate and effects of the said Insolvent were vested in the Official Assignee.

M. T. Pearson, *Attorney.*

In the matter of WILLIAM TULLOH FRASER, an Insolvent.

On Tuesday, the 4th day of August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 976 to and amongst all the creditors upon the estate of the said Insolvent as a dividend at the rate of Rs. 8 per cent. upon such of the debts admitted in the schedule of the said Insolvent and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admittted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

A. B. Miller, *Official Assignee.*

IN the matter of RUSTOMJEE, COWASJEE, an Insolvent.

On Tuesday, the 4th day of August instant, it was ordered that the Assignee do pay and divide the sum of Rs. 1,494-4-4 to and amongst all the creditors upon the estate of the said Insolvent as a dividend at the rate of 4 annas per cent. upon such of the debts admitted in the schedule of the said Insolvent and claims proved as have been duly substantiated in proportion to their several debts and upon the other debts admitted in the schedule when and so soon as such debts or any of them shall be duly substantiated upon affidavit filed in this Court from time to time for directions respecting any debts or any other matter or thing relating thereto.

BENGAL FAMINE.

TWENTY-FOURTH SPECIAL NARRATIVE OF THE DROUGHT IN BENGAL FROM THE 7TH AUGUST TO THE 20TH AUGUST 1874.

Weather and Rainfall.—The general cry throughout the country is for more rain, except in Cuttack, the greater part of the Chota Nagpore division, and South Behar. But the parts of the country where actual damage to the crops has been caused by the drought are limited in area; the worst tracts being that at the junction of the Moorshedabad, Beerbhoom, and Burdwan districts, and parts of South Tirhoot. The districts where rain is most urgently required are Tirhoot, Rajshahye, and Moorshedabad, and those of the Burdwan and Presidency divisions.

Prospects of Crops.—The prospects of the autumn crops are on the whole good. It is generally admitted that there will be more than an average autumn crop in the great majority of districts, and in hardly any part of the country, except the few tracts where it has been submerged by floods, will it be much below the average. The tracts injured by floods have been for the most part low-lying lands, where crops are sown on the chance of a harvest, but where the cultivator's hopes are more often disappointed than not.

Prices.—Prices as a rule continue stationary, except in North-East and East Bengal and the Bhagulpore division, where they are generally lower than they were last fortnight. The fall of prices has been especially conspicuous in the Rungpore and Pubna districts, where it has fallen from 13 seers to 20-13 in the former district, and from 12-12 to 16-12 in the latter. The districts where prices have risen are Beerbhoom, Bankoora, Nuddea, Moorshedabad, Sylhet, Noakholly, Tipperah, Tirhoot, Sarun, Pooree, and Hazareebagh; but the rise in almost all these districts has been insignificant. The highest rise in the distressed districts has been in Burdwan, where the prices have risen from 12-12 to 11-4 seers for the rupee.

Private Trade.—The usual note on the movements of food-grains will be found in Appendix A. The returns show a total increase in the up and down

traffic on the railway of 4,514 tons. The down trade appears to be still brisk but the up traffic is falling off very considerably. The river traffic appears to be nearly stationary.

Tirhoot.—The deficiency of rain, especially towards the south of the district has caused considerable anxiety during the fortnight. Towards the north of the district prospects are generally reported to be good; but in the south and even as far north as the southern part of Mudhobunnee the outturn of the bhadoi crop will be less than was expected, while the late rice crop will seriously suffer if heavy rain does not fall shortly.

Chumparun.—The prospects in this district are similar, but somewhat better than those in Tirhoot. There does not appear to be the same anxiety felt about the southern sub-divisions as in Tirhoot.

Sarun.—The prospects of the bhadoi are generally exceedingly fine. Rain has been very unequally distributed throughout the district; some parts having an ample rainfall, while others have not had enough for their requirements. Some of the crops in the south-east of the district have been destroyed by floods.

South Behar.—The prospects of crops in these districts continue to be magnificent, and there is very little distress.

Bhagulpore Division.—The reports from all the districts of this division continue to be exceedingly satisfactory. In parts of Monghyr and the Sonthal Pergunnahs fears are expressed that the bhadoi crop will not be so good as was expected; but even with regard to these tracts there seems to be a difference of opinion: and on the whole it cannot be said to be probable that the deficiency will be great in the small area alluded to, while the crop generally will be far above the average.

Rajshahye Division.—With the exception of Rajshahye and Moorshedabad, the prospects of the crops are most excellent, and distress decreasing; but in parts of the two districts named there has been a deficiency of rain, though in the worst portion of the latter district rain had fallen on the date the Collector wrote his narrative.

Burdwan Division.—In Hooghly there has been a want of rain generally, but not sufficient to cause serious anxiety; and on the whole the prospects of the division, though not nearly so good as those in most other parts of the country, may be said to have improved during the fortnight, with the exception of a small tract to the east of Beerbhoom, bordering on Moorshedabad, where there is great want of rain.

Chota Nagpore.—The only district from whence reports have been received is Manbhoom, and there prospects have decidedly improved. In the other districts distress has almost ceased to exist.

Relief Works.—The following statement shows the numbers on relief works during the fortnight as compared with that preceding it:—

	Last fortnight.	This fortnight.
Patna division	265,552	237,005
Gunduk embankment	2,869	10,868
Soane Canal	28,455	26,874
Bhagulpore division	48,349	54,252
Rajshahye division	66,364	57,296
Northern Bengal Railway	5,795	5,537
Chota Nagpore and Burdwan divisions ...	33,732	32,536
Cooch Behar division	2,370	2,370
Total ...	453,486	426,738

Though the total numbers show a decrease, yet in some districts, owing to the cessation of the demand for field labour, the numbers on the works have increased; and possibly in some districts, where the bhadoi crop is not very good, there will be still further increase during next fortnight. The increase in the Bhagulpore division is more nominal than real, as no returns were received during the last fortnight from Bhagulpore. If the numbers employed in that district had been stated correctly in the last narrative, the total for the division would have been 54,572, or somewhat more than that shown during the present fortnight.

The following tabular statement shows the numbers employed in each district, with details, as far as they are available, of those employed on task and piece-work respectively:—

Divisions.	Names of Districts.	Laborers under Public Works Department.	Laborers under circle officers.	Total laborers.	Task or piece-work	Daily wages.

	Grand Total ...	196,571	230,167	426,738	.....	.....

(a.) Last fortnight's figures.
(b.) Details imperfect.

Gunduk Embankment and Canal.—The number of labourers has increased during the fortnight, and the work is progressing favourably. 2,004,720 cubic feet of excavation and embankment have been completed during the fortnight, and 1,232,798 superficial feet of dressing and turfing.

Soane Canal.—The number of labourers was somewhat decreased; about 37 lakhs of cubic feet of earth-work have been completed in the Kurumnassa division during the fortnight.

Northern Bengal.—There is little demand for labour in the country through which this line runs, especially in its northern and southern portions. The total amount of earth-work completed up to date is 71,720,000 cubic feet, equal to 147½ miles of 4-feet bank, with a top width of 15 feet. During the fortnight more than 21 lakhs of cubic feet of earth-work have been thrown up.

Charitable Relief.—The following table shows the number of persons in the receipt of charitable relief in each district, as compared with those of the previous fortnight:—

Divisions.	Names of Districts.	Number of centres.	This fortnight.	Last fortnight.
Patna	Tirhoot, North	681	208,072	204,938
	Tirhoot, South		27,220	31,687
	Chumparun (a)	47	11,732	32,428
	Sarun	18	44,337	44,337

	Rajshahye	44	25,655	26,408
	Pubna	.....	4,919	5,222
	Total ...	630	140,880	205,574
Chota Nagpore...	Manbhoom	.....	21,948	16,214
Burdwan	Hooghly	.....	17,768	8,194
	Beerbhoom	.....	31,195	23,075
	Bankoora	.....	32,802	38,716
	Burdwan (c)	6	67,895	61,332
	Total ...	6	149,660	131,317
	Grand Total ...	1,481	647,550	749,256

(a) Last fortnight's figures. Returns incomplete: number receiving relief from villages not stated.

(b) Revised figures received by telegram.

(c) Including Maharaja's centres.

From the above statements it will be seen that for the first time since the beginning of the distress the very satisfactory fact has to be recorded of a decrease both in the numbers on relief works, and in those of the recipients on charitable relief. The total numbers in the receipt of charitable relief have decreased from 749,256 to 647,550. The decrease has taken place in almost every district, and is especially notable in the districts of the Rajshahye division. It is only in Burdwan that there is a general increase; in that division Bankoora alone shows a decrease, while the increase in the other districts is large.

By order of the Lieutenant-Governor of Bengal,

J. F. K. HEWITT,

Offg. Junior Secy. to the Govt. of Bengal.

APPENDIX A TO THE 24TH SPECIAL NARRATIVE.

Movement of Food-grains.

1. THE total exports of food-grains from the Bengal Presidency during July were ,802 tons; the details are given in Schedule A.

The imports to Calcutta during the same month were 7,619 tons; of which 1,748 were n Government, and 5,871 on private account. The bulk of the latter were from ports on the rissa and Madras coasts.

The total figures from the beginning of November 1873 to the end of July 1874 are—

	Tons.
Exports from the Bengal Presidency	249,874
Imports to the Port of Calcutta	443,892

2. The following figures show (in tons) the quantity of food-grains "sent up from tations *below* Rajmehal and Jamooee, and down from stations *above* Mirzapore, which was elivered at stations between Rajmehal and Buxar (inclusive)" between the 26th July and ne 8th August, compared with the figures for the previous fortnight—

	This fortnight.	Last fortnight.	Increase.	Decrease.
Up	4,301	11,516	Nil.	7,215
Down	15,178	7,914	7,264	Nil.
Total ...	19,479	19,430	7,264	7,215

he increase is all in private grain. The decrease is 4,465 tons in Government, and 2,750 ns in private, grain. The totals to date (from the beginning of November) of the returns which the above figures are based, and which are for Behar only, are given below. The ρ" figures are only approximately correct. Appendix B, however, shows in detail the estination of all the Government grain sent up from Howrah since the commencement of perations:—

	Government grain.	Private grain.	Total.
Up	286,098	156,526	442,624
Down	39,330	214,604	253,934
Total ...	325,428	371,130	696,558

3. The importations of food-grains by the eastern canals from the 1st to 14th August ere 1,688 tons (against 3,438 tons during the previous fortnight), making in all 203,626 tons nce 1st October 1873.

4. The private traffic registered on the Ganges is as shown below:—

Stations.	Date.	Direction.	Tons.	To date from 1st November 1873. Tons.
Sahebgunge	2nd to 15th August ...	Up the Ganges ...	1,024	42,690
Ditto	Ditto ...	Down the do. ...	2,817	24,091
Goalundo	26th July to 1st August ...	Up the do. ...	13	28,235
Kooshtea	Ditto ...	Down the do. ...	85	13,026

he grain sent upward was chiefly rice; the greater part of that sent down was wheat and ram for the Calcutta market. The continued decrease in the river traffic appears to be due the fall and general equalisation of prices in the distressed districts accessible by water mmunication.

G. TOYNBEE, C.S.,
On Special Duty.

The 20th August 1874.

SCHEDULE A TO THE 24TH SPECIAL NARRATIVE.

Statement showing the quantity of rice (distinguishing table and other kinds), paddy, wheat, gram, and other food-grains, exported from the Presidency of Bengal for the month of July in the present year, and last year, respectively.

G. Toynbee, c.s.,
On Special Duty.

No. A., dated Bankipore, the 9th August 1874.

From—A. C. Mangles, Esq., Collector of Patna,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I have the honor to submit the following narrative for the fortnight ending Saturday, the 8th instant.

A.—State of the Country.

2. The supply of food-grain continues to be abundant in the several bazars of the district, and no deficiency is reported from anywhere.

3. As I had stated in paragraph 8 of my last narrative might be expected, the importation of grain during the fortnight was considerably in excess of that of the previous fortnight, the quantity being 3,66,990 maunds against 1,63,848 maunds. This increase was, we may say, entirely owing to the publication of the Government order for the restoration of the old rate of freight of grain from the 1st proximo.

4. Owing to this final mob of importations, there was some inconvenience felt for a few days at the Patna City Station, the new siding being still incomplete; but I am glad to be able to report that the crush has passed away, and everything is now working smoothly again.

5. The following were the prices of food-grain prevailing towards the close of the fortnight:—

	Rice, best.	Rice, common.	Wheat.	Barley.	Jenira.	Gram.
	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.
Patna	12 0	17 0	16 12	20 0	17 0	20 0
Barh	10 0	10 8	13 4	17 0	15 8	18 8
Behar	10 8	11 0	13 0	19 0	15 8	16 8
Dinapore	10 4	12 8	16 8	.....	17 0	18 12

6. We had 3·38 inches of rain at the Sudder Station during the fortnight, ·92 at Barh, 1·9 at Behar, and 3·40 at Dinapore. The weather has been extremely favorable for the bhadoi crops throughout the district. The sub-divisional officer of Behar writes as follows:—"I visited some portions of the Behar and Sillao thanas during the last fortnight and found the bhadoi crops in a very flourishing condition. I can confidentially assure you from

what I saw myself, and what I heard from respectable zemindars and well-to-do ryots, that there is no possibility of any injury being done to the bhadoi crops. This year the land on which bhadoi was sown exceeded by one-fourth the usual quantity that used to be devoted to this purpose in previous years. The whole of this land, whether high or low, was well watered by the early rain we had in June, the result has been a "bumper crop," which will go to a great extent in relieving the wants of the people."

With the exception of Dinapore, however, where the sub-divisional officer reports that they have an abundance of water, rain is generally wanted throughout the district to allow of transplanting the young rice plants; but for this I am glad to say we have still some four or five weeks left, and from the appearance of the weather we may expect a good fall of rain any day, and, in fact, local showers are of almost daily occurrence.

7. The condition of the people is reported upon favorably from all parts of the district, and no case of misery or starvation was brought to light during the fortnight.

8. 138 emigrants were registered for Demerara and 27 for British Burmah during the fortnight; whereof 85 belonged to Patna, 24 to Gya, 22 to Shahabad, 2 to Tirhoot, 2 to Sarun, 1 to Chumparun, and the rest to other districts.

9. There was no case of grain robbery reported during the fortnight; four cases of theft of a very petty nature were reported.

The monthly statement of crimes prescribed by the Government order of the 20th December last is herewith annexed.

B.—Relief Works.

10. None in this district.

C.—Transport of Grain.

11. The subjoined statement will show the importation of food-grain into this district during the fortnight ending the 1st instant:—

	Rice.	Wheat, oats, and barley.	Jenira.	Other grain.
By rail	40,101	1,67,160	44,218	1,08,259
„ river	3,670	40	1,530	2,012
Total ...	43,771	1,67,200	45,748	1,10,271

or a grand total of 3,66,990 maunds, all belonging to private trade.

D.—Storage of the Government Grain.

12. With the exception of the 1,139 maunds of Government grain stored at Pallygunge, and to which I referred in my last narrative, we have none left in the district. Failing to get any local merchants to take it off my hands, I am now making a second attempt to get it as far as Bihta *en route* to Arrah for Sarun, and hope that I shall succeed.

The whole of the 11,000 maunds offered in exchange for the Behar grain has been received and despatched for Sarun; so also has the 27,683 maunds of Gya grain, for the exchange of which arrangements were made by Mr. Palmer with the city merchants. 4,300 maunds have unexpectedly, within the last three days, turned up by boat from Jehanabad, and this is now as quickly as possible being despatched to Chuprah, and that once done, our transport work, as at present advised, will have come to an end.

E.—Advances to Private Parties.

13. None during the fortnight. I have realised during the period under report a sum of Rs. 1,500 in part payment of the advance made for the purchase of grain.

F.—Charitable Relief.

14. None in this district.

G.—Financial Results.

	Rs. A. P.	Rs. A. P.
15. As per account already rendered	.....	2,67,299 13 9
During the Fortnight.		
To Mr. Rattray for transport of grain	40 0 0

To the Deputy Collector of Dinapore on account of transport charges	160 0 0	
To Beharee Sing on account of transport of grain	1,513 10 6	
Total ...	4,824 14 6	
Fodder Account.		
Paid to Beharee Sing on account of conveying 5,325 maunds of bhoosa from Deegha to Bunker Ghât	720 8 9	
		5,545 7 3
Grand Total ...	.....	2,72,845 5 0

In conclusion, I would now suggest that I might be excused from the submission of these fortnightly narratives as the prospects of the district are as favorable as they well could be, and we have no existing distress; should things take an unfavorable turn, I will not fail to keep Government informed of the same by means of special report.

PATNA DISTRICT.

Statement showing the number of the true cases of dacoity, robbery, theft and house-breaking for the month of July 1874, *as called for by Government No.* 4801, *dated* 20*th December* 1873.

PATNA POLICE OFFICE,
BANKIPORE;
The 8*th August* 1874.

A. C. MANGLES,
Magistrate.

No. 1233F, dated Gya, the 10th August 1874.

From—A. V. PALMER, ESQ., Collector of Gya,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my fortnightly report on scarcity and relief in the Gya District for the fortnight ending Saturday, the 8th instant.

A.—STATE OF THE COUNTRY.

2. There is no dearth of food anywhere. The murwa and some of the burra janera has already found its way into the market. Prices are steady, and there is sufficiency and content.

3. I annex a table of food-grain prices:—

BAZARS.	WHEAT.		BARLEY.		RICE, BEST SORT.		RICE, COMMON.		MILLET.		MAIZE.		GRAM.	
	Week ending 8th August 1874.	Week ending 25th July 1874.	Week ending 8th August 1874.	Week ending 25th July 1874.	Week ending 8th August 1874.	Week ending 25th July 1874. 4. During the fortnight under review we have had the best possible weather for the vigorous growth of bhadoi crops and dhan. The rainfall has been sufficient for all purposes, and I append a statement in the margin. All hands are fully employed in weeding and looking after the young crops, and there is no demand for relief labor by agricultural classes.

Gya	7·11
Nowadah	5·20
Jehanabad	3·97
Aurungabad...	9·73

5. No cases of misery or starvation have been reported; and the very thorough enquiries made by the supervisors and deputy supervisors under Sir Richard Temple's instructions have almost precluded the possibility of such cases, if existing, from not being brought to notice.

6. I append a statement of grain thefts and robberies for the month of July:—

Statement showing the number of true cases of Dacoity, Robbery, Theft and House-breaking in which grain was stolen in the Gya District for the month of July 1874, *as compared with the number of cases occurred in July* 1873 *and* 1872.

7. It will be observed that the increase in crime is by no means excessive, and it is very doubtful whether, such as it is, it can be wholly attributed to scarcity and high prices, though doubtless these have something to do with it.

8. The district has been thoroughly well sown down with food grains this year, and a larger area, than usual, has thus been occupied both with bhadoi and dhan. The Government grain stored in the west of the district is being freely taken by traders and others, with a view to bring it into consumption amongst the people. In the sudder Sub-division the greater portion of the grain has been disposed of. In the Nowadah Sub-division alone is there any hesitation to take this grain, and this I attribute more to the want of energy and interest in the sub-divisional officer than to any other cause.

B.—Relief Works.

9. The subjoined statement will show the works in hand and numbers employed on each:—

Fortnight ending 1st *August* 1874.

Names of Works.	On Piece-work.				On Daily Wages.			
	Men.	Women.	Children.	Total.	Men.	Women.	Children.	Total.
Puraya road ...	208	166	5	379	.....	.....	.....	.....
Bela and Kazi Serai road ...	Return not received.							.....

Total ...	1,294	873	370	2,537	6,817	5,178	2,481	14,476

Grand total ... ... 17,013.
Daily average ... ... 1,215.

10. The total number employed during the fortnight was 17,013 against 14,932 during the preceding fortnight. As noted in my last report, the laborers have decreased everywhere, save in Aurungabad, where they have increased from 10,006 to 14,476. The Deputy Magistrate of Aurungabad explains this increase by saying that the Government grain at the canal works being now expended, and the work there being somewhat slack, the laborers having become accustomed to payment in grain, have voluntarily deserted the canal for our local labor, though paid at lower rates. He further states that "piece-work" has been again insisted upon. It would appear that it had not been carried out. The daily rate-payment is the most popular.

G.—Transport of Food Grains.

11. The quantity of private food brought into the bazars for sale during the past fortnight is in excess of the importations during the preceding fortnight.

12. The following statement will show the importations during the fortnight under review:—

Bazars.	Wheat.	Barley.	Rice, best sort.	Rice, common.	Millet.	Maize.	Gram.	Total.
Gya	264	55	19	517	.....	.....	298	1,153
Nowadah	15	.....	.....	20	.....	.....	20	55
Jehanabad	250	150	125	100	.....	250	325	1,200
Aurungabad	244	440	315	475	.....	.....	270	1,744
Daoodnuggur	100	76	50	30	.....	.....	126	362
Sherghotty	.....	.....	.....	.....	.....	.....	.....	500
Total ...	873	721	509	1,142	.....	250	1,039	5,014

13. The importations in preceding fortnight amounted only to 3,960 maunds. In the sudder bazar, Gya, 1,151 maunds were imported as against 1,219 maunds. The difference does not call for notice.

D.—Storage of Government Grain.

14. The annexed statement will show the disposition of Government grain in this district, *vide* Statement D accompanying:—

15. It will be seen that 5 golas in the Sudder Sub-division and 2 golas in the Jehanabad Sub-division have been entirely emptied.

	Mds.
Stored at Gola	5,250
Issued from Gya and Behae golas...	5,665
From Bihta	1,324
„ Urwul	6,717
„ Buktearpore	4,674
„ Kinjur	1,945
„ Jehanabad	2,408
By Merchants	49,271
Total ...	77,254*

16. I apprehend no difficulty in getting rid of the grain in the Sudder, Jehanabad, and Aurungabad Sub-divisions; but in Nowada, in consequence of the absence of any but petty traders, applications for Government grain have not been received.

17. Of the 75,000 maunds ordered to Patna for Tirhoot, I have delivered as per margin.

E.—Advance to Private Parties.

18. The annexed table will show the transactions up to date under this head:—

Sub-divisions.	Number of applications received.	Rejected.	Granted.			Pending.
			Number.	Cash.	Grain.	
				Rs.	Mds.	
Gya	99	29	46	4,758	2,682	24
Nowadah	77	73	2	35	20	2
Jehanabad	58	.....	24	.....	.....	34
Aurungabad	228	74	.....	.....		154
Total	462	176	72	4,793	2,702	214

19. No fresh applications are being made, and I hope within the ensuing fortnight to dispose of the few still outstanding.

F.—Charitable Relief.

20. Since last report the Bela centre has been closed. It was found difficult to supervise it efficiently, and as all agriculturists had left for the fields, and none but professional beggars remained, who could be relieved at Jehanabad or Gya, there was no object in its remaining open.

* Of this quantity, 2,848 maunds is the estimated weight of bags containing 22,318 maunds, leaving a net balance of grain delivered maunds 74,406.

21. The following statement will show that the numbers still continue to increase; but the difference is this, that distressed poor are giving place to professional mendicants:—

Sub-divisions.	B.	C.	D.	Total.	Daily average.
Gya	4,634	928	125	5,687	406
Sherghotty centre	2,139	635	.....	2,774	198
Nowadah	2,011	1,879	120	4,010	287
Jehanabad	1,107	925	1,701	3,733	266
Aurungabad	9,039	4,164	563	13,766	983
Total ...	18,930	8,531	2,509	29,970	2,120

22. The poor-houses require to be thoroughly overhauled from time to time, and this has been pressed on sub-divisional officers' attention.

23. The experiment of jute spinning, which was attempted, has proved a failure. It is unpopular, very costly, and the produce commands no sale.

G.—Financial Results.

25. The total expenditure shown in last narrative, that is—

	Rs.	A.	P.
Up to 25th July	1,30,219	4	7
Expenditure during current fortnight—			
(a)—Final payments made, establishment and contingencies ...	640	10	9
Transport of Government grain	1,515	4	10
(b)—Advances repayable	1,059	0	0
Total ...	1,33,434	4	2

GYA COLLECTORATE,
The 8th August 1874.

A. V. PALMER,
Collector.

F. H. SKRINE,
Dist. Grain Officer.

No. 725F, dated Arrah, the 12th August 1874.

From—H. W. ALEXANDER, Esq., Collector of Shahabad,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my 18th narrative for the fortnight ending the 8th August.

A.—STATE OF THE COUNTRY.

Abundance or scarcity of supplies in the Bazars.—No scarcity of supply is reported from any part of the district.

Kinds and prices of grain selling at one or more specified principal marts —Details are given in appendix A of the kinds and prices of grain selling at the principal marts in the district.

In the markets of the Sudder Sub-division prices show an upward tendency. This, I consider, is a temporary matter, and that the recent rainfall will bring them down again.

In the Buxar Sub-division a general fall in prices is noticeable.

In the Sasseram Sub-division the rise in prices is general, the slight rise having occurred in Akberpore.

In the Bhubhooa Sub-division there has been a slight fall in the Bhubhooa, Chynepore, and Hatta marts.

Rainfall.—Rain has fallen generally throughout the district. At Arrah, during the fortnight, 3·67 inches of rain have fallen. At Buxar there has been a rainfall of 3·88 inches during the fortnight. A fall of 5·67 inches has been registered in Sasseram and of 5·68 at Bhubhooa.

STATE OF THE CROPS.

The condition of the crops in the Arrah Sub-division is everywhere favorably reported on.

In the Buxar Sub-division Mr. Armstrong reports that "the prospects of all the bhadoi crop, including the serha dhan, are now excellent. More rain is wanted for the aghani dhan, but still it is doing very well. The sawan and tangun sown in the Rohnee Unchuttar are being cut, and are said to be as good as possible; and an excellent makai and serha dhan harvest is expected shortly."

In regard to the crops in the Sasseram and Bhubhooa Sub-divisions, Mr. Eyre reports—"The prospects of the crops in both sub-divisions were somewhat doubtful in the beginning of the current month owing to want of rain. Applications were made for canal water. Heavy rain, however, has since fallen all over both sub-divisions, and transplanting of rice has thus been nearly completed. The autumn crop, which was beginning to suffer, is now assured from any consequences of drought."

CONDITION OF THE PEOPLE.

The condition of the people is satisfactory.

In the Arrah Sub-division three grain thefts have been reported during the fortnight: one of 14 maunds of wheat.

In the Buxar Sub-division no grain thefts have occurred.

In the Sasseram Sub-division three thefts are reported, in one of which 10 maunds of wheat are said to have been stolen, and in the other 5 maunds 20 seers of rice.

In the Bhubhooa Sub-division one case is only reported of the theft of 7 maunds of rice.

For comparative statement of crime called for in Government circular No. 4081 of the 20th December 1873, see Appendix B. It would be noticed that there has been a total increase of crime in the past month of 84 cases as compared with the corresponding month of 1872; and of 52 cases as compared with the corresponding month of 1873. This increase is chiefly noticeable in offences of lurking house-trespass or house-breaking by night with intent to commit theft. The increase in cattle thefts is not so remarkable.

B.—Relief Works.

Full particulars in regard to all relief works in progress, and the number of laborers employed are given in Appendix C.

C.—Transport of Food.

Private imports and exports by rail are given in Appendix D.

The imports into Sasseram are—

	Mds.
By rail	1,611
Interior	500
Exterior	181
Total ...	2,292

Imports into Bhubhooa—

By rail	206
Interior	452
Exterior	187
Total ...	845

These figures show a slight increase in Sasseram and decrease in Bhubhooa as compared with last fortnight.

D.—Storage of Government Grain.

The last consignment of grain to Chuprah, consisting of 7,820 maunds, has been despatched during the fortnight by Mr. Armstrong. I presume it is unnecessary for me to notice in my narrative the quantity of Government grain which has been received at Arrah for the Collector of Sarun during the fortnight.

E.—Advances to Private Parties.

No advances have been made in the Arrah and Buxar Sub-divisions.

In the Sasseram and Bhubhooa Sub-divisions 400 maunds 15 seers has been advanced during the fortnight to the ryots. As the bhadoi crop is coming in, Mr. Eyre has stopped the advances for the present.

F.—Charitable Relief.

In the Arrah Sub-division the charitable relief operations are as follows:—

Heading B.—*Cooked Food.*

	Men.	Women.	Children.	Total.	Daily average.
Moulabag	313	318	837	1,468	98

ARRAH,
The 12th August 1874.

H. W. ALEXANDER,
Collector.

No. 2175F, dated Mozufferpore, the 13th August 1874.

From—C. F. WORSLEY, Esq., Offg. Collector of Tirhoot,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my narrative of scarcity and relief in the Hajeepore, Tajpore, and Sudder sub-divisions for the fortnight ending 8th August 1874.

A.—STATE OF THE COUNTRY.

2. In Hajeepore sub-division prices on the whole may be said to have remained stationary, variations having nowhere exceeded three-quarters of a seer in the rupee, while a fall in one place has usually been counterbalanced by a rise in another.

3. In the southern marts of Tajpore sub-division "prices have varied but little, if at all;" but at Tajpore itself all kinds of grain, except rice, have risen in value.

4. In the Sudder sub-division Government prices continue to prevail, and the demand for Government grain still increases. During the fortnight the town bunneahs have purchased no less than 27,318 maunds of grain from our godown, all of which they have sold either in the town or in adjacent villages; and so dependent upon Government have they now become for their supplies, that the stoppage of our sales for a few days would, I feel sure, be followed by disastrous consequences.

I have repeatedly visited the grain market, but have not seen a single shop in which any locally-produced grain, except oats, can be purchased. The bazar chowdree informs me that about 400 maunds of the grain daily purchased from us by the bunneahs are regularly distributed through baiparies in neighbouring villages; and I have reason to hope that their agency will shortly enable us to dispense with sales at many of our sub-golas.

5. The subjoined statement shows the kinds and prices of grain selling at some of the principal marts on 8th instant:—

Names of Marts.	Wheat.	Barley.	Common rice.	Indian-corn.	Gram.	Murwa.
Hajeepore	13½	18	9¾	...	18	...
Lalgunge	15	19	10½		19	...
Mhoweh	12	16¼	9	14	15½	18
Tajpore	14	17	10	...	19	18
Mozufferpore	14	16	13	16	18	...

6. The rainfall during the fortnight was as follows:—

Hajeepore	5·71
Tajpore	1·09
Mozufferpore	2·14

7. In my telegram dated 4th instant, I informed you that the prospects of the makai crop were deteriorating from want of rain; but I have since ascertained that both the dhan and makai crops have suffered greatly in several places. Even in Hajeepore sub-division, in spite of a comparatively good fall of rain, the dhan is backward; there is, however, as yet no serious cause for alarm in that quarter. But the Tajpore Officer takes a very gloomy view of prospects, reporting as follows:—

"There has been rain at Tajpore on only four days during the fortnight, aggregating 1·09. This scanty rainfall has caused, and is causing, the most grave anxiety for the bhadoi crop and also for the dhan. During the latter half of the week there was a good fall of rain in the south-west, and Mr. Lloyd of Shapore Undi, who twelve days ago wrote anxiously of

the prospects, now reports that there has been 'nearly sufficient rain for the bhadoi crops, and that the yield is likely to be, if any thing, above the average.' With the extraordinary partiality which has marked all the rains this year, the rest of the sub-division, except perhaps the part about Dulsing Serai (where rumour says similar rain fell), has not been so favoured. A magnificent promise is thus daily failing. There cannot now be the full crop once expected. I fear that even immediate rain would hardly secure a 10-anna crop all round, and that for every day's drought the outturn loses nearly an anna. In some villages towards Poosah, where the prospect was the very finest, the drought has prevented some of the makai putting out cobs, and here and there it is being cut for cattle; elsewhere grain is only forming half up the cob, and in the east and west makai only half-grown is to be seen in flower.

"Cownee and sama, though more forward, and so less liable to injury, are somewhat shrivelling. It is in the murwa that I still have hopes. Early rain would yet catch the majority of this not yet in ear, and bring it on to a fair outturn. A continuance of drought will, however, affect this even more seriously than makai.

"Dhan even in the south-west is not looking well. Mr. Lloyd writes: 'It has in many places hopelessly gone, and if we have not good rain soon, it will go altogether.' It is everywhere very backward. There is, however, yet time to transplant, and in this way the prospects of the transplanted dhan are more favorable than that sown broadcast.

"The Balgach pergunnah has been inundated by the Ganges, and much damage has been done to the makai. Fortunately a plentiful harvest of cheena has been there reaped. This grain is said to be selling in Balgach at 30 seers to the rupee, but it does not find its way northwards."

8. I have just returned from visiting Poosah and the northern part of Tajpore sub-division with the Commissioner, and I may mention that it is the general opinion in that part that the outturn of the makai crop cannot exceed 10-annas.

9. In the Sudder sub-division the crops promise well in the northern circles; but elsewhere the makai has suffered more or less from want of rain. I fear that this crop will not on an average be more than 10-annas. In the Sudder circle there is still a good deal of dhan to be transplanted, but the work cannot proceed without more rain. During the last three or four days there have been some good showers of rain in and around Mozufferpore, but I doubt if there has been general rain throughout the sub-division.

10. With regard to the condition of the people, the Tajpore officer observes: "The people seem to me more hard pressed than they have ever been, and several of the factory managers have observed this also. The drought has thoroughly disheartened the ryots, and it certainly is depressing, after the hard times of the past nine months, to see a magnificent crop daily withering when so near harvest. * * * I have seen among the cultivators of some parts a more pinched look than heretofore, and appearance more like that I noticed in the Bahlempore circle before the relief works there were started." In Hajeepore sub-division there are at present no signs of distress, and Mr. Tute thinks that "the advances we have given (solely to cultivators) will carry the people through." In the Sudder sub-division, notwithstanding the efforts that have been made to relieve all cases of distress, emaciated objects may still be seen occasionally. Within the last week I have myself seen two starving adults, little more than skeletons, who had wandered into the town in search of food; and the Belsund superintendent, in reporting on the increased number of paupers receiving charitable relief, remarks that "it is difficult to imagine how such diseased and decrepit wretches exist at all in ordinary years."

11. There have been no cases of death from starvation.

B.—Relief Works.

12. The number of labourers employed daily in the three sub-divisions is as follows:—

Hajeepore	4,052
Tajpore	11,070
Mozufferpore	75,385
Total ...	90,507

This number is 6,278 in excess of the number shown in my last narrative. The increase has been confined to Tajpore and Mozufferpore. In Hajeepore there has been a decrease of nearly 1,300 labourers.

13. The Tajpore officer expects during this fortnight "to have more people than ever on the works, as there is now little or nothing doing in the fields." He also thinks "that it will be advisable under any circumstances to keep the relief works open for another month."

14. From the annexed statement of labour for the Sudder sub-division, it will be seen that nearly two-thirds of the labourers are women and children. What effect the reduced rates of wages (*i.e.*, 10, 9 and 6 chittacks of grain per man, woman, and child daily) will have on existing numbers generally remains to be seen. In the Sudder circle, where 17 road-works were in course of construction, the whole of the labourers on two works at once struck when the new rates were introduced. They have since, however, asked for re-employment at these rates, and I have therefore ordered the works to be re-opened. On the other 15 works the labourers have all remained. In the Toorkee circle, where 7,786 labourers were being employed, there has been a general strike. The Superintendent writes—"Labourers have been coming steadily to the relief works; but the last few days, since the reduction of wages the works have been completely forsaken; but I think that in a few days many will return, that is, when they run out of the small stores of grain which I believe many have managed to save from the former rates they received" From other circles I have not yet received any information on this subject.

15. I sincerely trust that the "barest subsistence wages," which I fixed in accordance, as I thought, with His Honor's instructions, may not be maintained to the end of the season. As an experiment, they may serve to test the necessities of the labourers; but when these have been clearly established, such rates, I submit, must necessarily impair the efficiency of their work. It may be that I have given a stronger meaning to His Honor's expression than it was intended to convey, and that instead of fixing "barest subsistence wages" for human beings, I should have fixed "barest subsistence wages" for *labouring persons*. If this be so, the old rates (especially in the planter's circles) would admit of little reduction.

16. The large increase of labourers in the Kantee *cum* Reghai circle is a matter which I intend to investigate on 14th instant; though, bearing in mind the large amount of damage done to the crops in this circle, and the fact that many cultivators must have been thrown out of employment, I see no reason to suspect laxity of supervision. The probable future necessities of this large number of persons are the main cause of my uneasiness and anxiety to judge for myself.

17. I may repeat here (what I have already communicated to you by telegraph) that I apprehend great pressure during the ensuing five weeks, or until the produce of the bhadoi crop gets well into the markets.

C.—Transport of Food.

18. Under this head the Hajeepore officer makes no remarks, though I should have been glad to receive some explanation of the very great difference in the prices of rice at Hajeepore and Patna. In the former town the price is 10 seers, in the latter 16 seers per rupee. Wheat again is selling at 13½ seers in Hajeepore, and at 16½ seers in Patna. I know as a fact that at Lalgunge (as I mentioned in my last narrative) there is a great demand for rice, and it is reasonable to suppose that the demand exists at Hajeepore. It seems to me that either the Patna prices must be nominal, or that private trade, when left to itself, is wholly inoperative in this district as an importing agency.

19. The Tajpore officer reports that private trade has lately fallen off in his sub-division, and believes that the Government sales in the Durbhunga sub-division have had an injurious effect upon it. He also thinks that the smaller traders are unable to pay the high rates now demanded for boats. I am not in a position to dispute the correctness of these views, but I know that the manager of Jeetwarpore factory (close to Nagurbustee) finds no difficulty in disposing of rice which he has imported with an advance from Government at the rate of 11 seers per rupee. Further, the extreme lowness of the Boor Gunduck at the present time is very unfavourable to large boats; indeed, I have just learnt that several boats laden with Government grain, and bound for Mozufferpore, cannot get higher up the river than Nagurbustee.

20. I have not heard of any supplies of grain being brought into the Sudder sub-division by private traders.

D.—Storage.

21. The amount of Government grain that has been stored is as follows:—

	Mds.	Srs.	Ch.
Hajeepore	41,531	10	12
Tajpore	53,908	35	4
Mozufferpore	6,30,543	34	0

22. With reference to paragraphs 18 and 19 of my last narrative, I found on enquiry that "the balance of the 60,000 maunds lying at Doolee" was *nil*. I had also omitted in estimating my stocks to make due allowance for wastage. I was obliged therefore, on 5th instant, to apply by telegraph for another lakh of maunds, and I understand that Colonel MacGregor has proceeded to Monghyr to arrange for its despatch.

23. With reference to Government letter No. 4741—S.R., I beg to report that wetted grain is always the first to be sold or used at relief works as soon as it has been dried, and that rice in the Government golas is generally in good condition. I append a statement showing the total amount (Rs. 2,17,125) paid into the treasury up to the 10th instant on account of sale proceeds of grain.

E.—Advances.

24. Applications for advances are still very numerous, but are being disposed of as promptly as possible.

F.—Charitable Relief.

25. The number of recipients of charitable relief in the three sub-divisions is as follows:—

Hajeepore	3,342
Tajpore	5,483
Mozufferpore	18,395
Total ..	27,220

G.—Financial Results.

26. The subjoined table shows our expenditure for Hajeepore, Tajpore, and Mozufferpore subdivisions during the fortnight under review:—

		Rs	A.	P
1	Salaries, establishments, and office contingencies	13,284	2	3
2	Miscellaneous	500	0	0
3.	Transport of Government grain	60,567	13	5
4.	Storage (including building and repairs)	830	8	6
	Total ...	75,182	8	2

P.S.—With reference to paragraph 16, I have the honor to add that I have this morning ridden over the northern portion of the Kantee circle, have visited some relief works, and have conferred with the assistant manager of Reghai out-work. It appears that the reduced rates of wages were introduced in this circle on the 6th instant, and that the average daily numbers for the week ending 13th instant are as follow:—Men 2,796, women 1,722, children 632; total 5,150. Though there has been a decrease on the whole, it has not been very marked or important. The cause of the relief works being now so much frequented is exactly what I supposed, viz. the destruction of crops by inundation. All the first sowings of rice were completely ruined, and though second sowings were made, there has not been sufficient rain lately to admit of the seedlings being transplanted Besides the young dhan, I regret to say that other crops have suffered more or less severely. Sama and kownee have gone entirely, and the makai cobs have scarcely filled at all. The assistant manager believes that Government must continue to give assistance to the people in his circle up to the end of the year. In one large village (Mundaya), where the crops were wholly destroyed and the waters have not subsided (the lands being all low churs), the people one and all are only kept alive by relief works and advances of grain. In one or two other villages there is very great pressure, and I may say generally, that without the assistance now being given by Government, great mortality would ensue in the northern portion of Kantee circle. The labourers complain of the reduction of wages, but not so much as might have been expected.

APPENDIX OF LABOUR

Mozufferpore Sub-division.

No. 1041, dated Durbhunga, the 10th August 1874.

From—C. T. Metcalfe, Esq., Additional Commissioner,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I have the honor to submit my Narrative of Scarcity and Relief for the Fortnight ending Saturday, the 8th of August 1874.

State of the Country.

1. In the present narrative I have still to report a continuance of fine weather. The general want of rain is seriously affecting the harvest prospects, and a great deal will depend upon a rainfall during the next few days. The harvest prospects differ of course in different localities, but generally it may be said that the great murwa crop where not gathered requires rain to fill the heads, and that the transplanting of rice is delayed by the extremely dry condition of the soil. The present is no doubt a crisis, and the better to describe the exact state of things at this moment, I annex a map coloured according to the state of the crops, which, in the more northern portion of my jurisdiction, I have just carefully inspected. It will be seen that the least favorable prospects of rice and murwa are in that tract of country between the Kumlah and Bulan, but where the maize harvest has been a very good one.

2. The report for the different localities is as follows :—

Seetamurhee.—The scanty rainfall in this sub-division has not only interfered with the completion of rice transplanting, but has affected the bhadoi crops, which are nearly ready for cutting. Unless we have a heavy downfall, the outturn of the sathee will be very small, indeed next to nothing. Every morning there are indications of heavy rain, but the clouds towards mid-day disperse.

Poopree Sub-Division.

A heavy fall of rain is required to secure a heavy harvest. Indian corn partly gathered, partly ripening. Murwa and shama, both very thick crops; in places ripe and gathered; both crops, as also keonee and jeree, generally in the ear, and fast approaching maturity. Extensive fields of these crops are ripening, the stalks thick and juicy, but the seed wanting in fulness. The crops *already* gathered are exceptionally good. The paddy is in the lower lands healthy and growing vigorously; in the higher lands much in want of rain. In the Mudhoobunnee Sub-division the crops vary considerably. From the banks of the Chota Baghmutee to the Kumlah the murwa and Indian corn are very fair, and the paddy up to date very healthy. Between the Kumlah and Balân, constituting the Bukwa circle, the Indian corn is splendid, but murwa poor, and rice looking sadly in want of water; farther south, in what forms the Mudhoobunnee sudder relief circle, the crops are dry and have a withered appearance, and transplanting is, on the higher lands, stopped.

The condition is described as follows :—"Last fortnight was characterised by a general hopefulness induced by seasonable weather, general showers, and indications warranting expectations of a bountiful harvest. The present fortnight has been marked by short rainfall, extensive stoppage of agricultural operations, and anxiety as to the future of the paddy crops. The early bhadoi, murwa, and shama has been mostly secured against the chance of any great failure, but the later sown bhadoi and the whole of the paddy crops are seriously threatened." The weather is cloudy and there are occasional showers, but there has been no good fall of rain in this sub-division since the 22nd July, except at Kuchra, where there have been three heavy showers.

The agriculturists have in the lower lands taken advantage of the fine weather to resow most of the lands where the crops had been destroyed by the earlier floods. In some villages the seed has been found to be that of aous paddy and unsuited for transplanting, and fresh seed is being supplied by the Court of Wards.

The three worst tracts as regards prospects of crops in this sub-division, then, are Bukwa, Sudder Circle, Mudhoobunnee, and Motipore.

In Naraya, the state of things is better. The last heavy fall was on the 26th, and the crops are still healthy and growing vigorously, but still they would be improved by rain. The crops in the western half of the Putrahee circle are, similar to the Bukwa crops, stunted and poor, but the more western crops are very good indeed. The Durbungah situation may be best described in Mr. MacDonnell's own words,—"The continued drought has had an injurious effect on the murwa, which in places is turning yellow, a sure sign of decay and unhealthiness; insufficient moisture has also had the effect of checking transplanting. In the Hathi Sub-division, however, there has been a fair rainfall within the last few days, and the prospects have much improved

3. *Rainfall.*—

Seetamurhee	1·11 inches.
Poopree	...
Mudhoobunnee	2·3 ,,
Jhanjharpore	3·2 ,,
Matipore	2·8 ,,
Naraya	2½ ,,
Durbhunga	1·70 ,,
Hathi	½ inch.

In the last-mentioned sub-division there has been, as also at Naraya rates, a fall in excess of the quantity here given—

4. *Price-current for the fortnight under report.*

Sunbursa	18	20	.....	.....	16	.....	
Bela	18	18	.....	.....	30	.....	

5. *Public health, Poopree.*—Public health continues excellent. Returns are being received of the numbers who have died whilst receiving charitable relief. In 2 circles 17 persons out of 2,300 have died in 6 months. In Mudhoobunnee there were sporadic cases of cholera at Mahta and Bhatolia; otherwise there have been no epidemics. In the Bukwa circle, of the deaths reported, 18 are of persons on charitable relief. In Motipore, out of 30 reported deaths, 18 were of persons in receipt of charitable relief. In Durbhungah, there have also been a few sporadic cases of cholera.

For the Mohomedpore circle the following percentages are given by Dr. Macdonnell:—

	Beginning of July.	End of July.
Normal	66 per cent.	75 per cent.
Anæmic	21 „	22 „
Emaciated	9 „	3 „

Generally the condition of the people is so good that, with the cutting of the murwa crop, the number of persons receiving charitable relief may safely be diminished. Along the Northern Frontier there are, however, still numbers of haggard lean-looking persons, mostly wanderers from Nepaul, to be seen, and some few even of our own people, who remind me of the earlier famine months.

6. The following statement shows the number of relief labourers in the six Sub-divisions:—

Name of Sub-division.	Daily average of laborers on relief works.	Public Works.		Circle Officers.		Court of Wards.	
		Task.	Daily.	Task.	Daily.	Task.	Daily.
Seetamurhee	3,218	1,205	.....	.....	2,013	.....	.....
Poopree	2,088	1,132	.....	.....	956	.....	.....
Mudhoobunnee	14,951	6,757	2,288	2,241	3,665	.....	.....
Naraya	15,598	.....	1,312	1,811	11,745	401	329
Durbhunga	1,701	569	.....	.....	611	521	.....
Hathi	2,634	560	.....	.....	2,074	.....	.....
Total ...	40,190	10,223	3,600	4,052	21,064	922	329

There is a large increase in labourers in the Modheypore circle, but these are almost entirely women and children. The Relief Officer thought they needed relief, and, as their employment would not effect field work, they were employed on repairs to roads, making village footpaths; as the murwa crop ripens, these works will be closed.

7. The following statement shews the amouut of grain expended in payment of labour during the fortnight:—

Names of Circles.	Amount of Grain. Rice. Mds.	Pulses. Mds.

Storage of Grain.

8. All the grains in stock are being examined, re-stacked, and re-arranged, and in some places, where empty golas admit of it, the pulses are being separately stored.

The rice is not in any way getting damaged; damaged bags in which the rice is unfit for food, as they are discovered are destroyed, but they are very few in number.

9. *Sales.*—Sales in the western golas of Seetamurhee have been particularly brisk during the fortnight; 5,000 maunds were sold at Murpa, and what with sales and advances the golas were entirely emptied. To refill these golas grain has been pushed on from the surplus stocks at Dyne Chuprah, Iturwa, Kunhowlee, Sonebursa and Nurga. The Nepaulese have been eager purchasers all along the frontier.

10. At Amoah and Shewhur the grain stocks have fallen to about 3,000 maunds, and supplies have been actively sent from Bhugwanpore. In Bhootahee, sales are dull; also at Sonbursa and Kunhowlee.

In Mudhoobunnee Rs. 8,07,179-3-11 have been realized by sale of grain, and in Durbhunga Rs. 7,02,282; but there has been a falling off in the Mudhoobunnee sales, viz., 26,803 maunds, as compared with 40,335 in the previous fortnight, at the several stock-houses.

	Actual sales up to date.	
Seetamurhee	1,01,537

In the Perozeghur and Modheypore circles sales have almost stopped, and partly so in Naraya, owing to the large amount given in advance and to payment in kind. Mohadeomut still sells well, and so does East Patrahi; West Patrahi has slackened; sales of pulses in the latter circle have been almost stopped by the absurdly cheap rate of some neighbouring Mudhoobunnee golas.

STATE OF PRIVATE GRAIN TRADE.

12. There have been a few imports of pulses, and table rice has appeared in quantities sufficient to meet all demands at 10 seers per rupee, but murwa and Indian-corn are fast coming into the market, the former selling in a few places at 52 kutcha seers per rupee. The main dependence is still on the Government stocks. At Kurlahee, scores of Nepaulese throng the golas, but the sales will probably not aggregate more than 400 maunds a day; whilst at Deodah, which has been cleared out, the sales will daily average about 100 maunds. These northern golas have been replenished from Durbhunga by boats, as also from Cherout, in the Poopree Circle.

At Jaley, where sales hitherto had been almost nil, a brisk demand is springing up, as also at Seebnuggur, which has been replenished by Mr. Forbes from other golas. In the Durbhunga circle, similarly, there has been a good deal of grain transfer, and the sub-divisional officers have to give their particular attention to the fluctuating demands at their several stock-houses.

NOTE.—Hati figures incomplete ; Rohar circle returns not having been received.

No. 4034, dated Sarun, the 15th August 1874.

Memo. by—J. S. DRUMMOND, ESQ., Offg. Magistrate and Collector of Sarun.

FORWARDED to the Secretary to the Government of Bengal in the Scarcity and Relief Department, Calcutta, for information, with reference to his Circular No. 80 of the 17th November 1873.

Narrative of Scarcity and Relief in the Sarun District for the Fortnight ending 8th August 1874

A.—STATE OF THE COUNTRY.

Abundance or Scarcity of Supply in the Bazar.—While the importations by private trade continue to remain at the same small figure in the Sewan sub-division, they have fallen off by one-half in the sudder sub-division. This falling off is attributed by traders, who naturally are strongly interested in opposing the issues of Government grain, to the discouragement of private trade owing to the large advances of Government grain which have been made ; but though it cannot be but that this cause should have operated to some extent, it is to be remembered, *first*, that the main supplies of this district have been drawn for months past from Oudh, and that therefore it is reasonable to expect that the surplus produce for exportation thence must be now running short; and *secondly*, that with the prospect of an abundant harvest in a few weeks, there is not much temptation to import in any considerable quantities. But be this as it may, I am fully convinced that a great

risk would have been run if early steps had not been taken to supply the cultivators with Government grain. It is to be borne in mind, *first*, that the great mass of the ryots had not the means to purchase grain in the market; *secondly*, that it is not likely that the petty mahajuns who carry the ryots on in an ordinary year, had sufficient grain stocks to make the usual advances; and *thirdly*, that, considering to what an unexpected extent private trade has met the demand in all these months past, it would have been imprudent to rely on its holding out to the end, to say nothing of the certainty that had it not been for the supplies of Government grain, prices would, as has been abundantly proved by the experience of former famines, have gone up at once, and been maintained at famine rates without regard to the available stocks in the hands of the bunneahs and others.

2. Supplies are reported by the police to be deficient at Goldengunge, in Manjhee, and Bussuntpore, throughout the Musrukh thana, in Pursa, and at Kutiya; and it is, in my belief, solely owing to the slackening of the demand on the markets, in consequence of the relief of a large proportion of the population by means of Government grain, that the supplies in the bazars generally have continued to meet the demand. I have been assured by planters and others that rice is scarcely to be obtained in many of the bazars in the interior. It is to be noted that in ordinary years, the northern portion of the district is largely supplied with Nepaul rice, and that with the failure of this trade, there has this year been but little attempt on the part of private trade to supply its place from other sources, and, as a consequence, prices have all along ruled much higher in those parts of the district. This alone would show the fallacy of supposing that trade is regulated in the same manner in this country as in European countries.

3. The imports, mainly into the sudder sub-division, were, during the past fortnight, at Chupra 4,750 maunds, none of which was rice; at Revelgunge 17,900 maunds, of which 1,800 maunds only were rice; at Dooreegunge 4,597 maunds; at Panapore 27 maunds; and at Roopanchap (in the Burrowlee thana of the Sewan sub-division), 709 maunds. The exports to Tirhoot and Chumparun amounted to 740 and 640 maunds respectively.

4. Of the Chupra sub-division Major Jackson writes:

"The petty outlying bazars continue to be supplied with grain, but to no very great extent. In fact, there is a slight falling off, but sufficient to meet the demand."

5. Regarding the Manjhee sub-division, Mr. Tonnérre writes:

"The supplies imported into this sub-division are just sufficient to meet the slight demands in the bazar, and there is no surplus whatever of food-grain in them. Only 20 or 25 pack-bullocks bring provisions on market-days into one of the largest bazars; this shows how slight imports are, and from enquiries I have ascertained that in ordinary years there is always a flow of large stores into bazars on the days on which they are held.

"Food-grain cannot be always procured in the bazars, and in one bazar in particular, Kulhooa, there is no rice available at all.

"Another fact proves the scarcity of stores. In times of plenty the value of *Goruckpooree* pice increases—about 72 gundas to the rupee; whereas when scarcity prevails, their value decreases, and now for instance about 80 are to be had per rupee."

6. Mr. Barry, in charge of the Pursa sub-division, reports as follows:—

"No deficiency has been reported, and prices seem stationary, or nearly so, at the figures quoted in my last report.

"The abundant crop of cheena in South Kusmer ought to reduce prices in that quarter, as a large portion of it will doubtless be thrown upon the market."

7. Unfortunately, this is the portion of the district which has been recently submerged by the Ganges inundation, and much of the cheena, it is believed, was only just being harvested.

8. The price of barley at Pursa, as given in the annexure, has probably been misquoted by the police.

9. The following is Mr. Wright's report of the Sewan sub-division:—

"The bazars continue to be well supplied, and the fact of this being the case when private importations from other districts still continue to decrease, proves, I think, that there must be a good stock of grain in the hands of the people in the sub-division. I do not mean to say that the poorer classes have any stocks of grain in their possession, as they are a class in this district who are accustomed to live from hand to mouth, but the well-to-do and the traders must have stores of grain, else the supplies in the bazars would long ere this have run short.

"The private importations of grain during the past fortnight amounted only to 6,140 maunds. The exports according to reports received were 96 maunds of barley, sent from Guthani to the Goruckpore district.

"Mr. Rattray informs me that he has had special enquiries made at the principal marts throughout this division by the tehsildar as to the reason for such a great falling off in the private grain importations, and that the tehsildar after making the enquiries reports that the large advances of Government grain given to the people have checked and almost put a stop to private trade. Traders are afraid that they will not get rid of the grain they have already in their hands, and will not therefore run the risk of importing largely as they used to do."

10. I have already alluded to the fact of the diminished demand on the markets, as well as to the probable causes of the falling off in the importations, so I need not remark further on this head.

11. Concerning the Hutwa sub-division, Mr. Hodgkinson writes:

"The supplies of grain in the bazars of this sub-division have been sufficient. The new grain, tengoonee and murwa, has begun to come into the market; bhunslee rice is ready, and makai is being sold near the Gunduk dearah.

"The Raj tehsildar denies the correctness of the police report that the supply of grain had fallen short in Kutiya. The market has been amply supplied on every market-day, though on one or two occasions in wet weather traders and purchasers have assembled in less numbers than usual. The deficiency of supplies cannot be inferred from this circumstance, and as a matter of fact, it does not exist."

12. *Kind and Price of Grain selling at the different Marts.*—The kind and price of grain selling at the principal marts and at the thanas and outposts are given in the annexed statement.

13. Prices have fallen at Ekma, Bussuntpore, Maharajgunge, Baneapore, Pursa, Sonepore, and Durrowlee. At all other places prices have risen, or are either stationary or nearly so.

14. *Stock of Food in the hands of the People.*—Major Jackson, in charge of the Chupra sub-division, writes as follows under this head:—

"I have had more particular enquiries made on this head during the past fortnight, and though exact information on such a subject must always be difficult to obtain amongst a population particularly reticent as to their private affairs, have ascertained that in several places private stocks do exist, but these are confined principally to places where other than rice crops have been in excess. In the purely rice districts, all private stocks are said to have expended."

15. Concerning the Manjhee sub-division, Mr. Tonnérre reports:

"I find that on an average, taking a village at 16 annas, only 2 annas of the ryots possess supplies of their own. This shows how urgently needed Government advances were.

"The rest have no supplies at all; this is the purport of reports from all my circles about this matter, and I fully endorse what they state.

"Very large numbers are now in possession of Government grain, and I believe that, where advances have been completed, the ryots lend grain to their less fortunate neighbours whose turn has not yet arrived, to be repaid when the latter receive their allotments.

"All fears of insufficiency of food-supplies may now be set completely at rest. It has been a race against time, and time has been beaten."

16. From Pursa Mr. Barry writes:

"I have not been able to obtain any fresh information on this head, but it is admitted on all hands that the old stocks have run very low, and that but little remains. Any food-grains that are used now are obtained either by purchase from the bazars, or by advances from the Government golas.

"But the murwa, which is ready for cutting, will replenish the petty stocks of many poor ryots; and the cheena, which is being cut in the southern half of Kusmer pergunnah, will put most of the ryots there beyond the reach of want, and fully replenish their stocks."

17. I fear this cheena must have been lost.

18. *Rainfall and State of the Crops.*—The rainfall here during the fortnight has been 2·05, making a total of 23·15 inches. The rainfall in the interior of the district seems this year to have been very partial, the fall in some places being plentiful, and in others very scanty indeed. For instance, I hear that at Ramcolah, in the Musrukh thana, there have been only 16 inches registered, while at Barhogah, Chitowlee, and Dhubowlea, in Bussuntpore, the rainfall since the 1st of June had, up to the third of this month, been only 14, 11½, and 10½ inches, respectively. Generally throughout the Musrukh and Sewan thanas, and in portions of the Chupra, Pursa, Bussuntpore, Burrowlee, Barragaon, and Durrowlee thanas, more rain may be said to be urgently wanted. On the other hand, owing to the rise of the Ganges, extensive tracts have been inundated. Accurate information regarding the Dighwara inundation has not yet been received; but here, near Chupra, the lands of some 22 villages have been entirely submerged, and are still under water. Except where destroyed by inundation, the bhadoi crops are nearly everywhere most promising; but general transplantation of the aghanee rice is still retarded in many parts by the want of rain.

19. Of the Chupra sub-division, Major Jackson writes:—

"For the greater part of the fortnight under review, there has been a break in the rains, particularly favorable to all bhadoi crops, at one time in danger of being drowned; these are now in safety and promise extra abundance. In a very few spots, loss to the extent of 2 annas has been experienced; but these cases are exceptional. The promise of the rice crop is not, however, so bright. The sowing of the rice nurseries has been completed throughout the district, but planting out has been much retarded for want of rain; recent heavy downfalls have somewhat remedied this state of things, and planting out is now actively going on. The completion to the full extent remains yet to be seen, and is dependent on future atmospherical conditions."

20. Regarding the Manjhee sub-division, the following is Mr. Tonnérre's report:—

"Up to the 5th very little rain had fallen, and serious fears were entertained as to the fate of the aghanee rice; on the 5th however, the rains seemed to begin in real earnest: it rained nearly all day; on the 6th more rain fell, and on the 7th and 8th the rain was very heavy. It is now still raining, and there is every prospect of a steady set in of the rains.

"The crops have benefited all the more because the rain was unattended with the violent winds which prevailed of late. These winds bent down even the strong makai plants, and their continuance threatened damage. I have seen whole fields the crops of which were almost lying along the ground; and the effect of heavy rain under these circumstances would no doubt have seriously injured them. Within the last two days, they have recovered the upright position, and look very healthy and strong.

"Weeding will soon have to be resorted to, and will furnish employment to numbers who are now on relief works. In one week's time the bhadoi crops will be ripe to the extent of one anna out of the 16. Murwa, which was irrigated, is now being harvested in small quantities in all my circles. Tengoonee is also coming into ear, and in one circle four annas of it are reported to have done so.

"Dhan is being transplanted everywhere, operations having begun chiefly after the 5th.

"It is on the bhadoi that all the lower classes mostly depend; men of substance scarcely ever consume any of it, so those classes in the deepest distress will find prompt relief.

"The *Chowmasah* fields are being ploughed and prepared for the rubbee crops.

"The indigo in my sub-division is reported to be a failure."

21. From Pursa Mr. Barry gives the following account:—

"The only days on which rain did not fall during the fortnight were 26th, 29th, and 31st of July, and 4th August. On all the other days light and occasionally heavy showers fell, succeeded by sunshine. These passing showers, followed by warmth, have been most advantageous to the growing crops; but there have been more clouds than rain, and the aggregate of the rainfall for the fortnight is small, and the low lands for the aghanee rice have not yet been generally flooded. I regret that I have not a rainguage, and consequently am unable to give you the exact figures.

"The bhadoi crops could hardly be in better condition, and the promise of a splendid yield seems fully assured. The makai is in full flower, and the heads are beginning to appear; it will be ripe in from six to seven weeks, but will be fit for food long before that—in many places in 20 days. Weeding, hoeing, and manuring this crop, give employment to large numbers; but in not a few fields I regret to observe that the cultivators, either through laziness, apathy, or want of means, have neglected to weed and hoe their makai in time. The consequence is that the crop is stunted and yellowish, and will give a poor return. I asked one or two of these cultivators why they allowed their fields to run to grass; they replied that they had no grain (*i.e.*, had not the means to weed them). But some men seem to think that when they have thrown in the seed, they have done enough; whereas the more labor is spent in weeding, re-weeding, hoeing or ploughing and manuring the makai, the greater the yield will be.

"Most of the makai-fields are getting a second weeding, and are all the better for it.

"The amount of land under this crop is very much greater than usual, people having been induced to sow it largely, as it is very certain, easily raised, and ripens in 110 days."

"The *sawan* is a fair crop, is sown to a considerable extent (generally amongst kodo and arhur), and will be ripe in 10 days, it having been in the ear for some time. It will thus yield an early supply of food to the people, but merely a makeshift till the makai is ready.

"The early *murwa* is ripening, and will help to keep the wolf from the doors of many a poor family. This grain seems to have no particular season of its own, as within the last week I have seen a good number of patches of it being transplanted out These bits will not be ripe till November.

"The *bhadoi* rice, the kodo and arhur, are doing well, and weeding is still going on. The rice and kodo are of slow growth, and will not be ready till October.

"In the southern half of pergunnah Kusmer, I found on my visit there that cheena had been sown in large quantities on the moist lands within the influence of the numerous water-courses (or sotahs) of that region. At the time of my visit, on the 3rd of August, I saw hundreds of people employed in cutting this cheena, which appears to have given an abundant yield, and thus relieved us of all anxiety for the people in that quarter. But in the northern half of Kusmer there is no cheena, the land being light and high and dry, above the influence of the water-courses which communicate with the Ganges, and stand back when the river is in high flood.

"The *aghani* rice-fields or 'chowr' lands have not yet been properly flooded, and the planting out has been somewhat retarded in consequence; still many of the fields have been planted out, and the chowrs are gradually being taken up, and the crop looks well as far as we have gone; but this plant delights in a foot of water in each field. The seasonable and timely rains we are now having are doing a world of good. I doubt whether much more than half of the aghanee rice has yet been planted out.

"As to *indigo*, the plant, where there was any at all, looked well enough; but the outturn of produce is, I am everywhere told, of the most wretched description. The incessant rains of June and first ten days of July seem to have washed out the color from the plant; and I am told that few (if any) of the factories will be able to clear their outlay, and in some the loss will be very heavy.

"The asserhi plant is not a foot high, and anything it can yield will be insignificant. I am told that this is the worst indigo season that has ever been known."

22. Mr. Hudson, in charge of the Musrukh sub-division, writing on the 8th from his head-quarters at Gopalpore, reports:—

"Until yesterday there has been a considerable abatement in the rainfall this fortnight, and I have heard alarm expresssed for the safety of the rice crops; but yesterday a tremendous downpour commenced about 9 A.M., and the rain has continued falling with hardly any intermission until the present time, Saturday, 6 P.M. This timely assistance has doubtless averted all danger to the rice for the present. The other crops, makai, sawan, tengoonee, murwa, and kodo, could not be in a better condition. I have ridden as far Bansghat, in the north, and Tejpore, in the south, and have had plenty of opportunity for observation; besides which I have conversed with a number of zemindars and cultivators on the state of the country. All agreed in saying that the season has been very favorable for all the crops except the winter crop of rice; but this requires more rain. The truth is that hardly a single day of the fortnight has passed without rain; but it has been a succession of passing showers, instead of a continuous downpour; and it is apparently this latter description of rainfall which is absolutely required for a full crop of winter rice. I have myself observed the aghanee turning yellow in a good many places; and I have been told, in answer to enquiries, that it was owing to want of rain. For the Indian-corn and millet crops, there can be no doubt now of a full yield; but the ultimate decision between scarcity and abundance of rice depends, I presume, on the character of the weather during the ensuing month. Murwa, sawan, and tengoonee are actually ripe, and are already being plucked. I am informed that it will be all gathered in a day or two; but there are three harvests of this crop, according to the time when the grain is sown. That sown in Jeth is gathered now; that sown in the beginning of Asar will be gathered the first week in September; and that sown at the end of Asar at the close of September. Now that there has been a good fall of rain, the chief business of transplanting will commence, and will go on for twenty days. One of the planters (Mr. Cosserat of Rampore) has expressed his opinion to me that the crops have never, within his knowledge, been in such fine condition.

"The rainfall up to date has now amounted to nearly 2 feet, being distributed as follows, since 10th June:—

June 10th to 30th	8·95
July 1st to 31st	9·80
August 1st to 8th	4·30
Total ...	23·05"

23. The following is Mr. Wright's report of the Sewan sub-division:—

"The weather during the first week of the fortnight was bright and sunny, but during the second week it has been cloudy, with occasional heavy showers of rain. The rainfall, as measured at Sewan during the fortnight, was 1·61 inches, but it has been heavier, I believe, in places in the interior.

"The bright hot sunny weather we had for about the last three weeks of July, was at first all that could be desired for the crops after the heavy rain we had had previously. as it enabled the ryots to clear their fields of weeds, which had begun to choke the young plant; this caused the crops to grow for a time most vigorously, but the long continuance of the dry weather was at last beginning to tell on them, and but for the timely fall of rain, which commenced on Sunday last, and has continued on almost every alternate day since, the bhadoi crop would have turned out a very poor one. The rain we have had has saved the crop, and it now looks in excellent condition."

"Murwa is ripening fast, and in some places has been cut and is being eaten by the people. Tengoonee, sawan, and bhondali paddy are also ripening. Indian-corn is in flower, and has also in places begun to bear fruit.

"The bhadoi crops are all well advanced, but the aghanee dhan is backward owing to the want of heavy rain. Very little of it, and that only on the lowest lands, has been planted out as yet. Most of it is still in the nursery beds, and there it will have to remain till we get a very heavy downpour of rain to flood the fields, into which it has to be transplanted."

The following is Mr. Rattray's report under this head:—

"The rainfall has been very deficient during the past fortnight; so much so, as to cause great anxiety as regards the prospects of the crops. Within the last three days, however, there have been passing showers, and the early crops (bhadoi) have been saved. Much rain is still required for the rice crop.

"Indian-corn, murwa, and other early crops, are close upon maturity, and are in fact being gathered in some parts of the sub-division. The outturn promises a good harvest. A seasonable fall of rain within the last two or three days has saved these crops, which were in an exceedingly critical condition. The transplanting of paddy is in a backward state. Low lands have been planted out to some extent, but rain is much wanted, and the high lands are lying uncultivated. Villagers have been obliged to resort to artificial irrigation in their nurseries, a most unusual proceeding for this time of the year, to save the young paddy plant, which cannot be transplanted on the high lands for the want of sufficient rain."

24. Concerning the Hutwa sub-division, Mr. Hodgkinson writes as follows :—

"The rainfall at Hutwa during the fortnight is given below :—

28th July	·10	7th August	·20
30th "	·06	8th "	·40
31st "	·02	9th "	·19
3rd August	·02		
5th "	1·64		4·19
6th "	1·36		

"The want of rain in the earlier part of the fortnight under review led to grave apprehension being entertained for the crops; but although more rain is much required for the rice planting, the bhadoi crops are now as a rule everything that can be desired. The general harvest has, however, been retarded a few days.

"The loss on the Gunduk dearahs has been very much less than was anticipated. The cheena crop (largely grown) had been gathered before the flood came. The greater part of the makai recovered itself, and much of that portion of the rice which was thought to have been destroyed is throwing out new shoots except in low lands, in which a crop rarely escapes destruction. The total loss is now estimated at less than two annas of the whole outturn of food-grain in this tract."

25. *Condition of the People.*—The condition of the people remains much as it was The severity of the pressure on them in parts is indicated by the clamour of the ryots to be supplied with grain at once. At Sewan, the ryots with indents for rice, sooner than be kept waiting while the rice bags were searched for, preferred to take the coarser grain as it came to hand, in order they that might be served more quickly, notwithstanding that such grain is advanced from the Government golas at a price considerably higher than that at which it can be purchased in the markets. I have had the advantage of seeing recently the managers of Pertabpore and Togapore factories, in the Sewan sub-division, and certainly their information does not coincide with Mr Wright's report as to the absence of distress in that sub-division. To show the danger of trusting to zemindars for the relief of their ryots, I may quote the following from a letter recently received from the manager of the Barhogah factory, in the Bussuntpore thana He writes:—"The assamees of a village called Suddee came to me yesterday. I had given their malik Rs. 1,000 worth of grain some time ago, but he had put them off with promises, and now they said they were on the verge of starvation, and certainly their appearance bore out the truth of what they asserted." Happily, everywhere large grain advances to the ryots have been, and are being made, and another month should see us safely through the crisis; though with exhausted golas only being gradually replenished, the time has been an anxious one of late. It is to be feared, however, that in the inundated tracts measures of relief will have to be maintained for a longer period than was anticipated; as in Dighwara, which is not a rice-growing tract, the ryots will, it is apprehended, have no crops to carry them on till they can gather their rubbee crops. It is fortunate for them that their last rubbee harvest was an excellent one; still they are likely to need assistance before long.

26. Regarding the Manjhee sub-division, Mr. Tonnérre writes as follows under this head :—

"The more I see of the people, the more convinced I am of the danger they were in. "From the village of Kulhova, in the Bugowrah circle, a number of ryots came to me for their advances, which had been retarded. They were most certainly much underfed, and the ribs of most of them could be easily counted. These men could not possibly have escaped, left to their own resources. I, of course, had their grain given to them at once, and they received it on that very day.

"In Chainpore, I met a man in good health apparently, but quite emaciated. In reply to my questions, he said that the illness he suffered from was want of food.

"I told him to go to Ekma at once, to be entered in the list of the poor. He has been relieved.

"There is now a greater feeling of ease owing to Government advances wherever they have been received, because increased employment, the payment of which is afforded by means of Government grain, is being given by those who possess lands to the laboring classes.

"Taking the population at 16 annas, about 3 annas show unmistakeable symptoms of suffering from want of a sufficient quantity of food."

27. From Pursa Mr. Barry reports :—

"The condition of the people does not call for any special remark, and is, I am glad to say, apparently not any worse. The one absorbing occupation of tending and dressing his fields, takes up the whole time of the ryot, and if he does this duty properly (and the exceptions are few) he has no time for anything else.

"The ordinary ryot looks forward hopefully and cheerfully to the coming time of plenty, and with the abundant advances of Government grain, and the ripening murwa and sawan, the acute pressure of distress has either been altogether removed or will gradually become less and less.

"The crowds of ryots for advances have melted away to a few stray applicants; and as the advances have been made rapidly and systematically, it is believed that the crops have not suffered in the slightest in consequence of the absence of ryots from their fields.

"The condition of the people on the relief gangs is very much the same, and shows no improvement. I have given clothes to large numbers of the more naked among them, principally old women and children. One or two of the gangs on the Dighwara and Jelalpore

road I found in very fair condition ; mostly petty cultivators, or their wives and children, eking out a livelihood in this way."

28. Mr. Hudson writes :—

"Mr. Cosserat, of Rampore, thinks that the people are harder up now than they have ever been, and will stand in urgent need of assistance throughout this month and September. He tells me that he has remarked women and children in his compound engaged in gleaning the scattered grains of rice on the spot where the grain has been distributed from his gola. I had myself remarked this at Balah factory, when I was there before the rains commenced, and alluded to it in a former report. It must undoubtedly be accepted as a sign of suffering in the very poorest class. But I do not lay so much stress upon it myself, for the register of gratuitous relief is freely open to all, and Mr. Cosserat is indefatigable in the discharge of his relief duties."

29. The following is the report of the Sewan Sub-Divisional Officer :—

"The condition of the people continues good, and with the prospects of an excellent bhadoi harvest before them, also with a supply of grain (received from the Government stores) in hand sufficient to meet all their present wants, they are, on the whole, in a cheerful state. Charitable relief is given to the poor who are unable to work, at the several relief centres in the division ; and for those who are able and willing to work, employment is provided on the relief works, which are still being carried on, if they cannot find work elsewhere."

Under this head Mr. Rattray reports as follows :—

"The condition of the people has not changed in any marked degree since my last report. Everything at present depends upon the abundance or scarcity of rain. The Government advances of grain have been given out throughout the sub-division, and with the relief-works in hand, combine to keep the mass of the people well supplied. Distress of a serious nature is not reported from any of the relief circles. Every endeavour is being made in the different relief circles to reach those requiring gratuitous relief, and such relief is now extensively given."

30. *Known Cases of Misery and Starvation.*—There have been no reports of deaths by starvation, of which official confirmation has been obtained.

31. *Grain-thefts or Robberies.*—There have been 15 cases of grain-theft during the fortnight. The accompanying comparative statement shows the number of cases involving an element of theft, committed during the month of July 1872, 1873, and 1874, respectively, as required by Government Circular No. 4081, of the 20th December last.

B.—Relief Works.

32. The annexed statements* show the relief works in progress and the number employed thereon. The mean daily number employed during the fortnight was 94,089, and the number on the last day was 76,296. The mean daily numbers both of the previous and of this fortnight, and the number on the last day of this fortnight, are shown below for each sub-division :—

*Will follow.

J. S. D.

Sub-Divisions.	Mean daily number of the previous fortnight.	Mean daily number of the present fortnight.				Number of persons employed on the last of the 14 days.	Remarks.
		On piece-work.	On subsistence wages.	On charitable relief.	Total.		
1. Chupra	24,048	723	21,305	6,465	28,493	33,932	
2. Manjhee	13,101	667	9,623	....	10,290	8,390	
3. Musrukh	62,986	3,136	24,040	11,442	38,618	18,007	
4. Pursa	5,056	612	5,363	....	5,975	6,107	
5. Sewan	17,675	7,170	1,567	....	8,737	7,884	
6. Haltona	2,507	....	...	....	1,976	1,976	
Total	125,373	12,308	61,898	17,907	94,089	76,296	

33. The ordinary rate paid for piece-work in this district is Rs. 1-9-0 per 1,000 cubic feet ; but as a matter of fact, from the difficulty of introduing piece-work everywhere, the majority of those on the relief works are still paid by daily wages at mere subsistence rates, so that it cannot be said that the continuance of the relief works interferes with the demand for field-labor in any way.

34. Regarding the Chupra sub-division Major Jackson writes :—

"Relief works still go on, but to a reduced extent. All able-bodied work-people have been returned to agricultural labor."

35. Of the Manjhee sub-division, Mr. Tonnérre writes thus :—

"I believe that the able-bodied have left the relief work for agricultural work, and the numbers on relief works ought to diminish still more, owing to the preparation of rubbee lands, which is being much favored by the rains, which have now commenced.

"In Ramgurh circle, there are very few indeed still on the relief works.

"Six Goruckpooree pice are paid together with 'lookum,' which is a quantity of *suttoo*, or some other grain ground down equivalent to the value of another pice, for a day's weeding. This shows what inducements are held out to people to abandon relief work where they get but the bare necessities of life.

"In the case mentioned in the last report, where insufficiency of labor was complained of, the Circle Officer took the requisite number of men from the nearest relief work and remedied the evil at once.

"No such complaints have been made to me during the fortnight under review."

36. Mr. Barry, in charge of the Pursa sub-division, reports :—

"During the 14 days I have been over—

The Makair and Sitalpore road ;
The Sitalpore and Dighwara road ;
The Dighwara and Dalipchak Ghaut road ;
The Sitalpore and Sonepore road ;
The Dighwara and Jelalpore road ;
The Tehtee, Arna, and Sootihar road ;
The Pursa and Barwey road ; and
The Tehtee, Jelalpore, and Pursa road.

On all these roads I am glad to say piece-work has been freely taken up, except on the piece from Pursa to Makair (which is not adapted to piece-work), and on the Sitalpore and Sonepore road. I am of opinion that on this latter road, for the earth-work at least, piece-work should be gradually and gently, but firmly, introduced. The weak and infirm can be employed on daily wages in turfing the road.

"I do not consider it would be safe to close any of these relief works, for though some one or two of the gangs look robust and healthy, yet most of the gangs consist only of the poorest of the poor in wretched plight ; and to close them indiscriminately would cause the greatest hardship.

"I have no doubt that some of the coolies work a little in their own or other fields in the morning before going on the relief works. but as the subsistence wages are a mere pittance, I would let this pass. I am satisfied that many poor ryots, while working hard in their own fields, send their wives and children on the Government roads to earn the daily meal for the family, and thus, while the husband is working hard, but earning nothing (*i.e.*, no immediate return) in his own fields, the wife and children become the bread winners, and earn sufficient for the evil day that is passing over them."

37. From Hutwah, Mr. Hodgkinson writes :—

"Except in the north-western tuppas, the number on relief works is quite nominal, ample employment being still found for the people in the fields. An increase in the number may be expected next fortnight."

38. *State Emigration to British Burmah.*—There are 25 emigrants in the depôt here, awaiting transmission to Calcutta.

D.—Storage of Government Grain.

39. The usual statement accompanies. The fresh supplies of grain are now coming in in increased quantities, and are pushed forward rapidly to the different golas, which they generally manage to reach just when the golas are on the point of exhaustion. The grain, in fact, is being received only just in time, and I have written to have the daily despatches from Calcutta increased to six or seven thousand maunds, if possible.

40. Under the head of Transport and Storage of Grain, Major Jackson reports :

"Reports have been called for and received from the Group Superintendents as to the import of grain into the district. With the exception of small quantities going to the village bazars periodically, all report no importation into the district along the main channels of communication. If going on at all, it is probably by river carriage outside of the sudder sub-division. In accordance with the orders of Government, I have looked into the state of storage of grain at the central depôt at Chupra Serai. Old stocks have been issued, and only about 1,500 bags remain of new. These are stored in pucca built rooms with intervals between the bags for ventilation. As issues go on daily, there is no fear of loss from heating or insects."

41. Mr. Tonnérre writes thus under this head regarding Manjhee :—

"Owing to the grain received during the fortnight, the distribution has everywhere been rapidly carried out.

"Ten thousand maunds have arrived at Ramgurh by boats, and will in three or four days have been all distributed.

"Five thousand five hundred and seventy maunds have arrived at Ekma. The other golas at Manjhee and Bugowrah have also received supplies, and I hope that all this grain will soon have been disposed of.

"With reference to the heating of bags containing Burmah rice, I have to state that no such cases have come to my notice. The rice is given out as fast as it comes in, and has no time to spoil. A few bags of wheat were found to have been so damaged on arrival. They had been wetted on the way from Chupra and so were damaged. The heat was so great that it was not possible to keep one's hand inside the bag.

"With the exception of the above, there have been no cases of grain spoiling through being heated."

42. Concerning the Pursa sub-division, Mr. Barry reports:—

"The heavy drafts made on the Pursa and Amnour golas cleared them out early in the fortnight, and now the Mirzapore gola is again in nearly the same condition. The grain turned out of good quality, not in any way heated or injured by damp; the ventilation is good, being secured by holes in the walls; the rice has not suffered from insects, and any mixed grain that suffered in this way has been disposed of long ago; in short, the golas are all but empty. During the fortnight I have inspected all the golas but Amnour, which is empty. Within the last day or two, grain has begun to arrive in small quantities."

43. Mr. Hudson, of the Musrukh sub-division, writes:

"The golas, which have been all closed during the past fortnight against tuccavee advances, are now reopened, supplies having been everywhere received. There were 1,900 maunds of grain in the Baneapore gola on the 5th, and 4,500 maunds in the Bussuntpore gola on the same date. The latter gola has received 9,041 bags of rice from Tilpahghât, Sutturghât, and Gobindgunge, since the 3rd instant, and on Saturday, 8th, it contained 16,436 maunds of grain."

44. From Sewan, Mr. Wright reports:—

"There is very little rice left in the golas in this sub-division, and there is no fear of its getting seriously damaged, as it will be used up in a very few days."

E.—ADVANCES OF GOVERNMENT GRAIN.

45. The statement accompanying exhibits the advances of grain made up to date. These advances have, in many places, been delayed by the want of grain, and the urgency of the need is shown by the rapid manner in which the grain is cleared away as it arrives at the golas. The manager of the Chetowlee factory in Bussuntpore writes of "the rush there is now" (on the arrival of fresh grain at one of the golas): "chota maliks, putwarees, and assamees form one huge noisy crowd, all clamouring to be served first."

46. Under this head, the following is the Chupra report submitted by Major Jackson:—

"The advances in this sub-division are gradually coming to an end. In the portion I have retained in my own hands, 53 villages remain on the roll as not disposed of, but of these the lists and requirements of 42 are ready. The villagers, however, do not now come forward as they did in the beginning of the season, only one or two putting in an appearance every other day, and it will most likely be found that only about 10 more villages will now ask for assistance. These will complete the advances in the Chupra circle. Arwa and Gurkha have a balance remaining, but probably for the same reason, viz., the prospects of a favorable harvest, most of these will not apply."

47. This favorable prospect has, as already noticed, been effected as regards part of the sub-division by the recent inundation.

48. Of the Manjhee sub-division, Mr. Tonnérre writes:—

"The sum total of the grain required for this sub-division has reached the figure of 86,633 maunds, and it may be necessary to increase it, because villages which at first preferred trusting to their maliks, now wish to have advances from Government, because the zemindars do not adhere to the promises made by them.

"There were several absurd rumours floating about concerning the distribution of grain; zemindars feared a change in the permanent settlement, ryots apprehended that their lands would be given up to indigo, where the Circle Officer was a planter, or appropriated altogether, where a zemindar was the Circle Officer.

"I have known of villagers applying for advances only when assured that their lands were safe, though they were in need of them.

"Excluding those villages in which the maliks supply what the ryots require, there are in this sub-division but five villages in the Bugowrah circle which have not as yet received grain orders on the golas. All the rest are rapidly drawing their respective allotments. 41,008 maunds, Bugowrah circle excepted, have been given out in advances up to the present time. I am constructing sheds to allow of weighing going on when it rains.

"The list of zemindars who have given security for their ryots has increased during the fortnight, several at a distance sending their mukhtears with powers-of-attorney to sign for them.

"On the strength of the above, I have reduced the rates at which grain is being given out to ryots.

"This measure is most acceptable both to zemindars and ryots: to the former, inasmuch as they know that their lands will be thoroughly brought under cultivation; and to the latter, because their means of doing so are increased.

"There is no difficulty about giving grain where rice was applied for by the ryots; they take whatever comes to hand first and, in the eagerness to be helped; the highest *bidder* in many cases receives his grain first.

"I have every reason to believe that goladars have taken advantage of their position to extort black-mail.

"Two goladars have been dismissed, and I hope that such practices have been stopped.

"The repayment in three instalments has been promulgated throughout the sub-division, and is very much approved of by the ryots. They agree that it would have been impossible for them to pay all at once, and I have no doubt that they will repay the value of what they have received.

"To ensure this, I have as much as possible put a village and all its tolahs together. I have by these means reduced the *number* of villages, but increased the value of the *collective* security. In the Pursa circle, for example, properly speaking, there are 80 villages and tolahs, but having tacked on the tolahs to their villages, I have reduced the number to 65.

"The ryots seemed to think at first that Government wanted to repay itself out of their crops, and I had received petitions wishing to know how the murwa, which was ready to be cut, was to be disposed of. Instructions were at once given to Group Superintendents to let ryots know that the Government had no wish to appropriate their crops, but wished to be repaid in cash."

49. From Pursa Mr. Barry reports:—

"Owing to the want of grain in the golas, this work has been brought to a standstill during this fortnight; and except the testing and investigation of a few remaining lists, little has been done. The ryots finding the grain was exhausted, have held aloof; but as soon as the exp cted grain arrives, they will come in shoals again, for those whose grain cheques are 'unpaid' are all on the out-look.

"I have been on tour during the best part of the fortnight, but have received few applications for advances; and the Relief Superintendent, Mustausin Billah, whom I left in charge here with authority to take petitions, only received about 40 fresh applications, from which I infer that few more applications will be made. Most of those who want grain have applied for it, and it only remains for us to dispose of those applications which are still pending or undergoing enquiry. And it is not improbable that we shall find that villages in which lists have not yet been prepared, or in which the ryots themselves have not come forward for grain, will not, at this advanced season of the year, require or ask for assistance from the Government stores. Of late no less than 23 villages have been reported by Group Superintendents, in which the ryots say they do not require Government advances, or in which zemindars have given advances to their ryots.

"During the fortnight I have visited all the circles. The moonsif has all but completed his lists, having advanced 4,228 maunds in 43 villages, leaving 12 for disposal.

"Sheikh Abdul Ali, of Sitalpore, has 31 villages left; most of his lists have come in, and it is probable that many of these villages do not require grain; he has advanced 3,620 maunds in 54 villages.

"The English Circle Officers of Nowadah, Arna, Tehtee, and Jelalpore, have finished their lists, and are now giving out the last instalments of grain. The returns from Arna have not yet come in As for my own circle, I have, during the fortnight, advanced 1,588 maunds in 30 villages, leaving 20 villages in which applications have not been made, or whose lists are undergoing investigation. From the above, it will be seen that the brunt of the work is over, and it only remains to finish up those villages which have been from any cause omitted, and to complete the remaining instalments.

"In all 62,620 maunds to 30,873 persons in 444 villages, have been advanced, and under heading D, Charitable Relief, 123 maunds and 30 seers have been given away. But all this larger quantity has not yet been drawn from the golas, as I have no less than 100 cases in which the ryots have not yet come for their cheques, though notices have been issued to them. This is in great measure owing to the fact that the golas ran short of grain about 10 days ago, and it may be that, from prudential motives, many cultivators are unwilling to draw the Government grain, except in the very last resort, when they can hold out no longer. If they do not need the grain sanctioned, all the better; but if the worst come to the worst, they know they are safe with the allotment in their favor.

"I have, however, again issued notices to all concerned to take away their allotments within 10 days, as the grain is now beginning to arrive In South Kusmer, I considered it would be unnecessary to make any advances; but since writing the above, I have heard (and to-day the news has been fully confirmed by Sheikh Abdul Ali in person) that during the last four days the whole of this region has been submerged by floods, and the damage done to the cheena and makai, &c., is very serious. I shall visit the flooded tract at once, and report separately. It will probably be necessary to give the ryots some assistance."

50. Mr. Hudson, in charge of Musrukh, writes:—

"Applications for advances have latterly become very slack. They do not now average more than three or four, at most, per diem, exclusive of individual petitions under clause (*d*) of the Central Relief Committee's notification. I have now only 17 applications pending; and of these seven have been lying for weeks, waiting for the applicants to appear. I looked forward with some confidence to completing my own advances within the next fortnight."

51. Mr. Rattray's report from Sewan is as follows:—

"With the exception of about 59 villages, the village lists for grain advances have been completed. The following are the allotments made up to date in the different circles mentioned:—

No.	Circles.	Number of villages.	Quantity of grain allotted. Mds.	Srs.	Chs.
1-2.	Saddowah and Shahpore	100	15,188	1	0
3-4.	Jogapore and Chowki	78	9,494	25	0
5.	Maharajgunge	30	2,386	0	0
6.	Madrowli	41	7,562	7	8
7.	Bhagar	57	6,522	0	0
8.	Hurpore	46	7,914	10	0
9.	Trihalpore	36	1,488	0	0
10.	Goyaspore	55	5,935	29	0
11.	Sohagrah	29	2,046	10	0
12.	Mairwa	96	3,538	24	0
13.	Kurbullah	67	9,823	15	0
14.	Manjha	81	5,283	13	0
15.	Bansopali	44	3,899	0	0
16.	Hajipurwah	42	4,307	24	0
17.	Gaighát	81	8,600	20	0
18.	Zamanpore	68	4,784	30	0
19.	Dhanowtee	58	5,451	12	0
20.	Goonewan	57	1,901	20	0
21.	Sewan	54	8,611	10	0
22.	Pertabpore	63	7,640	30	0
	Total number of villages in which the lists have been prepared ...	1,183	1,22,379	0	8

"As mentioned before, there remain about 59 villages in which the lists are under preparation, and for which the allotment of rice will be about 12,000 maunds. The actual quantity of rice in the hands of the people received as advances from the Government, amounts to 97,052 maunds 11 seers and 9 chittacks, and includes advances made in separate bonds to landholders, independent of the village allotments.

"I am unable to submit with this report the return called for in the Government Circular of the 22nd July, No. 4640—S.R., owing to the want of certain information which has been called for from the different circles."

52. Concerning the Hutwah sub-division, Mr. Hodgkinson writes:—

"The second instalment of advances has been given out in nearly every village that requires it. The total amount distributed under this head is 96,474 maunds 9 seers and 1 chittack."

F.—Charitable Relief.

53. The number receiving this description of relief is shown in the annexed statement. The total number is now 60,231, the increase being mainly in Musrukh; but much of it is believed to be nominal, and due to defective returns having previously been supplied.

54. Under this head, Major Jackson reports:—

"The poor-house in Chupra remains the same. It is not popular, and even the bazar beggars, who might be thought glad to take cooked food, prefer to obtain pice in the bazars, and will not frequent it. Cotton-spinning continues to employ large numbers. The weavers objected to half anna per yard as too small an allowance, and the rate has now been increased to 7½ pie, at which rate the surplus thread will be converted into cloth."

55. As those requiring relief are relieved in their own villages, there is no need to resort to the poor-house, and most natives have a strong prejudice against relief in this form."

56. Of Monghyr, Mr. Tonnérre writes:—

"There are now 3,503 persons receiving gratuitous relief in grain, and 1,017 women who spin cotton. I have also had the thread converted into cloth, which is being given out to those who need it. Weaving has afforded employment to 'jolahas' numbering 136.

"The recent orders of Government to diminish the numbers on charitable relief will be borne in mind, but none are relieved unless in absolute want; so reductions are not yet practicable.

"The native doctor whom I sent on tour reports distress in the Chainpore and Ramgurh circles; he will soon visit the other circle.

"According to the recent instructions, one pice is given daily to all recipients of charitable relief in addition to the grain to enable them to buy firewood, salt, and other commodities.

57. From Pursa Mr. Barry reports:—

"During the fortnight everything has gone on satisfactorily.

"There are altogether 7,237 persons on the registers, and 3,485 women and 171 jolahas have received assistance; while money has been given to 177 and grain to 3,404 persons. I have again directed the Circle Officer at Kusmer to distribute grain instead of money, and have supplied him with cheques for grain.

"The Circle Officer at Amnour seems to be doing good, having distributed grain to 78 persons. I have myself given away 123 maunds and 30 seers under heading D as charitable advances to about 90 persons, and during the fortnight I distributed clothes to 57 poor women and children, mostly working on the roads.

"Mr. Tullock, of Nowadah, is using up the grain he bought for Government in distributing charitable relief, and also in making advances to ryots. It was getting slightly damaged by insects, but I am glad to say very little of it is left.

"All the Circle Officers understand their duties thoroughly, and take pains to watch that no one gets relief who is not really in distress, or who is able to earn a livelihood.

"I have distributed an aggregate of Rs. 2,400 to the various Circle Officers according to their requirements."

58. And the following information is supplied by Mr. Hodgkinson in connection with the Hutwa sub-division :—

"The accounts and estimates prescribed are herewith forwarded. The average daily number in receipt of charitable relief of all kinds during the fortnight has been—

Serial No.	Name of Circle.	Average number receiving cooked food.	Number receiving uncooked food.	Number receiving food in payment of wages for cotton-spinning relief.	Number specially relieved by village officers under (D).	Total.

SYUD MAHOMED FUZL,
Manager.

No. 2717F, dated Motiharee, the 11th August 1874.

From—W. B. OLDHAM, ESQ., Officiating Collector of Chumparun,

To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to forward the fortnightly narrative of Scarcity and Relief in the Chumparun District for the fortnight ending on the 8th instant. Its despatch has been delayed by one day, owing to the non-receipt of the Bettiah narrative till the night of the 10th instant, though the Sub-divisional Officer reports that it was despatched in time.

The delay enables me to report that, since the narrative was begun to be written, there has been a most favorable fall of rain in the Motiharee and Bettiah Sub-divisions, and Mr. Howe telegraphs equally good news from Ramnuggur. There is reason to believe that this opportune fall has been general in the South and East, and there is every prospect of its continuance.

A.—STATE OF THE COUNTRY.

The appendix contains a statement (A) shewing the kind and prices of grain at different bazars throughout the district. Except in Ramnuggur, all these markets are very fairly supplied, and this fact and the comparatively low rates are the most favourable signs of the fortnight, at the close of which a panic prevailed throughout the district on account of the prolonged break in the rains. These statistics are the more significant, because, except in the Ramnuggur Sub-division, Government prices have everywhere ceased to rule the markets as has hitherto been the case. In the other four sub-divisions stocks have run so low that at all golas sales have had to be restricted, and in many ceased altogether.

The weather has been everywhere the same. The continuance of the sunny interval at first caused no anxiety, and was favorable by allowing weeding to be carried on while rain was confidently expected. The clouds, however, kept gathering and again dispersing, and at the end of last week the prospects of the crop were very critical. The latest accounts report, however, that there have been heavy showers in all parts of the district within the last two days, and it is raining with every appearance of continued wet while this is being written. Meanwhile, the long delay has, except in Bettiah and Ramnuggur, caused some damage, particularly to the sathidhan, in which the ear was forming; and though generally the bhadoi crop may now be considered safe, there has been nothing like the general downpour which was required, and in the east and south of the district the outturn will not come up to what was expected. Some of the maize plants on high grounds have withered, and the partially formed ears in some of the millets have dried up.

Murwa, sama, and kodo are now everywhere being harvested, and green cobs of the maize exposed for sale in some markets, while a large proportion of the crop itself will be harvested within the next fifteen days. A good deal of the early rice called "bhandule" has also come in, and is being sold at from 20 to 14 seers for the rupee.

The prospects of the main early and late rice crops are, however, anything but safe, except in the north of the Motiharee Sub-division, where there has been copious rain. Elsewhere, transplanting had everywhere been discontinued on account of the hardness of the ground. The partial showers already referred to have been effectual in keeping the plants alive, and there need be no serious anxiety on the subject unless the general fall of rain, which is now so anxiously looked for, does not come before the end of next week. The pressure has, of course, been severely felt, and has manifested itself in the closing of their stores by the mahajuns and clamorous applications for advances on all sides. But, except Mr. Weekes, in the Gobindgunge Sub-division, none of the officers report that there has been any change in the previous good condition of the people, and, wherever works have been opened at the subsistence rates of half a seer of clean rice for adults, they have failed to attract labourers. Mr. Weekes reports that he has found some people collecting grass seeds for their food, and that some persons have died lately of dysentery. On visiting myself the part of Mr. Kilby's Sub-division (Dhaka) in which the panic first arose and where relief works had been re-opened, I found that only some 20 women and children had attended, and that on learning the rates they said they preferred to gather these grass seeds, of which they could collect from 2 to 3 seers in a day; while the local residents from whom I made enquiries said that this food was not unhealthy, though certainly it is not resorted to in ordinary years.

I have not heard of the prevalence of dysentery in any other sub-division besides Govindgunge. There have been some cases of sporadic cholera in the Dhaka and Ramnuggur Sub-divisions, in all 88 cases, of which 34 were fatal; but there are no signs of it in anything like an epidemic form. It is the general opinion that there have been far fewer deaths this year than usual.

B.—RELIEF WORKS.

There is plenty of work remaining to be done in all the sub-divisions, but, notwithstanding the pressure occasioned by the drought and the completion of so much field work, the demand for work is still very small, and after the rain, which has so opportunely fallen, may not be expected to increase.

In the Motiharee and Bettiah Sub-divisions all work under the circle officers was closed in the first week of the fortnight. The bulk of the labourers shewn as employed under the Department Public Works are not relief labourers properly so called.

In the Dhaka Sub-division, also, only a daily average of 151 labourers under the circle officer is shewn. All these people have been working at subsistence rates. The remainder are either skilled workmen or labourers paid at ordinary rates, and engaged in finishing bridges and emergent works.

In Ramnuggur, too, all the labourers are engaged in finishing emergent works.

It is only for the Govindgunge Sub-division that a long list of works under the Circle Officer is shewn, and nearly all consist of petty village conservancy works, and the completion of bridges on village roads. The labourers have been paid at low contract rates in grain. Since the recent orders of Government restricting rates to subsistence allowance, Mr. Weekes reports that he has only works going on at five of the villages shewn in this list. The work-people under the Department Public Works and under himself are not shewn separately; but the Executive Engineer tells me that there are now only 11 persons, all skilled labourers, working in this sub-division under his department.

Generally, therefore, it may be said that throughout the district relief works are only maintained as a precautionary measure.

C.—Transport of Food.

The operations under this head have been confined to the re-distribution of grain within the district and to the exportation of the surplus grain in the Ramnuggur and Bettiah Sub-divisions to Sarun. The whole quantity called on for Sarun from Mr. Weekes' Sub-division, Govindgunge, has been despatched. The despatch of the rest is going on as fast as it can be conducted, the only delay being on the part of the Sarun contractor, who has to supply the boats, and who, Mr. Howe reports, has most unfortunately quarrelled with Mr. Chretien at Bugaha, from whom he could have derived the greatest assistance, considerable delay being the result. Three laden boats also have been wrecked on their passage down the Gunduck. Mr. Fiddian is enquiring into the circumstances, and I have called for, but not yet received, a report on the subject.

The arrangements for these despatches to Sarun were made by the sub-divisional officers at Govindgunge at the conference with his Honor the Lieutenant-Governor there, but apparently both Mr. Samuells and Mr. Howe mistook their requirements. The former has since telegraphed, protesting against the removal of the embankment grain, and urging that 15,000 maunds were urgently required for his sub-division, as Mr. Howe had refused to let him have more than 5,000 maunds of 20,000 maunds, of grain which at Govindgunge he had arranged to send from Bettiah to Ramnuggur. With the Commissioner's sanction, Mr. Samuells was at first authorized to detain as much of the embankment grain as he thought absolutely required, but subsequently this permission was withdrawn, and he has been directed to allow the whole of it to go as originally arranged. The transport arrangements are altogether in the hands of the Collector of Sarun, and no delay has taken place through these contradictory orders. Mr. Howe's protest, which is embodied in his narrative and has reached me to-day for the first time, is as follows:—

"Under Government orders we are sending one lakh of maunds to Sarun. When I was at Govindgunge to meet His Honor the Lieutenant-Governor, I was asked how much we could spare. Considering previous, and the then actual and probable expenditure, and bearing in mind how outlying a tract Ramnugger is, and how difficult it would be to dispose of surplus stores, I said we could spare one lakh of maunds. This would leave us 68,000 maunds, which I considered would fairly bring us through the famine. The question of the possible failure of the rains did not then press itself on us, as prospects were magnificent. But the change I have described under Heading A. completely alters the circumstances of the case. The demand for the grain is enormous, and all the grain I have can, with advantage to Government and the people, be disposed of here. In view of possible contingencies, it would be fatal to denude this outlaying tract of grain, and I would therefore most earnestly recommend that more grain be despatched to Sarun. According to the return, we have up to date despatched 28,524-25-8, but I have just heard from Mr. Fiddian that much more has been sent since these returns were prepared. I do not think we can safely spare more than 40,000 maunds, and would solicit sanction to stop after this amount has left Bugaha."

Mr. Howe reports that, notwithstanding this opinion, he has been making every effort to effect the despatch of the consignment originally arranged for.

On receipt of this, I at once telegraphed to Mr. Howe to despatch the whole amount as originally arranged for to Sarun, contracting his issues as may be necessary. I have this day received a note from Mr. J. S. Drummond, which shows the needs of Sarun to be very much more urgent than our own. As Mr. Howe had a reserve of 68,000 maunds after making over one lakh to Sarun, and as he reports that he is making large wholesale sales, it is obvious that by contracting his issues he will have enough in store to prevent the likelihood of any starvation-deaths till the next crops, however below the anticipated results they may be, come in.

Mr. Samuells, it appears, required the amount he wished to detain for advances. There is still a quantity of private grain in his sub-division, which, if it be absolutely necessary, he can be authorized to take over, a course which will save his having to embarrass Mr. Drummond, and there is also some 57,000 maunds of embankment and canal grain, the bulk of which is available to save at least any deaths or extreme misery from starvation occurring.

D.—Storage of Grain.

In the Govindgunge sub-division Mr. Weekes' stocks had suddenly run down from 37,000 maunds on the 25th July to 3,000 maunds on the 3rd instant. On acertaining this, I at once went out to the eastern part of Mr. Weekes' Sub-division and the southern part of Mr. Kilby's. The latter has been able to give 1,000 maunds of his reserve to Mr. Weekes' and I have given him 2,000 more from the Motiharee Sub-division. At the same time I authorised him to take over 4,000 maunds of grain imported on advances from Government by Mr. M. N. Macleod, and stored at Pipra in the Govindgunge Sub-division, and also got permission from Mr. Gibbon to stop 5,000 maunds of his privately imported grain in its course up the river to Bettiah. Both these steps have since received the Commissioner's sanction. Mr. Weekes wishes to have a still further supply, and I have written to the Commissioner asking that he may be supplied with 15,000 maunds more by river. In the eastern and southern parts of the Govindgunge Sub-division the bhadoi crops are both very poor and fully a month behind what they are in the rest of the district, and it is in this tract that supplies had fallen short, the chief expenditure being in direct advances to ryots, under which head Mr. Weekes has consumed nearly 60,000 maunds up to date. In consequence of this general falling short of stocks, sales to the public have had to be restricted and at many golas have ceased altogether, while advances have been very much restricted. On the stoppage of sales the market at first rose considerably, but almost immediately fell to the present favourable rates without further interference.

The Motiharee Sub-division has a full reserve equally distributed. The border country is now quite safe, and steps will be taken to empty the two border golas within the month.

The grain is generally in very good condition. The mixed grains only have been attacked by weevils, and both they and the rice, injured by damp, have been disposed of. Heat damp has not appeared anywhere.

E.—Advances to Ryots.

As stocks have run low in all the sub-divisions but Ramnuggur, I have asked the sub-divisional officers to stop all advances except to zemindars and substantial mahajans, till they had tried the test of opening relief works on subsistence rates. If these were found to attract adult male labourers, advances were authorised to the latter.

There is a good deal of divergence of opinion on the subject. Mr. Howe, with whom I entirely concur and who has not been obliged to restrict his advances from lowness of stocks, has stopped them of his own accord, because he thinks they have done their work and are no longer necessary to keep the people from starvation, while field work has, through them, been allowed to go on. There is reason to believe that in many cases applicants who really could get supplies from their mahajans come clamorously to us because of the favourable terms which Government grants, and because, having once broken loose from the mahajans' yoke, they do not wish again to come under it. This is not, I apprehend, a point with which the Relief Department has any concern. Mr. Weekes, on the other hand, is of opinion that for some months back mahajans' stocks have been a myth, but this is not borne out by the state of the markets in the Govindgunge Sub-division, or by the fact which he also reports that private trade is reviving, and, even if past stocks have been consumed, enough of the present harvest has come in to form fresh ones. On the whole, it is better that direct advances should cease except in those exceptional cases, where the necessity for them is proved by some simple test.

F.—Charitable Relief.

The results of operations under this head are shewn in the accompanying statements. The numbers shew a slight decrease everywhere except in the Bettiah Sub-division, where the Sub-divisional Officer has found it impossible to diminish his numbers chiefly because, owing to the promptitude with which he closed his works, all the labourers who were doing merely a little more than nominal work were brought on his relief lists. The small amount of advances given out in this sub-division has doubtless a great deal to do with the numbers receiving gratuitous relief. Each officer has reported that the lists are scrutinized with the greatest strictness, and every effort has been made to contract operations under this head; but the last fortnight, with the pressure attendant on the drought, has certainly not been a favourable season for doing so.

I regret that the instructions laid down in the Government Circular No. 4640 L.R. of the 22nd July 1874, regarding the shewing of relief expenditure, have only been complied with by the three Sub-divisions of Motiharee, Dhaka, and Govindgunge; and of these the account submitted by Mr. Kilby is not intelligible. From Bettiah a gross account shewing the expenditure up to date has been received. A statement embodying those for the Motiharee and Govindgunge Sub-divisions only is annexed, and every effort will be made to submit the

ct accounts with the next report. The preparation of all statements is very much led by the constant breaking down in the establishments from sickness at this unhealthy of the year, and the great difficulty of replacing vacancies in the Ramnuggur and a Sub-divisions.

G.—Financial Results.

he chief expenditure has been on transport. Grain payments are still made wherever able except in the Govindgunge Sub-division, where it was absolutely necessary to the little grain left for the payment of relief labourers and for charitable relief. The expenditure has been exhibited principally in the sub-divisional returns, and has urred from the advances made to the several officers, and already shewn in the arrative.

Rs. 995 expended by the Executive Engineer, East Chumparun, was on account of for bridges.

Chumparun Collectorate,
The 11th August 1874.

W. Oldham,
Officiating Collector.

Fortnightly Narrative of the District of Monghyr for the fortnight ending 8th August 1874.

A. State of the Country.

The weather during the past fortnight may be said to have been generally favourable. More or less rain has fallen almost every day, and the transplanting of the cold-weather rice has been going on all over the district. The Ganges has risen very high during the past week, and the dearahs have all been more or less submerged. The bhadoi, consequently, as is usual in most years, can only be gathered to any extent as food for cattle. This is no very great hardship, for, if the dearahs are well inundated, there is all the better prospect of a good spring crop, on which these dearahs chiefly depend. Food in the markets throughout the district is plentiful; some hawkers told me this morning that indian corn is cheaper now than it was this time last year, and at Bucktearpore early kirhi is selling at 50 seers per rupee. Vegetables are generally cheap, and any one who can work has no difficulty in getting food. The relief superintendents remark, as I have also myself remarked, that persons emaciated from scanty food, are rarely met with.

There is, however, a good deal of sickness about, both in the town of Monghyr and in the country.

From Luckeeserai Mr. Currie writes: "The want of rain latterly has made the paddy crop very backward. On the other hand, it gave hopes of getting a bhadoi crop off the dearahs; we have just had three days' heavy rain, which must have extended to the Jamooee hills, for the Keul was roaring past yesterday and the day before at a precious pace. This has entirely done for the dearah crop here, whereat the owners weep, but they sow on chance every year, and do not get a crop once in five years. This year their hopes were, perhaps, raised by the advanced stage to which the crop reached, while it was the more important from the short crop of last year. No great harm would ensue if nothing were lost but the dearah bhadoi. The bhadoi crop generally, however, will be a short one, averaging eight annas. It was weakened by the excessive rain, and, while unfit for such a contest, was, at the same time, choked by the rank growth of weeds. This excessive rain was followed by dry weather, which, too late to save the bhadoi crop from injury, has only had the effect of making the paddy crop backward from want of moisture for transplanting. The three days' rain this week will suffice, I hope, for the completion of the transplanting. While the above sounds gloomy, I do not mean to say that there is really a worse lookout than in ordinary years, only it is unfortunate, especially this year, when we want early crops in to ease the markets, that the bhadoi should be short and the paddy backward."

From Bucktearpore Mr. Manson writes: "In last report I stated that there was a promise of more rain, and that the aghany dhan would all be speedily planted out. Unfortunately, the clouds are all passed off with but one shower on the 26th, which the people gladly took advantage of, and about half the aghany dhan was planted out. From that date to the end of the fortnight the weather has been dry and close. I heard many reports that kirhi and marwa, which are just ripening, would be spoiled, and give but an eight-anna yield. These reports, however, I believe to be pure inventions, as we had little showers at intervals, giving quite sufficient moisture for the ripening crop. The marwa and kirhi, will, I estimate, be quite a thirteen-anna crop. Reports were also rife that the remaining half of the aghany seedlings were being scorched up in the nurseries. I have noticed them a little yellowish, but nothing more, and this morning we have had a fall of 2·15 inches, and the rain still continues. By to-morrow evening the remaining half of the aghany dhan will be planted out, and nothing but the most extraordinary dry weather in Bhadra can now damage it. A few light showers during the next six weeks and a good shower in Assin is all that is required.

Mr. Wilkins, at Begooserai, reports: "The crops were much in want of the late rain in the neighbourhood of Begooserai itself. I expect it will do a great deal of good. The crops on the bank of the Ganges, near here, have suffered considerably from the sudden rise of the river. They are being cut for cattle. I also hear that a good deal of dhan sown this year in the bed of the Kabur Tal (the waters of which receded for want of rain) is suffering from drought. A good deal of the crops on the banks of the Gunduk and the Balim have been destroyed by the floods. The Balim is higher this year than I have ever known it before.

Otherwise the prospects are very good; cheena is, in some places, ready to cut. The crops are not at all choked with weeds in this sub-division.

Mr. Money reports from Jamooee: "During the past fortnight I have visited Mahishere, Sona, and Newadi, and the crops both of janera and dhan were doing very well. Fears entertained of too long a spell of fine weather have been dissipated, and the alternate wet and fine weather latterly has been all that could be desired. I went as far as Nurgunge, the hills south-east of Newadi. The crops are more backward there, but are doing well; the area under janera being particularly large. I also visited, a few days ago, several of the Sonthal villages in the Mullehpore taluk. Everywhere transplanting was going on freely, and indian corn very strong and healthy looking. Everything promises as brightly as possible. Many of the upper lands had been sown with chotta jenera, rahur, kudrum, moogh, and undi, all together (the kudrum as a boundary fringe to the rest), and they were coming up well. Very few paddy fields were unsown; all these few will be sown later with rubbee, crops of barley and gram."

B.—Relief Works.

The relief works are now almost stopped throughout the district. A few persons are at work at Jamooee, Bucktearpore, and Begooserai, finishing up the works which have been taken in hand, but no new works are contemplated, and I think the ordinary road cess work will find employment for all.

C.

The only transport of grain now going on is between Luckeeserai and Begooserai. As Mr. Wilkins, however, says he does not want any more grain there, the transport will now be stopped. Grain, which has been lately indented for by the Executive Engineer for payment to laborers on the Tirhoot road, is being supplied from the neighbouring Fegrah gola.

D.

There is nothing particular under this head.

E.

The following amount of grain has been advanced during the fortnight:—

	Mds.
Monghyr circle	262
Bucktearpore circle	4,261
Luckeeserai circle	76,605½*
Jamooee...	.....
Begooserai	12,206¾*
	93,335¾

These advances have been of immense benefit to all concerned. They have enabled the landlords to pay their laborers' wages, as they do in ordinary years, in grain, and they have kept the ryots in good condition, as having sufficient food.

E.

I purpose doing my best, consistent with propriety, towards closing all our relief centres in the district, as I think the present price of food and future prospects warrant a return to the normal rule, that those who cannot work must be supported by their relatives and not by Government. Colonel Murray, who manages the relief centre at Monghyr, agrees with me that the numbers relieved by him should now be greatly reduced, and he will do his best to carry out this object. If the prospects continue good, I think charitable relief should be stopped altogether in the district by the end of September.

The following information is in accordance with Government letter No. 125:—

Committees.

Monghyr, Jamooee, and Begooserai.

Sub-Committees.

Luckeeserai, Sheikpoora, and Bucktearpore.

(2) Special sub-division opened and officered.

(3) Luckeeserai, Sheikpoora, and Bucktearpore.

(4) Jumalpore ... ... Native gentlemen connected with railway.
Chapran ... ... Mr. H. Christian.
Bassoni ... ... Mr. J. Christian.
Garpurrah ... ... Mr. Hooley.

* Besides this amount an extra 5,000 maunds has been received for the Monghyr district, as seen by the Railway receipts. This amount, at present, cannot be traced at any of the golas in the interior. It was at first thought that this amount was the difference between the reported weight as received from the Railway and the actual weight on weighment at the golas. I regret to find, however, that this does not account for the deficiency. As vast quantities of grain for Tirhoot and North Bhagulpore were lying side by side at the Railway station, and being carried by the same contractor, the missing grain has, perhaps, been carried to Tirhoot or Bhagulpore. I am doing my best to trace the missing grain.

Return called for under Government letter No. 3127, *dated the* 14*th May* 1874, *for the fortnight ending* 8*th August* 1874.

E. LOCKWOOD,
Offg. Collector.

No. 925—S.R., dated Bhagulpore, the 13th August 1874.

From—V. T. TAYLOR, ESQ., Collector of Bhagulpore,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the 19th fortnightly narrative for this district.

2. Up to 7th instant, since my last report was sent in, the weather has been particularly fine and most favorable for all crops, but reports received shewed that rain was at last necessary to complete the aghani transplantings, especially in the south of the district, and to benefit the aghani already planted out. This rain has now fallen, and is all that could have been desired up to date, when all crops are most promising.

The total rainfall to the 11th at Sudder has been	33·86
Ditto ditto 8th at Banka has been	30·17
Ditto ditto 1st at Muddehpoora, has been	30·73
Ditto ditto 8th at Soopool, has been	40·74

At head-quarters 3·96 fell on the 9th and 10th, at Banka 1·50 fell on the 7th, at Soopool 6·40 fell on the 7th and 8th. I have no particulars of this rain at Muddehpoorah.

4. The sub-divisional officers remark as fellows on the state of the crops and the condition of the people :—

Soopool.—"The rain has come just in time, for had it been withheld a few days longer, the consequences to the bhadoi crops (both paddy and murwa) coming into ear would have been serious, whereas now they may both be looked on as secure; and should no unforeseen calamity befall them, the crops, both in extent and yield, will, it is expected, prove better than any one secured during many past years, The earlier murwa and paddy to the north, it is true, have suffered somewhat from want of weeding during the continuous rain of June and early July, but the later crop of both is very fine, and, on the whole, far exceeds an average crop. This fall of rain will also carry on the aghani cultivation nearly to completion. For the transplanting of this crop there is yet about a month before us, and until after this period has elapsed, all forebodings as to its deficient area will, I think, be purely speculative. The mukai crop was in former years a very uncommon one in these parts, but it has been cultivated comparatively largely this season and has turned out very well. I observe, too, that a much larger area is being devoted to food-grains ; for instance, this season preparations are being made on all sides for the janera crop where it was never sown before, and lands usually reserved for chillies, &c., may this year be seen with a fine crop of murwa. The condition of the people is undoubtedly improving, and after the close of the current month, when the bhadoi harvest becomes general, our house-to-house relief operations may with safety be much narrowed." Mr. Smith adds : "There will, I fear, however, be a certain class of non-cultivators, principally decrepit, old women or widows with small children, of the lowest classes, such as Julahas, Doosadhs, and Musahirs, to whom we shall be obliged to continue relief till the main and cold-weather harvest; and more particularly in this non-bhadoi country along the Tiljooga valley, I am convinced of the necessity of providing ample work for those in want of employment and willing to work, at fair rates; for, it is only to be expected that, with the present deficiency of food-supply, those ordinarily employing hard labor should do as much for themselves as possible, and that, consequently, many of the ordinary laboring classes should find it a difficult matter to support themselves and their families."

5. *Muddehpoorah.*—"On all sides may be seen the different crops in various stages of maturity. Kerhi has in some places been cut; in others, is nearly fit to reap; the same with murwa. The bhadoi, in some of the early transplanted fields, has come into ear, and in most looks promising. Aghani is also good, except where damaged by floods. The ryots from the west are buying aghani seedling to plant in the low lands lately injured by excessive rain. We had need of rain lately, but it has been raining all night (7th) and is still threatening."

6. *Banka.*—The prices of all grains are falling, and a further fall is anticipated as soon as the indian corn and murwa, both nearly ready, are cut. The late rain has immensely benefited the transplantings of paddy. Up to date the paddy looks promising, and about one-half has already been transplanted. Another good shower of rain is necessary for the paddy already transplanted. With a favorable rainfall an excellent harvest may be looked for. The general condition of the people is satisfactory, but cholera exists here and there.

7. *Head-quarters.*—The Ganges is now in high flood and still rising, but the crops on the dearah land were, I understand, nearly all cut and saved—a very unusual circumstance.

8. The Deputy Collector at Pertabgunge reports very satisfactorily of the whole state of the country under his direct charge, and thinks that no further relief measures will be necessary in that portion of the district after the end of this month. The Muddehpoorah officer

is inclined to a similar opinion, and, if possible, arrangements will be made to carry out these proposals. The only portion remaining where slight assistance will be necessary will be portions of Naradigur and Ekar, especially along the valley of the Tiljooga, almost an entirely aghani rice country.

9. The following statement shows the difference in prices as far as they can be ascertained now and at the corresponding period of 1866. Rice throughout the fortnight at head-quarters has been alternating from 12 to 12-10 and back again, and now it again stands at 12-10:—

	Rice, common.		Pulses.		Indian corn.		Wheat.	
	1866.	1874.	1866.	1874.	1866.	1874.	1866.	1874.

* Probably new rice.

10. I annex the required crime statement for the month of July.

B.—Relief Works.

11. The usual statements will be sent with this if they reach me in time, but up to this moment I have not received them.

C.—Transport of Grain.

12. The only traffic worth remarking on is that at the Bhagulpore railway station; but, as the reduced rates ceased to exist on the 1st August, it is very probable that we have seen the last of these imports from up-country. The total imports for the fortnight ending 8th instant, were 36,953 maunds, and exports 10,025 maunds. Of the former, excepting 100 maunds rice from Sahebgunge, and 270 maunds gram and wheat, local, the whole quantity was wheat and gram from various up-country stations, and the whole of the exports wheat and gram for Howrah. No private importations appear to be carried on to the north of the district, and the Soopool officer reports "little or nothing is being done in this direction."

D.—Storage of Government Grain.

13. The usual statements are annexed, showing the quantity stored and expended at, and from, each gola. A statement showing the quantity stored at each sub-gola, and how used, is also given. There is still ample for all possible requirements in the north of the district.

E.—Advances to Private Parties.

14. No advances in grain have been sanctioned during the fortnight.

F.—Charitable Relief.

15. I was unable to furnish figures with my last fortnightly. I now do so, together with the figures for this, for the sake of comparison. In Mr. Kirkwood's report, just received, he remarks "generally the numbers receiving relief have somewhat diminished towards the *end of the fortnight.*" I trust the figures, to be submitted at the close of August, will show that this reduction still continues.

16. *Sales.*—The wholesale moodies are reported to have disposed of a very large amount, but in some parts their demands, and the demands of their customers on their stores, are slackening. This is said to be especially noticeable at Pertabgunge, where new rice is coming into the market; and Baboo Ram Shunker Sen reports the quantity of grain sold under the new liberal rates (to wholesale dealers) was 10,178 maunds. In fact, so eager was the competition among the local tradesmen at Buloora, that stores began to run short before all demands could be met. In Muddehpoorah sub-division, during the fortnight, 8,045 maunds were thus sold; in the Soopool circle 7,461 maunds were disposed of to wholesale moodies, while the sales from the golas themselves had fallen to 380 maunds; the moodies generally retailing at a seer cheaper than the gola retail selling price. In Narradigur circle the wholesale moodies took, during the fortnight, 2,402 maunds. There are very few persons in that circle, especially in the neighbourhood of Roshwar and Nurgo golas, of sufficient substance to become large purchasers. There have been, it is said, large purchasers in the Bongong circle, but the figures are not given. It is still most positively stated that there is no rice forthcoming or available anywhere in Soopool, except Government rice. The new bhadoi rice will soon be in the market, when only the better class of men who are unaccustomed to eat the bhadoi rice, and can afford to pay for Government rice, will become purchasers; we shall not have much to sell, except in the Muddehpoora sub-division. The golas in the Buloora, Bongong, and Simrahi circles have become almost empty. Buloora and Simrahi have since been replenished; Bongong will be replenished from the Byjnathpore gola in the Muddehpoora sub-division; Naradigur, Soopool, and Ekar circles, it is said, have enough for all their requirements.

17. *Advances.*—Of course, these have now come almost to a close. The figures for last fortnight should have been a total of 94 zemindars, receiving 31,703 maunds of rice and 4,074 maunds of seed-grain; and 18,434 ryots, receiving 60,787 maunds of rice and 2,296 maunds of seed-grain up to 29th July, and in some cases up to the 1st August. The figures stand thus—ryots, 19,324, receiving 64,978 maunds of rice and 2,380 maunds seed-grain; and zemindars 98, receiving 32,287 maunds rice and 4,074 maunds seed-grain.

18. *Cooked Food.*—The figures for this and last fortnight are thus given:—

	Men.		Women.		Children.	
	This	Last.	This	Last.	This	Last.
Bulooa and Nathpore } Hospital and Poor-house. } ...	39	34	54	52	56	46
Simrahi, ditto	5	23	19	37	15	24
Nowabahur, ditto	11	9	12	15	16	16
Dugmura, ditto	37	14	58	63	22	40
Soopool, ditto	16	17	32	33	44	43
Ekar, ditto	14	21	26	46	10	43
Bongong, ditto	45	31	40	27	27	21
Bhowanipore, ditto	10	15	8	18	7	13
Kamp, ditto	1	3	4	4	3	3
Muddehpoorah centre	7	11	13	20	9	24
Puchgachia centre	7	30	7	30	8	32

Total, this fortnight, 682, against 848 of the previous fortnight.

Many of these poor-houses are now going to be closed, as also the hospitals, at once, and the native doctors attached will be relieved. Mr. Kirkwood reports their presence no longer necessary. There has been a marvellously small amount of sickness throughout the relief operations, and the native doctors are no longer required, with the exception of three, who will be retained a short time longer.

19. *House-to-house Relief.*—Mr. Kirkwood remarks on this head that "this relief was largely extended during June and July in the Naradigur and Ekar circles; the climax was, however, reached about the 20th July, and steady reductions, both in numbers and in the amount given, are now going on. The numbers on this relief appear much larger, proportionately, than the amount of relief given. The reason is this, that, while some new people, generally fully 10 per cent., and frequently very many more, had to be brought on the lists, some 50 per cent. had their allowances reduced, as they improved and gradually took to one of our labor reliefs; thus, although the numbers may have increased 10 per cent. on a certain day in a certain village, it is not uncommon to find a reduction of 10 per cent. in the total amount allowed to that village. The average relief given per head—men, women, and children, for a month—is about 10 seers of rice. It runs, I think, mostly from 10 to 12 seers as the maximum allowance per child, and 18 seers for adults." The total figures shown in Mr. Kirkwood's next fortnightly will probably show a still further reduction.

20. *Labour.*—Mr. Kirkwood remarks: "There are on the regular works in North Bhagulpore, as far as I can ascertain, about 8,000 persons, of whom 3,000 are on the Court of Wards' works. Our relief works now show large numbers:—

		Men.	Women.	Children.	Total.
Bulooa ...	Last fortnight	316	1,333	137	1,786
	This fortnight	610	2,029	186	2,825
Bhowanipore ...	Last fortnight	79	90	38	207
	This fortnight	80	125	95	300
Kamp ...	Last fortnight	81	278	92	451
	This fortnight	100	130	73	313
Naradigur ...	Last fortnight	491	417	159	1,067
	This fortnight	521	1,673	1,062	3,256
Simrahi ...	Last fortnight	150	2,700	1,150	4,000
	This fortnight	1,224	5,465	2,011	8,700
Soopool ...	Last fortnight	42	826	347	1,215
	This fortnight	29	900	480	1,409
Bongong ...	Last fortnight	12	2,136	403	2,551
	This fortnight	42	2,750	406	3,198
Ekar ...	Last fortnight	216	932	289	1,437
	This fortnight	123	2,501	808	3,432

This shows a total this fortnight of 23,433, against 12,714 of the previous fortnight, or nearly double. I anticipate a considerable reduction during the fortnight, as strict orders have been given to reduce wages. The women, who chiefly swell the numbers, will soon be, or ought to be, engaged in reaping the bhadoi harvest. Mr. Martin, the Muddehpoorah sub-divisional officer, remarks: "The rates now are not sufficiently tempting to induce people to work; what is really wanted is not a sudden but a gradual driving back all persons to their usual condition, whether that normal condition be bad or good. There are many found in poverty who have been in poverty all their lives, and had a hard struggle for an existence, who will, without doubt, appear fit subjects for relief for many years to come, and who, having once subsisted on charity in the way they have this year, will find some difficulty in giving it up and reverting to their previous miserable life; and the question appears to be rising, how long we are to find work for this class of persons; all others will now very soon desert us of their own accord."

21. *Spinning and Weaving.*—Mr. Kirkwood reports: "The numbers have very largely increased during the fortnight. The number, daily average, has been 5,952 spinning and 1,238 weaving, against 4,267 spinning and 646 weaving in the previous fortnight. This also is a class who will hang on to us as long as we provide them with cotton, though many of the spinners are women who ordinarily do not engage in this manufacture. I have given orders that in

September this work must be gradually brought to a close, and that all engaged shall have a free gift of cotton or thread given out to them for the last time. This will enable them, if inclined, to work for themselves, and especially the weavers, who can sell their cloth and *purchase* more thread fairly, as doubtless thread will be available for some time longer; but their work as a means of charitable relief must cease, and can cease when once the new harvest is in and they are set upon their legs once more.

22. The group superintendents are no longer necessary, and their services are being dispensed with. The military soubadars and jemadars are no longer necessary, and can all return now. Mr. Kirkwood only wishes to retain one after the end of this month, but he can go with the others. The whole work of relief at the end of this month ought to be entirely confined to a portion of Naradigur and Ekar circles along the valley of the Tiljooga, where no bhadoi is grown, and where the aghani in any year is liable to be, and is often destroyed or damaged by floods, instead of, as was the case last year, by drought; at any rate, it is satisfactory to know that the beginning of the end has arrived.

15. G.—FINANCIAL RESULTS OF THE FORTNIGHT.

* No return received, but Baboo Ramsunker Sen informed me verbally that all had been used.

† Figures for these five golas given to 1st instant.

V. T. TAYLOR,
Collector.

No. 3032F, dated Purneah, the 13th August 1874.

From—W. KEMBLE, ESQ., Magistrate and Collector of Purneah,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit herewith my fortnightly narrative for the period ending 8th August 1874.

A.

During the past fortnight I have visited Motiharee in Arrareah and Kudbah circles. I everywhere found that the new rice was coming into the market and that old rice from Dacca and the eastern districts and from Calcutta was being brought up and distributed over the country in large quantities.

The crops are everywhere looking well. I noticed that they were particularly fine in pergunnah Teerakharda in the north, and in the eastern part of thana Kudbah.

We have throughout the fortnight been favoured with showers, which have enabled the people to transplant their seedlings for the winter crop. The intervals of sunshine have been favourable for the reaping of the bhadoi, which is now general.

The prices now quoted are for old rice—Purneah 14 seers, Kusbah 14 seers, Kissengunge 16 seers, Arrareah 12 seers.

New rice in some places selling at 18 seers per rupee and dhan at 32 seers.

At Kissengunge the price is 22 seers of new rice, and in some hâts 40 seers of dhan per rupee.

The general health of the people is reported to be good everywhere.

The usual statement of grain thefts and dacoities is annexed.

Statement showing the theft of grain reported in the District of Purneah for the fortnight ending Saturday, the 8th August 1874.

PURNEAH,
The 5*th August* 1874.

W. KEMBLE,
Magistrate and Collector.

W. O. LEWIS,
Court Inspector.

B.

Mr. Cordner's progress report is annexed.

It shows only a total of 25,366 persons on the work, or a daily average of 3,624. Payment by the token system has been everywhere introduced on these works and has as yet been found to work well.

A very large number of persons, viz. 13,139 daily, were up to the date of last report still employed by our relief officers. These will soon be materially reduced by recent rules reducing rates of payment; they were fast falling off even before the issue of these rules. Mr. Coles, at Bulrampore, reports that during the fortnight the number of laborers on road had fallen from 700 to 30; this was due, not to reduction of rates, but simply to the people going off of their own accord to work in the field.

The largest number of persons are employed in Arrareah and Kusbah Amour. To both of these places orders for effecting reduction have been sent, as since the cutting of the bhadoi has commenced, the plea that work cannot be obtained in the field is inadmissible.

PURNEAH DISTRICT.

Progress Report of Famine Relief Works for the Week ending Saturday, the 1st August 1874.

Names of works.	Progress in marking out relief works.	Progress in opening works.	Number of laborers thereon.				Supply of food thereat.		Condition of laborers, and feature of the country.	Mode of payment.	Rate of wages.	Arrangement for tools.	Disbursement during the week.	
			Class I.	Class II, A.	Class II, B.	Total.	Amount of Government grain sold to laborers.	Proceeds of sale.					In grain.	In cash.
							Mds. Srs.	Rs. A. P.					Rs. A. P.	Rs. A. P.
No. 1, Purneah to Keotgamah.	The whole line of road, about 40 miles in length, has been fixed, and estimate in progress.	1 party ...	1,031	.....	.....	1,031	119 12	313 15 8	The works have been brought to a close on this road, as the portion taken in hand this season has been completed. Between Purneah and the river Belwah, 28 miles in length, the road has been completed, including the embanked portion from Bunbhag to Sirsee, a distence of 11 miles. There now remains a portion of only 8 miles between the river Belwah and Keotgamah which was not put in hand owing to there being heavy rice crops in the ground; this portion will be completed as soon as the crops are cut. The labourers who have been employed on this work, and who wish for further employment, are being drafted on to road No. 5; there are only the professional laborers.	Payments are now made to laborers by means of grain tokens where shops have been established for that purpose by the civil officers and where we have used up the balance of rice in the hands of our cashier. As the payment by means of tokens is exactly the same as for cash so often described in these reports, it is not necessary to again allude to it.	Everything is being done by contract; the following being the rates:— Grassing slopes, annas 12 to Re. 1, per 100 square feet, where turf can be procured within one chain of the bank. An extra sum of anna 1 pies 6 to be given for every other chain lead. Dressing banks and slopes at 6 annas per 100 square feet.	As a rule the laborers are supplied with Government tools; the beldars being the only ones who use their own.	313 15 8	.....
No. 2, Nathpore to Etwaree.	The whole line, 82 miles in length, laid out and levelled; estimate in progress.	7 parties...	13,380	.....	.....	13,380	988 20	2,577 10 8	There is still further decrease in the number of laborers at work on this road, and the greater number of those now employed are professional laborers, as most of the ordinary agricultural class have returned to their usual avocations. A few light showers have fallen during the week, but more rain is now required; in a few places new dhan is being offered for sale in the markets. The cash payment in the column of disbursements has been for contingencies, salaries, none of the laborers being paid otherwise than in grain.	.....	.....	.....	2,451 10 8	126 0 0
No. 3, Kissengunge to Titalya.	40 miles of old Ganges and Darjeeling road being repaired and estimate sanctioned.	2 parties...	539	.....	.....	539	31 10	83 5 4	There has been a reduction in the number of laborers employed on this road since last report. All those who are now employed are engaged in repairs, and on the dressing and grassing of the banks.	.....	.....	.....	83 5 4	.....

Names of Roads.	Progress in marking out relief works.	Progress in opening works.	Number of laborers thereon.				Supply of food thereat.		Condition of laborers, and general feature of the country.	Mode of payment.	Rate of wages.	Arrangement for tools.	Disbursement during the week.	
			Class I.	Class II, A.	Class II, B.	Total.	Amount of Government grain sold to laborers	Proceeds of sale.					In grain.	In cash.
							Mds. Srs.	Rs. A. P.					Rs. A. P.	
No. 4, Kissengunge to Nekmurd.	The whole line laid out and levelled and estimate submitted.	3 parties ..	1,275	.....	.....	1,275	78 15	209 0 0	The general aspect of the country in this part of the district is everything that can be desired; prices of grain have fallen; new dhan is being brought into the market, and the people are in general more contented and hopeful. The laborers on this road are still decreasing, and all of those at present entertained are employed in repairing, dressing and grassing the banks that have been thrown up. The crops look flourishing and there is every prospect of a good harvest.	.....	.....	.....	209 0 0	.....
No. 5, Dengrah to Soorkelly	The whole line has been laid out, levelled, and estimate submitted.	2 parties ..	460	.....	.....	460	6 30	18 13 3	There is now ample occupation for laborers in the fields, and the rates given by the cultivators offer a much greater attraction to the unprofessional laborers than those given by the Public Works Department. There has been a very small attendance on this work during the past week, as almost all the laborers have left for works in the fields. As laborers are required to keep the road in order and set the dressing and grassing done on the banks that have been thrown up, I am transporting from road No. 1 the professional laborers who have completed their works there and who are willing to go. The crops are looking well, but the cultivators are beginning to look out for more rain.	.....	.....	.....	18 13 3	.....
No. 6, Dengra Ghât to Bhopla Tajpore.	The whole line has been laid out and levelled, and estimate submitted for sanction.	3 parties ...	2,567	.....	.....	2,567	115 20	308 1 6	A great reduction has taken place since last report in the number of laborers employed on this road, as there is plenty of work going on in the fields, and the rates given by the cultivators more attractive than ours. The crops are looking splendid in this part of the district, and new rice is now selling in the market at 16 seers. Real distress is, I am convinced, at an end in this part of the country; of course there is the usual poor of the place that can be seen at any time.	.....	.....	.....	308 1 6	.....

No. 7, Bulrampore to Tarapore.	The whole line has been laid out and levelled; estimate submitted for sanction.	2 parties ..	2,886	.....	.....	2,886	179 30-4	479 9 1	The numbers at work on this road remain much the same as last report. Owing to the heavy floods in this part of the district, there have been some extensive repairs to the roads in several places where the bank is high. Right and left of this road, as far as can be seen, the crops are looking magnificent and give every promise of a splendid harvest.	.....	.....	.....	479 9 1	.....
No. 9, Kudbah to Barsoe.	The whole line has been laid out and levelled, and estimates submitted for sanction.	2 parties...	1,614	.....	.....	1,614	69 0	184 5 6	A considerable reduction has taken place in the number of laborers employed on this road since last report. All of those now at work are engaged in dressing and grassing the banks. The crops are looking well in every direction.	.....	.....	.....	184 5 6	.....
No. 23, Kissengunge to Bahadoorgunge.	The whole line laid out and levelled, and estimate submitted for sanction.	1 party ...	153	.....	.....	153	9 25	25 10 8	The laborers employed on the road are only a few engaged in repairs and doing a little dressing to the banks that have been thrown up, where we had a large number employed. The crops are every thing that can be desired and the condition of the people generally highly satisfactory.	.....	.....	.....	25 10 8	.....
No. 36-6, Chownagra to Bulrampore.	Line marked out and estimate sanctioned.	1 party ...	1,275	.....	.....	1,275	42 19	113 4 0	A great many of the laborers who were formerly employed on this road have now left for work in the fields. The late fine weather has been of great benefit to this part of the country, especially as it has allowed the water left by the heavy flood to dry up sooner; in places it was doing more harm than good. New rice is now being offered in the markets for 16 seers.	.....	.....	.....	113 4 0	.....
Bahadoorgunge to Tarabarry.	Line laid out and estimate submitted for sanction.	1 party ...	186	.....	.....	186	3 13	8 14 2	The people employed on this road consist of only a few engaged in repairs and doing a little dressing and grassing on the banks that have been thrown up.	.....	.....	.....	8 14 2	.....

R. A. CORDNER,
Executive Engineer, Purneah District.

C. AND D.

The transport and storage of grain has now been quite completed; grain had been conveyed to the most remote villages, and during the last hard fortnight before the bhadoi came in could be obtained without difficulty.

The golas, both Government and relief minor golas, have all stood well. I have not heard of or seen one which has not answered well the purpose for which it was built.

The train of transport ponies is now being gradually broken up.

Mr. Perry reports that he has sent away 550 out of 600 which he was working. A register has been kept of all these animals and their owners. Contractors now know their business and a useful system has been organized.

E.

No advances were made during the fortnight.

F.

Th returns of persons in receipt of charitable relief look very large. The numbers are however, less than last fortnight, being 27,192. It must be remembered that the period now under report is that which many persons said would be the hardest in the whole year. The relief officers and their subordinates had reached the most remote villages, and many people who had received the supplies on being sent away from the works are entered.

At the Sudder the numbers in receipt of relief are larger than in any other circle. This had attracted my notice before the receipt of the late circular, and the lists have been carefully scrutinized; from Dengrah, Lieutenant Thornton reports that distress has entirely ceased, except among the very poor classes of professional beggars, and that new rice is being brought into the markets, Government rice being only saleable in very small quantities.

There appears to have been no extravagant charitable distribution here; nor has there at Kudba, where all relief works have now been stopped.

From Kudba Amour the returns are not satisfactory, but recent reports show that matters are now on a better footing.

In Bulrampore and Kishengunge the number of village relief tickets is small; the crops are here most magnificent, and Lieutenant Coles and Mr. Craven both report that distress has quite ceased.

From Arrareah the reports were last fortnight very alarming, but I found on visiting the circle that they were exaggerated. The number of laborers on the roads was very large, but will soon be reduced. I noticed no distress among them. They were mostly working at task works, trying to complete some very useful roads which have been laid out and nearly finished.

There is in the eastern and northern pergunnahs of the circle still a demand for Government grain, as there is not much bhadoi grown here.

In Nepal there is scarcely anything but aghani, which is much more backward than our crops. I am glad to say that the supply if stored will meet all demands.

The returns called for in Government letter No. 4640—S.R., dated 22nd July, will follow.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

The expenditure reported last fortnight amounted to Rs. 8,06,608-2-8 + 26,107-15-10 = 8,32,716-2-6.

* One death erroneously reported last fortnight is struck off.

† Includes Rai Luchmiput Sing's return, formerly separately reported.

No. 833—S.R., dated Nya Doomka, the 11th August 1874.

From—J. BOXWELL, ESQ., C.S., Offg. Deputy Commissioner, Sonthal Pergunnahs,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my Narrative for the Fortnight ending August 9th.

A.—STATE OF THE COUNTRY.

I have no information of much value about the state of the bazars, except what the price currents give. Mr. Stewart says,—"The favorable prospects of the ensuing bhadoi crop have had their influence on the markets."

The Godda Officer writes,—"Supplies in the markets are pretty nearly equal to the local demand;" but he adds that "15 or 20 maunds of rice cannot be had in a single day in one hât."

In Deogurh supplies are sufficient and prices easy. There are no complaints from any part of Doomka.

The rainfall during the fortnight has been—

Doomka	..	..	9·81
Deogurh	..	..	5·93
Rajmehal	..	..	1·2
Godda	..	..	2·0
Jamtara	..	..	9·2

Rajmehal notation not understood. Godda figures not received for last week; rainfall reported slight.

The late heavy rain in Doomka came exactly when it was most wanted. The sunshine had done immense good to the Indian corn; and the want of rain was being felt on the high lands to finish transplanting. The late rain has set all the people hard at work transplanting, and has come just in time to fill the grain of the Indian corn.

From Deogurh reports are as good as possible. Mr. Wilmot says that, if the late rains do not fail, a better year could not be asked for than this promises to be.

Mr. Wood writes from Moheshpore,—"There has been no rain for the last 8 or 9 days. Transplanting of paddy more or less stopped except in the very low lands. Advantage has been taken of this weather by Sonthals to plough high lands for til and surguja oil seeds. The Indian-corn crop promises most favorably. Some few fields will be gathered in another week to ten days. The bhadoi dhan has suffered from the recent very dry weather, and should we not have rain in a few days, the yield on the higher lands will be but small.

It is likely the Moheshpore country, or rather South Sultanabad, got a share of our late rain, which came up from the east and south-east, and appears to have been very heavy to our north-east.

Mr. Stewart writes,—"There has not been much rain since my last report, but the weather cannot be pronounced unfavorable." More rain is in some places wanted for transplanting. East of the hills there has been, perhaps, less rain than there should have been; but in the Damin there has been no lack of it, and there is every prospect of a good bhadoi and aghani crop in that tract, and I may say everywhere at present."

I have had two reports from Godda, one from Colonel Moore, dated the 5th, and the regular narrative from the sub-division, dated the 6th. I shall quote the two side by side.

Colonel Moore says,—"From personal observation and enquiries, I fear the maize (janera) crop in the district, more especially from Godda to Barahat, will yield a poor return. An eight-anna crop all round would not be an exaggeration of the failure. Transplating operations have been suspended, and the young rice not looking well."

Baboo Omesh Chundra Banerjee, who writes the fortnighly, says,—"There has been a deficiency in the rainfall during the last fortnight; and although the light showers which have fallen throughout the sub-division have prevented any injury being done to the growing crops, cultivation of the himanta or late rice has been, to a certain extent, impeded, and in some places nearly stopped. This want of rain, which is favorable only to the janera, is beginning to make itself felt by causing the mahajuns to stay their hands, and also delay in transplating, which proves ultimately detrimental to the late rice. If, however, copious showers of rain fall within the next week, no sensible harm will be done, though there will be cause for very great anxiety if it holds off much longer. Sugarcane, murwa, and kodo, which occupy no small area, as well as janera, are however looking remarkably healthy."

I have quoted at length to show what different views two persons can take of the same fact. It is plain that the break in the rains was long and nearly complete in Godda, and that it had not ceased when these reports were written. This is the one undoubted fact. It is also unquestionable that unless rain falls in Godda soon, much damage will be done; but on every other point the two reports are contradictory. I may say that from Godda to Barahat is a great rice country; very little janera is grown.

The Godda maize country is nearly all inside the Daman.

Mr. Boerresen reports damage done to janera by insects.

The Jamtara narrative came in this morning. Mr. Hand, after a good deal of minute detail, says,—"The 6th and 7th proved splendid wet weather. The rain came just in time to save everything, and I hope to make up for, and counterbalance, the effects of the late drought. Transplanting was commenced with renewed vigour, and the weather promises to keep wet for some days longer. The rain on the 6th and 7th was 5·7 inches. The sum

total of all this therefore is, that though there has been cause for great anxiety, still the crops as they now stand have not been very materially injured. Makai will yield a full 14-annas crop, if not more. The earlier sowings indicate being ready for consumption by the end of this month." "Dhan is promising."

The small grains, gundli, murwa, and kodo, are all reported good, but not widely sown. Gundli will be ready to cut in ten days.

The prospects generally are about these.

In Doomka high-land planting is a little late. Everything else is as good as possible. We wanted heavy rain after the dry weather, and we have got it.

In Deogurh the weather has been very seasonable: with the best results on the crops up to date.

The Rajmehal Damin is as well off as Doomka and Deogurh.

In Moheshpore. the crops are earlier and more forward than elsewhere. Up to a short time ago the weather was perhaps more favorable than anywhere else. Now heavy rain is wanted.

In Godda the weather has been less favorable than in other places; and now heavy rain is wanted, and very soon.

Up to date, as far as I can judge, crops are unusually good, except in Godda; and with favorable weather from this on, we have every chance of a bumper season.

There is nothing to report about misery, starvation, or crime.

B.—Relief Works.

Our numbers show an increase which has not been accounted for.

The Godda Officer writes,—"Payments in grain are being made in almost all the works." I do not know why he does not specify and explain the exceptions.

Mr. Stewart writes,—"The establishments have almost been withdrawn, and accounts are now being closed." His works are not only being closed, but are nearly finished.

From Jamtara Mr. Hand writes that his short supply of grain forced him to stop his works a good deal He has been selling, and making large advances, distributing in charity, and paying altogether in grain, and therefore getting rid of his grain fast. He has had to cut one large tank and a bund for irrigation. The tank will now be cleaned and deepened.

I do not think it likely that our labor numbers will decrease very much more. We shall probably let 2,000 or 3,000 more go, and continue to employ from 6,000 to 8,000 on the sub-divisions and head-quarter roads.

C.—Transport.

Mr. Stewart reports a small private importation of 300 maunds into Rajmehal.

D.—Storage.

During the fortnight 5,555 maunds have been stored at Rajmehal. Arrangements are being made to store an additional 25,000 maunds at Pirpointee for Godda. About 1,000 maunds have been received in Deogurh from Calcutta, and 1,110 maunds in Jamtara.

E.—Advances.

It is time that I should say a word generally about advances. In this direction our policy has been cut out for us. Officers occasionally make remarks about the necessity for advances. This generally means the people's capacity for advances, which may be called unlimited. Grain advances have been made in Godda, Rajmehal, Sultanabad and Jamtara, to a considerable extent, and to a very slight extent indeed in Deogurh, Belpatta, and Hendua. The cry for advances was about equally strong all over the district. A great deal of confidence has all along been placed in the local officer's opinion; and the result is that advances have been made in the most unequal manner. The quantity appears generally to be a function of the quantity in store and the officer's fancy.

Thus the crops in North Godda were a good deal the worst of any in the district. All over Godda advances have been freely made: partly because there happened to be good reserve store in Godda.

The crops in Sultanabad were very much better. Still in Sultanabad large advances have been made.

In Ambar affairs were pretty much the same as in Sultanabad. The zemindar has taken 1,000 maunds out of complement to the Sarkar, but does not want it.

In Hendua the Sonthals were clamourous and were beginning to look riotous. When they were told that they would get no advances of any kind from the Government, and must pay the usual interest to their zemindar and mahajuns, they shut up and went home. I had no rice in Doomka to give them, and made a virtue of necessity. At the same time I was very confident that the ryots were in no great danger.

In Belpatta driblets of advances have been made.

In Mohammadabad none have been made.

Jamtara was near the railway. A loud cry of distress was raised in April. Rice was imported, and much of it has been spent in advances. I am pretty confident now that Jamtara could have escaped with much less help than it got.

It will have been observed that no officer in the district has discovered a death from starvation; and that relief operations everywhere have been pronounced excellently timed and admirably successful.

I am afraid we have proved too much. My sub-divisional officers are, with one exception, greatly and provokingly in arrears with me; and I am horribly in arrear with the Commissioner in general work; therefore we have not succeeded in completely keeping our balance under the new strain. There is no doubt great efforts have been made in relief works, but nearly every officer says, with a sigh of satisfaction, that he has been just able to prevent famine.

I don't believe in this nicety of work. The fact of there having been no famine in the district up to date, taken with the fact that we have by no means nicely adjusted the rest of our work, proves that our action in relief has been a great deal more than sufficient, and I am bound to say so at once. At considerable expense we have greatly lightened distress, and got a good deal of very good and useful work done in roads, bunds, and tanks. But if we had been on the verge of famine in a dozen places, we must have gone in somewhere.

The necessity of making advances is next to impossible to estimate. Any number of people will jump at the chance. Eagerness to take advances is absolutely no criterion of anything.

When other signs of famine appear, advances are a good way of meeting it; but other ways, such as giving cooked food and giving work, are tests as well as ways of relief, and I am afraid many officers forget the difference.

F.—Charitable Relief.

The Godda Officer writes,—"The daily average of persons relieved during the fortnight is 133 by cooked food, and 1,575 by uncooked rations;" this is all wrong. Receivers of uncooked rations ought to be the very few "bhadra lok," who make out a decent claim to have their "izzut" regarded. If only 133 are badly off enough to eat our boiled rice, we may very nearly shut up relief. I shall have the greater part of the 1,575 people struck off the roll.

Mr. Hand is doing better. His daily average of people on cooked food is 936, and on uncooked 528.

G.—Financial Results.

These are given in a separate sheet. The cash payments all explain themselves, except in Godda. I have already said that the Godda officer has not given details.

E. J. MEARA, C.E.,
Offg. Executive Engineer,
Sonthal Pergunnahs District.

Dated Berhampore, the 10th August 1874.

From—W. WAVELL, ESQ., Offg. Magistrate and Collector of Moorshedabad,
To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative for the fortnight ending the 8th August.

2. At the commencement of this period I was at Rampore Hât, from which place I struck across country to Khurgaon, having heard very bad accounts as to the cultivation and the prospects of the crops on account of deficient rainfall. I found that the backwardness of cultivation had been, as I expected, greatly exaggerated, and that the prospects of the crops were by no means bad in the eastern portion of the Khurgaon thana, and that, with seasonable rain, the transplantation of the winter rice crop would probably be completed in good time. From Khurgaon I went by the Badshahye and Synthia roads to Kandi, and thence into Berhampore. In this part of the district matters were not nearly so promising. Tempted by the abundant falls of rain in June, the cultivators had sown a large extent of land broadcast, and the transplanted crop had been transplanted two or three weeks earlier than usual. The effect of the long-continued break in the rains during the last three weeks of July had naturally been disastrous in these parts, and extensive tracts, the promise of which I found at the end of June to be so very good, had, at the end of July, suffered damage which no rain that may have fallen since I saw this part of the country, or that may fall hereafter, can repair.

3. Not only in this, but in other parts of the district has there been a material change for the worse since the last fortnightly report was written, and unfortunately this change is owing to circumstances which are entirely beyond our control, and, as affecting the outturn of the crops of this year, are of far greater importance than any temporary outbreak of distress or increase of prices. No part of the district has escaped some loss from the insufficient rainfall during the past month, but the losses are very unequal in different parts. Thus, with the exception of some parts of Mirzapore and Sootee, the Jangipore sub-division has obtained almost sufficient rain, and the very heavy fall on the 7th instant (3 feet, 28 inches) has probably done more good than can easily be calculated. In the Rampore Hât and Lalbaugh sub-divisions, too, the rainfall appears to have been almost sufficient, except for the high lands of Khurgaon and Bhudrihat, and if the drought has not destroyed the seedlings, as I fear has been the case in some parts, there is time yet for transplantation if the long threatened heavy rain will fall at last. The most unfortunate thanas are those of Bhurtpore and the southern and south-western portions of Gokurn. Here, for the past month, there has been no rainfall worthy of the name, slight sprinkles not being, I fear, sufficient even to keep the broadcast sowings alive in some places, and a fortiori utterly insufficient for fields into which seedlings are to be transplanted. Heavy rain fell yesterday about Berhampore in a south-westerly direction, though the fall in the station was insignificant, and I have this morning heard that there was a good fall in part of the Gokurn thana. I trust that there was a really copious fall in Bhurtpore, by which a considerable improvement in the prospects may be effected, but, however favorable the weather may be hereafter, a certain proportion of the crop has undoubtedly been lost, and the outturn of much of it has been diminished.

I have this morning learnt that good rain has fallen in Bhurtpore, except apparently about Kandi. Parts of the Gokurn and Burwa thanas are, however, greatly in want of rain.

W. WAVELL,
11-8-74. *Offg. Magte. and Collr.*

4. The aous crop also has been injuriously affected in many places by the deficiency of rain, and its magnificent promise of the past month has not been fulfilled. The strip of country in the Bhurtpore thana, between the Bhagiruttee and the Babla rivers, in which this crop is grown, has specially suffered, and one result has been that whereas a month ago I intended to have closed the Suktupore poor-house and to have very greatly circumscribed all relief operations in this part of the district, I found on my visit to the place last week that the numbers obtaining relief had considerably increased, and might be expected to increase still more. In fact, I have authorized the opening of a poor-house at Bhurtpore itself, a place at which there has hitherto been distribution of uncooked food. With regard, however, to the aous crop generally, it may be said that so large an area was sown down with it that, even allowing for a considerable amount of damage caused to the crop in parts, its actual outturn will probably be not much below the average, especially if we have falls of rain during the next few days.

Narrative of Scarcity and Relief in the Moorshedabad District for the fortnight ending 8th August 1874.

A.—STATE OF THE COUNTRY.

1. *Abundance or scarcity of supply in the bazar.*—The supply of food-grains in the bazars and hâts of the head-quarters sub-division is still reported to be sufficient for the daily wants of the people. In the Jangipore sub-division the bazar of the Dhulian is best supplied with rice. The Roghoonathgunge bazar stands next. The bazars of Mirzapore and Notungunge have got a good supply. In the smaller bazars the supply is reported to be scanty. The supply of food-grains in the bazars and principal hâts in the jurisdiction of the Rampore Hât sub-division is reported to be sufficient for local consumption. In thana Khurgaon the supply is less abundant than in the other thanas, but still no want is felt by the people. In the Lalbaugh sub-division the bazars in thanas Assanpore, Shahanuggur,

Manullabazar and Bhugwangolah continue to be abundantly supplied with grains of all descriptions; but the supply in thana Bhudrihaut still continues to be deficient. Advances of Government grain are being made to shop-keepers for sale in this thana. In other thanas, where supplies appeared to be deficient, the local dealers have not come forward, and under recent orders sales will be opened at the golas of Rangamattee in Gokurn, and of Sukteepore in Bhurtpore, and if necessary at Shahapore in Bhudrihaut, at Nobogram in Kalyangunge, and at Kandi and Jangipore.

2. *Kind and price of grain selling at one or more principal marts.*—The price of common rice is lower in the head-quarters sub-division than at the date of the last fortnightly report. The average of twelve of the principal marts is 11½ seers per rupee, it is cheapest at Jellinghee and Gowas, being 16 and 14 seers respectively at those places, which of course lowers the average rate very much, and dearest at Satoon and Kalyangunge, where it is 9 and 9½ seers per rupee respectively. Wheat is nearly the same price as last fortnight and gram is cheaper being 16½ seers per rupee. In the Jangipore sub-division, in the Roghoonathgunge bazar, common rahri rice is 13 seers per rupee, whilst good rice is 12 seers per rupee. At Sooty rice sells at 12¾ seers. At Dewan Serai bazar bhadoi sells at 12 seers and rahri and purbi at 11 seers per rupee. At Mirzapore rice is at 12 seers, and it would therefore appear that the backwardness of the crops in part of that thana has not as yet had any effect in raising the price of the article. In the Rampore Hât sub-division the prices of coarse rice vary from 11¼ to 12½ seers per rupee, and those of best rice from 9¾ to 10½ seers per rupee. In the Lalbagh sub-division the prices of best, common, and aous rice in the several markets vary from 9 to 11½, 9½ to 12, and 13 to 13½ seers per rupee respectively: those of wheat, barley, and gram from 10 5/16 to 13½, 20 to 22, and 16 to 18 seers per rupee respectively.

3. *Any information obtained regarding the amount and kind of grain believed to be in stock in the hands of zemindars, traders, ryots and others.*—No trustworthy information on this subject is available, but there is reason to believe that the supplies in the hands of zemindars and traders is sufficient for present wants, though the poorer ryots have probably very small supplies. A few days ago I was informed that the effect of the fall of prices and of the anticipation of a further fall when the aous rice comes into the market had had the effect of bringing out some stores of old amun rice which had probably been kept back in view of a rise in prices.

4. *Rainfall, if any.*—There was some rain, but generally very slight, in every station in the head-quarters sub-division during the fortnight under report. The want of a real good downpour to soak the ground thoroughly and flood the rice fields is much felt, as the rice crops have been, and are being, much damaged, especially on the stiff clayey soil west of the Bhagiruttee. The rainfall at Jangipore, where it has been heaviest, has been 6·50 inches during the fortnight, and on the 7th instant the quantity of rainfall was 3·28 inches. In the Rampore Hât sub-division there has not been a sufficient fall of rain, but in thana Khurgaon, in which it appears to have been most deficient, the rain that has fallen has enabled the cultivators to carry on agricultural operations everywhere. In the Lalbaugh sub-division, during the fortnight under report, the rainfall at the head-quarters was 4·61 inches, and as stated in my preliminary remarks, deficiency is mostly felt in the high lands of Bhudrihaut.

5. *State of the crops.*—I have written on this subject in my preliminary remarks. The future of the winter rice crop, and, to a certain extent, of the aous crop, depends very much on the weather of the next few days. With heavy continuous rain much of the amun which is now greatly imperilled may be saved, but I fear that a certain portion has been damaged irreparably. In the Jangipore sub-division the harvest of bhadoi rice has commenced, but no bhadoi rice has as yet come into Roghoonathgunge or Jangipore market. In spite of loss by submersion in the part of the sub-division between the old and new entrances of the Bhagiruthee, the harvest is expected to be a bumper one. The prospect of hymunto rice is not good in parts of Mirzapore and Western Sooty, and these parts are much the same as those that suffered most from last year's drought. The worst tract in Mirzapore is the tract between Simla and Zindgi, about 5 miles long, and between Daspara and Matkhankra, about 3 miles broad. Throughout this tract little hymunto rice has been transplanted. The sub-divisional officer has been informed that advances must be especially made in these bad parts. The sub-divisional officer reports, as a consoling feature, that the seedlings in the nurseries at four of the villages still look well. At a certain village of which he heard the worst accounts he found remarkably fine seedlings. The sub-divisional officer of Rampore Hât reports that generally speaking the state of the crop is not bad, although the progress of the agricultural operations in some places has been somewhat retarded owing to the deficient fall of rain during the fortnight. In thana Pulsah the state of the aous paddy and sugarcane is not bad, but it has been reported that owing to the want of sufficient rain, transplanting has, to a certain extent, been stopped. In thana Rampore Hât the state of the amun crop has been reported to be good, and the sugarcane and mulberry crops are also in a thriving state. Only in thana Khurgaon the report is somewhat unfavorable, but on account of the late rains agricultural operations are going on pretty satisfactorily. The sub-divisional officer of Lalbaugh states that the indigo is very nearly all cut, and the result of the season, especially in Bhagwangola, likely to be most satisfactory. The aous in that thana promises, up to the present time, a capital outturn. The crops in thana Bhadrihaut are somewhat backward for want of rain, and a considerable portion of the land in the villages bordering on the Kalyangunge thana have not yet been transplanted

from the same cause. The prospect of the crops to the north of the line of the Branch Railway is, however, far more pleasing.

6. *Condition of the people.*—There is no improvement in the condition of the poorer classes, who are still severely pressed by the high price of food, and distress, as exhibited by the flocking of larger numbers of people to the poor-houses and centres for relief, is undoubtedly on the increase in Bhurtpore and other western thanas, and in the southern part of the Burwah thana. In the Jangipore sub-division there is distress in the interior of Mirzapore and in western Sooty. It is being actively relieved by the Relief Committees at Mirzapore, Beluria, Hilora, and Jangipore. The people who attend the Jangipore cook-house at Roghoonathgunge are, for the most part, Mirzapore people. The sub-divisional officer of Rampore Hât reports that there is no change to report in the condition of the people, but their wants have been in a great measure supplied by the assistance given them in the shape of relief works now going on in numerous places in the jurisdiction of this sub-division and by gratuitous relief. The agriculturists are now busily engaged in their works in the fields. Khurgaon is unquestionably the worst thana in this sub-division, and the sub-divisional officer has been directed to send the officer specially engaged for the purpose of enquiring with regard to advances to ryots to this thana. In the Lalbaugh sub-division the inhabitants of thana Bhadrihaut are, the sub-divisional officer believes, as a rule, poorer than the inhabitants of the other thanas, and having suffered more from last year's drought they require, as might be expected, more assistance than the people of the other thanas of the sub-division. The relief works and the small advances which are being made, as well as the charitable relief will, however, support the laboring classes and small cultivators to surmount the distress which they would otherwise have experienced.

7. *Actual facts as to any known cases of misery and starvation.*—A report of three deaths from starvation was received from Andoolbareea, a village of Burwah, at no great distance from Beldanga, where there is a relief centre. The relief officer who enquired into the matter found that one of the men had died of fever and the two others of diarrhœa, caused apparently by eating *shama*. The relief officer asked to be shown the worst cases of distress, and a man was brought suffering from fever, but who was said to be starving, in whose house the relief officer found 10,000 cocoons, grain, bullocks, &c.

8. *Grain-thefts or robberies.*—Twelve cases of petty theft of grain were reported during the fortnight in the head-quarters sub-division. In the Jangipore sub-division three persons were punished for grain-theft. There were two cases of grain-theft reported during the fortnight in the Rampore Hât sub-division. In the Lalbaugh sub-division there was no case of grain-robbery or theft reported since the submission of the last narrative. A crime statement is annexed.

9. *Condition of any special tracts.*—Cholera has almost disappeared, and there are very few cases of small-pox still lingering in the head-quarters sub-division. In the Rampore Hât sub-division cholera and small-pox are still prevalent, but they are in a very mitigated form. Owing to the coming in of the aous crop distress is greatly mitigated in the eastern thanas, and is most intense in the western thanas of Bhurtpore, Gokurn, Kalyangunge, Bhadrihaut, Mirzapore, and part of Sootee. All the relief officers and assistants are now employed in that part of the district.

(B.)—Relief Works.

Two statements, one showing the average number of persons at work on the several works and other particulars, and the other the expenditure in money with explanatory notes, are herewith submitted. It will be observed that the number of laborers on the Gorabazar southern drain has greatly increased. A month ago, when the prospects of the aous and amun crops alike were so good, the cultivating classes would not resort to this work, and many laborers could not be tempted to work for rice payments. When, however, prospects became worse, owing to want of rain, the numbers rapidly increased. Many of the laborers are women, and there can be no doubt but that the execution of this work has been most beneficial in providing employment for the inhabitants of the vicinity of Berhampore. In some parts of the district, in the Jangipore sub-division for instance, the numbers of laborers on relief works will probably fall off, but in others they will, I think, increase, and it is in my opinion better that these works should be kept open than that the laborers should come (as I believe many would) on the purely gratuitous relief list. Much, however, depends upon the character of the weather during the present week. Heavy rain would doubtless relieve the works of many laborers who would have employment in agricultural operations on their own account or on account of others.

(C.)—Transport of Food.

From the returns furnished by the Traffic Manager, East Indian Railway, at Jamalpore, it appears that 24,628 maunds of rice have been imported to, and 6,811 maunds of rice have been exported from, the jurisdiction of the Rampore Hât sub-division during the fortnight under report. This large importation has to a certain extent kept down the price of rice in the hâts and bazars. No purbi rice is said to have been imported into the Jangipore sub-division during the fortnight.

D.—STORAGE OF GOVERNMENT GRAIN AT RELIEF WORKS.

The assignments made for the storage of Government grain and for the management of golas have already been mentioned in previous reports. The following figures show the quantity of grain received into the district from—

	Mds.
Calcutta	45,752
Godagaree	8,467
Maldah	9,970
Total ...	64,189

There is still great difficulty in procuring transport for supplying rice to circles in the interior. The cargo of rice received from Calcutta by the steamer *Success* (9,750 bags) has enabled me to distribute large supplies to the various golas on the banks of the Bhagiruthee. Annexed is a statement showing the storage and consumption of grain in the district. I note that in the printed copy of the last fortnightly statement, the columns opened by me, showing advances to zemindars, was omitted. I have therefore included those advances in the column of advances to ryots in the present statement.

E.—ADVANCES TO PRIVATE PARTIES AND THEIR RESULTS.

There were 20 applications pending at the close of the last fortnight in the head-quarters sub-division. Twenty-five fresh applications have been received during the fortnight under report. Out of the total 45, orders for payment have been passed in 9 cases, and the remaining 36 cases are under investigation. Cheques for payment in rice have been issued to the aggregate amount of Rs. 6,798 to nine zemindars. The above is exclusive of the advances made to the ryots direct for small amounts. In the Jangipore sub-division 881 maunds and 27 seers of rice have been advanced to 453 ryots, and 70 maunds to a zemindar of Joroor, to enable him to make advances to his ryots. The Sub-Deputy Magistrate and Collector and the Sub-Inspector on special duty actively exerted themselves to induce some zemindars to stand as securities for their ryots, but they have failed. The Sub-divisional Officer himself has been equally unsuccessful. It is worthy of notice that Rai Dhunput Singh Bahaddor, Baboo Pulin Behari Sen, and Rao Jogendro Narain Roy are lending money to their ryots without taking advances from Government. In the Rampore Hât sub-division, in 54 applications orders have been passed for giving 579 maunds of rice to ryots, and 1,163 maunds 37 seers of rice to 13 zemindars for making advances to their ryots. In the Lalbaugh sub-division advances have been made to the chowkeedars of Assanpore and Bhadrihaut thanas, on the understanding that the amount should be repaid in money at the end of next harvest in December or January, and with the stipulation that it may be levied at once for any neglect of duty. The Relief Sub-divisional Officer of Kandi has made advances to zemindars and ryots to the amount of 404 maunds 20 seers, actually given out, besides other grants sanctioned, but in which the rice has not been taken. Unless prospects alter materially for the better in the bad parts of the district, it will, I think, be necessary to make considerable advances in some villages; but the rainfall is so capricious and uncertain that it would, I think, be better to defer such grants on anything like a large scale for a short time, until it can be ascertained in what parts the crops have been wholly or very materially damaged. Even in adjoining villages there are great differences between the prospects of the crops owing to greater or less deficiency of rain, and much more relief may hereafter be required in one part of a thana than another, though both may have suffered equally from the failure of last year.

F.—CHARITABLE RELIEF.

The statement prescribed by Government No. 1251—S.R., dated the 5th March last, is annexed.

A separate report. with accounts up to the end of June last, called for in Government No. 4640—S.R., dated the 22nd ultimo, will be submitted as early as practicable, as they are not ready for submission along with the narrative, owing to some accounts having been received too late, and to want of some information called for from the sub-divisional officers of Jangipore and Rampore Hât.

At head-quarters the cook-houses for Hindus and Mahomedans are still resorted to by numbers. The number of persons relieved under heading (*d*) has been 58.

In the Kandi relief sub-division there has been an increase in numbers owing to the want of rain and bad prospects of the crops.

In the Lalbaugh sub-division the Hindu and Mahomedan cook-houses at Shahanuggur and Mohimapore are being continued. The laboring classes have generally plenty of employment on relief works. Several relief roads have been started in thana Bhadrihaut. Rice is distributed at Sagurdighee in thana Bhadrihaut and Furrabag in thana Assanpore, to persons who are unable to work. Small loans of Rs. 5 each have been made to ryots of several villages under this head, as the re-payment in most instances will be by labor on relief roads. Of the total number of persons relieved, shown in the statement, 3,737 persons were relieved under heading (*b*), 628 under heading (*d*), and 1,287 under heading (*c*). There are 25 relief roads on which these persons were at work. The total receipts of the sub-divisional relief fund amount to Rs. 4,764-4-8, and the total expenditure Rs. 567-8-6, leaving a balance of Rs. 4,196-12-2 at the close of the fortnight. As regards the Rampore Hât sub-division, a new poor-house has been started at Bosowah in thana Rampore Hât, and a poor-house at Jaipore in thana Khargaon has been abolished during the fortnight under report. The above poor-house was abolished simply because there are other poor-houses in its neighbourhood, where people incapable of work, and really needy, could easily obtain relief. The total receipts of the sub-divisional relief fund amount

to Rs. 996-4-3, and the total expenditure Rs. 623-14-3, leaving a balance of Rs. 372-6 The figure given in column total as regards the Jangipore sub-division represents the average daily number as far as could be ascertained. In addition to this, 60 persons on an average daily were relieved by work on an embankment. There were 32 persons relieved under heading (d) during the fortnight. The total receipts of the sub-divisional relief fund amount to Rs. 4,071-0-4, and the total expenditure Rs. 3,773-6-10, leaving a balance of Rs. 297-9-6 at the close of the fortnight.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

Vide the accompanying statement.

No payments in money have been made in the sub-divisions during the fortnight under report from the imperial fund.

Total ...	1,533	7	3
Grand Total ...	49,988	1	6

W. WAVELL,
Offg. Magte. and Collr. of Moorshedabad.

No. 1694—S.R., dated Dinagepore, the 10th August 1874.

From—E. E. LOWIS, ESQ., Offg. Magistrate of Dinagepore,

To—The Offg. Secy. to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the Narrative for the fortnight ending 10th August 1874.

A.—STATE OF COUNTRY.

The health of the people continues good. Cholera has disappeared, and so has small-pox, with the exception of a few isolated cases here and there. Dr. Coates, the Sanitary Commissioner, has lately passed through the district and inquired into the state of the people. He reports that the public health is good, but that there are signs of privation having been suffered during the earlier stages of the scarcity. This quite accords with what has come under my own observation: there was very prevalent and wide-spread distress during March and April, even with relief-works in progress in various points; since then our organization has been completed, and this, coupled with the distribution of Government grain throughout the district, has relieved what would otherwise very rapidly have become a grave disaster. With the exception of the two circles of Porsha and Tumbuli, supplies are nowhere sufficient, and prices vary in the most perplexing manner. At the large hât of Fakirgunge, in Patiram, one day country-rice was sold in sufficiency at 12 or 13 seers per rupee, no Govern-

ment grain was therefore disposed of; on the next hât day grain was not procurable, and purchasers had go to a Government golah, some way off, to have their wants supplied. It is the same in most places, the supply very irregular, and, on the whole, deficient; it is to be noted, however, that prices show a downward tendency. It would appear that there are still some stocks in hand, which are gradually being disposed of by the holders, as they see future prospects continually brightening. The weather has been on the whole most favorable for the crops, and reports from all the circles are most encouraging, and everywhere it is reported that the bhadoi just ripening is a magnificent crop; some of it has been cut, and a little has already come into the market. The winter crop is also reported as doing well; a large proportion of it has been transplanted, and the operations with respect to it are in a very forward state. From Doorgapore Circle only do I hear that the winter crop is backward. Mr. Pollen complains that there the transplanting has been begun indeed, but the work is not so well forward as it ought to be. I would remark, however, that most of Doorgapore lies very low, and the late floods so completely submerged many parts of it as to stop work altogether for some time. During the past fortnight we have had no heavy rain; what there has been, has consisted of showers sufficient to refresh and keep alive the young rice plants, but not sufficient to flood the rivers: there is a cry of want of rain, but there has been no such deficiency as to cause damage. The prospects of the winter crop are on the whole most encouraging, and if only we get heavy showers during September and the early part of October, we may expect a good harvest. In Thakurgaon to the north, prices show a downward tendency, but fall very slowly; they range from 7½ to 11 seers per rupee, the general rate being 8 to 9. Mr. Scanlan has taken advantage of this spell of comparatively dry weather to push in supplies of Government grain, and at Thakurgaon alone last week disposed of Rs. 6,730 worth of rice without causing any particular alteration in the market selling rate. The bhadoi is only just coming into the market in Thakurgaon; as soon as it does come in, the demand for Government grain will fall off, and relief operations for that part of the country may be closed.

In Beergunge some bhadoi is coming into the market from the Rungpore district; the consequence is that the demand for Government grain is beginning to fall off there. The people in every instance prefer their own country rice, if they can get it; and that they have so long been dependent on Government sales, is of itself evidence that other grain was not procurable. I omitted to mention in my last report that in Thakurgaon a series of grain robberies had occurred: a number of bad characters banded together and began a systematic plunder of their fellow villagers' grain godowns; threats of personal violence deterred the earlier victims from complaining; information, however, did reach the police, and the result has been that a considerable number of persons have been sentenced by the Sessions Court. From the evidence adduced in these cases, it appears that many of the Thakurgaon villagers have grain stored in their houses, sufficient for their own wants, and with a surplus to provide for contingencies. On the whole, during the past fortnight, the condition of the people has bettered, rain has fallen in sufficient quantities to prevent damage to the winter crop, the bhadoi is now safe, and is a very good crop; jute also has turned out well, while prices are slowly declining.

B.—Relief Works.

Of actual work on the roads there is next to none. Mr. Scanlan is trying to improve the existing road between Thakurgaon and Bonbari, so that rain may interfere as little as possible with future transport arrangements. In Beergunge and Bochagunge circles too, coolies are employed in trying to finish off uncompleted roads; while in Bindol, Mr. Fasson finds some employment in the same way. The coolies employed are partly men who do not live by agriculture, and partly agricultural laborers, who have failed to be absorbed by the labor market. The largest numbers are at Bindol, and are persons that, Mr. Fasson says, he must find employment for, as they cannot get it elsewhere. I know there are a great number of villagers in the Bindol direction, who generally at this time of the year go down to Putnitolla and the south to obtain work in the fields; this year there being no demand for their labor, they can find no employment: numbers of these men passed through the station as usual going to seek employment, but they did not all obtain it, for I know some of them returned, finding no demand for their services. The difficulty is to find work for laborers at this time of the year: employment, however, is found for them in dressing roads, filling up holes, improving village foot-paths, &c.; and in no case on any of the works is a higher sum paid than can be earned by an agricultural laborer in the vicinity. Wages in this district vary from 2 annas to 4 annas a day with food twice a day as well. On our works, on the other hand, a man cannot earn more than one seer of rice per day; in fact Mr. Fasson has been trying the experiment of only giving ½ a seer per day for a certain amount of work done: we may rest assured, therefore, that our works are not attractive. Every effort will be made to get rid of what laborers there are. I may add that Mr. Fasson gives employment to several men who come across the Nagor river from Purneah every day, and who assert that they cannot get work near their homes, neither in the fields, nor on Government works; the addition of these helps to swell his list.

C.—Transport.

There have been some transport operations going on: rice has been sent into Thakurgaon; there was also an unexpected run on some of the Ranisankoil golahs from the Purneah district, which necessitated further supplies being thrown into that circle. Such supplies must go from Raigunge, but as Mr. Pollen has nothing to spare, whatever he sends away must

be made good. Our Maldah reserve has been all sent away, the deficiency therefore must be made good from Neetpore and Godagari. The reserve at Sahibgunge to the amount of some 5,000 or 6,000 maunds will have to be moved up to Putnitolla to supply the place of some of the rice sent from there to Beergunge Circle. The Railway authorities have also just made over to us 10,000 maunds of rice on the Atrai; of this 2,000 will be carted to Chintamon in Habra Circle, and the balance 7,000 be landed at any point in the Patiram Circle that Mr. Finucane wishes to have it stored. Our stores have been on the whole judiciously placed, but it has been impossible to avoid moving a few thousand maunds here and there as occasion arises. Very little grain has been imported into the district; some was brought up the Koratoya river into the Bhaduria Circle from the eastern districts, and this had the effect of lowering prices considerably: the fall of the rivers has apparently stopped this traffic, or, it may be, the coming in of the bhadoi has warned traders that prices will fall below what they can afford to sell at. A little rice at one time came up the Atrai to Patiram and Putnitolla, not grain imported by any mahajuns residing at any of the marts on that river, but brought by boats sent out from Dacca and elsewhere, with instructions to sell wherever a market offered. The imports into Bhaduria were of the same nature; the relief afforded, therefore, was only afforded to persons residing on the banks of the two rivers Atrai and Koratoya, and did not touch those living in the interior: such importation has now stopped, and rice is nowhere reported as coming into the District from outside. From the very first all the substantial traders, whose agents reside in the marts on the Atrai, Jamoona, Koratoya, and Poornabhaba, have declared their intention of not importing, and this they have adhered to throughout, so that such chance importation as I have noted above, plus stocks in hand, have been all that could be depended on to meet the emergency.

D.—Storage.

During the last few weeks grain has had to be moved about from one circle to another, the surplus of one being made available for the wants of another. These movements have been effected without difficulty, for in selecting sites for golahs, when grain was first stored, the necessities of future transport were kept in view, and our main depôts have always been on the banks of rivers, navigable during the rains. It is satisfactory to find that our golahs have been fairly well built, and the rice properly stored: no loss has resulted from the Burmah rice heating and becoming black and unsaleable. I have not received specific answers to my circular on the subject issued on receipt of Government letter, but I am sure I would have heard of it, had such damage occurred to any extent. Owing to the steady demand for Government grain, our stores are fast running out, and a question has been raised as to the sufficiency of our supplies to last up to the time when the ripening of the winter crop restores things to their normal condition. Out of the total amount stored, which, counting what has been received from the Railway, amounted to about 11 lakhs of maunds, there are not, allowing for wastage, much over 1½ lakhs remaining in hand; if so much, it is a matter for serious consideration therefore whether such amount is sufficient for our requirements until such time as the people are no longer in want of help. Of course if the weather is not propitious, if the rain fails us in September and October, it is perfectly certain that no amount of grain now at our disposal will avert a great calamity; but supposing nothing unforeseen occurs, will our supply hold out to the end? I am inclined to think they will. The bhadoi crop is now safe, the outturn is a good one, and twice the usual breadth has been sown; allowing for loss by the late flood and damage done by too much sun, we may count on about twice the usual amount of bhadoi passing into the hands of the ryots. In ordinary years the bhadoi is kept by the individual cultivator for his own consumption, any surplus he may have only being disposed of: such surplus generally lasts about six weeks, *i.e.*, till the first week in October, the supply for the period that intervenes between the beginning of October and the coming in of the earlier sorts of winter rice being met by issue of old stocks. It is feared that much the same will happen this year, *i.e*, that the ryots will only sell surplus stocks, that such surplus will only last until October, that our supplies will have been exhausted, and that after that there being no stocks to fall back upon, prices will rise and great distress be the result. I have discussed the matter with most of my Circle officers, and the result arrived at is as follows: The Bhadoi will this year come in very gradually, having been sown at different periods according as the ryots found means to purchase seed. The last of the Bhadoi will not be reaped until the middle of September, and the coming in of the crop is sure to decrease sales of Government rice, more especially if the latter be not pressed on the market. Again a larger area than usual having been sown this year, there will be more surplus to be disposed of, and also fewer eventual purchasers, inasmuch as more persons will have stock in hand to last until the Hemanta comes in. The prices in November are expected to rise, but not to the same extent as they have done, and the people being then certain of a winter crop, there will be no panic, and money will be procurable from mohajuns. The Bhadoi will come into the market more gradually than usual, but there will of course be a natural anxiety felt by all to dispose of their surplus, before prices fall further. There is no doubt that many would prefer to buy good clean rice at 14, in preference to Bhadoi at a cheaper rate. In order then to avoid all possibility of competition, I would raise the price of Government rice to the rate at which clean country sells in the bazar here, *viz.* 12 seers for the rupee; this raising of price would also enable us to keep a reserve in case prices show a disposition to rise during the latter end of October. By acting on the above suggestion, our present supply will, I think, be found more than sufficient, our sales being thus reduced to a

minimum during the period the bhadoi is in the market, allowing the people during that period to depend on their own resources. If after the Bhadoi goes out, there is any demand amongst those who have none of that crop to fall back upon, we will be prepared to supply the demand; if, as I hope, prices will not rise so very high, we can always dispose of any stock in hand. It would be unpolitic to dispose of our grain until we see what happens in November, and it would be unfair to the ryots to keep open our golahs at rates, likely to interfere with the disposal of their produce; both difficulties, it seems to me, will be avoided, by raising our selling price, and thus reducing our sales. I may add that the rice now in our store is, I am told, mostly good mugi and ballam rice, which the dealers would be glad to buy in any year, and the sale of which at 14 seers per rupee, must interfere with sale of bhadoi.

The Relief Commissioner has been moved to address Government on the subject, with what result is not yet known.

E.—ADVANCES.

I subjoin the remarks of the District Relief Officer under this head, and I may add that the Circle Officers have, from the first, watched carefully the effect of this system of relief, and are unanimous in expressing their opinion that advances have been a great boon to the people, and that Government liberality has not been abused. Some few cases have been reported, where the recipients of advances were found selling Burmah rice in order to purchase seed grain; and in a few isolated instances, attempts have been made to obtain advances on forged receipts, or by hypothecating anothers land. In some of these cases legal steps have been taken; in others, the rice or its value has been returned. Grain advances supplied a real want, and though in some few instances designing persons may have imposed on the officials, I am sure the grain, as a whole, has been consumed in a manner that Government intended it should be.

"The following statement shows the amount of grain issued on account of advances in the different circles of the district during the past weeks. It will be seen that in all but four circles the issues have now receded to a comparatively insignificant amount, and (except Thakurgaon, where they were somewhat delayed by the short stores of grain,) these are the circles in which the Relief Officers arranged to give out the total amount of the advance in two or in three instalments. It must then be borne in mind that only a very small portion of the issues during the last week was on account of newly granted advances to fresh borrowers, or of supplementary advances to previously successful applicants, but rather that nearly the whole amount had been previously promised by Government. As soon as the liberal concession of lower rates became known to the public, many applications for new or further advances were presented; but following the instructions issued, the Relief Officers have been particularly strict in their enquiries, and very few applications are now granted, only in cases where an absolute want of them is apparently proved. With the coming into the market of the early bhadoi, the necessity of completing the second instalment is disappearing, and virtually the work of granting advances may now be considered as at an end.

This is a favorable opportunity for placing on record a short account of the way in which the granting of these advances has been conducted.

Immediately after the orders of Government authorizing the granting of these advances were received, the intention to make these advances was communicated to the zemindars, the necessity of the measure was shown to them, and they had pointed out to them how self-interest and humanity alike needed their exertions. To these calls almost with unanimity they turned a deaf ear; many of these zemindars are non-resident, and their agents replied that answers could not be expected for a month or more; others did not answer; a few promised, but did not follow up their promises by a single sign of preparation, and nearly all of the rest said they had no objection to Government making these advances, but they would not, or could not, do it of themselves. It has since been found that in a few instances zemindars, who would not hold up a finger to help their own tenantry, and so to maintain the prosperity of their own estates, even resorted to threats towards their tenants of their resentment, if not worse, should they ask for aid from Government.

It may be as well to exhaust this unpleasant part of the account—the conduct of the zemindars—and have done with it.

Since the advances have been given out, some of the zemindars have come forward to undertake the obligations of their tenants, here and there ostensibly to prevent their people incurring unnecessary debts on the security of their tenures, but, in general, with the expectation, or rather certainty, of reaping where they have not sown, of getting a large margin of profit without the expenditure of any capital, or trouble or labour. The following is an example. Since the zemindar of has heard from some source that either 25 per cent. commission will be allowed to zemindars, or that they will be at liberty to take bonds from the ryots at any rates they chose, after themselves receiving at 16 and 18 seers per rupee, he was very anxious to become security, in the hope of gaining a large sum of money without incurring any expense or trouble.

The following sentence embodies the views of all the relief officers who have noticed this side of the question: "The ryots are afraid that if they be left entirely to the mercy of the zemindars there will be no end of oppression to them, and that they will never be able to get rid of their liability, but become the bounden slaves of the zemindars." He continues—"My experience of the locality leads me to believe that the apprehensions of the ryots are not groundless, and that it is desirable to make agreements direct with the ryots, and then make over the bonds to their zemindars to realize the amount due from them." It is now reported from different quarters that the landlords have already commenced to take oppressive proceedings to get from the ryots the rent, for the possibility of obtaining which they are indebted to the exertions of Government, which has preserved, for their benefit, the ryots whom they, with short-sighted apathy, would have allowed to starve.

In a district like this, where there still exists a competition on the part of zemindars for cultivators, rather than one of cultivators for lands, it is clear that by the advances the zemindars are immensely benefitted, and that the zemindars are now in many instances willing to take over the obligations to Government is a clear proof that the amounts of the advances have been very moderate, and only what was absolutely required.

While the answers of the zemindars, when thus appealed to, to do their duty, were awaited, the circle officers through their staff were quickly collecting the data on which advances could be safely given. To have delayed this till the zemindars' answers were received would have proved a fatal mistake As soon as it was evident that the zemindars were not going to avail themselves of the very liberal offers of loans in money or in grain, wherewith to give loans to their ryots, nor to become sureties for the advances which Government was preparing to lend, applications from village committees, proferred by their respective mandals and leading men, began to be entertained. As a rule, the applications were tendered to the relief officers, and reports based on the previous enquiries taken from the inspectors, or more generally written after a second enquiry in the villages whence the applications came. Lists of all those who joined in the applications, together with a rough estimate of the value of each individual's property, the extent and nature of their holdings, the number of individuals in each family, together with their latest receipts of rent paid to their landlords, were taken, and then submitted to the relief officers, who fixed, in consultation with the leading men of the village, the amount of grain to be lent. After this was done, the conditions were all again explained to the applicants, and a formal agreement, embodying these conditions and the hypothecation of their lands, tenements and personal property, was duly executed and taken. This was followed, as quickly as might be, by an order on the most convenient store for the delivery of the amount engaged for, or in some circles of an instalment of it. Of course there have been some slight variations in the procedure. In some circles, it is believed, the enquiries were nearly all made by the circle officers, either at their head-quarters or on tour. In some the lists of the subordinate applicants under the mandals and leading men have not been invariably filed; in some the latest receipts of the zemindars have not been always retained. In some of the agreements taken the boundaries of all the separate tenements hypothecated have not been fully entered according to the requirements of the Registration Act; but in all, the several and joint responsibility of all the borrowers for the full amount of the advance appears to have been clearly laid down.

In two or three circles only have the relief officers noticed anything like a general idea that Government would not insist on the payments of the loans. In Luskerhaut, where in one or two

cases the zemindars were willing to help their tenants, the latter obstinately said they would rather starve than touch their money or grain, while they were clamouring for Government advances, hoping never to be forced to pay them: and again in Patiram, the circle officer noticed a story that His Excellency the Viceroy would travel through the country to tear up all the bonds; and another, that those who did not apply for advances would be men marked down for future taxation. But the judicious conduct of both of these officers speedily corrected these absurd stories and such like follies. Mr. Finucane, reporting of this Patiram circle, observes: "I have taken particular care to inform the ryots that it is not for their interest to encumber themselves more than they can help, and indeed generally they show no inclination to do so. I think if there ever was a notion among them that Government would not insist on being paid the price of grain advanced, that notion prevails no longer. If ryots are convinced that they will have to pay, it is inconceivable that they should ask for more grain than is absolutely necessary, for they must have sense enough to see that they are receiving inferior grain at probably four-times the price which they will be able to realise hereafter from their own superior rice." Again, in respect of this and the Bhaduria circle, where zemindars have come forward more freely to take advances for their cultivators, we have the check of the estimates framed by the zemindars of the requirements of each village: and again, in general, the zemindars have given either an explicit or implied acquiescence in the amounts about to be granted to their cultivating communities. That the zemindars have been alive to their own interests, in watching that their people did not get excessive grants, is shown by those instances where they have come forward to give their own lands and estates as security, when they became really alarmed lest the ryots were about to borrow on the security of their tenures too heavily.

In the Doorgapore circle one of the zemindars, a leading man, who had at first refused to stand security for the advances then granted to his ryots, afterwards became convinced that the first supply was inadequate and brought his people up for a second supply, becoming surety for the amount of both loans.

Mr. Pollen writes: "I have taken the greatest care to impress on the people the necessity of avoiding all unnecessary debt, and have given them plainly to understand that whatever becomes of their rent to the landlord, the Government dues must be paid in full. I have not held out the slightest hope of a compromise of any kind, and I have pointed out, over and over again, that in case of one of their number dying, the rest of the community must make good his quota." Mr. Fasson writes: "The mandals have almost everywhere taken up the cause of their poorer villagers who needed advances. The whole system of the advances has been based on the co-operation of the mandals, and their conduct throughout has afforded a strong contrast with that of the zemindars. In many cases the mandals submitted a complete list of the landholding population, marking off those who did not need rice. The mandal having submitted the list, consents to become security jointly with four or five of the principal inhabitants." It follows, as they would be the first and heaviest, perhaps the only losers, and to the extent of their whole property, that they would take every care to prevent any imposition or extravagant requisitions. In Porsha the relief officer at one time expressed a fear, not that the people were asking for too much, but for too little. From Thakurgaon came particular accounts of the people, suggesting that it was useless arranging for instalments for repayment, for they would be able and only too glad to clear the debt from the first bhadoi crop; and both in that circle and in the Sudder circle considerable tracts, where last year's crops were tolerable, have not furnished one application for advances for relief works or for relief. In the Sudder circle I have myself seen among the applicants their anxiety not to be suspected of over-valuing the property they were offering as security, and the pains taken by the relief officer in keeping them in mind of the strictness of their engagements. It is generally supposed in this circle that the amount is to be repaid within three months.

It is needless to adduce further opinions, for we may assert that the advances were timely given—an ample inquiry on collective and good security—and not prodigally, but rather with a prudent parsimony. The number of persons to be maintained for so many days guided the officer in fixing the minimum, and the maximum was, I think, estimated in money at 1½ times the annual rents paid by the whole of the associated cultivators.

I think we may assert that the borrowers have every wish and intention to act up to their engagements; but the question is, whether the zemindars, under the present state of the law, with their prior liens for rent and power of attaching the standing crops, will not forestall every effort of the Government, or even whether they would not try to frustrate the realization of Government loans from a spirit of opposition. It would be hard if all the direct benefits should be reaped by the zemindars, while the Government loses labor, capital and prestige, with only the advantage of a consequent enhancement of the stability of the land revenue, the discharge of a debt to humanity, and the temporary reduction of our relief work gangs. The giving out of advances interfered with no trade, and it has been remarked that the expenditure of Government grain during the time when issues were being made scarcely exceeded that of a previous period of equal duration.

Without those advances cultivation must have been very backward almost all over the district, to the prolonging of the period of distress, and the total area of cultivation must have been far less than what it now is.

The immediate result was to free our relief works of nearly all persons belonging to the cultivating classes and agricultural labourers, as is proved by the state of the pauper rolls of

Beergunge, Bochagunge, Thakurgaon, and Phulbari, where advances could not be given out early, and where the pauper rolls continued to be very heavy until they were given out. It is greatly to be desired that the matter of registration of these agreements should be at once decided, as the delay will cause further legal difficulties, and perhaps something should be done to facilitate and remove from the regions of chance the recovery of the value of this 3,30,000 maunds of rice. I hope in my next report to give some account of the number of advances given, and the households to which this help has reached, and also to give the names of the few zemindars who have behaved well in helping their tenantry.

F.—Charitable Relief.

The district relief officer has furnished the report under this head.

A copy of the Government telegram to scrutinize our charitable relief lists has just been placed in my hands, and I have much pleasure in reporting that every direction in it, applicable to this district, has been forestalled, and that the moment it became safe to do so, the circle officers were directed to take these measures with a persistence which some among them appeared not altogether to like.

The result of this scrutiny and of the more favorable aspect of affairs has been that, during the past fortnight, the number of persons in receipt of charitable relief has decreased from considerably over 84,000, probably 87,000, to 53,881,—a decrease of 30,426 in the fortnight. Three weeks ago the numbers stood at more than double this, being over 1,13,000. The subjoined statement shows that the decrease has been general and progressive, and this gives room for expecting a continued decrease arising from scrutiny, in addition to the easement which must follow the harvesting of the bhadoi crop. I have shown with tolerable accuracy the numbers under the simple classification of—

1*st.*—Those receiving gratuitous relief.

2*nd.*—Those employed on out-door labour.

3*rd.*—Those employed in-doors in making thread, gunny-cloth, or in husking rice or the like.

There are shown 3,965 as employed in this last way. The probability is that much of the expenditure now applied in finding these people employment will be recovered from the sale of the manufactured articles, while it affords employment at home for some few thousands of women who, on account of age, domestic cares, or caste prejudices, are unable to work on roads. These are all people who are on the charitable relief rolls and are paupers. If no employment were found for them, they would be none the less on our hands, getting something less as gratuitous relief. The rates of their remuneration vary slightly in different localities, but it is found impossible to fix one scale. As far as I can make out, a woman must be particularly industrious to earn by manufacture much more than another woman would, working on the roads in turfing or the like. The number employed on out-door light labour, in turfing, improving, or repairing roads made as relief works is 14,458.

These only get a working subsistence allowance, one seer of cleaned rice a day for adults, half that quantity for children, while a rough sort of task work is insisted on. A gang have a reasonable quantity of work shown them as their day's task, and no one is paid till it is quite finished. In two or three circles there are a few men among these gangs employed on higher rates, as the work is particularly hard, such as bridging, clearing jungle off roadways, &c. Such work cannot be done by weak men or women, and able-bodied men have to be employed at, or nearly at, the ordinary wages paid by the cultivators to hired labourers. Again, among the gangs of women and children some proportion of strong men must be kept to break up earth or the like, so as to keep the weaker ones fully employed. These have to be paid higher when they are particularly wanted. It will be seen from the list in the margin what are the prevailing rates in the different circles for hired labor. Where daily wages are in vogue, 1½ anna a day or Rs. 2-12 a month is the lowest rate of wage anywhere given; but in addition to this is food, two meals a day, over and above the amount of the money wage. It is clear that the people have every inducement to find other employment than that on our roads, obtaining, under the irksomeness of the ticket system, something like real hard labor, with only a seer of rice a day. I do not believe the remuneration could be brought lower, and that the men on our works now are (save the especially retained men, probably not altogether 200 in number) only those who positively cannot obtain in this year any other employment (for the usual employers of labor are now, of course, working harder themselves and hiring less), or they are men not strong enough to go afield, though not reduced to accept gratuitous relief. The composition of the gangs will best be shown by a few examples—

Bhaduria ...	6 pice.
Bindol ...	7 "
Bochagunge ...	6 to 8 "
Churamon ...	8 "
Durgapore ...	6 to 8 "
Raneesonkoil ...	8 to 12 "
Phulbari ...	12 "
Thakurgaon ...	8 to 12 " a day.
Tambooli, up to ...	4 Rupees a month.
Luskerhaut ...	2-8 to 3 " "
Habra, up to ...	4 "
Porsha ...	2-8 "
Patiram ...	3 to 4 "
Putnetolla ...	3 to 4 "

	Men.	Women.	Children.
Churamon has ...	53	537	192
Dinagepore ...	257	574	703
Patiram ...	137	244	130

This shows that the men are but very few compared with the women and children. And the work they are doing, the proper consolidation and turfing of the roads, is very important

and valuable. Still I look to this class as that in which reductions can most easily be made, and the attention of the Doorgapore and Bochagunge officers is especially required to this matter.

In the remaining class we have the blind, maimed, infirm, in short the mendicants, the poor beggars, and the sturdy beggars, besides some poor relations of poor people who are cast on to gratuitous relief till better times return, and they can again be supported by their friends. These get only half a seer of rice a day for adults and half that for children, and a pice in cash is added occasionally to those whose condition is at all bad.

As for the professional beggars, there are just now very few who can afford to give. They may, however, be soon cast off, when they can safely be trusted to shift for themselves; while the infirm and mendicants must be kept on till public charity revives with returning abundance. It is hoped that the next fortnight will see our pauper list showing a total below 30,000 people.

The following descriptions will show the slight variations in the system of charitable relief organization:—

TAMBOLI CIRCLE.

Distribution is effected by mandals, superintended by inspectors and assistant inspectors. There are seven sub-circles, six under assistants, one under an inspector, who also occasionally visits and reports on the assistant's charges. Besides this, the inspectors have various duties.

The work began by the inspector and assistants visiting every village of each sub-circle, and settling what persons were to be brought on to charitable relief. The lists then formed are the basis of the lists of to-day, having been added to or decreased as circumstances demanded. They next selected one village mandal to distribute rice to all the paupers of a contiguous group of villages. Such mandal had a copy of the original lists given him. This has been amended from time to time. Each assistant compiled a register for his own charge, corrected after each circuit.

Each selected mandal has to distribute for some four or five villages. There are 80 such distributors, who get rice to the value of Rs. 5 a month where they wish for any remuneration. The mandals are always in communication with the assistant inspectors, and give information and aid in many ways. In the west central sub-circle, bordering on Durgapore, the mandals came forward and engaged in writing to support all their indigent without any aid from Government. This they have done. In Mhypal, the work being heavier at the commencement, a paid mohurir had to be stationed, and at their head-quarters the assistant inspectors in person distribute. This distribution is made once a week—all the villagers of the little group attending on the same day—as this takes up only one day of the mandal's time, and allows the sub-inspectors to time their visits so as to be generally present on distribution days.

Having selected the distributors and the recipients, the sub-inspectors supplied the distributors in the first instance with rice calculated to last two months; this stock has from time to time been replenished from the regular golas. The sub-inspectors are all men particularly fitted by reason of their local influence and experience, all but one being residents of their sub-circles and of the landholding classes. They are paid Rs. 40 a month, and have no mohurirs or peons found for them. They all come personally with their papers and accounts every Tuesday to the circle relief officer.

The manufacture of cloth and gunny (mostly by women) is superintended by these sub-inspectors, and the raw material is given out by, and returned to, and paid for by the sub-inspectors at their head-quarters.

The recipients of gratuitous relief get at the rate of half a seer of rice a day for adults, a quarter seer for children, and cash has not been deemed necessary for them.

Those on light labor are on task work; with industry a very little over a seer can be earned a day by an adult. A small proportion of cash is given to these people.

No cooked food has been given. There are a few orphans whose parents have died of cholera on the charitable relief lists, getting rather over the ordinary dole They are boarded out with respectable people, and will, no doubt, be readily adopted as soon as general prosperity returns.

It will be seen below what the chief differences are in other circles.

Mr. Fasson, from Bindol, writes that charitable relief is administered on the village system. The mandals have always undertaken the relief of their own villages without pay. The mandals of 127 villages distribute at the same rate as is given in Tambooli to those who are very poor and cannot work or find any other livelihood. Gratuitous relief has been rather strictly limited to the distribution of rice to the maimed and diseased, the very old and very young. Every one who could work was made to work in the out-door gangs. Pice were given sparingly, as people did not seem to want it. In the only case in which the people asked for pice, they fixed their own requirements at one pice a week only; clothing, too, was not lavished, a redundancy of clothing not being in fashion, and there were very few indeed reduced to wearing rags. Relief work was afforded as near as possible to their homes, and care taken to prevent the crowding of paupers in any one locality. From the end of June all our works were reduced to subsistence rates of one seer for adults and half a seer for children.

The villages were formed into groups of 20 or 30 villages, under group superintendents on Rs. 15 a month. These visit their villages regularly and report carefully. The mandals all do their work well: many of them being in authority over two or three villages, distribute for all of them. Just before the rain set in, a month's supply was sent to each village. During the rains much attention has been paid to finding employment at their homes by manufactures,

and at their villages by minor improvements under the supervision of the mandals. People of respectable castes, unwilling to work, but reduced to distress, were not found in this circle. People of higher castes are fairly well off, and having land, were relieved sufficiently by grain advances.

The circle officer observed that there were orphans, but not the result of the famine, and many might be collected no doubt, were it desired, but just all had some one to lookafter them.

In some respects the Putnitolla arrangement differs; local agency not being so much employed. The villages in this circle are divided into groups, containing from 60 to 130 in each group, according to the ascertained severity of the distress, and the particular portion of the circle in which the group is situate. Over each group is a superintendent, a man of good character, and accustomed to work in some respectable public post. Mandals are not much employed, as the circle officer was not so satisfied with their efficiency, or character as a class, as to feel warranted in entrusting them with such responsibilities. There are 18 group superintendents, getting each 30 Rs. a month. Their working is supervised by the two inspectors and by Mr. Sneyd himself.

They first of all went from village to village and compiled lists of all persons then requiring gratuitous relief. This was the starting point. Superintendents travel daily through their groups, submitting reports to the circle officers every Sunday. Every village is visited once a week, and they superintend the distribution of grain. The amount given in this circle seems to be in excess of what is allowed in other circles, and the reduction of staff is imminent. The superintendents in this circle are (besides the circle officer's personal observation) the general suppliers of intelligence.

In Durgapore, Mr. Pollen does his work first through his five inspectors, each with a division of from 60 to 100 villages, each with several assistants,—local men,—patwaries, getting from Rs. 10 to 15 a month. The old and infirm draw their daily subsistence allowance from the mandals, who at the outset got supplies sufficient to last two months.

In Thakurgaon, where relief had somewhat lately to be opened out, Mr. Scanlan remarked that all good men were employed elsewhere, and nothing but the leavings of men were available for him, of whom he would entertain but very few, and have the work done as far as possible by the village communities alone, with the supervision of his inspectors, all accounts being rendered direct to head-quarters.

In Luskerhaut, under the group superintendents, the mandals do all the work of supervision and distribution. "Mandals are never paid in cash for their remuneration in my circle; indeed, rice payments are made to very few. Those who are really poor get double pauper allowance. Many asked for remuneration, but I have set my face against it, for, if we were once to concede it, there would be no end to their demands, and the result would be that our pauper expenditure would be eclipsed by our payments to mandals."

In Churamon the mandals are nearly all paid. Equal firmness would no doubt have got the village headmen to give their services gratuitously. In both circles the amount of their services, individually considered, is not very great. I have mostly noticed the arrangements in circles under European officers, but it would be unjust not to add that generally I am as well satisfied with the arrangements made by the other circle officers. I conclude with a brief account of the arrangements made in the Sudder circle, which come before my notice daily.

The circle has four divisions, each under a sub-inspector; each sub-inspector has grouped the villages in his division. Before this was done, all the mandals were in pay, getting 6 or 4 Rs. a month, each representing his own village. The circle has now 65 groups, in each of which the ablest or most willing mandal in the group of villages is selected, and though only getting pay in grain, equivalent to 7 Rs. a month in rice, does every thing which a group superintendent would do, besides being the actual distributors of the grain. As in other circles when groups were formed, initial pauper rolls were prepared. These have been under continued revision and amendment, whether on the recommendation of mandals or the sub-inspectors. Each mandal has a complete list for all the villages under him, duplicates of these are with the sub-inspectors, and finally a general register of all the circle is compiled, and always kept under the supervision of the circle officers and a special inspector of charitable relief, under the headings gratuitous relief, out-door relief, and in-door relief.

The sub-inspectors, all local men, live out in their sub-circles, visiting each village at least once in two days. They submit diaries every other day, supervise the distribution of grain, see to the sufficiency of supplies, the condition of the paupers, and recommend or scrutinize all corrections and additions to the pauper roll. To provide for any emergency in the interior, at a time when transport may be very difficult, each sub-inspector has a reserve store in his division of 200 maunds, and they generally supervise the light labour gangs. At the outset, each distributor was provisioned for three months' expected requirements.

Most of the work connected with relief by spinning and weaving is conducted in godowns close by the circle officer's residence. Payments are there made, and raw material issued; but in the interior mandals take and return material, pay and manufacture articles for their own people in account with the central godown. They are especially of use in bringing this form of relief to the women who have prejudices to against appearing in public.

The correction of lists of paupers of out-villages falls generally to the sub-inspectors, whose energies are enlivened by occasional and unexpected visits and scrutiny of inspectors.

At Dinagepore where, on account of the city, beggars and mendicants and impostors do mostly congregate, besides the vigilance of the circle officer and his alien inspectors, there are two great checks against imposition. Close by the Government charitable relief office is a poor-house maintained by Rai Dhunput Singh Bahadoor, where cooked food is daily given

away. All of his agents and servants are well able to discriminate the deserving applicants from others, and they work in perfect unison with the circle officer. About 250 persons of the mendicant class are daily fed by him, and these cannot possibly get assistance a second time from Government and *vice versâ*.

Next, a few professional beggars, instead of being given a subsistence allowance and unemployed, are retained on trifling pay, and make themselves very useful in giving private information of cases of imposition. Enquiry nearly always proves them to be correct.

Money and clothing, in addition to food, are very sparingly given; light labour is indeed pretty hard work; and always task work, and a verv great deal of asistance in quarters where much is required, though not clamoured for, is afforded by the manufactures at a minimum expense to Government or the Central Committee.

Lieutenant Proudfoot speaks highly of the willingness and efficiency of the mandals.

I must mention the good example of Karim Bux, a zemindar in Raneesonkoil, who has volunteered and done particularly hard work in connection with charitable relief, without asking for any remuneration or recognition. I regret that, owing to the lateness when the Government circular came into my hands, the accounts of all expenditure for charitable relief are not yet ready, returns from some of the circles not having been received. The accounts will be forwarded as soon as compiled.

The following table shows the number of criminal cases in connection with scarcity that occurred during the month of July 1874 :—

		Number of cases reported, excluding cases declared to be false and never to have occurred.

Dinagepore Magistracy,
The 10th July 1874.

E. E. LOWIS,
Offg. Magistrate.

No. 944, dated Maldah, the 10th August 1874.

From—F. WYER, ESQ., Offg. Magistrate-Collector, Maldah,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to forward my report for the fortnight ending the 7th instant.

A.—STATE OF THE COUNTRY, &c.

During the past fortnight some of the bhadoi has been cut, though the greater part still remains to be reaped; it will nearly all be harvested during the next fortnight. The outturn is very good, seven or eight maunds a beegah. I went over the north-east part of the district towards Chanchal; the bhadoi there could hardly be better than it is, very little damage had been done by the rise of the Mahanuddee. Mr. Reily told me that a good deal of the crops towards the west part had been submerged and destroyed, but that part had a capital rubbi crop last year, so the people can bear the loss very well. The ryots are beginning to cut their Indian corn; this crop is very good, and is chiefly sown in the west part of the district. The small quantity that has been sown in the Barind has turned out very well.

The prospects of the hymunti crop, as far as one can say, continue good, though rain is required in the north-east part to complete transplantation. This complaint of want of rain is pretty general; however, I do not think that the prospects of this crop are yet materially affected; transplantation goes on up to the end of this month, and there seems to be every likelihood of there being more rain. Besides this, the ryots, taught prudence by the scanty rainfall of last year, have bunded up their tanks so as to retain the water for irrigating their crops. Until the end of this month it is impossible to say how the hymunti will turn out.

The Sanitary Commissioner of Bengal went through the district from Chanchal to Nowabgunge, and has given a very favorable report of the condition of the people. The following is an extract from his report:—"The average health of ten villages was 18 per cent. with spleen enlarged; 12 per cent. anæmic; 2 per cent. emaciated; 4 per cent. aged, and 64 per cent. in normal health."

Dr. Coates observes that this is a large percentage of anæmia, and that those most affected were the town school boys whose parents were in easy circumstances. He attributes the loss of *physique* in these children to the want of muscular employments. The next most affected were the people of the southern villages, where the anæmia varied from ten to thirty per cent. of those examined. This, and the presence of some orphans at Gomashtapore, is the only evidence of there having been any scarcity in Maldah. The native doctors of Nowabgunge, Old and New Maldah and Chanchal, all concurred in telling Dr. Coates that there had been no deaths and no diseases the result of scarcity. Dr. Coates adds: their hospital records show the same thing. There has been a very slight increase in the deaths from diarrhœa and dysentery, while those from cholera have been much less than in the previous year in corresponding months.

In Chanchal Mr. Reily reports that there was more than an average crop of bhadoi. The supplies in the local markets are increasing, and prices have fallen below the rates at which Government is selling, so that Government sales have fallen off a good deal during the last three or four days.

During the past fortnight the prices of rice have been slightly lower than during the previous fortnight. The circle officer of Nowabgunge, Baboo Ishan Chunder Sen, reports that traders who have hitherto held back their stores are now eager to sell, and that lately they have exported a large quantity of rice to Calcutta. One man brought a boat load of 250 maunds of paddy to English Bazar from Dinagepore; he told me he had brought it from a place called Sihal, thana Bansia, where he gave Rs. 2 a maund, and was retailing it here at 18 seers for the rupee.

The following tables show the latest prices at the principal marts, and the quantity of grain brought to English Bazar by river during the week:—

	Paddy.	Common rice.
English Bazar	22	12 to 13½
Maldah	.....	12 to 13½
Chanchal and Abadpore	22	14

„ Nitpore	100	.....
„ Kalikamoria	.....	100
„ Rohunpore	865	395
Total	4,045	2,745

RAINFALL.

During the fortnight the rainfall has been scanty, the quantity recorded at head-quarters being only 2·57 inches, and at Chanchal 1·59. On the whole, the health of the people has been good, though at Shibgunge some deaths from fever are reported.

B.—RELIEF WORKS.

The number of people on relief works under the Department Public Works has slightly increased during the fortnight, the daily average being 1,118 against 1,088. For the Sudder

sub-division there is a slight decrease, the daily average number being 1,364 against 1,479 last fortnight. In Chanchal there has been an increase in the number, the daily average being 1,260 against 476.

There will probably be a great falling off next fortnight, since the people will get employment in reaping the bhadoi crop; and I have recently reduced the daily wages of coolies not on task-work to ¾ of a seer a day, that being mere subsistence allowance.

C.—Transport of Government Grain.

There is nothing to say under this head.

D.—Storage of Government Grain.

There are now 4,890 maunds of Government grain in English Bazar. This, I think, with the quantity distributed to the several circles, will be quite sufficient for the wants of this district, for rice is getting cheaper, and wheat is now selling at 16 seers for the rupee, *i.e.*, only one seer less than at this time last year.

All the hired godowns have been given up, and the only establishment retained is the one at head-quarters directly under the district grain officer. During the fortnight Lieutenant Barton came round and recommended that some of the rice stored in English Bazar should be removed and stored in the transport golas at Old Maldah. I found that this step was not necessary, since a few days after Lieutenant Barton left there was plenty of room here.

With reference to paragraph 5 of Government letter No. 4741—S.R. of the 31st ultimo, no serious damage has been done to any of the rice stored in this district; a few bags only have been heated and damaged by rats, but there is now ample room in the godowns, so that there is plenty of ventilation.

The following table shows the places within the district to which grain was sent during the fortnight:—

		Quantity sent. Mds.	Sr.	Ch.
From English Bazar ...	To Bamungolah	488	30	0
	" Gomastapore	1,480	16	8
	" Bulbulchundi	565	13	0
	" Kamlabari	24	7	8
	" Kaliachuck	500	0	0
	Total ...	3,058	27	0

E.—Advances to Private Parties.

No advances of money have been made during the fortnight. The quantity of grain advanced to ryots for the Sudder sub-division was 4,197 mds. 20 srs., and for Chanchal 706 mds.; total 5,503 mds. 20 srs.; and thus the total advanced up to date is 23,988 mds. 25 srs. 4 chs. The value of the immovable property pledged as security for these loans is, for the most part, less than Rs. 100; so that generally it is not necessary to register the bonds. In Chanchal, the ryots who are beginning to sell their jute and bhadoi are already beginning to repay these advances. Mr. Reily originally advanced the rice at 10 and 12 seers for the rupee; I have told him to allow the borrowers to pay at the more favorable rates of 12 and 14 seers, these being the rates subsequently sanctioned.

F.—Charitable Relief.

There has been a decrease in the daily average number of people gratuitously relieved, the number being in the Sudder sub-division 6,625, against 7,701 of the previous fortnight; and in the Chanchal sub-division 2,690, against 2,996; the daily decrease for the whole district was thus 1,382. The number relieved in the Sudder Circle is very great, being 2,421 a day. Unfortunately Mr. Livesay, the relief officer, was taken ill, and so could not go round and inspect the centres, otherwise the decrease would probably have been greater. I expect that there will be a much greater decrease during the next fortnight. The number of centres closed during the fortnight was—

Grand Total	Month of July 1874	85
	Corresponding month of July 1873	67
	Ditto ditto 1872	58

Remarks.—No grain theft.

The great increase is in petty thefts, of which there were more than double the number of the corresponding month last year. This is attributed to the prevailing scarcity.

Maldah,
The 3rd August 1874.

B. S. Moitreya,
Ct. Inspr. in charge of District S. Office.

F. Wyer,
Offg. Magistrate.

No. 2032, dated Beauleah, the 12th August 1874.

From—W. H. D'Oyly, Esq., Collector of Rajshahye,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I have the honor to submit herewith my Narrative for the fortnight ending the 8th instant.

A.—State of the Country.

The supply of rice in the markets throughout the district is ample. Importations at all the river-side marts along the Ganges, Godagaree alone excepted, have been extensive. Singra and Nattore have also received largely from outside. Prices are gradually falling. There was a report, when prices rose suddenly in the end of July, that the supplies at Dacca were failing, and that the merchants were closing their stores; but subsequent large and continued importations soon removed this idea and caused the prices to fall. They range at present from 10 to 15 seers (80-tolah weight) per rupee. The highest of these prices (10 seers) prevails at some of the marts in Tannore, Manda, and Bagmara; while in Singra and Beauleah rice is procurable at 15 seers. In Manda potatoes are selling at 22 seers 8 chittacks per rupee. The aous crop has been cut in several parts of the district, and the rice is coming into the markets. Mr. Clay reports that it is selling at Runbagha at 20 seers per rupee. There has been a decided insufficiency of rain. The weather has been unusually clear for this time of year. This, though advantageous for the silk bund, has not improved the prospects of the amun rice crop, regarding which fear has been expressed by many. After the first rise, the water in the rivers sank very low, but the Ganges has since risen gradually, and is now higher than the highest level which it attained in the first rise. This gradual rise is good for the deep-water rice. For the transplanted rice in the Bhurind and the north of Singra, rain is much wanted; and unless there is a more plentiful rainfall hereafter than there has been lately, it will suffer greatly. Jute has been cut in the north of the district, and the Sub-Divisional Officer of the North Bhurind reports very favorably on it. All other crops in the ground promise well. Mr. Manisty reports that maize is ripening in his sub-division, "and has afforded relief to not a few persons; but the greater part of it will not be ready for another ten days or so. Poultry has become scarce in most parts owing to the Mussulman population having lived in an unusually large measure upon it this year. I am informed that field-coolies are paid a considerable portion of their wages in poultry, the ryots not having the means to pay the whole in rice."

The condition of the people continues the same. In the south and south-east of Tannore, in Bagmara, the north of Pootea and Beauleah thanas, distress is undoubtedly severely felt by many. The numbers at the poor-houses in this part are still large, but they have been considerably reduced at Khooshadanga, where at one time they were enormously high. That distress is really more severe in the parts above specified than it was a month ago, is certain; that it is acute, is proved by the fact that men, women, and children seek eagerly for work for even half a seer of rice daily. The children have now in many places to dive for kunker, still they do dive for it, and bring it to the centres. Men who were getting 13 chittacks of rice and pice for dall, salt, &c., were told that they would now only get 8 chittacks for working on the roads, &c; several refused at first, but in two days returned and begged to be allowed to work for even half a seer a day. Facts like these prove indubitably that distress is severe. It may seem strange that these people, who were not so distressed when prices were higher, and when prospects were not so good, have now suddenly fallen into great distress at a time when prices have fallen and rice is plentiful; but it is a fact, and the reason is, first, that private stocks have been exhausted, jewels have been pledged, and there is no money to buy rice, even though it should fall to 30 seers per rupee. Again, the part of the country in question is noted for its silk; cocoons are raised there in sufficient quantities to supply not only the neighbouring factories, but those also at a considerable distance. The price of silk has fallen enormously, and the price for cocoons has fallen accordingly; a man now gets one rupee where before he got two. The silk bunds have not been good this year, and the people have consequently suffered. The aous crop is also more backward in this part than elsewhere, but I trust that when it comes in our poor-houses will be cleared. There has been an increase in crime, but only in a trifling degree, as compared with the corresponding portion of last year, and a decrease as compared with 1872. There have been no cases of starvation.

B.—Relief Works.
C.—Transport. } See statements.

D.—Storage of Government Grain.

The golas having issued the greater part of their stocks, it has been easy to carry out the Government orders regarding ventilation. There has been no heating, and I trust that no injury will be sustained from this source.

E.—Advances and their Results.

Rupees 3,966-8-3 have been repaid out of the advances made to dealers to import rice

F.—Charitable Relief.

See statements and remarks above.

J. J. O'FLAHERTY,

Executive Engineer, Rajshahye District.

BEAULEAH,

The 11th August 1874.

No. 19, dated Rungpore, the 8th August 1874.

Memo. from—E. G. GLAZIER, ESQ., Offg. Magistrate and Collector of Rungpore,
To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

Narrative of scarcity and relief of Rungpore district for the fortnight ending Saturday, the 8th August 1874.

A.—STATE OF COUNTRY.

Market quotations.

	OF 80 TOLAHS WEIGHT PER RUPEE.	
	Last fortnight. Seers.	This fortnight. Seers.
Head-quarters	18	20
Govindgunge, ...	13 to 22	15 to 16
Peergunge	20	20
Sadullapore	20 to 26	20 to 24
Sundergunge	20	20
Molung	20	18 to 22
Mahigunge	20	23
Kumargunge	16	17 to 21
Borobari	13	21
Durwani	12 to 15	24
Kallygunge	14	22

The greater part of the aous rice has been housed, and the harvest has begun on the khair lands of Govindgunge. In the north, at Durwani, the yield is expected to be double the average, and prices have gone down to 24 seers the rupee. Exportation to Serajgunge and Nattore is now busily going on all along the south, and prices have risen in Govindgunge where the trade is most active to 16 seers the rupee, and it is anticipated that there will not be much fall again before the amun is reaped. The markets are now assuming their normal condition, the rates being cheaper in the north, and increasing gradually to the south, where the facilities of exportation exist.

The prospects of the amun crop are less favourable. The rainfall has been deficient, only 1·48 during the fortnight. Everywhere the cry is for rain; transplantation of seedlings is being retarded and some are withering. In low parts, however, there is still water in the fields, and in Dimla, especially, transplantation is actively proceeding. But unless we speedily get rain, we shall have a late harvest in all the high lands to the detriment of the yield, for the people say that rice which is transplanted in Asar yields twice as much as that which is transplanted in Srabun, and the same holds good with respect to Srabun and Bhadra. The dry weather has had one good effect in killing off the caterpillars, which had very generally attacked the young plants. They have not done much damage except in Moheegunge circle, where it is said to have been considerable.

There is little to note as regards the condition of the people. The reaping of the aous is driving away distress in the north at Durwani and Dimla. Pirgunge shews a considerable improvement. The following quotation from the Molung officer's report aptly describes the state of the greater part of the district:—

"Barring their debts to the zemindar, the mahajun and the State, the majority of the people are now in a perfectly good condition, their health as good as usual, their stores full, and their minds free from all anxieties. In some places the people seem so happy that, if a stranger were now to visit the houses of our cultivators, he should certainly be at a loss to perceive that there has at all been a famine in the district. The merry songs, the laughs that indicate a vacant mind, the pleasant pastorals, and the love ditties that now ring the peasants' homes in every village in the evening, are unmistakeable proofs of their light heart and their freedom from all harassing cares of the world."

In the pauper circle of Mahigunge alone the numbers continued large, but the lists are being carefully scrutinised.

B.—RELIEF WORKS.

Daily average number of coolies employed during the fortnight—

CIRCLE.	Men.	Women.	Children.	Total.	On piece work.	On daily wages.	Unenumerated.

Jelalgunge road	44	.....	.....	44	44	.....	.....
Total ...	112	.....	.....	112	112	.....	.....

Baboo Akhoy Kumar Sen of Molung thus reports of the work done under the village group system:—

"Of all circles in the district it was first introduced in this division, and of all parts of my thana, first in Andwah. 34 villages in that Pergunnah were placed under this system,

and the number of labourers averaged about 1,500 per month. The number of village paths repaired or constructed in that pergunnah above is 275. These vary in length from 1 rasi of 87½ cubits to 10 rasis or 875 cubits and from 6 cubits to 3 in breadth. It was next introduced in Shurhatta, where 32 villages were grouped for purposes of better inspection. There we have 58 paths repaired and constructed, the average length of which is 462 yards and average breadth 8 feet.

"The expenditure on these paths did not exceed a few hundred rupees in cash and 2,000 maunds of rice, and considering the agency at our disposal, and the small encouragement given to persons to join the work (the remuneration having been a bare subsistence allowance), we have, I think, every reason to congratulate ourselves at the gratifying results produced by the weak-bodied people, who, till their removal to the villages, were a sort of nightmare to the overseers and the supervising agency, and certainly a great obstacle to the progress of our works on the roads. Besides these roads, 12 bamboo bridges have been constructed by them in Shurhatta, and the work done is certainly creditable to the parties concerned. The work done in Andwa came under my notice on several occasions, and I have always had reason to feel satisfied with their quality."

C.—Transport of Food.

Nothing to note.

The grain expenditure during the fortnight has been 30,000 maunds, and that for the ensuing fortnight will probably be 15,000 maunds. The disposal of the Cooch Behar reserve is at present under reference. No grain has been found to be heated in any of the storehouses. I have called for detailed reports, and shall notice the subject more at large in my next. I have already reported in my previous narrative that insects had attacked the Borobaree balance, and that I had sold it off locally. I hear now that they have appeared in the 2,000 maunds left unsold at Darwani, and I am apprehensive that the stocks at Chillakhal, Kallygunge, and elsewhere may be attacked in this way. I shall have a special examination made in these stocks, and do what is possible to obviate any damage; but I think it is desirable to sell off all the clean rice at present market rates, and keep in hand only the cargo rice which is less susceptible to attack.

E.—Advances to Private Parties.

	Rs.	As.	P.
For purchase of food ..	7,500	0	0
To zemindars for advances to their ryots	1,50,844	0	0
To jotedars " " "	27,706	0	0
Add advances sanctioned but not taken by the parties	19,700	0	0
Total	2,05,750	0	0

The work of advancing grain is still actively going on in Mahigunge and Peergunge. In Sadullapore and elsewhere it is being brought to a close. The total amount advanced by the statement is 37,784 maunds, but in addition advances of 6,000 maunds have been arranged for, but the grain has not yet been delivered.

F.—Charitable Relief.

(Prepared by the District Relief Officer.)

The closing of the last private relief centre was reported in the previous narrative. During this fortnight six Government public food relief centres have have been dispensed with, leaving thirteen still open. The majority of these will probably not be retained beyond the next fortnight. In Govindgunge charitable relief has been entirely stopped, except west of the Kuratoya, and there enquiries are being made in order to effect a further reduction.

In Mahigunge a large number still remains; clothes have been given to 322 people.

In Molung Rs. 1,100 have been expended in the distribution of clothing, and charitable relief has ceased there with the exception of the village light work, which also it is intended to bring to a close during the ensuing fortnight. The total number is 10,980 against 16,154 in the last return, shewing a reduction of 5,174. The returns of the expenditure on charitable relief, in Form A, have not yet been received from the relief officers. The statement will be submitted as soon as possible.

(MEAN.)

1903, dated Bogra, the 10th August 1874.

From—E. J. BARTON, Esq., Offg. Magistrate and Collector of Bogra,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the fortnightly narrative of relief operations which is now due.

CONDITION OF THE COUNTRY AND PEOPLE.

2. The improvement which I have previously reported in the condition of the country and people still continues. The principal agricultural operation has been the transplanting of the amun crop, and the season hitherto has been favorable for it. Up to date, I should estimate the proportion of amun which has been planted and is in the ground at nine-tenths of the whole. The rainfall during the past fortnight has amounted to 3 12 inches. It has been somewhat deficient for the time of year, and this deficiency is shown in the great subsidence of the water level in rivers and tanks throughout the district. However, I am glad to be able to report that the comparative dryness of the last fortnight has as yet done no injury either to the *aous* or the young amun. In fact, the *khiar* soil of this district retains moisture so long that many ryots have told me the young amun would not be materially injured if we had no rain for another eight days. The aous has ripened well, and the outturn of grain has come up to the great expectations which were formed of it. The aous rice is being now extensively cut, and is finding its way into the markets in very large quantities. As I anticipated, its effects upon the selling price of food has been very great. In many parts of the district the new aous rice has been selling at from 18 to 24 pucka seers the rupee. As was to be expected, this great cheapening of the price of food in the local bazars has still further diminished our sales of Government grain to the public.

3. I append, in the margin, a statement of prices of rice during this fortnight and the last. The low figures are the quotations for old and seasoned rice. The high figures are the quotations of the new *aous*. This latter as a food grain is not held in such estimation by the people as old amun rice, which partly accounts for its comparative cheapness. During this fortnight many boats from Rajshahye and other districts have appeared in our rivers seeking cargoes of rice. There can be no doubt but that a good deal of the *aous* will be exported.

Relief Works.

4. As I reported in my last fortnightly narrative, these have been entirely stopped. During this fortnight the operation of giving a subsistence allowance in rice to the laborers who were turned off our works was continued, and has now been completed. The expenditure of grain in this direction will be shown under the head of gratuitous relief. The supervisors and other subordinate establishment which the Executive Engineer entertained, have been discharged. The works have been closed, and no bad results have followed; there has been no demoralization of the laboring population. This fact has been proved by the singular activity with which agricultural operations have been prosecuted universally throughout the district during the past fortnight.

5. The most important operation during this fortnight has been the completion of the payment of a subsistence allowance to the thousands who were turned off our roads. I find that during the period under review 15,615 persons received this payment at the Bogra gola, where the large quantity of 15,598 maunds of grain was distributed to them. This large total of persons was composed of the following, viz., (*a*) chiefly laborers on works under the Executive Engineer; (*b*) laborers on works under the relief officers direct; (*c*) inefficient laborers, chiefly aged persons, who had been turned off the roads in previous months with an allowance of from 15 to 20 seers of rice each, to whom it was found necessary to give another advance of grain.

6. The laborers who were thus turned off, and to whom these subsistence allowances were given, were, to judge from their external appearance, exceedingly poor. Very many were helpless, from age, or nearly so. In apportioning the grain allowance, the principles referred to in paragraph 11 of my last fortnightly narrative have been observed. The average amount given to each is below one maund.

Transport and Storage of Government Grain.

7. There is really nothing to narrate under this head this fortnight. I have ordered to transfer 20,000 maunds of my stock to the district of Rajshahye, and steps already been taken to effect this. There have also been movements of grain from the re at Chandanbasia to Bogra, and from Bogra to the interior golas. The heavy expendit Government grain which has characterized the last three fortnights has very mat diminished our stocks in many of the interior golas. I shall be careful to see, however a reserve is maintained to meet the reappearance of the scarcity, which I fully expect i end of September or beginning of October, when the effect of the excellent *aous* harves the markets will probably cease.

8. As our relief works are now finally and completely closed, and as the conditio country is steadily improving, I have been diminishing the numbers of my interio In the Sudder circle no less than six subsidiary golas have been shut up, and their e ment discharged. Many of the smaller golas in the Panchbibi circle have been em they will not be refilled. It is my wish to have a stock of grain at only one or t places in each circle, so as to be ready for a reappearance of the scarcity, should suc

9. *Sales of Government grain to the public.*—In the 19th paragraph of my last narrative, I expressed an opinion that there would be no appreciable increase in th Government grain sold to the public, even under the relaxed rates sanctioned by Commissioner, because the prices of country rice were easy, and were daily opinion has been confirmed by the r in the margin the figures of the sales night and also for last fortnight; of country rice is selling at the quot present prevail in the bazars everyw possibly sell the Government grai

10. Steps have been taken to and mahajans of Nattore in Rajsh at which we will sell them our gra and Chandanbasia. Some Nattor come in and made considerable do not, however, appear in the a

11. *Rice Loans.*—This form of relief has been so very actively prosecuted during previous fortnights that there remain but few deserving persons to whom loans of grain have not been given. The *aous* harvest, and the consequent great increase which has taken place in the food supply of the country, have further diminished the necessity for working this form of relief. In the margin are given figures which show the loans for the past and this fortnight. In future fortnights there will probably be a great diminution of grain expenditure under this head. I also do not consider that there is now any necessity for prosecuting loans with the energy and activity which have distinguished past fortnights, for there has been a very great amelioration in the condition of the country and the food supply of the inhabitants. Moreover, the available balance of grain at my disposal has fallen low, as is shown in the margin. With even a contracted expenditure, a good deal of this, 63,000 maunds, will certainly disappear before the time when I think a temporary return of the scarcity is highly probable. I shall therefore enter upon a policy of economizing my stocks.

13. By far the greater portion of this grain expenditure represents the payment of stence allowance to laborers who were turned off our works. As I have already ined, this operation was continued into the present fortnight. It has, however, been now y concluded. I have already discussed this expenditure in paragraphs 4, 5 and 6 of my nt narrative, and in paragraphs 7 to 14 of my last fortnightly narrative. There does not n more for me to say here.

4. *Relief by spinning and weaving.*—There is almost nothing to say under this head. The marginal figures show what has been done. The number thus relieved is daily diminishing, as was to be expected, from the continued improvement in the state of the country.

15. I think the time has now come when we may safely discontinue this form of relief altogether. It is an expensive mode of administering relief. The raw material (cotton and jute) is costly, and is generally worth more than the manufactured articles which we get back from the people. The cotton thread and yarn, by women, is very inferior, and is unsaleable. They cannot make better. In fore English cloth had supplanted the native manufactures, the Musulman stern Bengal were famous as spinners of yarn and thread. Our late experience hat the art is forgotten. Machine-made yarn and thread have supplanted the icles. Altogether, I think that this form of relief should now stop, for it is are doing little good with it, and the articles we get back are useless upon our therefore issued the following instructions to circle officers :—

he time has now come when we may curtail or shut up altogether our relief d cotton.

will do this according to the best of your discretion. If you think that this ould be continued a little longer, by all means continue it. If you think that cessary, I beg you will discontinue it.

Pages 2917 to 2920 missing

F.—Charitable Relief.

Five hundred and four persons were gratuitously relieved during the fortnight; orders have been issued to stop all future grants. Had we trusted to the sub-committees, there would have been still many on our lists. As an experiment, I directed the sub-committee at Pubna to stop supplies for a week, directing them at the same time to keep an eye on the late recipients. The result was much what I expected; no complaints were received till the day for again giving out supplies came round, but as they all appeared in good health, and well fed, they were again dismissed grainless, and with no bad results. This, together with the fact that in the flooded part of the country no such relief could be granted (the recipients being unable to come to the sub-committee depôt) for more than a week, and that no ill consequences resulted from this stoppage, determined me to put a stop everywhere to gratuitous relief. The sub-committees will, however, keep a strict watch that no suffering is caused, but I am convinced that no complaints will be received. Distress being now over, I propose, with the sanction of the Commissioner, to report monthly only in future, unless during the next fortnight my present orders have to be countermanded.

G.—Financial Results.

No private subscriptions promised or realized during the fortnight. Reminders have been sent to the several subscribers, as well as to the sub-committees, for speedy realization of the unrealized subscriptions.

Fourteenth Fortnightly Narrative of Scarcity and Relief in Serajgunge Sub-division fro July to 5th August 1874.

A.—State of the Country.

The aous harvest has been nearly completed during the present fortnight, and the which would have been 14 annas, but for the flood, has proved about 10 annas. Th also been considerable imports into the Serajgunge bazar; as though our crop has been t that of other districts has been much better. There is therefore in the sub-division stock of rice probably sufficient to carry on the people until the winter harvest. The of the amun rice is good. The rainfall has been 2·60 inches, which is as much as we

There has been a considerable fall in prices. In the following table this app market manner at Serajgunge, where prices are governed by general rather than lo and at Raigunge and Taras, places where no great damage has been done by the f Ullaparah and Shazadpore, where the flood has been destructive, there is no change as even there imports must soon bring down prices to the general level.

* This advance was ordered to be made when there was distress, but by mistake the sum was paid out of the Road mistake which has now been rectified.

Table showing retail price of amun rice—

Station.	Number of seers per rupee according to last narrative.	Number of seers per rupee at present.
	Srs.	Srs.
Serajgunge	13¼	15¾
Ryegunge	12	13½
Taras	10½	11¼
Ullapara	12¾	12¾
Shazadpore	12¾	12¾

As to the condition of the people, it is satisfactory elsewhere, but deplorable in the flooded tracts. In these the destruction of the aous crop has often been complete. Where the ryot has sown jute he can live by its sale, but about half the sufferers have no jute. The importance of the cultivation of this fibre as a preservation against famine has been shewn this season and last. The jute plant resisted the draught of 1873 and the flood of 1874, while the rice in the high lands was dried up by the one, that on the low lands swamped by the other.

B.—Relief Works.

All road work has been stopped during this fortnight.

C.—Transport of Food.

At the request of the Collector of Pubna, I sent him 1,000 maunds of rice on the 25th July 1874.

D.—Storage of Government grain.

The following statement shows the result of our grain operations up to 25th July 1874. It includes all petty purchases made by committees for distribution of cooked food. In round numbers, we have received 12,000 maunds of rice from Government and bought 15,000 maunds ourselves. We have sent 1,000 maunds of this to Pubna and spent 13,500 maunds, so that our stock is hard on the date to which these figures relate; the 25th July was 12,500 maunds or a little more than the Government grant:—

Statement showing the storage and consumption of Government grain in the Serajgunge Sub-distr since the commencement of the operation up to 25th July 1874.

Name of Circle, Serajgunge.

Date for which figures are given, 3rd April to 25th July 1874—

	Mds.	Srs.	Ch.
Total allotment of Government grain	27,382	19	9
Total quantity of grain stored inclusive of grain transferred to other districts	26,382	19	9*
By gratuitous distribution in any shape	10,259	25	3
By advance to zemindars and ryots	2,677	39	0
By payments in ₹ to laborers	570	14	3
Total ...	13,507	38	6
Estimated grain expenditure of the ensuing fortnight	2,000	0	0

The following table shows the transactions in grain between 11th and 25th July 1874:—

	Mds.	Srs.	Ch.
Balance in hand on 11th July including grain in transit, and at Taras sale gola	17,106	37	1
Received during the fortnight	91	7	8
Total ...	17,198	4	9
Expenditure in wages to coolies	43	0	0
Charitable relief	2,545	6	6
Loans to zemindars	150	0	0
" to khas ryots	411	0	0
Balance on the 25th July 1874	14,048	38	3

Our present stock is about equal to uor probable wants.

E.—Advances to private parties and their results.

have stated the amount of advances to private parties for the fortnight for which ts have been rendered in form.

uring the actual fortnight under report the advances made here were—

	Mds.
To zemindars	240
Khas ryots	786
Total ...	1,026

mindars who own flooded tracts, where relief is much wanted, are being pressed to take s. I have hitherto refused to advance grain to any ryots except on our own khas or those settled for a very short period. The flood has been severely felt on the a chur, where there are many khas villages.

e rates for advance to zemindars fixed by the Commissioner are 16 seers per rupee rice, and 14 seers cleaned rice. I think they might now be lowered to 18 seers for and 16 seers for clean rice, as prices have fallen and are likely to continue to fall. To lend at the rate of 14 seers Burmah, and 12 seers cleaned rice. These prices are above ket rates, the quality of the rice being taken into account.

* 1,000 maunds was sent to Pubna.

(F).—Charitable Relief.

During the fortnight 4,282 persons received relief on the ticket system, that is, they got an amount of uncooked grain sufficient to last these 14 days; 133 persons were fed, on a daily average, at the unnochotras, making a total of 4,415 in receipt of charitable relief. The number last fortnight was 5,038, so that there has been a decrease of 623 paupers.

Of these, only 558 reside in the Raigunge circle adjoining Bogra, where the distress was at first keenly felt, but is now almost over Ullapara, which marches with Rajshahye, has to support the remaining 3,724. They generally belong to the flooded tracts. These have been inspected village by village and tickets issued to the infirm, to women and children without protectors, and to others in a similar state of helplessness. When these tickets are presented, we will have a moderate increase under the heading of charitable relief. The zemindars will be asked to assist the able-bodied inhabitants of these villages with loans of grain, which they can obtain from Government for the purpose. List of the villages distressed and of the owners names have been sent to me by the Superintendent of Ullapara circle.

Of the 4,415 in receipt of relief, 1,403 work in jute or cotton for their food. We have a large stock of the product of their work, and find it difficult to get a market for it; 2,452 receive gratuitous relief.

Five hundred and sixty are respectable persons (class D), to whom the rice is advanced as a loan. They get it on ticket fortnightly, and not as the khas ryots in one amount. Their difference is that I believe the khas ryots will repay us, and that if they do not do so willingly they will be compelled to do so, but the respectable persons in distress will never settle the account.

G.—Financial Results of the Fortnight.

Rs. 988-7-6 has been expended during the fortnight as follows:—

	Rs.	A.	P.
Price of raw material for manufacturing cotton, thread and jute twine ...	773	13	0
Repairs of gola	0	4	0
Transit charges	172	14	0
Expenses incurred by sub-committees in the distribution of cooked food ...	29	15	6
Purchase of weights and scales	5	4	0
Office charges	2	5	0
Total ...	988	7	6

Remarks of Magistrate.

Except in the tracts inundated by the late floods, I think we may safely declare all real distress to be over. The number receiving gratuitous relief at Raigunge ought now to be considerably decreased, seeing that rice is now selling there at 13½ seers, and that the amun crops have not been injured by the floods. Importations, too, to the flooded tracts should render it unnecessary very shortly to grant such relief at Ullapara and Shazadpore. The attention of the sub-divisional officer will be called to this.

Pubna,
The 10th August 1874.

W. V. G. Tayler,
Magistrate.

No. 206—S.R., dated Burdwan, the 13th August 1874.

From—C. T. Buckland, Esq., Commissioner of the Burdwan Division,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I have the honor to submit in original the accompanying district narratives for the fortnight ending Monday, 10th August.

2. *Bankoora.*—The postscript to the Collector's narrative states that heavy rain had been reported from all sides, including the north. This makes it unnecessary to offer any further remarks. I was in the north of the Bankoora district on the 5th instant, and was then satisfied that there was no visible cause for apprehension about the coming crops.

3. The statement of charitable relief shews a reduction of the numbers relieved in Class B, from 30,255 to 22,101, and in Class D from 2,863 to 1,605; whilst the numbers under class C, from whom light work is required, have risen from 6,280 to 9,096. This salutary reform is due to the exertions of Mr. Macaulay as relief officer, for so long as Mr. Larminie was left without any European subordinate, it was almost impossible for him to put a sufficient check upon the unscrupulous liberality of the village sub-committees, unrestrained, if not connived at, by the paid native relief officials of Government, whose appointments are dependent on showing as much distress as possible. I believe that within the next fortnight the distress in Bankoora will be reduced to very manageable dimensions.

4. *Beerbhoom.*—The Collector notices the increase of pauperism, which he correctly attributes to the increase of native circle and group relief inspectors, and which will, I hope, be checked when the European relief officers of the district can apply effective supervision. The general condition of this district as regards the prospects of the crops is remarkably good, but there is an exception in the small and extreme north-east corner of Barwan, which adjoins the Moorshedabad district. This unlucky corner of the Beerbhoom district has not been favoured with rain, and is at present in need of active relief, which is being provided by the Collector and by the relief officer, Mr. O'Donnell.

5. The three cases to which the Collector alludes, in which death is attributed to starvation, appear to be palpably false stories, and I think it is unnecessary to offer any further remarks on them.

6. The Collector has omitted to send the usual statement C of the persons employed on public relief works. He will be called on to submit it.

7. The average number of the daily recipients of charitable relief has risen from 24,515 to 31,195. The increase has been chiefly in class B, from 18,429 to 23,897; but there has been a proportionate increase in class C, from 6,076 to 7,298. The entry in class D seems erroneous when compared with the corresponding entry of the previous fortnight.

8. *Burdwan.*—The Collector's narrative is rather meagre, and the report of the sub-divisional officer of Culna is written in exaggerated terms, and the facts are not borne out by what I heard at Burdwan yesterday from the Collector and the district superintendent of police. When the rainfall in the Culna sub-division is 7·22 inches, and the Deputy Collector still wants another heavy shower for the transplantation of the amun rice, he writes nonsense. I fear that he is jealous of the distress and the amount of the relief given in the adjacent sub-division of Cutwa, and he wishes to make out that his wants are as great. I have requested the Collector to give immediate attention to the real state of the sub-division.

9. The Collector received the narrative of the Cutwa sub-divisional officer on 10th instant, and he might have delayed his report for it, or have noticed it in a postscript. The sub-divisional officer states that upon the whole more than half of an average aous crop cannot be expected under the most favorable circumstances, but I must observe that this statement seems to me, according to what I saw and heard at Cutwa, to be ridiculous. The very liberal distribution of Government grain in this sub-division has produced the usual scramble of applicants for advances of grain and charitable relief in any form, and unless European agency is supplied I have no hope that it can be thoroughly checked by the native Deputy Collector and his native subordinates for relief purposes.

10. In writing on charitable relief, the Deputy Collector states that the average attendance at the 29 relief centres in the Cutwa sub-division was 10,716 a day, against 4,757 of the previous fortnight. I quote the following extract from the Deputy Collector's report, which bears out my remarks in the previous paragraph.

"This is owing to a large number of relief-houses being lately opened, and the more detailed inquiries made by the inspectors and ameens in the villages within their groups. In the relief-houses that I have visited, I found that the labour-test was not fully enforced; the labour returned in lieu of rice received being nominal. I have now ordered that a full day's labour should be exacted from all those who are capable of doing work. The greatest obstacle to the enforcement of this labour-test is the action of the sub-committees, who are averse to co-operate with us in this matter and thus lose the good opinion of their neighbours; but I hope to be able to carry it out by the agency of the ameens, who have received strict instructions to supervise all paupers working in relief-houses."

11. With regard to the sale of Government rice, to which the Collector refers in his narrative, I reported demi-officially from Raneegunge that no sales to wholesale dealers had been made, although authorized by the Government telegram dated 1st July. I am under the impression that I spoke to the Raneegunge sub-divisional officer on the subject; but it will be seen from the postcript to the Collector's narrative that he has found that 750 maunds have been sold at Raneegunge. No explanation had been received up to yesterday afternoon, but it is believed that this transaction refers to the payment by the district committee for the Government rice supplied to them for charitable purposes.

12. I beg to call the attention of Government to the Collector's remarks regarding his being held personally responsible by the Controller-General for all advances made by him. The Controller-General might be requested to report upon this subject.

13. The average number of daily-labourers on road-works has risen from 3,334 to 4,566. The total number of persons receiving charitable relief, as shewn in statement No. 4, has risen from 52,771 to 67,895 during the fortnight. The chief increase is in the sudder sub-division of Burdwan and in Cutwa, as I have already noticed. There is a reduction in the Bood-bood sub-division from 34,895 to 32,629, which is remarkable and satisfactory, as it shews that the number receiving relief in this part of the district, where distress was most felt, is susceptible of reduction. I believe that the addition of one or two European officers to the Collector's relief staff, as suggested by me in the last narrative, is most desirable, in order to reduce the recipients of charitable relief to the proper number. The special monthly reports on the fever, which are submitted by the Civil Surgeon through me to Government, shew that the district has this year been more healthy and free from fever up to the present date than it has been for the last four years.

14. *Hooghly.*—The Collector's report is dated the 11th, and there has been up to the 13th some additional rain in heavy showers, which have helped to improve the prospects of the amun crop, which is being planted out as fast as circumstances will permit; and although the season is backward, I think that it is premature to say that the main rice crop is in a somewhat critical condition. If the rain was heavier, we should be told of injury to the aous or early rice crop, which is fair, generally speaking, though patchy, and rather short in the stalk in some fields.

15. The total daily average number of labourers on relief-works is 2,667 in the present fortnight, against 2,768 (not 2,851) in the previous fortnight.

16. The increase under the head of charitable relief is very large the total having risen from 8,194 and 17,768, the chief increase being in class B. The Collector says that much of the increase is doubtless due to insufficient supervision. An experienced European assistant is wanted, but he will do what he can with his present staff. I believe it would be true economy to send to the Collector a good European assistant, if one can be spared. I noticed a few days ago, in reading a police report of a dacoity committed within the municipal limits of Chinsurah, that one of the dacoits, who was luckily caught on the spot, made the following confession. He had been employed as a workman at the Gouripore jute-mills, opposite Hooghly, but finding that he could live for nothing at the Rajah's annochutro near the Hooghly railway-station, he settled there comfortably until he was unfortunately induced to join some other idle friends in a dacoity on a lone woman's house. This story needs no comment.

17. The narratives from Howrah and Midnapore require no remarks here, but I would recommend their publication.

No. 855, dated Bankoora, the 10th August 1874.

From—W. R. LARMINIE, ESQ., Offg. Collector of Bankoora,

To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit my report for the fortnight ending 10th August 1874.

STATE OF THE COUNTRY.

2. The price of rice has risen in the two chief marts, Bankoora and Bishenpore, but has remained stationary elsewhere. The increase in the supply of Government rice for the use of relief centres and for labourers on relief works has lessened the pressure throughout the district. The prevailing rates are given below :—

	Wheat.	Barley.	RICE. Best sort.	RICE. Common ordinary.	Gram.
	S. C.	S. C.	S. C.	S. C.	S. C.
Bankoora	13 0	20 0	10 0	11 4 Coarse. 13 2	13 12
Chatna	13 8	17 8	12 12	13 8	13 8
Bishenpore...	12 8	24 0	10 8	13 0	13 4
Onda	13 0	22 0	11 0	13 0	14 0
Gungajulghatty	13 0	16 0	10 8	11 0	14 0
Burjora	14 8	.....	11 0	12 0	13 0
Saltora	10 0	16 0	10 0	11 0	8 0

3. There have been heavy showers at intervals in the greater part of the district, but in the north the rainfall has not been nearly enough to allow of extensive amun cultivation. In the extreme south also there are some small tracts which have not yet had a sufficient supply of moisture. The aous crop, speaking generally, is unusually fine, and in Chatna the jenar crop is much above the average and is now being harvested. Mr. Macaulay reports very favourably of the appearance of the crops in the south-east of the district, and heavy rain would even now make the prospects elsewhere equally good.

4. Much change cannot yet be expected in the general condition of the people. The advances of grain to the ryots have done immense good, and wherever rain has fallen heavily labourers have found plenty of work. There is a gradual increase in the number of the manufacturing classes requiring aid. The health of the people continues fair, although cases of cholera and small-pox are still reported.

5. One dacoity, not of a very serious nature, has been reported.

6. No cases of death by starvation have come to light.

RELIEF WORKS.

7. The return annexed shows an increase in the number of labourers. The Executive Engineer reports that the daily totals fluctuate according to the weather. When rain holds off the coolies come on the roads, but are drawn off to the fields by a heavy fall. This is satisfactory, as it shows that our rates are not too high. One new road, viz. from Chatna to Sussinia, has been commenced, and the road from Onda to Taldangra is being widened and metalled. The road from Burjora to Beliator will be commenced in a few days, and it is probable that new roads must be opened in pergunnah Moheshra.

ADVANCES TO PRIVATE PARTIES.

8. The total amount of grain advances sanctioned up to date is about Rs. 80,000. This branch of relief operations will shortly be closed, except in pergunnah Moheshra, where it is necessary to go on for a few weeks more.

Transport of Food.

9. Nothing worthy of note under this head.

Storage of Government Grain.

10. Annexed is a statement showing our receipts and expenditure. The supply is now nsfficient to enable us to carry on all our relief operations by means of Government grain. It is of course a matter of difficulty and expense to convey rice to some of the outlying centres, but they are now all being regularly supplied. Captain Grant is now importing at the rate of 2,000 maunds a day, and we will soon be in a position, if necessary, to sell Government grain in pergunnah Moheshra.

Charitable Relief.

11. The numbers relieved are shown below. As I anticipated, there has been a large reduction in the number of persons gratuitously relieved, and considerable increase is shown under heading C. This is due to the efforts of Messrs. Macaulay and Hare, who have been working most successfully. The sub-committees have, as might be expected, shown themselves far too liberal, and in some instances the relief mohurirs have been detected in malpractices, and will of course be duly proceeded against. I have no doubt that my next report will show a still greater reduction, and that the strict enforcement of the labour test will prevent the misapplication of our charitable fund.

P.S.—Since writing the above heavy rain has been reported from all sides, including north.

Statement of Charitable Relief.

1. One central committee.
2. Thirty-eight sub-committees.
3. Thirty-eight.
4. None.
5. Thirty-eight.
6. Statement showing average daily number relieved during the fortnight.

No. 519, dated Soory, the 11th August 1874.

From—R. D. Hime, Esq., Offg. Collector of Beerbhoom,

To—The Commissioner of the Burdwan Division.

I have the honor to submit my district narrative for the fortnight ending 8th August 1874, and to explain that its submission has been delayed by my absence in the interior of the district.

A.—State of the Country.

The most notable fact of the fortnight is the lamentable spread of pauperism; this is to a great extent due to the operations of the recently appointed circle and group inspectors, who have added a large number to the lists and taken none off. I am not, however, prepared to say that their action is not justified by the circumstances of the people, as I anticipated a considerable increase this month, the relief works ceasing to afford sufficient employment to support the large labouring population of this district, and the operations of ploughing and planting out being nearly completed. The crops generally promise well, but in the north-east corner of the district, in the Barwan and Moureswar divisions, they are sadly backward, scarcely any rain having fallen over that tract for the last month. Local distress is consequently rapidly spreading, which I am taking immediate measures to relieve by advances of grain to the cultivators and by an extension of charitable relief. The special relief officer, Mr. O'Donnel, and the circle inspector, having reported from the spot that the relief given by the agent there was too limited, I visited Barwan myself on Sunday, 9th instant, to inspect and give directions regarding the charitable distribution, and found that the paupers there require to be well sifted, there being probably a considerable amount of imposture mixed up with much real distress. This

can only be effected by a house to house visitation, to which the circle inspector, aided by one of the group inspectors, has been deputed. In other respects the history of the fortnight is uneventful,—with the exception of three reports of deaths from starvation, two of which were said to have occurred some weeks ago, the other on the 8th instant. Of the former two—one, that of a fever patient at Krinnahar in Sacoolipore division, was reported by the villagers to the circle inspector when visiting the village; all he could learn by inquiry is that the local chowkeedar states the man died of fever, while the widow, backed by the villagers, stoutly maintains he had recovered from the fever and died of starvation. The circle inspector reported the death a natural one; probably it is one of those cases which must occur at all times and in all lands as long as poverty continues to exist, in which recovery from exhausting illness is impossible owing to insufficient or innutritious diet, but which it would be almost as great a misuse of language to term deaths from starvation as to call the death of an invalid who might have been saved by beef-tea or port-wine a death from thirst. The second case is the death of a weaver of the same village said to have died of starvation in consequence of the obduracy of the neighbouring voluntary relief agent of Labpore in refusing him advances. Singularly enough no mention of this case, which was reported to the gentleman in charge of another voluntary agency when visiting the village at my request, was made to the circle inspector, though they came within a few days of each other. Both reports are alleged by the relief agent at Labpore to be spiteful inventions of the villagers who have taken the opportunity of two natural deaths in their community to annoy him on account of his refusal to place on his relief list some idle fellows among them who applied. The case of the weaver not having been yet officially investigated, the circle inspector has been ordered to inquire and report on both cases again, the fact that no other members of the families of the deceased have died of starvation suggesting reasonable doubts of the truth of both stories. The last case reported is that of an old man close on 70 years of age, reported to me, when on my way to Barwan on 9th instant, by some of his fellow villagers as having occurred owing to his failure to obtain his customary dole of rice at the last weekly distribution at Barwan. The reason of this failure was said to be his inability to press through the mob which assembled at the relief-house on its becoming known that the special relief officer, Mr. O'Donnell, had taken the distribution into his own hands, which, with very praiseworthy zeal he carried on for two days, considering the local agent to be incompetent. The result, however, as Mr. O'Donnell described it to me, was a collection of some five thousand people, about seven hundred of whom, judging from their appearance, at best but an uncertain test, he considered fit objects for relief and brought on the register. Though distress is undoubtedly spreading in the Barwan division owing to the causes given in detail above, the number of applicants for relief cannot be taken either as a guage of the amount of actual distress or a sign of demoralization, for I fully believe that were the rumour to get about at any time in any part of this district that rice was to be had for the asking, the low-caste labouring population, the domes, harees, moochees, bagdees, who, with the cripples and lepers, form the bulk of the paupers, would soon crowd in from all parts of the district, whether in distress or not. On inquiry into the last-mentioned case of starvation, I found it to be, like the first, a death probably accelerated by insufficient food, but not one of starvation properly so called. Though the family was evidently extremely poor, its other members were not in a starved condition; and it was admitted that the deceased had not been absolutely without food, though unable to procure sufficient to keep up his naturally failing strength. The chief markets continue steady and sufficiently supplied, and the public health good. 2 grain-robberies occurred during the fortnight. Prices are given in appendix 1.

B.—Relief Works.

One additional relief work has been opened during the fortnight, namely the repair of the Badshahi road between Barwan and Nowgaon, with a view to the alleviation of the distress in the Barwan division.

C.—Transport of Grain.

Exportation continues, 4,178 maunds of rice having been exported by rail against 3,222 maunds of the preceding fortnight; there is besides a considerable exportation constantly maintained into the Moorshedabad district by the Cynthia—Moorshedabad road. The Government imports for the fortnight amount to 7,127½ maunds, though 15,000 maunds were indented for; my supplies are now nearly exhausted, and further delay may be attended with serious consequences.

D.—Storage of Grain.

The imports of the fortnight have been stored.

E.—Advances to Private Parties.

Are shown in appendix, statement II.

F.—Charitable Relief.

Vide appendix, statements III and IV; efforts are being made to reduce the numbers in receipt of relief.

G.—Financial Results.

Rs. 650 have been placed to credit of the Executive Engineer on account of charges incurred before 7th July; Rs. 2,151 have been disbursed in the purchase of cotton, and Rs. 965-5-9 in transport and storage.

P.S.—Two reports from the special relief officer, Mr. O'Donnell, dated respectively 27th July and 11th August 1874, are submitted. The latter was received after the preparation of my report, too late for comment; but I may observe that nothing contained in it leads me to alter my opinion regarding the expediency of making advances of grain among the ryots of the Barwan division. General advances throughout the district I have never proposed or suggested.

APPENDIX RETURN II.

Statement showing the storage and consumption of Government grain in the District of Beerbhoom for the fortnight ending 8th August 1874.

1. Name of Circle—Beerbhoom.
2. Dates for which figures are given—23rd July to 8th August 1874.
3. Total allotment of Government grain—Uncertain.

		Mds.
4.	Total quantity of grain stored	7,127½
TOTAL QUANTITY OF GRAIN CONSUMED UP TO DATE.	5. By sale to the public or to laborers	.....
	6. By gratuitous distriuution in any shape	4,894
	7. By advances to ryots	.....
	8. Drawing by zemindars under concession G	4,177
	9. By payment in kind to laborers	3,888½
	10. Total	12,959½
	11. Estimated grain receipts of the ensuing fortnight	11,000
	12. Estimated grain expenditure of the ensuing fortnight ...	15,000

APPENDIX STATEMENT III.

Statement showing the progress of charitable relief in the District of Beerbhoom for the fortnight ending 8th August 1874.

1.	Number of committees and sub-committees as yet appointed	12
2.	Ditto of special relief sub-divisions opened and officered	23
3.	Ditto of regular relief circles opened and manned by special officers	14
4.	Ditto of relief circles opened and manned by planters, zemindars, and other residents	13
5.	Ditto of work-houses or centres for the distribution of food and gratuitous relief ...	27
6.	Ditto of men, women, and children in receipt of gratuitous relief in any shape through the charitable relief organization daily as on the 1st August 1874 ...	31,195

REMARKS.—Of the total number of recipients of charitable relief, 5,376 are spinners and weavers and 1,922 are employed in light labor on village tanks, roads, and conservancy, leaving 23,897 in receipt of purely gratuitous relief. These numbers do not include a daily average of about 200 pauper patients in receipt of rice at the dispensaries.

APPENDIX STATEMENT IV.

Statement showing the number of Persons relieved up to 1st August 1874, submitted with reference to Government No. 3216—S.R., of the 9th May 1874, paragraph 5.

B.			C.		D.			
Total number of meals given up to 1st August, *i.e.* persons fed for one day.	Total number of persons receiving gratuitous relief in rice at present as on the 1st August.	Total disbursements up to 1st August, including cost of laborers employed in light out-door work.	Total number of weavers and spinners supplied with thread, cotton, and advance on the 1st August.	Total disbursements to 1st August—weavers and spinners only.	Total number relieved under heading D on the 1st August.	Total disbursements up to 1st August.	Total number of persons in receipt of relief on the 1st August.	Total disbursements up to 1st August under all heads.

REMARKS.—*Vide* Appendix, Return V of the fortnight ending 30th May 1874.

R. D. HIME,
Officiating Collector.

No. 972-F.R., dated Burdwan, the 10th August 1874.

From—E. H. WHINFIELD, ESQ., Officiating Collector of Burdwan,

To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the narrative for the fortnight ending to-day.

A.—STATE OF THE COUNTRY.

2. The Raneegunge Sub-divisional Officer says that there is enough gain in the bazars; that prices range from 11 seers to 14½ seers per rupee; that the rainfall has been 2·76 inches and it has been general, but a really heavy shower is much wanted; that the transplanting of the rice on the lower lands is nearly finished; that the outturn of maize is good and sugarcane and krista til are doing well; that the condition of the chowkeedars is bad, as they are very irregularly paid; that emaciation amongst the cultivators is comparatively rare; that the general health of the people is good, except amongst the pilgrims to Juggernath; that no death from starvation has occurred.

The Bood-bood sub-divisional officer reports that the supply of rice in the bazars is not abundant; that prices range from 11 seers 13 chittacks to 12 seers 11 chittacks per rupee; that the mahajuns hold considerable stocks, but will not produce them; that the total rainfall in the fortnight is 5·02 inches; that the prospects of the crops have improved, but more rain is wanted, especially in the north; that the condition of the people is better; that no grain thefts or deaths from starvation have come to light The Assistant Surgeon of Shor reported a death from starvation at Oochgram on the 24th ultimo. On local enquiry being made by the sub-divisional officer, he found that deceased was a leper, named Deno Bagdi, whose wife had deserted him. His sister-in-law, Murmo Bagdini, had been attending to him, and he had been regularly getting daily rations from the Kolekole depôt up to the 22nd July.

The District Superintendent reports that the supply of rice in the bazars of the Sudder sub-division is abundant; that prices of rice range from 10 seers to 14½ pucca seers per rupee; that the late rain has done much good to the aous crop, but more rain is wanted for the amun. In some villages the transplantation of the latter has not yet commenced, owing to want of rain. No deaths from starvation have occurred. The rainfall in the fortnight has been 3·25 inches. The crops are looking much better than they were at the date of my last report, but the fields are not nearly so moist as they usually are at this time of the year, and the tanks are very low every where.

The Culna sub-divisional officer sends a bad account of his sub-division. Though prices remain unchanged, he says the stocks are becoming exhausted, and though 7·22 inches of rain fell in the fortnight, the transplantation of amun is suspended for want of a heavy shower, and the aous is doing well only in a few places. The lower classes, he says, are undergoing great privations, and in some places have taken to eat grass seeds. The general health of the people is reported to be good, and no deaths from starvation have been heard of.

The Jehanabad sub-divisional officer reports that the rainfall in the fortnight has been 4·58 inches; that cultivation is going on favorably; that there is no deficiency in the supply of rice; that prices continue unchanged, and that no deaths from starvation or grain thefts have occurred.

The Cutwa narrative is behind time as usual.

B.—RELIEF WORKS.

3. These are shown in the annexed statement.

C.—TRANSPORT OF GRAIN.

4. The imports of grain by rail on account of Government as well as of private persons in the fortnight ending 25th July—the latest date up to which returns have been received,—were 48,508 maunds, and the exports 7,201 maunds.

D.—STORAGE OF GRAIN.

5. The particulars of the Government grain stored and expended up to date in this district are shown in statement No. II.

There has been some correspondence during the fortnight, originating in a complaint in one of the daily papers that we were underselling the local traders. But in point of fact we have made no sales at all up to date, except in one single case at Kanoo. There the station master, who has been rendering us much assistance in relief arrangements, represented that he found great difficulty in getting rice for the railway employés under him, and in consideration of his services he was thereupon allowed to purchase a small quantity for their use. This is the only instance in which grain has been sold. On receipt of the Government orders to sell grain, the sub-divisional officers were called on to report the price which should be fixed, and the reports received showed that the dealers were not willing to take it at a higher price than 18 to 20 seers per rupee. Of course this was out of the case altogether, and I told the sub-divisional officers that I should not recommend any sales at cheaper rates than 14 seers clean riceto 16 seers cargo rice per rupee. There the matter rests. The only Government grain that has found its way into the market is some small

portions of that advanced to ryots or paid to laborers and sold by them. It is not impossible that the complaints in the paper were a bold stroke on the part of some mahajun to effect a rise of prices. The knowledge that we were prepared to step in and sell at any moment has, I think, unquestionably had some influence in keeping prices down; and the correspondence of last week, giving rise to a rumour that Government had absolutely prohibited the sale of Government grain in any event, at once sent prices up in this bazar. On Friday a number of the mooktears and other hangers on of the cutcherry complained grievously of the suddenly enhanced prices in the bazar, and the evil practices of the mahajuns generally. But (always supposing that the rains continue) I think it probable that the rise of prices will not be permanent. It may be fairly inferred from the universal unwillingness shown by the mahajuns to purchase Government rice at reasonable prices that they have plenty of rice of their own in store.

E.—Advances to Private Persons.

6. These are shown in the statement No. III. As before reported, advances under the Land Improvement Act have ceased to be made in consequence of the expiration of the working season. Enquiries are now being made into the works executed from the advances already given. There is one matter in connection with these advances on which I should be glad to have a clear understanding, and that is, the exact responsibity incurred by the officer making the advance. The Controller-General has debited all the advances made up to date to me, but I cannot suppose that it is the intention of Government that officers should be held personally responsible for the amount of any advances made by them which may hereafter turn out to be irrecoverable, supposing the rules have been duly observed.

F.—Charitable Relief.

7. The particulars of this are given in the statements Nos. IV and V.

G.—Expenditure.

8. See statement No. VI hereto annexed.

P.S—Since writing the above, I have discovered that the Raneegunge Sub-Divisional Officer has sold 750 maunds of grain. I am not aware of the particulars of these sales, and I have called for report.

I.

Statement showing Progress of Works in the Burdwan District for the fortnight ending 8th August 1874.

Names of Roads.	Average daily number of laborers.	Rate of wages.	Price of rice.	Remarks.

* Refunded by the Deputy Commissioner of Manbhoom.
† No returns received this fortnight.

No. 311, dated Hooghly, the 11th August 1874.

From—F. H. Pellew, Esq., Officiating Collector of Hooghly,
To—The Commissioner of the Burdwan Division.

I have the honor to submit the narrative for the fortnight ending 8th August 1874.

A.—State of the Country.

2. *Abundance or scarcity of food grains in the bazar.*—There is no scarcity of food grain in the bazars.

3. *Kind and price of grain selling at certain specified marts.*—Prices appear to be slightly rising again, being very nearly what they were in the middle of July.

Names of principal marts.	Quantity by the seer of 80 tolahs.									
	Wheat.		Barley.		Rice, best.		Rice, common.		Gram.

4. *Information as to the kind and amount of grain in stock in the hands of zemindars, traders, &c.*—No reliable information available.

5. *Rainfall, if any.*—The fall at Serampore has been very beneficial, and even as far north as Hooghly there has been considerable rain along the banks of the Hooghly; but in the interior and towards the north the fall has been much less, and rain is urgently required.

	On the banks of the river.		Interior.

6. *Prospect of Crops.*—Near Serampore the main rice crop is being planted out, and its prospects are good. In the east of Bansberya, I observed, on the 9th, the crop being planted out on lands watered by artificial irrigation assisted by the rainfall. In Pandooah I found, on the same date, the transplanting not commenced, and the aous crop injured. In Chanditollah, where the rainfall has been about the same as in Hooghly and Bansberya, I am informed by a local zemindar that crops are in the same state as in Pandooah. In Kristonugger, Haripal, Dhunyakhally, the rainfall has been less than in Mohanad, and the main rice crop is in a somewhat critical condition.

7. The early rice crop is too far advanced to be in danger of more than partial injury, and in many parts it will be a good crop. Jute is doing well.

8. *Condition of the people.*—The want of rain is generally complained of. Except along the banks of the Hooghly, agricultural operations have been nearly at a stand-still. On the 30th July I visited portions of thanas Bydabatty and Haripal, on the 4th a portion of thana Hooghly, and on the 9th a portion of thanas Bansberya and Pandooah. I found no general distress, but the number of paupers in each village was said to be increasing, and some of the lower class of agricultural laborers have begun to require relief. This has been effected by increasing the light labor system under head C of the Central Committee's notification of the 4th March 1874, and extending it to jungle cutting and drain clearing, and by setting on foot the repairs of a few small roads in thanas Haripal and Kristonugger in the Serampore Sub-division, in which thanas the rainfall has been so slight as not to hinder earth-work.

9. In my visits to the interior, I paid great attention to ascertaining whether the cultivators were in need of Government assistance to enable them to cultivate. It is my opinion at present that where the rain falls sufficiently to enable the rice to be transplanted, the necessary aid from private sources is not withheld. Wherever the soil is sufficiently moist, transplantation appears to be effected. Much work usually done by hired labor is doubtless being performed by the ryots themselves; but this affects only the position of the landless, or nearly landless, class of laborers. Even amongst the latter class my observations lead to the conclusion that distress is rare in comparison with the number of the class.

10. *Grain theft.*—No new cases occurred during the fortnight in the Sudder Sub-division. Only one case is reported to have occurred in Serampore, in which Rs. 3 worth of paddy was stolen from a woman's house.

11. *Condition of special tracts.*—There are no tracts here which can as yet be said to be in a specially distressed condition.

B.—Relief Works.

12. The following is a statement of relief works under the Road Cess Department. Earth-work is now going on in very few of the roads, but turfing and smoothing and mason's work still affords employment on the minor works and spreading metal on the more important roads. Earth-work, however, is going on on the Kristonuggur to Seetapore and the Atpore

to Rajbalhat roads, which are situated in thanas Kristonuggur and Haripal, where the want of rain has thrown agricultural laborers out of work :—

11. *Statement of Relief Works during the Fortnight ending 6th August* 1874.

Names of Roads.	Number of coolies.	Supply of food.	Condition of laborers.	Mode of payment and rate of wages.	Arrangement for tools.	REMARKS.

Bhudressur to Nucibpore ...	18	Ditto ..	Ditto ...	Ditto ...	Contractor's supply	Under Baboo Rajkrishto Banerjee.
Atpur to Rajbalhat	74	Ditto ...	Ditto ...	Ditto ...	Ditto ...	Under the Canoongoe of Serampore.
	586					
Hooghly ...	1,286					
Total ...	1,872					

13. The Collector of Howrah will give the Howrah figures separately.

14. The following laborers were employed daily on works, such as turfing and culvert making, on otherwise completed roads in the Municipalities, Towns, and Unions out of the funds of those bodies :—

Hooghly and Chinsurah	144
Serampore	...
Ooterparah	28
Kotrung	...
Bullagurh	69
Gooptiparrah	36
Muggrah	16
Total ...	293

15. Under the Executive Engineer, Northern Drainage and Embankment Division, the following works are in progress :—

Thana.	Name of work.	Daily average number of coolies during the fortnight.	Condition.
Bydabatty	Kananuddee and Surrosutty Canal ...	94	Good.
	Ordinary embankment repairs ...	about 34	Good.
	Total ...	128	

16. The returns of works on tanks, which are being dug or improved from tuccavee advances, show a daily average number of 374 coolies, of whom 111 are local. Almost all the tanks were completed before the end of July 1874.

17. I give here a comparative statement of coolies employed on relief works as shown in the last and present report :—

	Last report.	Present report.
Roads, &c., under Chairman of the Road Cess ... Sudder Sub-division ...	1,035	1,286
Roads, &c., under Chairman of the Road Cess ... Serampore Sub-division ...	728	586
Municipalities, Towns, and Unions	262	293
Under the Executive Engineer, Northern Drainage Embankment Division	258	128
Employed on works executed from tuccavee advances ...	485	374
Total ...	2,768*	2,667

No. 240, dated Midnapore, the 10th August 1874.

From—H. L. HARRISON, ESQ., Collector of Midnapore,

To—The Commissioner of Revenue, Burdwan Division.

I HAVE the honor to submit the fortnightly report for this district for the period ending the 8th August.

2. With the exception of the last two days, rain has fallen almost every day at the Sudder station, and has been more or less general throughout the district. At Contai the fall has aggregated 15 inches, and has been fully as much as could be desired. At Tumlook it has exceeded 8 inches, and there also the reports are favorable. At Midnapore the fall has just exceeded 6 inches, and the cultivators would like more, though they cannot complain much; but at Gurbetta the fall has only amounted to 3 inches during the fortnight, just enough to prevent the aous crop from suffering further injury, but insufficient to allow of universal transplantation. The Deputy Collector, it will be seen, estimates 5 annas of the cultivable area as still unsown, but it must be remembered that in an undulating country such as Gurbetta, it is only in years of excess rainfall that the highest lands can be utilised.

3. The aous crop throughout the district is variously estimated at from a full average to a low average crop, according to soil and rainfall. The prospects of the amun are, of course, still entirely dependent on the weather for the next 2½ months, and cannot be forecast with any confidence.

4. Prices continue to rise almost everywhere; this is due partly to the cessation of importation from the west frontier, partly to the great reduction of importation from Orissa, partly to the impediment which the rains are to traffic, partly to the difficulty in drying rice and preparing it for the market owing to the wet weather.

5. No one believes that there is an actual deficiency of rice in the district, but all my information tends to shew that it is in fewer hands than before, and the owners are slow to put it into the market; partly because the price is not yet as high as they wish, partly because they have not yet recovered from the panic which was rising three weeks ago from the absence of rain, and are still apprehensive of another short crop.

6. The following list contrasting the prices that obtain now with those obtaining four weeks previously will shew the extent of the rise.

Names of Thanas.	Number of seers per rupee on Saturday, 11th July.	Number of seers per rupee on Saturday, 1st August.	Increase in price per rupee.
	Srs.	Srs.	Srs.
Midnapore	16	15	1
Debra	15	14	1
Naraingur	20½	18½	2
Keshpore	14½	13	1½
Dasspore	13	12	1
Salbonee	15	13¼	1¾
Gopeebullubpore	20	18	2
Beepipore	16¼	12½	3¾
Jhargram	18	13½	4½
Gurbetta	16	14	2
Dantoon	23	21½	1½
Chunderconah	13¾	12½	1¼
Subung	18	18	.....
Contai	18	17	1
Roghoonathpore	20	18	2
Ghattal	15	14	1
Puttaspore	20	16	4
Bhugwanpore	16	16	.....
Tumlook	16¼	14	2¼
Kedgeree	18	18	.....
Musloudpore	15	14	1
Egra	16	16	.....
Panchkoorah	14¼	14½	¼
Sootahatta	14	14	.....
Mundulgram	16	16	.....

7. It will be seen that the rise has been very great in the North-West, though the list gives the relative prices at the two periods correctly; the absolute prices are somewhat more favourable than they appear, as the sales are all by a local measure called pie, which varies somewhat, but which the police of Beenpore and Jhargram convert into seers at 1¼ seers per pie. To test this, I measured several pies when in that part of the district, and found that they varied from 1 seer 6½ chittacks to 1 seer 7½ chittacks; hence, the calculation of 1 seer 4 chittacks is undoubtedly too low.

8. Retail dealers in rice are almost unknown in the jungle mehals; hence, it is found that great relief is caused by the retail sale of the rice belonging to the Jambonee estate and to the committee when first formed. As long as these stores hold out, we are certain that all who can pay for rice can procure it while our road works, which are still open, afford the assurance that all able-bodied persons can find work. Although, therefore, pinching and distress is universal in the north, and beyond all possiblity of question, I hear of nothing approaching starvation, and hope that we have safely tided over the year without any actual charitable relief to the agricultural or labouring classes.

9. To the Tantees our relief measures are continued, and cannot be reduced till prices fall. On the contrary, distress among them is increasing, though relief operations are jealously watched. Fever is beginning to appear, not at present in an aggravated form, but sufficient to increase the effects of scarcity.

10. The statistics of the 4 relief depôts, which have been working during the fortnight, are (daily average)—

	Men.	Women.	Boys.	Girls.	Total.
Chunderconah	10	22	13	7	52
Keerpoy	4	6	2	2	14
Radhanugur	3	27	8	6	44
Rajnugur	16	96	63		175

No. 322, dated Howrah Collectorate, the 10th August 1874.

From—J. B. Worgan, Esq., Offg. Covenanted Deputy Collector of Howrah,
To—The Commissioner of Burdwan.

I have the honor to submit the usual report on the weather, prices of rice, &c., for the fortnight ending on Saturday, the 8th instant.

2. The Sudder station rainfall report shows for the 1st week ... 3·73 Inches.
for the 2nd „ ... 2·16 „
Total for fortnight ... 5·89

This is the amount as by the Civil Surgeon's rain guage. The Court Inspector, who has another, shews 4·59 and 2·31 or 6·80 for the same period, or nearly so. I am doubtful of the correctness of the observations made by the latter, his rain guage being on the ground, and there being reason to believe that tricks are at times played with it by passers by. The mofussil report shew that the rain has been pretty general and that it has done much good to the crops.

3. The price of common rice during the 1st week of the fortnight was as below :—

Station.	Price per maund. Rs. A. P.	Quantity per Rupee. Seers.	Price per maund in preceding week. Rs. A. P.
Sudder station...	3 2 0	13	3 2 3
Doomjoor	3 2 0	13	3 3 0
Juggutbullubpore	3 10 0	11	3 10 0
Amptah	3 2 0	13	3 1 0
Bagnan	2 12 0	14½	2 12 6
Shampore	3 2 0	13	3 2 0
Oolooberiah	2 14 0	14	2 12 0
Sankrail	3 4 0	12¼	3 4 0
Khanacool	No report received.		

4. As I see that the number of seers per rupee is generally referred to in quoting prices in the report throughout the country and by the Government in its orders, &c., I have determined to adopt this standard; and agreeably to this arrangement, I shew below the prices for the second week of the fortnight, the seer quoted being the seer of 80 tolahs—

Station.	Quantity per Rupee. Seers.	Quantity in previous week. Seers.
Sudder	13	13
Doomjoor	13¾	13
Juggutbullubpore	10⅔	11
Amptah	12	13
Bagnan	14½	14½
Shampore	12½	13
Oolooberiah	13¼	14
Sankrail	12½	12¼
Khanacool	13¼	Not received.

5. From the above it will be seen that, in the first week, prices fell at head-quarters Doomjoor, and Bagnan, and rose at Ampta and Oolooberiah. In the second week they rose in Juggutbullubpore, Ampta, Shampore, and Oolooberiah, and fell in Doomjoor. The highest prices prevail in Juggutbullubpore, where common rice is selling at 10¾ seers for the rupee. It is cheapest at Bagnan.

6. The District Superintendent's statements of sums expended on relief show small figures. One statement shows eight persons relieved at an expense of Rs. 1-6, and the second shows twenty-five perssons to have received Rs. 4-4; or, for the fortnight, (as far as accounts received) thirty-three persons relieved at an expenditure of Rs. 5-10, an average of two and a quarter persons roughly per idem. The Deputy Collector of Mohesreekha reports the expenditure from the moneys with the Khanacool Relief Committee at Rs. 9-6-6. The number of persons is not stated.

7. The Executive Engineer's fortnightly return shows 226 men employed in Howrah and 76 men in Mohesreekha sub-division; much sickness, in the shape of fever, is reported to prevail amongst them.

8. Under the head of Land Improvement there is nothing to report.

9. I regret that the statement of relief expenditure called for in Government Circular No. 4640—S.R. of the 22nd ultimo, up to the end of June is not yet able to be sent, it not having been received from the District Superintendent of Police for his portion of the same.

Extract from the Fortnightly Return of Coolies employed on the ordinary District Road Works during the fortnight ending 6th August 1874.

CHINSURAH,
The 6th August 1874.

W. H. WELLS, C.E.,
Executive Engineer, Hooghly & Howrah District.

No. 1860, dated Purulia, the 14th August 1874.

From—COLONEL E. A. ROWLATT, Deputy Commissioner of Manbhoom.

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

WITH reference to paragraph 3 of Government circular No. 154—S.R., dated the 16th January 1874, I have the honor to submit my fortnightly narrative up to the 9th instant.

A.—STATE OF THE COUNTRY.

Since the date of my last narrative a favorable change in the weather has again taken place, and the crops which were then suffering from want of rain have recovered, and the transplanting of the main rice crop has again been resumed. The rain which had held off so continuously during the last fortnight, began to fall again on the 25th ultimo, and has since continued pretty general; but more is now wanted, as the high lands into which rice is transplanted are still in some villages too dry to admit of their being planted out. The accounts of the crops are better from all parts of the district than in the immediate neighbourhood of Purulia, which seems generally to get less rain than any other portion of Manbhoom.

From Govindpore the relief officer writes: "The grave fears that were entertained a short time back of another famine have been dispelled by seasonable and copious showers, and the people are cheerfully engaged in transplanting their seedling paddy which, should the weather continue favorable, transplanting operations ought to be over by the middle of the month. The paddy which was first transplanted shows very well at present, and the rubbee crops are unusually good." From Rughoonathpore it is reported: "The crops all over the country look wonderfully well; a bumper harvest is expected, and the transplanting of paddy is being assiduously pushed on." The relief officer of the Purulia circle writes: "During the fortnight the heavy fall of rain has enabled the ryots to make great progress with the planting out of their second class lands, and there is now every hope that the full area of land will be cultivated, and the outturn a more than usually heavy one." The reports from Manbazar are also favorable, where, until lately, very little progress had been made in transplanting operations.

The rainfall during the fortnight has amounted to 5·57 inches; and up to the 9th instant, from the beginning of the year, to 22·29, which is 8 inches less than the average. The Purulia lake is unusually low for the time of the year, and has only risen about 9 inches from what the water stood in the month of May; but what rain has fallen, has been well distributed, and very little has run to waste.

At present, employment in the fields is everywhere pretty abundant, and the wages earned by the labouring classes fairly remunerative: it is, however, everywhere reported that the cultivators are employing fewer laborers than usual, and that after the transplanting of the rice crop is over, numbers will again be wanting employment. The demand for loans of Government rice also still continues, which the cultivators allege they require to enable them to pay their laborers. They complain that the mahajuns still refuse to make the usual advances, except to a few approved customers; but as the gundli and indian-corn crops are being gathered, the people are now beginning to obtain a fresh supply of food, and are therefore more independent of the mahajuns and far better off than they have been during the last five or six months. It may now be said that the worst effects of the scarcity, which would have developed into famine except for the measures of relief which had been adopted, is now fairly over, and that if the season only continues favorable to the end, prosperity will again resume its usual sway. Crime still continues to be rather below than above the average, and the public health is generally good, although a few cases of cholera still occur, and small-pox is ripe in a few villages which have steadily resisted the introduction of vaccination.

The usual table showing the price of rice and pulses as given by the police up to the 8th instant is given below:—

Names of Bazars.	Coarse Rice.		Fine Rice.		Pulses.	
	Last report.	Present report.	Last report.	Present report.	Last report.	Present report.
	Srs.	Srs.	Srs.	Srs.	Srs.	Srs.
Raipore	14	13	12	12	12	12
Manbazar	12	12	11	10	10	10
Burrabazar	13	13	12	12	11	10
Echagurh	18	16	16	14	12	10
Jhalda	13	13	12	12	11	10
Purulia	14	13	12	10	12	12
Govindpore	13	12½	12	12	11	10
Rughoonathpore	13	13	11	12	11	10
Nirsha	12	12	11	11	11	11
Gourandih	12	12	11	11	11	10

It will be seen from the above that prices were higher during the last than the preceding fortnight, which I believe was entirely owing to the long break in the rains that continued up to the end of last month; since then prices have I believe fallen, and will continue to do so, if the weather remains favorable.

B.—Relief Works.

As might be expected, the number of people seeking employment on the relief works has greatly decreased. The rate of daily wages was reduced on all the minor relief works from the 28th ultimo, a pice all round, from that which is given in the margin, and piece-work from 2½ to 2 annas per 100 cubic feet. The work on village tanks has now been stopped, both on account of most of them having partially filled with water, and from employment on them being no longer required. The daily rate of wages paid to the laborers on the roads has also been reduced, as above, during the time transplanting is going on, but will be raised to its former rate as soon as that operation is completed. The average number of persons employed on the roads during last fortnight was 5,003 against 5,282 during the previous fortnight, showing a decrease of 282.

	As.	P.
Men	1	6
Women	1	0
Children	0	9

The number of minor relief works carried on by the relief officers is given in the margin. The number was gradually reduced during the fortnight, and very few, if any, will appear in the next narrative. The laborers on these tanks were paid entirely in grain, into which the money rate was converted at 12 seers per rupee. The expenditure of Government grain in carrying on these minor relief works during the fortnight was 123 maunds 16 seers 14½ chittacks exclusive of the Rughoonathpore eastern circle and the Manbazar circle, from where the particulars have not been received.

Names of Circles.	Number of tanks.	Number of laborers.
Govindpore circle	11	215
Rughoonathpore western circle ...	3	112
" eastern " ...	16	885
Purulia circle ...	20	218
Manbazar "	2	44
Total ...	52	1,474

The quantity of grain expended on the roads was much greater, but cannot be given, as no returns are made by the contractors, who pay for the grain either as they take it, or directly their bills are cashed. It is now taken by them wherever grain can be made available, which it now is, all over the district where works are going on, except in the Manbazar circle, where, for want of roads and bridges, it has not been found possible to convey grain in sufficient quantities to meet the requirements of the group officers, sub-committees, the cultivators, and contractors. Arrangements are, however, in progress, by which the difficulties there also will I hope soon be overcome.

C—Transport of Government Grain.

The whole of the extra 30,000 maunds of Government grain having been received at Burrakar, this is now being carted from there down to a large gola which has been constructed at Desarghat on the north bank of the Damudah river: from there it is crossed over to the gola at Hijlighat, and then conveyed in carts sent there from Rughoonathpore. The portion of this allotment required for the Purulia circle is being brought in carts sent from the Sudder station. None but covered carts are used, so that the grain is kept perfectly dry and undamaged by the rain.

There being a difficulty about procuring carriage to transport grain to the minor gola in Murardih in Pergunnah Chowrasi, the cultivators were told that if they wanted more grain on loan they must provide the carriage themselves. On this, the relief officer says: "Carts and bullocks and porters, male and female, flocked into Hijli and carried off in a day the local allotment of a thousand maunds." This practice has been found very successful all over the district where impassable nullahs and rivers have not to be crossed, and the distances are not very great, and is a pretty fair test as to whether the grain is actually required.

D.—Storage of Government Grain.

The quantity of Government grain received and stored in the five circles into which this district has been divided is as follows:—

	Mds.	Srs.	Chs.
Govindpore circle	68,182	5	10
Rughoonathpore, west circle	53,784	6	4
Ditto east "	48,042	33	14
Purulia circle	39,066	10	0
Manbazar "	20,464	16	5

From the Govindpore circle 3,000 maunds is being transferred to Axta in Khaspel, contained within the Purulia circle; the Rughoonathpore eastern circle has still to receive 13,457 maunds, the Purulia circle 9,934, and the Manbazar circle 535 maunds.

E.—Advances to private parties and their results.

No money advances have been made during the fortnight.

The loaning out of Government grain to cultivators, non-cultivators on security, gifts to chowkeedars and paid to tabedars employed on relief duty during the fortnight and up to the 9th instant was as below:—

	Fortnight. Mds. S. C.	Up to 9th August 1874. Mds. S. C.
To Cultivators—		
In the Govindpore circle	653 20 0	47,018 28 0

Total ...	29 20 0	1,579 19 14

	Fortnight. Mds. S. C.	Up to 9th August 1874. Mds. S. C.
To Chowkeedars—		
In the Govindpore circle	.....	284 0 0
„ Rughoonathpore, west circle	154 0 0	414 20 0
„ „ east „	170 0 0	486 0 0
„ Purulia circle	145 14 0	400 22 0
„ Manbazar „	.....	81 20 0
Total ...	469 14 0	1,666 22 0
To Tabedars	8 16 0	202 26 0

Loaning out to the cultivators is still being continued in most of the pergunnahs, but as a considerable quantity of rice will be required, with which to pay the laborers on the roads, sufficient will be reserved for this purpose and for being made over to the road contractors to enable them to pay their laborers in grain.

F. (*a*).—Charitable relief by Government.

The number of group circles has not changed since the date of the last report, and are 235. The number of persons receiving uncooked rice from the group officers is given in the margin, showing altogether an increase of 1,888 persons. The increase and decrease in each circle is also given in the margin. No sufficient reason has been assigned for it by the relief officers in whose circles an increase has taken place; but the persons thus relieved are stated to be helpless children, decrepid and aged people without relatives to help them, diseased persons whose bodily ailments preclude them from doing any work, widows and women of good caste, unaccustomed to manual labor, who are in extremely destitute circumstances. The latter ought more properly to be provided for out of the relief funds and classed under heading D, but as they only receive rice, and this will all have to be paid for out of the general relief fund, it matters very little as to the manner in which the relief is being administered. The relief officers have been again called upon to revise their lists of persons receiving relief from the group officers, and as the crops on the high lands will soon be cut, there is every prospect of its being possible to reduce the numbers considerably during the current month.

Govindpore circle	2,187
Rughoonathpore, west circle	1,646
Ditto east „	2,850
Purulia circle	2,015
Manbazar „	3,896

Total ...	1,636 9 11	1,313 14 10	852 13 10

The number of persons receiving relief according to the above classification during the ortnight under report were—

	B.	C.	D.
In the Govindpore circle	518	.....	.....
„ Rughoonathpore west circle	1,231	1,313	.....
„ Ditto east „	2,311	303	.....
„ Purulia circle	611	490	135
„ Manbazar „	89	99	2,254
Total ...	4,760	2,205	2,389

These returns also show there is an increase in the number of persons being provided for by the relief committees, but in these, as well as in the returns furnished of the number being supplied with rice by the group officers, I believe a portion of the increase can be accounted for by the fact that the previous returns were incomplete, especially from the Manbazar and Govindpore circles. The number being provided for, which altogether amount to 21,948, is I consider far too large; but as up to the date of the returns sent in by the relief officers no grain of any sort had been gathered in, the impoverished classes must have been just as badly, if not worse, off than they have been at any previous time during the present scarcity, so that no reduction, but on the contrary some increase, was to have been expected.

No. 45 M.A., dated Calcutta, the 11th August 1874.

From—LORD H. ULICK BROWNE, Commissioner of the Presidency Division,

To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

IN continuation of my No. 42 M.A., dated 28th July 1874, submitting the fortnightly narrative of the Collector of Nuddea for the fortnight ending 25th July 1874, I have now the honor to submit the Collector's report* for the fortnight ending 8th August 1874.

* No. 903—S.R., dated 10th August 1874.

2. I am in hopes that the Collector, in his paragraph 4, has under-estimated the aggregate outturn of the aous crop from the district, as other accounts say that the crop is, speaking generally, an extraordinarily good one as it stands, and as a very large additional area has been sown, after making allowance for the deficiency in the northern part of the distressed tract, I expect the outturn to be decidedly larger than that of an ordinary year.

3. I find from the relief works returns that there have been considerable fluctuations in the number of people employed on the relief works lately.

4. The mistake made in sending the Government grain from Calcutta to the Burdwan district instead of to Kaleegunge in Nuddea is to be regretted. The consequences might have been serious.

No. 903—S.R., dated Kishnaghar, the 10th August 1874.

From—C. C. STEVENS, ESQ., Collector of Nuddea,

To—The Commissioner of the Presidency Division.

IN submitting my narrative of Scarcity and Relief for the fortnight ending Saturday the 8th instant, I have the following remarks to make:—

1. The supply in the bazars continues about the same, and is in most places adequate to the demand. The new rice has not yet come into the market, but the harvest has commenced in some parts, and the grain is used for private consumption; where this is the case, the market is becoming a little easier. The insufficiency of the stock in the distressed tracts has been all along reported. The recent importation of Government rice will give some relief. It is reported that the stock of food-grains in thanas Karimpore and Tehatta, in sub-division Meherpore, and in thana Jaguli in sub-division Ranaghat, is low, but the mahajans are pretty sure to keep nothing in reserve; they will either lend or sell their stocks, and this, with the aid of private trade, will suffice to carry the people through till the present aous crop is harvested.

2. The subjoined table will show the kinds and prices of grain selling in the principal marts of the districts:—

	Common rice.	Kalai.	Mug.	Mutar.
	Rs. A. Rs. A.	Rs. A.	Rs. A.	Rs. A.
Kooshtea	2 12 to 3 4	2 2	2 12	2 0
Coomarcolly	2 12 to 3 0	2 4	2 12	2 2
Santipur	3 0	2 4	3 0	2 8
Ranaghat	3 2	2 8	3 0	2 8
Chugda	2 15	2 5	3 0	2 8
Bongong	3 0	.....	.....	.....
Kishnaghar	3 0	2 4	3 0	.....

The price of rice during the fortnight under review shows a slight upward tendency, due, no doubt, to the scantiness of the rainfall.

3. I have nothing to add regarding the actual stock in hand to what I have stated in my previous narratives.

4. The jolly dhan, bhura, and cheena, have been harvested, and they are coming into the market, but the quantity has been so small as not materially to influence prices. There has been sufficient rain during the fortnight in the neighbourhood of the Sudder station, but in the district generally there has been much less than is required. The amun dhan is being generally thrown back. In the northern part of the distressed tract the deficiency of rain has been most lamentable; and it is estimated that, be the weather as favorable as it may, not more than half a crop of aous can be gathered. Even that which will be reaped has been delayed at least three weeks or a month by the drought; other parts of the district have been more fortunate, and probably the injury will not be more than one-fourth of the crop, if so much; considering, however, the increased area of land sown this year with aous paddy, the outturn of aous will still be equal to a full crop of an ordinary year. The amun seed-beds have somewhat improved in appearance, and to transplant, advantage is being taken of the recent rain. Jute is generally thriving; sugarcane is doing very well; arhar and chillies also look promising; indigo is being manufactured, and a good outturn is anticipated.

5. I am far from thinking that upon the whole distress has increased. No special cases of misery have been reported. With the rise in the price of rice a certain amount of pressure has no doubt been felt throughout the district, but this pressure, I believe, is not so urgent as to call for aid from the hands of Government.

6. Though the high price of food-grains has had some effect in diminishing consumption of excisable articles, yet no marked decrease in revenue is observable.

7. It is generally believed by all classes of people that the pressure which they now feel will cease within the course of two or three weeks time when the present aous crop has been gathered. No other tracts, save in which relief works have already been commenced, will need any assistance from Government in the shape of relief.

8. The steps taken to alleviate the distress that to a certain extent existed in thanas Tehatta, Karimpore and Gangui, in sub-division Meherpore, have proved adequate. No more relief measures are required there, as the aspect of affairs has changed for the better. The Deputy Collector of Bongong says that he visited some of the villages in thana Moheshpore where distress was reported to exist, but found there nothing to call for Government assistance. A serious mistake occurred in the despatch of Government rice from Calcutta, which might have led to fatal consequences. The supply of 20,000 maunds mentioned in my last narrative was missent to Cutwa, but we, unaware of this, collected carts and boats and coolies for its distribution, and day after day anxiously waited its arrival at Kaleegunge. As no news of the shipment arrived, I was obliged, notwithstanding the Government orders, to send money, and my having done so was most fortunate, for it was not till I had communicated with Mr. Toynbee that the state of the case was ascertained. Mr. Toynbee at once despatched another shipment, and in the meantime I applied to the Deputy Collector of Cutwa for 5,000 maunds of rice, which he immediately supplied. The relief officers husbanded their resources with very great care, and this carried the people through till the shipment arrived. It is with feelings of great satisfaction that I am able to say that no fatal results have followed the temporary diminution of relief, and that all cause for anxiety is now at an end. The unpropitious character of the weather has thrown back the crops so much that but little can be done this month towards diminishing the extent of the relief. To stop it or to reduce it greatly at present would merely undo all that we have been doing, for it is, I regret to say, quite certain that there are still thousands who must depend upon Government and the relief committee for their lives. The Assistant Magistrate of Kooshtea thus writes about the effect of the late rise of the river:—"The losses by inundation in this sub-division were not serious, but they have tended to check the downward tendency of prices, and rice is now as dear as it was three weeks ago."

9. The construction of village roads and embankments is going on in the distressed parts, and the number of laborers resorting to them for employment has increased. These people, however, prefer their own work to ours, and the number will certainly decrease when the reaping of the *aous* and transplanting of the *amun* begin. In consequence of a report from the Deputy Collector of Ranaghat that the laborers in one portion of his sub-division (which we have all along been watching) were in want of work, I applied for and obtained 500 maunds of rice, which was sent up to Ranaghat by Mr. Toynbee by rail. The number of persons now employed on relief works may be estimated at 3,500.

10. Owing to the rise of water in the several rivers that flow by and through this district, traffic has increased in nearly all the sub-divisions.

11. Charitable relief is being distributed both in the Debagram and Mooragatcha circles.

FINANCIAL RESULTS.

12. No advances under Land Improvement Act have been made during the fortnight.

STATEMENT OF THE BURDWAN MAHARAJAH'S RELIEF OPERATIONS FOR THE FORTNIGHT ENDING 8TH AUGUST 1874.

BURDWAN.

Sudder Bulla.—During the last fortnight a decided change for the worse has manifested itself. The number of applicants for relief at the Burdwan Sudder Bulla has largely increased The large daily average of 1,590 having been maintained throughout the 14 days. On one day, the 24th ultimo, the number was over 1,800. The increase is partly attributable to the rise in the price of rice in the bazar, but there is, unfortunately, no doubt that a number of people are coming in from the interior, and that this number is daily increasing and is already much larger than it was in the early days of the scarcity. Fifteen cases of actual distress have been reported as presenting themselves, but no particulars were given in the report. A further distribution of cloth has taken place and milk is being given to children.

BOOD-BOOD.

The number of persons receiving cooked food at the annachattra at Bood-bood has slightly diminished, but 150 persons of respectable family are receiving rations of raw rice upon the recommendation of the Government relief superintendent. The Darogah reports that the state of the people is becoming worse than it was. Here as in Burdwan milk is given to children, and invalid diet to the sick.

KEDINA.

Owing to an arrangement made by the Collector of Hooghly, by which the possibility of imposture is considerably diminished, the number of the recipients of cooked food has decreased to a daily average of 400. On the other hand, the number of respectable persons receiving charity has risen to 193. The Darogah reports favourably of the condition of the paupers.

CULNA.

The condition of this place is certainly not improving. There are complaints of distress on every side, and though there is, no doubt, a certain element of exageration in them they have some foundation. The people of the town do not appear to be suffering, but it is from the back lying villages the complaints principally come. In consequence of this state of things it has been resolved to establish five additional depôts in thana Culna, *viz.*, at the villages Gram Culna, Manikbar, Tehatta, Kadpara, Kooshodanga; arrangements have been made for immediately opening these depôts. Uncooked food will be distributed at the rate of twelve chittacks for each adult and six chittacks for each child, and this relief will be distributed in accordance with lists furnished by the Government relief officers to the Darogahs in charge of the depôts.

Relief Works.—Two hundred and twenty-five able-bodied persons have been daily provided with employment at various places during the past fortnight.

A tabulated statement showing the daily average number of persons receiving relief at the Raj depôts is annexed.

Statement showing the daily average Number of People relieved during the fortnight ending 8th August 1874.

RAJBARIE, CULNA, the 12th August 1874.

M. C. BURDWAN, *Maharaj, Adheraj.*

CINCHONA.

ANNUAL REPORT ON THE GOVERNMENT PLANTATIONS IN BRITISH SIKKIM FOR THE YEAR ENDING 31ST MARCH LAST.

No. 2394, dated Calcutta, the 20th August 1874.

From—The Assistant Secretary to the Government of Bengal,
To—The Secretary to the Government of India, Department of Revenue, Agriculture and Commerce.

I AM directed to submit to the Government of India, in the Department of Agriculture, Revenue and Commerce, the accompanying letter No. 60C, dated the 8th June, from Dr. King, in charge of Cinchona cultivation in Bengal, with enclosure, being the (twelfth) annual report on the Government plantations in British Sikkim for the year ending 31st March last.

2. In laying this report before the Governor-General in Council, I am to express the satisfaction of the Lieutenant-Governor at the degree of success which has marked the operations of the year. The plantations have arrived at a stage which permits us no longer to characterize them as experimental, but indicates plainly that the care and expenditure which have been bestowed upon them for so many years will have a practical result. The *canker*, concerning which fears were expressed before the Cinchona Commission in 1871, has proved to be simply one of those casual dangers to which young plantations are exposed; while we have at last learned to recognize the precise conditions of soil, &c., under which the tree thrives. The uneven quality of the hill soils is now well understood; and instead of attempting to remedy the patchy appearance of the plantations hitherto regarded as an evil, only such spots are now selected for planting as are marked by the known condition of success. In the language of Dr. King, "the newer plantations, therefore, are patchy from the beginning, and are so of choice." The Lieutenant-Governor does not understand that the intention has been abandoned of filling up the numerous blanks in the plantations where single trees have been damaged or choked by grass, but that no attempt will be made to replant spots where the trees have died out from the unsuitability of the soil.

3. The hope expressed in the last report, that Mr. Gammie would be able to increase the area under cultivation to nearly 2,000 acres during the year under notice, the Lieutenant-Governor observes, has been more than realized, and "Government now possess in Sikkim about 2,000 acres under quinine-producing cinchonas;" 247,000 trees of the *Succirubra* variety and 122,000 of the *Calisaya* having been planted during the period. This success has been achieved in spite of the early termination of the rains, which brought planting operations to a premature close, and indicates much earnestness and activity on the part of Dr. King's staff.

4. About three and a quarter millions of trees are now planted out, consisting mainly of the two great varieties—

Cinchona Succirubra	2,550,000
Cinchona Calisaya	476,500

The Government of India will observe that, practically, the plantations are now confined to these two varieties, the former producing the *red*, and the latter the *yellow* bark of commerce. *C. Officinalis* and the three or four other varieties of which the growth has been attempted have practically been abandoned, the soil being found unfavorable to their growth. Dr. King notices, however, the existence on the plantations of a supposed "hybrid" cinchona, the bark of which, upon analysis, was found to be rich in quinine, and every effort is being made to propagate this variety, experience showing that it grows well in Sikkim, and at a higher level than the *Calisaya*. The discovery of this "hybrid," which Dr. King thinks may possibly prove to be not a hybrid at all, but a distinct species of cinchona, is an interesting fact of the report, and the Lieutenant-Governor is glad to observe that, in addition to 6,000 plants of this variety in permanent cultivation, there are 34,000 cuttings and seedlings in the gardens.

5. The earnestness with which Mr. Howard, in the correspondence of October last, lately forwarded to this Government by the Government of India, urges upon Her Majesty's Secretary of State that the Indian *C. Succirubra*

belongs to the cinchonidine rather than the quinine-producing varieties of the tree, must invest the discovery of any new variety, producing quinine in quantity, with great importance. It is satisfactory, however, to observe in this connection that Mr. Howard believes "the *sulphate of cinchonidine* to be the very best means" the Government possesses in these plantations of bringing the medicine in a completely effectual form within the means of the people.

His Honor observes that Dr. King's attention appears hardly as yet to have been directed to the value of this more common alkaloid; and that he urges an alternative preparation of bark, in use on some of the plantations amongst the coolies, as a means of bringing the specific within the reach of the poorer classes. His remarks upon the matter are so important, that the Lieutenant-Governor would bring them to the special notice of the Governor-General in Council. He says—

"It is sometimes urged (especially in England) that cinchona planting is being overdone, and that quinine is not an article for which the demand will increase, simply because it may become cheap. This opinion is, I believe, held in entire ignorance of the fact that quinine, the only reliable remedy in the commonest of Indian diseases, is at present almost unobtainable by the mass of the population of India. The annual supply allowed to a charitable dispensary (and in most districts the dispensary is the only place where quinine can be had) is, as far as my experience goes, equal to the actual demand of only a few days in the year. This medicine is given at a dispensary only to what the official in charge considers 'bad cases;' others are put off with doses of chireyta, atees, or some other and inefficient substitute for quinine.

"The consumption of quinine in India is no index to the quantity that is required, but only to the quantity which can be afforded of so very costly a drug. But however much the cinchona alkaloids may be cheapened, they must (as involving a costly process of manufacture) always be comparatively high in price, and I think some of the inferior twig bark, which will continue to be yielded on the plantations, might be advantageously utilized in making a strong decoction or a liquor of bark. Such a preparation might be concentrated, so that half a teaspoonful or a teaspoonful would, mixed in water, form a dose. A preparation of this sort is in use in some plantations known to me, has been tried amongst the coolies in this plantation, and is reported an efficient medicine in convalescence from fever, and in the milder attacks even from the beginning."

Dr. King will be requested to be good enough to submit a further report upon this suggestion, after communication with Mr. Wood, the Quinologist, and upon a review of Mr. Howard's letter referred to above.

6. The arrival of Mr. Wood on the Sikkim Plantations will now place them on a footing of equality with those on the Nilgiris, which have for so many years had the advantage of a resident chemist, who, by careful and repeated analysis of the bark, has been able to give a more scientific culture to the plantations than has hitherto been possible in Sikkim. The Lieutenant-Governor regrets to observe that owing to the delay in forwarding from home the apparatus and chemicals for the laboratory, Mr. Wood's operations have been greatly delayed.

7. In Mr. Secretary Hume's letter No. 208, dated 21st June 1873, the Government of India has estimated that with 2,000 acres of successful planting, there will be a steady yearly supply of not less than 150,000lbs. of dry bark available for the analyst from the end of 1877; but Dr. Henderson, who was in charge of the plantations during Dr. King's absence, estimates Mr. Wood's requirements at half a ton of bark per working day, or 336,000lbs. a year, fully to utilize his services and appliances. The Lieutenant-Governor observes from the present report that about 16,000lbs. of dry bark were obtained during the last year from thinnings and prunings of the plantations, and that the yield will probably be 70,000lbs. in the present season from the same operations. The yield of last season has thus fallen very far short of the estimate in the last annual report (50,000lbs.). His Honor presumes that this is attributable to the fact that it is undesirable to accumulate stores of the bark in so damp a climate, but Dr. King's attention will be called to the matter. He will also be asked to state whether negotiations of any kind have been opened with the proprietors of the Pomung Plantation for purchasing the bark of that estate, concerning which His Honor addressed the Government of India in letter No. 376 of 9th February last, from this Department.

8. While on this point, I am directed to notice that this Government has not yet received any account-sales of the 60 cases of bark shipped to

London in 1872-73, nor of the final disposition of the 57 cases containing 3,500lbs. in Calcutta at the date of last report; information on both points is much desired.

9. As this undertaking is now passing out of the purely experimental into the commercial stage, it becomes necessary that a set of account books should be opened on the plantations, and an annual balance sheet prepared, in which the expenditure and receipts, the cost of cultivation and manufacture, the produce, stock, and sales of the plantations, should be clearly recorded. The Lieutenant-Governor would be glad to receive an expression of the views of the Governor-General in Council as to the form in which the accounts should be started, as it may be expedient to open them with a debit balance of such proportion of their cost up to date, as may be deemed proper. We have entered upon this experiment in the hope of being able to prepare this medicine so cheaply, as to place it ultimately within reach of the poor; and it is desirable to mark the advances which are made towards the attainment of this purpose, by the keeping of systematic accounts.

10. The Lieutenant-Governor remarks that Dr. King appears to have overlooked the call made by this Government upon his predecessor in No. 1899, dated 22nd July 1873, for a statement of the cost at which "the mapping and measurement of the plantations could be effected," and the estimate will be again called for.

11. His Honor would have been glad if the report had confirmed the hope raised by Dr. Henderson that "seedlings self-sown" were becoming common on the plantations and in the neighbourhood. Dr. King will be asked to notice the point in his next report, which the Lieutenant-Governor also hopes will contain some information concerning the prosecution of experiments with *manure* under Mr. Wood's direction.

12. I am to add that Sir Richard Temple is greatly obliged to Dr. King for his interesting report, and trusts that the Governor-General in Council will be satisfied with the energy which has marked all the operations of the year on the part of Dr. King, Dr. Henderson who acted for him in his absence, and the staff.

No. 60C, dated Mungpoo near Darjeeling, the 8th June 1874.

From—GEORGE KING, ESQ., M.B., Superintendent, Botanical Garden, Calcutta, and in charge of Cinchona cultivation in Bengal,

To—The Secretary to the Government of Bengal.

I HAVE the honor herewith to submit the annual report on the Government Cinchona Plantation, British Sikkim, for the year ending 31st March 1874.

Twelfth Annual Report on the Government Cinchona Plantations in British Sikkim, by GEORGE KING, ESQ., M.B., F.L.S., *Superintendent, Royal Botanical Garden, Calcutta, and in charge of Cinchona cultivation in Bengal.*

1. *Condition of the plantation.*—This is, on the whole, very satisfactory. The disease, concerning which such fears were expressed in some of the evidence given before the Cinchona Commission in 1871, is found, as I anticipated, to be comparatively harmless. Here and there, even in fair soil, a tree is attacked by it, but on cutting down the diseased stem healthy shoots are found to spring readily from the stump. I think this disease may, therefore, be classed with the minor dangers to which all plantations of young trees are more or less exposed. The older trees continue to grow satisfactorily, and some parts of the newer planting, in the richer soil and drier climate of the lower end of the Rungjo Valley, are about as fine as could be desired. The general appearance of the plantation is no doubt patchy, and will remain so. As explained in previous reports, the soil of the Sikkim hills is most uneven in quality. Cinchona cannot be induced to grow in spots which do not exactly suit it. We have now learned to recognize the kind of places where it is likely to do well, and in making extensions only such spots are selected. The newer parts of the plantation are therefore patchy from the beginning, and are so of choice.

2. *Species in cultivation.*—The plantations practically consist of trees of the two species yielding, respectively, red and yellow bark (*Cinchona Succirubra* and *C. Calis-aya*) in the proportion of about two millions of the former to three hundred thousand of the latter. The cultivation of the species yielding crown bark (*Cinchona officinalis*) has been abandoned because it does not thrive in the climate of Sikkim, while the cultivation of the species yielding the grey barks of commerce has been given up because grey barks are so poor in quinine. *Cinchona Pitayensis*, of which a few plants were received from the India Office about three years ago, will apparently not

thrive in Sikkim; but this is of the less moment as Pitayo bark is, I am informed, of little value compared to yellow (*Calis-aya*) bark. The great preponderance of *Succirubra* trees in the plantation is not due to a preference for that species over *Calis-aya*, but to the fact that the red bark tree is hardier, much more easily propagated, and has a much wider range as regards conditions of growth than *Calis-aya*. Artificial propagation of *Calis-aya* by cuttings proved very much more difficult than similar propagation of *Succirubra*, and until two years ago (owing to the slowness of the *Calis-aya* trees to yield seed), we had to depend entirely on such means for multiplying it; whereas *Succirubra* has been seeding freely for years. At last, however, we have raised a large supply of *Calis-aya* seed, and I trust before many months are over, to be able to report half a million of plants in the nursery beds, and if the funds at my disposal be sufficient, a large proportion of these may be permanently planted out before the end of the current financial year. Red bark, although rich in its total yield of alkaloids, contains less quinine than yellow bark, and in a less easily extracted form. It is therefore less esteemed by manufacturers of quinine. Moreover, red bark can still be procured in considerable quantity from South America, while yellow bark, on the contrary, is scarce. The yellow bark tree promises to grow well in Sikkim, and now that Government have the means of extending its cultivation I am strongly of opinion that they should do so. There is another species in cultivation in the plantation which in some former reports was referred to as "the hybrid." The first plant of this appeared amongst a set of seedlings raised from seed got some years ago from Dr. Thwaites, F.R.S., Director of the Royal Botanical Garden, Ceylon, a gentleman to whom we owe supplies of many other valuable seeds and plants. It is possible that this may turn out to be a distinct species and not a hybrid. Analysis of its bark shows it to contain much quinine. Since the discovery of this fact every effort has been made to propagate this variety. Experience, moreover, proves that it grows well in Sikkim and at a higher level than *Calis-aya*. Of this variety about 6,000 plants are in permanent cultivation, and I hope before another year to add largely to this number. A form similar to this sprung up accidentally in some of the Nilgiri plantations, and for a packet of seed of the Nilgiri variety I have to thank Mr. McIvor.

3. *Summary of the year's work.*—During the past year, 247,000 red bark (*Succirubra*) trees, 122,000 yellow bark (*Calis-aya*), and 6,000 of "the hybrid," have been planted out. These figures would have been higher but for the sudden and early termination of the rains, which brought planting operations to a premature close. As will be seen by the appended returns, the stock of seedlings in nursery beds has been kept up to the usual extent. The annual repairs have been given to the plantation [illegible]ds and bridges, and the necessary alterations have been made in fitting th[illegible] lings at Rungbee for the use of the recently appointed Quinologist.

4. *Manure.*—A limited [illegible] reated with Compton's patent manure, the effect of which in st[illegible] vigorous but evanescent. About seven hundred plants were liber[illegible] cow-dung. Hitherto no difference in growth has been perceptible in [illegible], but, as was the case in the Nilgiri plantation, the quality of the bark ma[illegible] improved. Samples of the bark will therefore be made over to the Quinologi[illegible] for report. Supplies of guano, ammonio-sulphate, and castor-oil cake have been got, and it is intended to apply these to a select number of plants at the beginning of the ensuing rainy season.

5. *Appointment of a Quinologist.*—Mr. C. H. Wood, the gentleman sent out by Her Majesty's Secretary of State for India as quinologist for these plantations, arrived in October, and located himself at Rungbee. There was considerable delay in the forwarding of Mr. Wood's apparatus and chemicals—indeed some of the former has not yet reached him, and Mr. Wood's operations have consequently been greatly delayed. In order to avoid expense, as far as possible, no new buildings have been erected for Mr. Wood, and but a comparatively small sum (about fifteen hundred rupees) has been spent in adapting those at Rungbee for his purposes. Mr. Wood occupies, as a dwelling-house, the bungalow first built at Rungbee, while the more recently erected inspection bungalow there has been fitted up as his laboratory. By Mr. Wood's appointment the Sikkim plantations will be on a footing of equality with those on the Nilgiris, which have for so many years had the advantage of a resident chemist, who, by careful and repeated analysis of their produce, has been able to give a scientific direction to cinchona cultivation.

6. *Yield of bark.*—No trees have been cut for the sake of their bark; but in a few places where the trees stood too closely together, some thinning and pruning has been done. These operations have yielded about 16,000 pounds of dry bark, part of which has been made over to the Quinologist. The remainder has been stored until he can use it. There are also in store about 16,000 pounds of dry bark got from last year's thinning and pruning. At the end of the ensuing rainy season a good deal more pruning and thinning will have to be undertaken in the interest of the older trees, and this will probably yield about 70,000 pounds more of dry bark. During the year no bark has been sent to England for sale, but 2,000 pounds have been supplied to the Presidency Medical Depôt.

7. *Expenditure and revenue.*—The budget allotment for the past year was Rs. 55,618, while the expenditure, exclusive of Mr. Wood's pay, but inclusive of the expenditure on his factory, amounted to only Rs. 50,471. There is thus a saving of Rs. 5,147. Mr. Wood has now got a separate budget allotment and draws his own bills, and henceforth the plantation and quinology accounts will be distinct. The sum of Rs. 1,613, received for the sale of bark

to the Medical Depôt, was entered as a paper credit in favor of the plantation, and Rs. 725-12, being land-rent collected in cash from the settlers within the cinchona reserve, were paid into the Government treasury at Darjeeling.

8. *General considerations.*—Government now possess in Sikkim about two thousand acres under quinine-producing cinchonas. It is sometimes urged (especially in England) that cinchona planting is being overdone, and that quinine is not an article for which the demand will increase simply because it may become cheap. This opinion is, I believe, held in entire ignorance of the fact that quinine, the only reliable remedy in the commonest of Indian diseases, is at present almost unobtainable by the mass of the population of India. The annual supply allowed to a charitable dispensary (and in most districts the dispensary is the only place where quinine can be had) is, as far as my experience goes, equal to the actual demand of only a few days in the year. This medicine is given at a dispensary only to what the official in charge considers "bad cases," others are put off with doses of chireyta, atees, or some other and inefficient substitute for quinine. The present consumption of quinine in India is no index to the quantity that is required, but only to the quantity which can be afforded of so very costly a drug. But however much the cinchona alkaloids may be cheapened, they must (as involving a costly process of manufacture) always be comparatively high in price, and I think some of the inferior twig bark which will continue to be yielded on the plantations might be advantageously utilized in making a strong decoction or a liquor of bark. Such a preparation might be concentrated so that half a teaspoonful or a teaspoonful would, mixed in water, form a dose. A preparation of this sort is in use in some plantations known to me, has been tried amongst the coolies in this planatation, and is reported an efficient medicine in convalscence from fever, and in the milder attacks even from the beginning.

9. In conclusion, my best thanks are due to Mr. Gammie, the Resident Executive Officer in charge of these plantations, and to Messrs. Jaffray and Kennedy for the excellent way in which they have performed their duties. Mr. Biernian, one of the plantation staff, still remains in Europe on sick leave on account of fever caught in the discharge of his duty in in the Rishap Valley.

I returned from sick furlough to England on 5th November, and received charge of the office from Dr. G. Henderson, who officiated for me during my absence.

10. The usual returns are annexed.

Table showing the Number and Distribution of Cinchona Plants in the Government Plantations at Darjeeling on the 1st April 1874.

Names of Species of Cinchona.	Number in permanent plantation.	Number of stock plants for propagation.	Number of seedlings or rooted cuttings in nursery beds for permanent plantations.	Number of rooted plants in cutting beds.	Total number of plants, cuttings, and seedlings.

GEORGE KING,

Supdt., Botanical Gardens, and in charge of Cinchona Cultivation in Bengal.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF 1874-75.

No. 528B., dated Fort William, the 18th August 1874.

From—W. H. GRIMLEY, ESQ., Offg. Secy. to the Board of Revenue, Lower Provinces,
To—The Secy. to the Government of Bengal, Revenue Department.

I AM directed by the Member-in-Charge to submit the following report on the state of the salt market for the first quarter of 1874-75, comprising the months of April, May, and June last.

2. The quantity of salt consumed (*i.e.*, the quantity of total clearances of salt of all descriptions) in the quarter under report amounted to 17,83,280¾ maunds, against 17,48,068 maunds in the previous quarter and 17,14,507 maunds in the corresponding quarter of the previous year; and the total amount of duty levied was Rs. 57,40,320-9, against Rs. 56,81,221 and Rs. 55,72,148 in the previous and corresponding quarters respectively.

3. The quantity of excise salt sold in Cuttack, Balasore, Pooree, and the 24-Pergunnahs during the present quarter, from the stock of the different seasons and the quantity which remained in store at the close of the quarter, are shewn in the following Table I :—

I.

	CUTTACK.			BALASORE.					POOREE.		24-PERGUNNAHS.

* The difference between these figures and those shewn in the report for the 4th quarter of 1873-74 is owing to revised figures received from Collector.

It will be seen from the above that the total clearances, or sales, of excise salt during the quarter under review amounted to 1,10,071¾ maunds, against 1,06,956 maunds in the previous quarter and 1,15,797 maunds in the corresponding quarter of the previous year.

4. The subjoined Table II shews comparatively the total importations into the port of Calcutta, and the total clearances of sea-imported salt during the quarter under notice and the corresponding quarters of the previous two years :—

10. In Table VII are exhibited the total quantities of salt that were available for the private export trade at the several depôts in the Madras Presidency on the first day of each of the three months constituting the quarter under report, and the corre sponding quarters of 1872-73 and 1873-74.

VII.

Months.	1872-73.	1873-74.	1874-75.
	Mds.	Mds.	Mds.
April	6,42,282	5,16,264	2,54,058
May	6,24,877	2,91,706	2,80,458
June	6,29,677	2,65,746	2,87,531

11. The following Table shews the quantities of sea-imported salt admitted into bond and cleared from bond and shipboard at Chittagong during the quarter under review and the corresponding quarter of 1873-74 respectively:—

VIII.

Description of Salt.	Admitted into Bond.		Cleared.	
	1st Quarter of 1873-74.	1st Quarter of 1874-75.	1st Quarter of 1873-74.	1st Quarter of 1874-75.
	Mds.	Mds.	Mds.	Mds.
Liverpool Pungah	.....	44,368	52,286	44,112
Madras Kurkutch	5,050	.....	100	1,240
Total ...	5,050	44,368	52,386	45,352

No transactions in sea-imported salt have been reported for the quarter from any of the Orissa ports.

RELIEF OPERATIONS OF THE MOTIHARI SUB-COMMITTEE.

No. 5273—S.R., dated Fort William, the 25th August 1874.

From—J. F. K. Hewitt, Esq., Offg. Junior Secy. to the Government of Bengal,
To—The Commissioner of Patna.

I am directed to acknowledge the receipt of your letter No. 339F., dated the 17th instant, submitting, for the information of Government, copy of a communication from the Chairman of the Relief Sub-Committee for the town of Motihari to the address of the Collector of the district, recapitulating all that has been done by them in connection with famine relief.

2. The Lieutenant-Governor is glad to find that the members of the committee have performed the trying work that they have had to do with zeal and devotedness. His Honor desires that you will be good enough to convey his thanks to the committee, and to Moonsiff Roy Matadin in particular, for their exertions in the matter.

3. A copy of this letter will be published in the *Calcutta Gazette*.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 22nd August 1874.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.				
		Western Districts.		
BURDWAN DIVISION.	1	Burdwan, 24th* Aug. 1874	1·11	Rainfall at Raneegunge 1·16; Bood-bood 2·40; Cutwah ·85; Culna 4·55; Jehanabad nil; want of rain complained of; prospects of crops not satisfactory; aous or early crop being cut in Cutwa; outturn short; fever as before.
	2	Bankoora, 22nd „ „	4·20	Heavy showers fell during the week, but more or less unevenly distributed. General prospects improved; cultivation backward in a few places. Aous or early rice generally in ear. Indian-corn, kheri, &c., almost all gathered. Outturn very good.
	3	Beerbhoom, 22nd „ „	·80	Showery. State and prospects of crops west of the railway continue excellent; fair throughout the rest of the district, excepting Burwan division and eastern portion of Mouressur, where the continued drought prevents transplantation; little hope of a fair crop in that part of the district. Rain wanted all over the east of the district. Export by rail, of fortnight ending 15th August, 185 maunds, all to Moorshedabad district. Prices rising.
	4	Midnapore, 22nd „ „	2·12	Fine and dry up to Friday, on which day copious rain began to fall and continued till the despatch of the report. On the whole the weather is favorable. Prospects in the south of the district reported good: elsewhere about average, except in the extreme north of thanas Chunderconah and Ghattal, where, over a limited area, almost complete drought and marked failure, in sowing the late rice crop, is reported. The indigo yield has turned out better than was expected.
	5	Hooghly, 22nd „ „	·20	Wind chiefly from south-east. Heavy passing clouds, but little or no rain. In Serampore the rainfall was ·77. Aous crops and jute fair. Amun or late rice crop partially planted out in few thanas only, in the remainder it cannot now be planted out. Rain still holds off except at and close round Serampore.
		Howrah, 22nd „ „	2·37	There has been some rain during the week throughout the district; weather sometimes clear and sometimes cloudy. Wind from south and east. The aous or early rice crop on the high lands is suffering. Lands are being prepared for transplanting the late rice seedlings and in some parts transplanting has commenced, but the cry throughout the district is for rain; unless there is heavy rain in a few days, there will be very little of the late rice crops. The jute and sugarcane are flourishing.
		Central Districts.		
PRESIDENCY DIVISION.	6	24-Pergunnahs, 24th† Aug. 1874.	5·02	Very close during the first part of the week, with occasional light showers. Warm and rainy during the latter part. Heavy rain fell during the week in the Sudder, Diamond Harbour, Barripore, and Bussirhat sub-divisions. Transplantation of the amun or late rice in these sub-divisions is now being rapidly proceeded with. Rain much needed in the other places. Harvest of the aous or early rice and jute progressing. The former will be a fair average crop, the latter an exceptionally good one. But owing to scarcity of water in some sub-divisions much difficulty is felt in macerating the plant. Fever still very prevalent in Diamond Harbour, Barripore, Bussirhat, and Satkhira.
	7	Nuddea, 22nd Aug. 1874	·72	The rainfall has been and still is very small. The aous or early rice crop is being harvested; the estimate given in last week seems still pretty correct, though in some parts the outturn is rather better than was expected. Of the amun or late rice crop only about one-fourth has been transplanted. Rivers have generally slightly fallen.
	8	Jessore, 22nd „ „	·75	Generally cloudy. The rainfall still continues very scanty. The early rice cut and uncut may be taken, notwithstanding all drawbacks, inundation doing damage at some places and drought at others, as being about a 12 annas crop. The late rice or amun also promises fairly. In Jenidah, Magoorah, and Nurail, broadcast sowing prevails. In Jessore, Khoolna, and Bagirhat, transplanting is more or less prevalent, and the transplanting has been considerably interfered with by the drought, which has also been injurious to the higher ground crop known as the *chota amun*. Nevertheless if rain falls now, the prospects continue good. The indigo outturn is generally favorable; prices of food grains have fallen in those places where early rice is ready. In Hurinacoond it had fallen to 20 seers, and though the return shews a rise to 17 seers, later information shows it as having again fallen to 19 seers. Where the crop has not found its way to the market and in those parts of the district where the amun or late rice largely preponderates, prices still continue as high as 11 to 13 seers; but as the harvest progresses, a further fall is to be expected.

* Telegram of the 24th August, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 24th August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)		*Central Districts.—(Contd.)*		
RAJSHAHYE DIVISION.	9	Moorshedabad, 22nd Aug. 1874.	Not received.	The week has been characterised by the same want of rain as its predecessor. A few showers fell in different parts of the district, but have not been sufficient to improve prospects. A heavy shower has, however, fallen on the day of report. It is not yet known how far it extended. The late rice crop continues in the critical state already noticed. Mirzapore and the west part of Sooty are suffering as much from drought as the western thanas of the Sudder sub-division. Telegraphed on the 25th August one inch and half of rain since Saturday, further falls probable.
	10	Dinagepore, 21st Aug. 1874.	1·13	Partial rain. In some parts heavy, in others deficient. The bhadoi or early crop is being reaped; more rain is wanted to render the winter crop safe.
	11	Maldah, 22nd Aug. 1874	1·11	Cloudy and sunny alternately. Weather warm, rain much wanted; heavy clouds collecting on Saturday evening. The bhadoi or early crop now being harvested, and though it has been injured in places by the rise of the Mohanunda, is on the whole a very good crop; more rain is wanted for finishing the transplanting of the late rice crop.
	12	Rajshahye, 22nd „ „	·19	The rainfall of the week has been very scanty all over the district. Rain is much needed for the aous or early rice which is still standing, as also for the ropa (transplanted) paddy, and if it does not soon fall in sufficient abundance, a partial if not total failure will be the result. The deep water rice is doing well, and believed to be safe. Prices have been stationary in some parts, in others they have fallen. The lowest rate reported is 19 seers and highest 12 seers per rupee.
	13	Rungpore, 21st „ „	1·07	Very slight showers fall constantly, but not sufficient to affect rain-gauge, ½ inch fell on the 18th and the same quantity on the 20th. Reports are still favorable to the north and east, where transplantation is active, but elsewhere the cry is for rain. Half the land is yet untouched and it will soon be too late to cultivate the high lands this year.
	14	Bogra, 22nd „ „	2·62	A deficiency of rainfall is reported to be doing harm in the north of the district. In all other parts of the district the crops are doing well. The aous or early rice crop is nearly cut, and the transplanting of the amun or late rice is nearly finished. Sugarcane, jute, mulberry, and arhur (pulse) are doing well. General health good.
	15	Pubna, 22nd „ „	·38	Dry and hot; slight rain in the nights of the 19th and 20th; clouds accumulate daily, but pass off without rain or with slight showers only. The water of the river is receding and want of rain is much felt. The prospects of the amun or late paddy good, but subsidence of water may prove injurious. Harvesting of the jute commenced. Fever prevails.
COOCH BEHAR DIVN.	16	Darjeeling, 21st „ „	5·43	Very favorable weather. Rain has fallen every day in the hills and terai, but not often heavily. Crops, in both the plain and the hills, are reported as progressing very favorably. The new maize has come into the market and is selling at Rs. 2 per maund.
	17	Julpigoree, 21st „ „	7·34	Heavy rain has fallen this week, falling mostly at night with bright hot days. No weather could be better for the hymunti or winter rice crop. Transplanting of the crop is now being rapidly completed and nothing could promise better than it now does. The bhadoi or early crop is still being cut, and as it now comes into the markets in large quantities prices are everywhere falling considerably.
		Cooch Behar, 20th „ „	5·67	Rain on five out of the seven days, falling generally at night. At head-quarters and throughout the greater part of the state the weather has been propitious since the commencement of the rainy season, but in the extreme south a break of nearly a month has been experienced. Heavy rain has fallen in the south in the last few days, but more is wanted.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca, 24th* Aug. „	1·16	Weather showery and windy. State of crops same as before—still uncertain.
	19	Fureedpore, 22nd „ „	1·47	Rain throughout the week, chiefly in drizzle. Weather generally cloudy. The prospect of the amun crops is on the whole good; at Ainpore, it is said, insects have attacked the growing paddy in some places. In Madareepore the sub-divisional officer reports that on account of the falling of the rivers the prospects are not promising. The rivers all over the district have not yet risen to the height they usually stand in August. The price of coarse rice at Fureedpore, Bhangah, Gopalgunge and Madareepore remains the same as last week, and at Goalundo it has fallen from 16½ to 18 seers.
	20	Backergunge, 20th Aug. 1874.	·73	Cloudy and cool. Rain somewhat deficient. Prospects good.
	21	Mymensingh, 21st „ 1874.	2·31	Hot with light showers. In Kisoregunge sub-division rain only ·15. Very much more is required everywhere; much land still remai for transplanting of the late rice; jute everywhere good.
	22	Sylhet, 18th Aug. 1874	2·06	Very close weather. Prospects good. The crops on the high lands want more rain. Transplanting of the sail (late) rice not yet completed. (Not sali as erroneously printed in the last Gazette). District not so healthy as usual at this time of the year.

* Telegram of the 24th August, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Concld.*)			
	Eastern Districts.—(*Contd.*)		
CHITTAGONG DIVN. 23	Chittagong, 20th Aug. 1874.	·27	Hot and unseasonably dry for the time of the year. Reaping of the aous or early rice crop continues and the outturn is fair. Rain is now much wanted for the amun or late rice crop, and the unusually dry weather retards transplanting. Cholera reported from Chuckeria and fever from Moiscal (Cox's Bazar).
24	Noakholly, 20th " "	4·76	Weather cloudy and rainy. Aous or early rice has in some places been reaped and promises well. Transplantation of amun or late rice is going on. Rain has done much good to the standing crops.
25	Tipperah, 21st " "	·87	Bright and hot, very little rain. Much more and heavy rain is greatly required for the amun or late rice, which is being transplanted. If heavy rain does not come within the next fortnight, this crop will suffer considerable loss. The aous or early crop is still being harvested, and will yield a fair average outturn.
26	Chittagong Hill Tracts, 18th Aug. 1874.	1·13	Hot and cloudy, with slight showers at intervals, almost invariably in the afternoon. The joomeas are now engaged in reaping their paddy crops. The cotton is doing well. The plough cultivators have nearly finished their transplanting operations; more rain is wanted by them.
	Hill Tipperah, 19th Aug. 1874.	0·46	Very little rain for the time of year. Transplanting is going on. The aous or early rice crop is nearly all cut, it will be below the average. More rain is much needed. Prices stationary.
BEHAR.			
PATNA DIVISION. 27	Patna, 24th Aug.* 1874	1·82	Weather partly cloudy and partly clear with heavy showers at intervals, all over the district; transplanting of rice plants in some places is being carried on vigorously and in others nearly completed. Health of the district on the whole good.
28	Gya, 22nd " "	2·33	Fair weather. Crops still good, but rain is wanted for the rice.
29	Shahabad, 22nd " "	1 04	Cloudy and unsettled, with occasional and heavy showers. State and prospects of crops very good so far. The sawan and "tengoon" (millets) are being cut and gathered. Rice transplanting has nearly come to an end. The bhadoi or early crop promises to be a good harvest generally. In a few places more rain is still required for the rice crops. Health of the district on the whole good.
30	Tirhoot, 22nd " "	...	Hot and cloudy. In the Hajeepore Sub-division rain is very much wanted on all sides for the autumn crops, which are becoming jeopardized. In the Durbhunga Sub-division, with the exception of Nagurbusty police station (Waresnagore Relief Circle), the outturn of the bhadoi or early crops will not be under 10 or over 12 annas on the whole. In Waresnagore one-third of the crop has been lost, and half the remainder is jeopardized by continued drought. This drought has had a prejudicial effect on the prospects of the winter rice, and has checked transplanting operations. Copious rain within a fortnight may secure a crop, averaging from 10 to 12 annas, except Waresnagore, where, under favorable circumstances, not more than from 8 to 12-anna crop can be expected. Generally the prospects of winter crop suggest grounds for watchfulness, and in Waresnagore for anxiety. In Mudhoobunnee Sub-division, murwa (millet), makai or Indian-corn, and sama or grass-seed crops are being reaped. Outturn of murwa 12 annas, and of makai and sama 16 annas. Prospects of gumri and aous or early rice daily becoming worse owing to the continued drought. Little, if any, will ever be reaped. The broadcast paddy will hold out, and there is much of it Of the other paddy, only three-fourths yet transplanted. It is suffering much, and while the drought lasts, the remainder cannot be transplanted. Great anxiety is felt regarding this crop. In the Tajpore Sub-division, bhadoi or early crop all round about 10 annas, makai or Indian-corn is better than murwa (millet); paddy is bad. In the Seetamurhee sub-division serious damage has been done to the crops from rain keeping off; the little rain that has fallen, has benefited the latest sown makai and sathi, and given life to the rice in the "bangar" soils. The prospects for the future were very bright, but the present drought has reduced expectations to about half as regards Indian-corn and the earliest sown sathi. It is too early to speak positively regarding the aghani or late crops, but the general expectation is that there will be only 8 annas bhadoi, or early crops. The prospect of crops in the Sudder Sub-division is equally gloomy. Rain is much wanted. Cholera prevailing at Shewhur.
31	Sarun, 22nd " "	3·13	Cloudy with intervals of clear weather. East wind prevailing. Rain more or less throughout the district, except within the jurisdiction of the out-posts of Moharajgunge, in thana Bussuntpore; Moharani in Mushruck, in the Sudder Sub-division; Kuttya in thana Burragaon, and Gopalgunge in Burrowlee, in the Sewan Sub-division. Rain very unevenly distributed. While five inches in one day fell at Sewan, the rainfall at Hutwa on the same day was only two-tenths. The bhadoi or early crops generally promise well; early murwa (millet), shama (grass-seed), tangnee (millet), and Indian-corn are being harvested. Manufacture of indigo is going on. Aghanee or late rice is being transplanted, but general transplantation is still retarded in many parts of the district by the want of rain. Prices steady. High flood in the Ganges—within 9 inches of previous flood and still rising. Cholera decreasing.

* Telegram of the 24th August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.—(*Contd.*)				
PATNA DIVN.	32	Chumparun, 21st Aug. 1874.	0·57	Very hot and close, with heavy clouds and occasional bright sun. There has been general rain at Ramnugur, where the prospects of the rice are good. Elsewhere there have been showers varying from 4 inches to 5-10 with hot sunny intervals. The weather has been favorable for the bhadoi or early crops except in Ramnugur. More rain is wanted for the rice. Transplanting progresses favorably, except in a few tracts where the rainfall has been insufficient.
BHAGULPORE DIVN.	33	Monghyr, 22nd Aug. 1874.	·99	Hot and cloudy. The prospects continue good, although the rainfall is short; the rice crop will be a good one, if sufficient rain falls during the next month. Nearly an inch of rain has fallen during the past 24 hours which has done much good. In Khurruckpore rain is urgently wanted; in Jamooee prospects continue good. Beegooserai report not received; but the prospects, except on those lands inundated by the river, are generally reported good. Much sickness in the town.
	34	Bhagulpore, 24th* „ „	1·20	It has been raining south of the Ganges the past week, but showers rather too partial; good has been done, but more heavy rain is required. Reports from north most satisfactory, though there rain is now looked for. General health very good.
	35	Purneah, 22nd „ „	2·09	Rains more or less every 24 hours, more frequently in the nights than in the day. The Indian-corn and bhadoi or early crops are yielding a full harvest. Winter rice prospects good. Prices falling rapidly.
	36	Sonthal Pergunnahs, 22nd Aug. 1874.	3·13	Heavy rain began at 3 P.M. of the 21st, and has been raining steadily till the hour of the despatch of the report. It looks like the best rainfall of the season. Deoghur 1·44, Godda ·20, Rajmehal 5·7, of which 5 inches fell on the 19th: a very heavy shower. Nothing could be better than crops at Doomka and Deoghur. Indian-corn and small crops being gathered in Deoghur; outturn excellent. *Sathi Dhan* (paddy), expected in 10 days, doing very well, though a little late in Doomka; but everything is doing extremely well. In Jamtara all crops are doing well. Indian-corn being gathered. Rain wanted in Moheshpore, but crops doing well. Indian-corn being gathered. Great damage in Rajmehal from floods. Ganges drowned dearahs. Rain badly wanted in Godda. Crops yellow and sickly.
ORISSA.				
ORISSA DIVISION	37	Cuttack, 24th Aug. 1874.	3·42	Weather cloudy, but breaks of sunshine daily. The crops which were under water have suffered very slighly in a few places. Floods have generally subsided. Crops flourishing. Cholera has decreased.
	38	Pooree, 20th „ „	3·29	There has been abundant rain and rise of the rivers. The weeding of the early rice crop continues, and it is beginning to come into ear. The later rice continues to be transplanted and has begun to be weeded. The crops on low lands have been slightly damaged by excessive rain and flood in some parts. The prospects are, however, yet fair and hopeful. Sugarcane is doing well. Cotton is being gathered, with a fair outturn; mandia and arhur (pulses); castor and teel (oilseeds) are growing well. Prices stationery. Cholera has almost ceased and fever continues in an abated degree.
	39	Balasore, 21st „ „	·43	During the week the fall has been slight and the inundation has gone down. The damage done, has been inconsiderable. The late rice is being planted out. Cattle disease has broken out in two villages.
CHOTA NAGPORE. *South-West Frontier Agency.*				
	40	Hazareebagh, 21st Aug. 1874.	1·35	Early part of the week very fine. Latter part cloudy, rainy and cold. Nothing special to report. Bhadoi or early crops are yielding excellently and the rice is looking very well. Cholera and small-pox are about the district.
	41	Lohardugga, 22nd Aut. 1874.	1·59	Seasonable, but little rain for the time of the year. The prospects of both the early and late crops are now very good. The goondli (millet) is still being harvested in parts and is reported to be an excellent crop. In Palamow, too, all the crops promise well. The goondli and sawan are being cut and the remainder of the bhadoi or early crops is doing well. The paddy transplanting operations have been completed under favorable circumstances. Prices easy. General health pretty good.
	42	Singbhoom 21st Aug. 1874.	1·75	Rain and sunshine alternately throughout the week. Condition of the crops extremely favourable. The goondli (millet) has been reaped. In some parts of the district they are beginning to cut the *gora dhan.* The Indian-corn and goondli crops both excellent. General public health good, but cholera here and there; condition of the people satisfactory.
	43	Manbhoom, 22nd Aug. 1874.	1·39	Unfavorable, as only slight showers have fallen when heavy rain was urgently required The prospects of the rice crops have not improved, but are rather worse than at the date of last report, and over a considerable extent of the district a very short crop and consequent scarcity next year is now almost certain. From the Gobindpore sub-division the reports are better, but in the centre of the district, and to the east and south-east the prospects of the great rice crop are bad, as what has been transplanted is suffering for want of water, and from this cause also about one-third of the rice lands have not, and most probably will not, be planted out, as the time for doing so with any chance of getting a crop has passed. The crops on the high land are all very good, but these do not produce a supply of more than four months' food. Goondli (millet) and Indian-corn are being gathered. Cold and fever are very prevalent.

* Telegram of the 24th August, received on the same day, shows rainfall during the seven days immediately preceding.

Published for general information.

CALCUTTA, STATISTICAL DEPT.,
The 25th August 1874.

R. KNIGHT,
Asst. Secy. to the Govt. of Bengal.

Note on the Rainfall, 1874.

THE Officiating Meteorological Reporter of Bengal has submitted to Government the annexed tables I and II showing the excess or defect of the rainfall of the year up to date of 31st ultimo. The tables shew that the earlier months of the year were wetter than usual, especially February, when rain was universal, the fall in most places much exceeding the average of the month. The months of April and May were generally drier than usual. Rajshahye, Cooch Behar, and Chittagong, were however exceptions.

"The distribution of the rainfall," says the Meteorological Reporter, "in the two first months of the monsoon was generally analogous with its distribution in the earlier months of the monsoons of 1870 and 1872, in both of which the rainfall was scanty in Bengal, and especially so on the Arracan coast, in the earlier months of the monsoon; whereas during the same period in Assam, in parts of Behar, the North-Western Provinces, Chota Nagpore, and the Central Provinces, it was equal to or above the average. In Orissa, however, in 1872, owing to storms in the Bay, the rainfall was much above the average; whereas in 1870, it was below." At Akyab, the scantiness of the July rainfall [this year] is unprecedented.

"But the monsoon rains of 1870 and 1872, though generally deficient in the earlier months, and also for the whole year (especially in 1872), over most of Bengal, were *more than usually prolonged;* and the September and October rains were on the whole plentiful and favorably distributed. It may be hoped that such will be the case also in the present year. An early termination of the monsoon rains in the present season would, on account of the backward condition of cultivation, owing to the long drought in June and July, be calculated, in a greater degree than in ordinary years, to cause, as in all similar cases, very serious damage, if not in some places a complete failure of the principal crop."

RAINFALL [BY DIVISIONS], 1874 [*Tables I and II summarized.*]

DIVISIONS.	Number of Registering Stations.	January to March.	April and May.	June and July.	Total of 1874.	Total normal.
BURDWAN ...	Aggregate fall at 8 stations—1874	46·51	28·54	135·19	210·24	.....
	Normal fall at same stations	24·42	48·12	190·85	.....	263·39
PRESIDENCY ...	Aggregate fall at 5 stations—1874	30·94	26·49	85·19	142·62	.....
	Normal fall at same stations	10·92	44·26	117·09	.....	172·27
RAJSHAHYE ...	Aggregate fall at 7 stations—1874	31·79	72·46	158·23	262·48	.....
	Normal fall at same stations	16·36	67·45	200·99	.....	284·80
COOCH BEHAR ...	Aggregate fall at 3 stations—1874	8·65	52·20	192·52	253·37	.....
	Normal fall at same stations	9·44	50·88	226·61	.....	286·93
DACCA	Aggregate fall at 6 stations—1874	60·74	122·04	156·44	339·22	.....
	Normal fall at same stations	27·44	127·22	227·05	.....	381·71
CHITTAGONG ...	Aggregate fall at 4 stations—1874	22·18	66·21	110·73	199·12	.....
	Normal fall at same stations	11·65	63·01	154·28	.....	228·94
PATNA	Aggregate fall at 8 stations—1874	13·51	3·51	182·89	199·91	.....
	Normal fall at same stations	11·05	15·09	147·28	.....	173·42
BHAGULPORE ...	Aggregate fall at 4 stations—1874	8·16	10·03	104·59	122·78	.....
	Normal fall at same stations	6·05	13·34	81 84	.....	101·23
ORISSA	Aggregate fall at 5 stations—1874	15·52	10·30	125·18	151·00	.....
	Normal fall at same stations	11·74	21·29	110·50	.....	143·53
CHOTA NAGPORE	Aggregate fall at 4 stations—1874	23·41	6·59	69·01	99·01	.....
	Normal fall at same stations	8·35	9·94	78·88	.....	97·17
AKYAB	Aggregate fall—1874	1·82	8·23	62·46	72·51	.....
	Normal fall at same station	1·12	12·06	114·81	.....	127·99

Aggregate of all the totals—1874... ... ... 2,052·26 inches.
Aggregate of the normal fall ... ... 2,261·38 ,,

NOTE.—An error was made in the Tirhoot rainfall, from May to July inclusive, given at page 2730 of the *Calcutta Gazette*, 12th instant. The figures should have been 22·10 inches instead of 9·04. The figures at page 2727 in the previous table are correct. The figures for Hill Tipperah also at page 2730 are incorrect. Those at page 2727 are right.

CALCUTTA,
25*th August* 1874.

R. KNIGHT,
Assistant Secretary.

	21st	·547	91·5	81·0	147·0	83·4	80·9	79·1	·87	S by E	...	100·2	1·25	...	Clouds of various kinds. Thunder from 2½ to 4 P.M. Lightning between 3 and 4 P.M. Rain at 1 A.M., and from 2 to 5 P.M.

The mean barometer, as likewise the dry and wet bulb thermometer means, are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken at unity. The receiver of the lower rain gauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUTENANT-GOVERNOR OF BENGAL.

REVENUE AND GENERAL DEPARTMENTS.

No. 2346C.S.

GENERAL.—*The* 18*th August* 1874.—The Lieutenant-Governor is pleased to sanction the retention of the services of Baboo Paul Dass as an Extra Sub-Deputy Collector in the Beerbhoom District for a further period of one month, from the 7th instant, for the purpose of continuing inquiries into advances made under Act XXVI of 1871.

The 22*nd August* 1874.—Baboo Rojoni Nath Chatterjee, Deputy Magistrate and Deputy Collector, Purneah, is vested with the powers, under Section 3, Act X of 1870, for the purpose of taking up lands required for relief roads in the Purneah District.

The 25*th August* 1874.—Moulvie Dilwar Hossain Ahmed, B.A., Deputy Collector, has been posted to Chumparun to take up lands required for the Gunduck embankment, with effect from the afternoon of the 27th ultimo.

The 27*th August* 1874.—Mr. Henry Fitzmaurice John Kean, C.S., reported his departure from India on leave on the 11th August 1874.

It is notified that the Lieutenant-Governor, in consideration of the high character and useful services of Moulvie Hamid Bukht Mozoomdar, Officiating Deputy Collector, in charge of the Settlement of Jynteah, in the District of Sylhet, is pleased to declare him to be exempted from further examination.

The 28*th August* 1874.—Baboo Omullo Churn Mullick, Officiating Deputy Magistrate and Deputy Collector, Purneah, is allowed leave of absence for two months on Medical Certificate, under Section 3, Supplement F of the Civil Leave Code, with effect from the date on which he availed himself of it under orders of the Commissioner of Bhaugulpore in anticipation of the sanction of Government.

Mr. John Frederick Browne, District and Sessions Judge, Cuttack, is allowed leave of absence for three months, under Section 21, Chapter VI of the Civil Leave Code, with effect from the date on which he may be relieved of the charge of his office by Mr. J. B. Worgan.

Mr. John Berney Worgan is appointed to act as District and Sessions Judge of Cuttack during the absence on leave of Mr. J. F. Browne, or until further orders.

Mr. Loftus Richard Tottenham, District and Sessions Judge, Backergunge, is allowed leave of absence for three months, under Section 21, Chapter VI of the Civil Leave Code, with effect from 21st September 1874, or from any other date on which he may be relieved of the charge of his office.

Mr. William Henry Verner is appointed to act as District and Sessions Judge of Backergunge during the absence on leave of Mr. L. R. Tottenham, or until further orders.

The orders of the 13th July last, published in the *Calcutta Gazette* of the 15th idem, vesting Mr. Edward Maxwell Reilly, Deputy Magistrate and Deputy Collector, with the powers of a Collector under Act X of 1870, for the purpose of acquiring land required for the site of a Post Office at the head-quarters of the Atia sub-division, in Mymensing, will have retrospective effect from the 1st June preceding.

The 29th August 1874.—Baboo Gobind Chunder Bose, Deputy Collector, in charge of the Survey Registry work of the Hooghly District, is vested with the powers of a Collector in the District of Burdwan.

Baboo Dwarka Nath Mookerjee is appointed temporarily to be a Sub-Deputy Collector of the Second Grade at Bagirhaut, in the District of Jessore, *vice* Baboo Bussunto Coomar Bose.

The 1st September 1874.—Baboo Poran Chunder Newgy, Deputy Magistrate and Deputy Collector, Bhagulpore, is allowed leave of absence for six months on medical certificate, under Section 3, Supplement F of the Civil Leave Code, in extension of the leave granted to him under orders of the 30th June last.

Baboo Nolin Chundra Roy, Sub-Deputy Collector, Serajgunge, is allowed leave of absence for three weeks on medical certificate, under Section 3, Supplement F of the Civil Leave Code, with effect from the 14th August last.

POLICE.—*The 31st August* 1874.—Mr. Arthur Blair, on special relief duty in Rungpore, is appointed to be District Superintendent of Police at Noakholly.

Mr. Henry Neville Harris, District Superintendent of Police, Jessore, is allowed leave of absence for fifteen months on medical certificate, under Section 3, Supplement F of the Civil Leave Code, together with the usual subsidiary leave for a period not exceeding thirty days.

The 1st September 1874.—Mr. Marcus Burgh Rochfort, District Superintendent of Police, Tipperah, is appointed to act as Assistant Inspector-General of Railway Police in that portion of the East Indian Railway which lies within the jurisdiction of the Lieutenant-Governor of Bengal during the absence on furlough of Major Q. D. Parsons, or until further orders.

Mr. George Morsely McMullen Ridsdale is appointed to act as District Superintendent of Police, Tipperah, during the absence on duty of Mr. M. B. Rochfort, or until further orders.

Mr. Alfred Erskine Chapman Bolst is appointed temporarily to act as District Superintendent of Police, Rungpore.

ECCLESIASTICAL.—*The 27th August* 1874.—The Revd. James Kilbee Stuart, M.A., Chaplain of Berhampore, is appointed to act as Chaplain of the Garrison of Fort William and the Military Hospital during the absence on leave of the Revd. Arthur Octavius Hardy, or until further orders.

The services of the Revd. Mathew Lamert, B.A., Chaplain of Cuttack, are placed at the disposal of the Government of the North-Western Provinces.

MEDICAL.—*The 28th August* 1874.—Surgeon-Major Robert George Mathew, Civil Surgeon, Midnapore, on leave, is appointed to act temporarily as Civil Surgeon of Darjeeling.

The 29th August 1874.—Third Grade Assistant Surgeon Gopal Chunder Dey is appointed to the medical charge of the South Suburban Town Charitable Dispensary.

The services of Third Grade Assistant Surgeon Kristo Das Sen, now attached to the Dispensary and Sub-Division of Bettiah, in the Chumparun District, are placed at the disposal of the Chief Commissioner of the Central Provinces.

Third Grade Assistant Surgeon Baney Madub Das, attached to the Keshra Endemic Dispensary in the Burdwan District, is transferred to the Sub-Division and Dispensary at Bettiah.

Third Grade Assistant Surgeon Neemy Churn Chatterjee, a supernumerary at the Presidency, is appointed to the charge of the Keshra Endemic Dispensary in the District of Burdwan.

The 31st August 1874.—The following gentlemen are appointed to be members of the Committee for the Management of the Charitable Dispensary at Contai in addition to the members previously notified, viz.—

Baboo Shama Puddo Chowdry, Sub-Deputy Collector, Contai.
" Probhat Chunder Chatterjee, Inspector of Police.
" Boikant Nath Hazra, Pleader, Moonsiff's Court.
" Shama Churn Ghose, Accountant, Public Works Department.

OPIUM.—*The 31st August* 1874.—Mr. C. E. S. Innes, Assistant Sub-Deputy Opium Agent, Rohnee, is allowed leave of absence for eighteen months on medical certificate under Section 3, Supplement F of the Civil Leave Code, together with the fourteen days' subsidiary leave.

MUNICIPAL.—*The 28th August* 1874.—The following gentlemen are appointed to be Municipal Commissioners for the Town of Chittagong, viz.—

Mr. W. Carbery, Manager of the Bank of Bengal, Chittagong.
" C. W. Robertson, Representative of Messrs. Bulloch Brothers, merchants.

LOCAL FUND.—*The 28th August* 1874.—Mr. R. Dubas, Manager of a Silk Filature at Choa, is appointed to be a member of the District Road Cess Committee in Moorshedabad.

Mr. H. L. Weatherall, local Manager of the properties of Khajah Assanullah, is appointed to be a member of the Road Cess Committee in Tipperah, *vice* Mr. W. F. Campbell, deceased.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

The 27th August 1874.—The following Circular, issued by the Comptroller-General, is published for general information :—

No. 533, dated Calcutta, the 3rd August 1874.

From—H. A. MANGLES, ESQ., Officiating Comptroller-General,

To—All Accountants-General.

From replies which have lately come to hand from various parts of India, it appears to be advisable to put before District Treasury Officers, in a concise form, the various concessions which have been granted by the Government of India in order to make the Paper Currency more generally convertible and so more popular.

2. They are—

(1) That the notes of a Paper Currency Circle should be cashed at every Treasury (district or sub-divisional) within the Circle up to the available means of the Treasury, *i.e.*, to whatever extent they can be cashed without embarrassing the Treasury.

(2) That notes of all Presidencies and Circles should be received at every Treasury (district or sub-divisional) in payment of Government demands, and should be cashed at every Treasury (district or sub-divisional) for the convenience of travellers.

(3) That notes which in this way or otherwise reach a Government Treasury should be freely issued in exchange for coin or in discharge of Government obligations.

3. It has frequently been represented that difficulties have been thrown in the way of persons desirous of obtaining cash for notes at treasuries, and even that commission has been demanded for the accommodation. To prevent any possibility of such complaints in future, a form of notice in English and the Vernacular should be hung in some conspicuous place, so that all may see whether the accommodation is available.

4. To remove all possibility of complaint on the part of Officers in charge of sub-divisional treasuries of the risk incurred in cashing notes to the public, it is suggested that each subordinate treasury be provided with a new home circle note of each denomination with which to compare all notes presented for encashment. These notes would of course form part of the Officer's cash balance, but they should not be considered as available for issue to the public or for remittance to the Sudder treasury.

5. Treasury Officers should be reminded that although it is the rule and is desirable to register the name of the person from whom a note of Rs. 50 or upwards is received, or to whom it is paid, yet that the rule should be complied with only when the name of the presenter or receiver is known or is voluntarily given. The Government of India has directed that Treasury Officers must not demand such information, nor put any questions to parties tendering or receiving notes.

6. In the Resolution of the Government of India on the operations of the Paper Currency Department during the year 1871-72, the President in Council noticed "with satisfaction" the remarkable increase of note transactions at Government Treasuries in the interior during that year. It should, however, be remarked that though considerable progress was made in that year's transactions as a whole, yet that little has been done as yet in this direction out of Lower Bengal and Madras, and that, therefore, great opportunities are still open to Treasury Officers in the North-Western Provinces, Oudh, Punjab, Bombay, Central Provinces, and British Burmah, to meet the wishes of Government.

7. By the latest published figures the increase during the last four years has been—

At Treasuries under Government of India	...	2	lakhs.
" " in Lower Bengal ...	...	412	"
" " in N. W. Provinces	...	73	"
" " in Oudh ...	...	14	"
" " in Punjab ...	...	22	"
" " in Madras ...	...	153	"
" " in Central Provinces	...	24	"
" " in British Burmah	...	9	"
" " in Bombay, a decrease of 87 lakhs.			

8. I enclose spare copies for transmission to District Treasury Officers and other Officers of the local Government under the arrangement made in my letter No. 1557, dated 3rd February 1871, and spare copies of paragraphs 1, 2, 3, 4, and 5, for transmission by District Treasury Officers to the Officers in charge of sub-divisional treasuries.

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 26th August 1874.—Under the provisions of Section 11 of Act VII of 1864, the Lieutenant-Governor of Bengal has been pleased to direct that the following rule be substituted for Rule 32A, at page 8 of the Salt Manual, issued under date the 13th July 1870. The present rule is therefore notified for general information :—

Rule.—"If salt originally intended to be taken out of the excepted limits described in clause 4 of the Government Notification at page 2 of the Manual under a special pass be landed in such limits for the convenience of the trade, the alteration in the destination must be reported to the Board's Office, and the special Rowannah returned within 48 hours from the time that the salt was landed. The owner, however, shall be at liberty to refer to it in taking out protective documents for such portion of the salt as he may subsequently determine on removing within limits. Should a portion only of the salt originally covered by the special Rowannah be landed or sold in the aforesaid excepted limits, an exchange Rowannah after the manner provided in Section 28 of these rules, must be taken out to cover the remaining portion of the salt which goes out of such limits. Any person failing to comply with the provisions of this rule as regards the return, within the period of 48 hours, to the Office of the Board of Revenue, of the special Rowannah in the case hereinbefore mentioned, in which this document is no longer required as a protection for the salt specified therein, shall be liable to a fine not exceeding Rs. 500."

"Certificates taken out for the removal of salt from shipboard, or from bonded golas, to places within the excepted limits, must also be returned to the Board's Office within 48 hours from the time the salt is landed in such places; and the holder of any certificate who fails so to return it, shall be liable to a fine not exceeding five hundred rupees."

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 31st August 1874.—It is hereby notified for general information that the following readjustment of the Moonsiffee jurisdictions in the District of Gya has been sanctioned, and will take effect on the reopening of the Courts after the next Dusserah vacation:—

Instead of three Moonsiffees as heretofore, there will be only two Moonsiffees in the District, viz.—the Sudder Moonsiffee of Gya and the Moonsiffee of Aurungabad. The Moonsiffee of Nowadah will be abolished.

Thana Sherghotty will be included in the Sudder Moonsiffee of Gya, which will make the jurisdiction of that Moonsiffee conterminous with that of the three following sub-divisions :—

Sudder Sub-Division. Jehanabad Sub-Division. Nowadah Sub-Division.

Thana Daoodnaggur will be included in the Moonsiffee of Aurungabad, which will make the jurisdiction of that Moonsiffee conterminous with that of the sub-division of Aurungabad.

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 29th August 1874.—Under Section 2 of the District Road Cess Act (X B.C. of 1871), the Lieutenant-Governor is pleased to direct that the cesses leviable under the said Act shall take effect in the district of Manbhoom from the 1st October 1874.

Under Section 70 of the aforesaid Act, the Lieutenant-Governor is pleased to determine that the month in which the District Committee of Manbhoom shall meet to prepare estimates of income and expenditure for the cess year next ensuing, as in the said section provided, shall be September 1874.

RESOLUTION.

GENERAL DEPARTMENT.

SECTION B.

Calcutta, the 22nd August 1874.

READ—

Resolution in the Financial Department of this Government, dated 22nd April 1873, regarding the provision of executive establishments to sub-divisions.

Rules for the Instruction and Examination of Candidates for the Native Civil Service, dated 22nd April 1873.

Report by the Superintendent of the Subordinate Civil Service Examination of the result of the examination held in March last at Hooghly, Patna, Dacca, Cuttack, and Gowhatty.

This office letter to the Director of Public Instruction, dated 10th October last, prescribing the revised rules for the Native Civil Service Examination of 1865, and for the regulation of the Native Civil Service Classes.

LISTS of the candidates who passed at the Native Civil Service Examinations which were held during the month of March last at Hooghly, Patna, Dacca, Cuttack, and Gowhatty, have already been published in the *Calcutta Gazette.*

2. Of 423 candidates who obtained permission, 385 actually appeared and were examined. Of these 67 were declared by the examiners to have passed in the higher grade and 132 in the lower grade. One more candidate has been passed in the lower grade on the recommendation of the Superintendent of the Examinations. The total number of passed candidates is 200.

3. Of the candidates who passed in the lower grade, nine having passed with distinction, have been placed, at the special recommendation of the Superintendent of the Examinations, in the higher grade, making a total of 76. Of these 38 having fulfilled the requirements of paragraph 4, Part II, of the Rules for the Instruction and Examination of Candidates for the Native Civil Service, dated 22nd April 1873, have been placed in Class I and declared eligible for all appointments in the Subordinate Civil Service. The remaining 38 candidates have been placed in Class II, and will become eligible for all such appointments on their serving for one year in appointments of less value than Rs. 100 per mensem, for which they are now declared qualified.

4. The remaining 123 who passed in the lower grade, and the one who has been specially so passed, have been placed in Class III, and are declared qualified to hold appointments of less value than Rs. 100 per mensem.

5. The Commissioners to whose divisions the second class men of the examinations of 1873 were allotted, have been desired to report on their qualifications. If they are found deserving, they will be declared to be eligible for all appointments.

6. Two of the candidates who have passed in the first class are natives of Assam, and are anxious for employment in that province. Their cases will be brought to the notice of the Chief Commissioner of Assam, and a copy of Mr. Grimley's remarks regarding these two candidates in paragraph 6 of his report will be forwarded for the information of the Chief Commissioner.

7. Baboo Nundkishore Dass, Deputy Magistrate and Deputy Collector, and Bhoonya Abdoor Ruhman Khan, Sub-Deputy Collector in Orissa, who were appointed to their respective offices subject to passing the Native Civil Service Examination, and have passed in the higher grade, are now confirmed in their appointments.

8. The Superintendent of the Examinations recommends that a silver medal be awarded to Baboo Lolitmohun. Dhur, the first on the list of the passed candidates. The Lieutenant-Governor has already, in recognition of the merits of this native gentleman, conferred on him an appointment of acting Deputy Magistrate and Deputy Collector, and he considers this, under the circumstances, the more appropriate form of reward.

9. Another passed candidate of this year, Baboo Omoollo Churn Mullick, who was formerly a member of the Subordinate Executive Service, but removed for failure to pass the departmental examinations within the prescribed time, has, in accordance with the promise held out to him at the time of his removal, been appointed to act as a Deputy Magistrate and Deputy Collector.

10. Forty other canditates have been appointed temporary Sub-Deputies or Relief Superintendents in connection with the present famine relief operations, since the date of the examination.

11. The following is an abstract of the allotment which has been made of the passed candidates, exclusive of the two passed candidates who will be recommended to the Chief Commissioner of Assam :—

Division.	1st class candidates.	2nd class candidates.	3rd class candidates.
Burdwan	5	5	14
Presidency	6	6	13
Rajshahye	6	8	13
Cooch Behar	1	0	4
Dacca	4	4	12
Chittagong	2	4	10
Patna	5	3	25
Bhagulpore	3	3	15
Orissa	2	2	7
Chota Nagpore	2	3	11
Total ...	36	38	124

12. A list showing the names of the candidates allotted to the different divisions has been already circulated with this office Circular No. 12E, dated the 14th instant. They are recommended to report themselves to the Commissioners of the divisions to which they are assigned. Any candidates who wish to exchange by mutual arrangement with other candidates placed in the allotment list, may jointly apply to Government for permission to do so within a month of the publication of this resolution. Commissioners who have exhausted their own lists may select men from the other lists with the consent of the Commissioner to whom the candidate has been allotted.

13. The attention of Commissioners is drawn to the following extract from the Native Civil Service Examination Rules now in force :—" Lists of successful examinees will be published in the *Gazette*, so that Commissioners, Magistrates, and Educational Committees, may select for ministerial or other appointments passed candidates for whom vacancies in the Native Civil Service may not be immediately available."

14. Detailed lists showing the past service, the University or other attainments of each candidate, and the special subjects in which he passed, will be forwarded to Commissioners.

15. Unpassed candidates who were temporarily admitted to appointments pending the result of the late examination, or who were appointed subject to passing at that examination, and have failed to do so, should be now replaced

by passed men. The attention of all Commissioners of divisions is requested to this order.

16. It is to be understood that the appointments which have been made or may be made of men who have never before served Government are on probation for a year, and that their confirmation will depend on the practical efficiency shown by them. The District Officers will report on this point through the Commissioner after the expiry of a year. Their attention is drawn to paragraph 18 of the Resolution in Financial Department of 22nd April 1873. The reports now overdue should be submitted at an early date to the address of the Secretary to this Government in the General Department, Section B.

17. The Superintendent of the Examinations has recommended that thirty-seven of the candidates who have failed, but who have attained the passing standard of marks in certain subjects, may, if they appear at the next examination, be exempted from examination in those subjects. The proposal is, however, opposed to the principle on which these examinations have been hitherto conducted, and does not commend itself to the Lieutenant-Governor.

18. Mr. Grimley has also suggested that Messrs. Swinden, Babanau, and Lloyd, be considered qualified for appointments in the Opium Department, as they have succeeded in passing in some of the subjects which are obligatory for opium candidates. There are, however, other considerations which regulate the special nominations required under the rules for opium appointments, and the Lieutenant-Governor is not prepared to adopt the proposals made in favor of these gentlemen. Their success in the subjects in which they have passed qualify them for the general service, but gives them no claim to be admitted to the Opium Department.

19. As explained in the letter to the Board of Revenue, No. 1157G, dated 28th October 1872, candidates for opium appointments are required to pass in—

1. English.	4. Law (opium laws and rules, &c.).
2. Vernacular.	5. Chemistry.
3. Surveying.	6. Botany.

They are not required to pass in engineering or drawing. Apparently there has been some confusion from a misunderstanding of the rules in the recent examinations. In future when special permissions are given to candidates for the Opium Department, they will be informed of the rules which regulate their examination.

20. Mr. J. W. H. Dalrymple Clark, who was appointed to act as Assistant Superintendent of Police, subject to passing the examination for police appointments, has passed very successfully in criminal law, but has failed in other subjects. He was only nominated in November last, and has had but little time for preparation. He has lately been employed on distant duty in connection with the famine relief operations in Julpigoree, and under these circumstances will retain his present acting appointment subject to the results of the next examination.

21. The total amount of fees received from candidates at the late examinations is Rs. 9,060. The sum of Rs. 3,704-5-3 has already been disbursed, debitable to the receipts on account of fees. The propositions submitted by Mr. Grimley for remunerating the examiners and other gentlemen who have assisted in the late examinations are sanctioned. In addition, it is necessary to provide some remuneration for Mr. Grimley for his share of the work performed by him as Superintendent of the Examination subsequent to the date of his assuming charge of the office of Secretary to the Board of Revenue on the 13th April, when the special allowance, which he had drawn at the rate of Rs. 1,000 a month from the 15th January last, ceased. Mr. Grimley's labors have not been light, and he has performed the duty very satisfactorily. The Lieutenant-Governor is pleased therefore to pass to him a further remuneration of Rs. 500 a month for two months from the 13th April last. The further expenditure thus sanctioned amounts in all to Rs. 4,503, and is shown in detail in the statement appended to this Resolution.

22. The thanks of Government are due to Mr. Grimley and to the gentlemen who were associated with him in conducting the examination; and the Lieutenant-Governor has much pleasure in acknowledging the services which have been again rendered in the matter by Messrs. Sutcliffe and Thwaytes and by other gentlemen in the Educational Department.

23. The Lieutenant-Governor regards the general outturn of these examinations with satisfaction, as showing that the system is duly appreciated by the educated classes, and that increasing numbers are endeavouring to qualify themselves by study and experience.

24. But it must be borne in mind that the result of the past examination, and of those which were held on two previous occasions, has been to render 376 gentlemen eligible for appointments. The appointment to sub-divisions for the first time of subordinate executive officers has enabled Government already to provide almost all those passed on previous occasions with suitable posts, and in this year the necessities of the famine have rendered available a considerable number of appointments for the men who have passed this year's examination. In the future, however, the requirements of the Government service will be on a much smaller scale. Including temporary and officiating appointments, the approximate number of officers of the higher grade in the services for the supply of which these examinations were specially organized is 375, as in the margin. Excluding temporary posts, there are only 100 appointments of the lower grade of such a character as passed candidates would be likely to accept in the sub-divisional establishments. To these must be added whatever appointments Magistrates and Educational Committees may put at their disposal. Taking all these into account, it is not likely that the number of vacancies in appointments of both grades will exceed 15 on an average yearly. And it is to be remembered that under the rules it has been distinctly laid down that a passed candidate is not entitled by his success to an appointment under Government, but is only eligible for such appointments as vacancies arise. It is not, therefore, absolutely obligatory that all the appointments which may fall vacant shall be conferred on the gentleman selected from among the passed candidates. The selection of Government is not entirely limited to the list of those who have succeeded at these examinations. The Lieutenant-Governor though quite desirous of maintaining the principle of the existing rules, yet deems it expedient to state these circumstances, lest expectations should arise to an extent which Government may be unable to fulfil.

Deputy Magistrates and Deputy Collectors ...	232
Sub-Deputy Collectors	114
Subordinate Executive Service in Non-Regulation Provinces	29
Total ...	375

25. From what is above stated, it appears that already there are many more passed candidates for appointments on the Government lists than Government can ordinarily hope to provide for in the next two years. In the rules which have already been published for the examination which is to be held in the early part of next year, some provision has been made with a view to reduce the number of those who can present themselves for examination, and further proposals have been made for effecting this in a greater degree eventually. The Lieutenant-Governor apprehends that it may become necessary to make some limitation of the rule under which candidates obtaining a certain number of marks on different subjects are qualified for appointments, or to adopt for the future the competitive system (with such modifications as may be found expedient), and to limit the number of successful candidates to the number of vacancies which may be previously notified to exist in the several grades. Before finally determining the course to be adopted, His Honor will await the result of the next examination under the rules which have already been published. In the meantime, the standard of proficiency to be exacted at the next examination must be raised; and while candidates who gained one-third marks in each paper and half marks on each subject were passed on previous occasions, on this one it will be an instruction to the examiners to require two-third marks in each paper and subject from the candidates for both the higher and the lower grades.

Statement showing the Remuneration sanctioned to the Examiners and the other Gentlemen who assisted in the late Examination.

DISTRIBUTION LIST OF CANDIDATES WHO HAVE PASSED SUCCESSFULLY AT THE NATIVE CIVIL SERVICE EXAMINATION HELD IN MARCH 1874

BURDWAN DIVISION.

Class I.

1. Lohitmohun Dhur.
2. Saradaprasad Sirkar.
3. Kedar Nath Ghose, B.A.
4. Mohendra Nath Bhuttacharjee, M.A., L.L.
5. Mr. Owen.

Class II.

1. Shivaprosunno Sen.
2. Uma Churn Laha.
3. Suttyatarun Mookerjee.
4. Poorno Chunder Guho.
5. Kumal Narain Chuckerbutty.

Class III.

1. Sreenath Sen.
2. Prosunno Kumar Chuckerbutty.
3. J. T. Bobanau.
4. Denonath Ghose.
5. Govind Chunder Mookerjee.
6. Umesh Chunder Mookerjee.
7. Krishna Chunder Bose.
8. Sityakant Biswas.
9. Noni Lal Mookerjee.
10. Aizuluddin Ahmud.
11. Ramdyal Nag.
12. Bedhubhoosun Mookerjee.
13. Jogendro Chunder Chuckerbutty.
14. Romanath Mitter.

PRESIDENCY DIVISION.

Class I.

1. Monomatha Coomar Bose, B.A.
2. Gunganarain Roy, B.A.
3. Jogendranarain Gupta, (*a.*)
4. Dwarkanath Mookerjee, (*b.*)
5. Khoodiram Poddar.
6. Gopal Chunder Banerjee, B.A., B.L.

Class II.

1. Rojonikant Mookerjee.
2. Sachitanund Mookerjee.
3. Beni Madhub Chatterjee.
4. Bhoobun Mohun Gupta.
5. Jogendranath Mookerjee.
6. Jogendranath Gupta, (*c.*)

(*a.*) Son of Gour Hurry Gupta.
(*b.*) Son of Umaprashad Mookerjee.
(*c.*) Son of Isser Chunder Gupta.

Class III.

1. Prankissen Gangooly.
2. J. C. Lloyd.
3. Amrit Lal Banerjee.
4. Kali Coomar Roy Chowdhry.
5. Kumad Chunder Mookerjee.
6. Bishumber Das.
7. Sriram Gangooly.
8. Rojonikanto Bhuttacharjee.
9. Rakhal Chunder Ghose.
10. Kasi Chunder Roy.
11. Gopal Chunder Mookerjee, (*d.*)
12. Khadem Hossein.
13. Poolin Behary Mut.

RAJSHAHYE.

Class I.

1. Gogan Chunder Banerjee, B.A.
2. Gopal Chunder Mookerjee, (*e.*)
3. Nilamber Pal.
4. Abdool Wahab.
5. Abdool Khalek, B.A.
6. Bhoobun Mohun Banerjee, B.A., B.L.

Class II.

1. Iswar Chunder Mozoomdar.
2. Sookmoy Banerjee.
3. Peary Mohun Bose.
4. Sreenath Chatterjee.
5. Gossaine Dass Hazra.
6. Nundolal Mookerjee.
7. Shuja-ut Ali Ahmed.
8. Myeeuddin Ahmed.

Class III.

1. Sreenath Gupta.
2. Potiram Banerjee.
3. Golap Lal Das.
4. Kadernath Banerjee.
5. Abinash Chunder Sen.
6. Jodunath Dey.
7. Nebarun Chunder Mookerjee.
8. Mohima Churn Roy Chowdhry.
9. Abdul Huq.
10. Umanath Mozoomdar.
11. Aghorenath Chatterjee.
12. Kaliprosunno Dutt.
13. Kali Kumar Das.

COOCH BEHAR.

Class I.

Bhabotosh Banerjee.

NOTIFICATION.

The 20th August 1874.—In continuation of the notice dated 2nd April 1874, it is hereby notified that the provision opium to be brought forward at the monthly sales of the ensuing year 1875 will consist of 45,000 chests, in the following proportions respectively of Behar and Benares opium :—

	Chests.	Chests.
Behar.		
Reserve of 1872-73	534	
Manufacture of 1873-74	25,266	
		25,800
Benares.		
Reserve of 1872-73	260	
Manufacture of 1873-74	18,940	
		19,200
Total		45,000

2. The above includes the 300 chests to be reserved for the French Government.

H. J. REYNOLDS,
Offg. Secy. to the Government of Bengal.

[Second Publication.]

THE Lieutenant-Governor is pleased to order the publication of the following notification for general information :—

H. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 24th July 1874.—Under instructions from the Government of Bengal, it is hereby notified that from and after the 1st November next all vessels tendering for the conveyance of emigrants from this port will as a rule require to be docked for the purpose of survey. In cases where the Government Surveyor is satisfied that docking is not necessary, he may dispense with it, acting either on his own responsibility or in concurrence with the Master-Attendant.

A. BAKER,
Offg. Master-Attendant.

[Third Publication.]

NOTIFICATION.

The 17th August 1874.—Under the provisions of Section 83, Act V (B.C.) of 1870 (An Act to appoint Commissioners for making Improvements in the Port of Calcutta), the following additional Bye-law for the landing and delivery of goods at the jetties, as proposed by the Commissioners, is published for general information :—

BYE-LAW No. 14A.

When iron, drainage-pipes, or other goods, from their want of description or want of proper distinguishing marks, or from any other cause, are landed in a mixed condition, the Master or Agent of the vessel will be allowed two clear days to sort and make over the goods to the Commissioners ; and until the goods have been made over and the usual receipt granted, they will remain on the wharf at the risk of the vessel. Such goods, if not made over to the Commissioners within the two clear days, will at the expiration of that time be subject to wharf-rent at the schedule rates, the rent incurred being payable by the vessel. After receipt of such goods by the Commissioners, consignees will be allowed two clear days to take delivery before incurring wharf-rent charges. This exemption shall not be extended to goods the consignees of which refuse or neglect to forward their invoices within 24 hours after the vessel commences to discharge.

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 18th August 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that the present boundaries of the tehsils newly created in the Bhutan Dooars are not convenient to the public, it is hereby ordered that the following shall be the boundaries of the respective tehsils over which the tehsildars will exercise civil, criminal, and fiscal jurisdiction :—

Name of Tehsil.	Jurisdiction.
MYNAGOREE	Will comprise that tract of land in the Western Dooars to the west of the Juldaca river and east of the Teesta.
FALLACOTTA	Will comprise that tract of land in the Dooars between the Juldaca and the Toorsa rivers.
BUXA	Will comprise that tract of the land in the Dooars between the Toorsa and the Sunkoss rivers.

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

[Third Publication.]

ROAD CESS NOTIFICATION.

The 12th August 1874.—It is notified under Section 75 of Act X (B.C.) of 1871 (the District Road Cess Act) that the Road Cess Committee of the district of Pooree have, under Section 74 of the Act, determined to levy the cesses under that Act at half the maximum rates for the ensuing road cess year. The cesses payable in the Pooree district for the year beginning with the first of October 1874 will therefore be at the following rates:—

I. Three pie, or one pice, on every rupee of the annual value of lands under Part II of the Act.

II. The following rates on non-agricultural houses and shops:—

Dwelling-houses estimated to be of the present value of—

		Yearly Cess. Rs.	A.	P.
Not less than Rs. 100, but less than Rs. 500	...	0	8	0
,, 500, ,, 1,000	...	1	0	0
,, 1,000, ,, 2,000	...	2	4	0
,, 2,000 and upwards ...	...	1	8	0

for every Rs. 1,000 or part thereof of estimated present value.

Shops and buildings used for purposes of trade whose estimated present value is more than Rs. 25 and less than Rs. 100, to pay a yearly tax of eight annas.

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

[Third Publication.]

DISTRICT OF DACCA.

ROAD CESS NOTIFICATION.

The 17th August 1874.—It is notified under Section 75 of Act X (B.C.) of 1871 (the District Road Cess Act) that the Road Cess Committee of the district of Dacca have, under Section 74 of the Act, determined to levy the cesses under that Act for the ensuing cess year beginning on the 1st October next at the following rates, being the maximum rates, and the said rates are published accordingly:—

I. Six pie or two pice on every rupee of the annual value of lands under Part II of the Act.

II. The following rates on non-agricultural houses and shops estimated to be of the present value of—

		Yearly Cess. Rs.	A.	P.
Not less than Rs. 100, but less than Rs. 500,	...	1	0	0
,, 500 ,, 1,000,	...	3	0	0
,, 1,000 ,, 2,000,	...	4	8	0

Not less than Rs. 2,000 and upwards, Rs. 3 for every Rs. 1,000 or part thereof of the estimated present value.

Shops and buildings used for purposes of trade, whose estimated present value is more than Rs. 25 and less than Rs. 100, to pay a yearly tax of one rupee.

H. J. REYNOLDS,
Offg. Secy. to the Government of Bengal.

J. P. K. HEWETT,
Offg. Junior Secy. to the Govt. of Bengal.

The following order, issued by the Government of India in the Home Department, is republished for general information :—

No. 597.—*Fort William, the 28th August* 1874.—*Notification*—*Public.*—The Hon'ble A. G. Macpherson, a Judge of the High Court of Judicature at Fort William in Bengal, availed himself, on the 28th ultimo, of the privilege leave granted to him in Notification No. 364, dated the 1st June last.

The following order, issued by the Government of India in the Financial Department, is republished for general information :—

EXPENDITURE—MINT.

The 27th August 1874.

No. 5276.—*Notification.*—The following Resolution is published for general information :—

No. 4692. *dated Fort William, the 31st July* 1874.

Read the under-mentioned papers on the subject of a scheme for the establishment of a School of Apprentices in Calcutta in connection with the Mint and other Government Establishments employing skilled mechanical labour :—

Letter from the Master of the Calcutta Mint, No. 267, dated the 21st June 1874, and its enclosure.
Financial endorsement No. 3220, dated 20th September 1873, forwarding the above letter to the Public Works Department for previous consideration.
Endorsement from Public Works Department, No. 249E.G., dated 17th February 1874, forwarding a communication from the Military Department.
Memorandum by Master of the Mint, No. 270, date 22nd May 1874.

RESOLUTION.—The Governor-General in Council approves, generally, of the scheme proposed by the Mint Master, and is pleased to nominate the following gentlemen as a Committee to consider the details of the scheme, and to submit definite estimates of cost, &c. :—

Colonel Hyde,
,, Gastrell,
Captain Eckford,
Mr. MacGregor, Engineer of the Dockyard,

and an officer conversant with irrigation works, to be appointed by the Government of Bengal.

The Committee should not confine their consideration to sons of soldiers or to boys brought up in the Lawrence Asylum and other kindred institutions; they should ascertain full particulars of the system followed in regard to Apprentices at the Soane Works at Dehree, and also the system pursued in the Madras Ordnance Establishments, both of which

institutions have, it is understood, proved successful. The Superintendent of the Futtehgurh Gun Carriage Factory will, it is believed, be able to supply the Committee with much useful information.

ORDER.—Ordered that a copy of the foregoing Resolution be forwarded to the Departments noted in the margin for further orders, and for communication to the Members of the Committee who are under the control of those Departments; to the Mint Master, Calcutta, for information; and to the Government of Bengal, for communication to the Chief Engineer of the Dockyard at Calcutta, and for the purpose of nominating a Member for the Committee conversant with irrigation works.

Department of Revenue, Agriculture, and Commerce, Public Works Department, Military Department.

The following order, issued by the Government of India in the Military Department, is republished for general information :—

No. 845.—*Fort William, the 26th August* 1874.—The undermentioned Officer is permitted to proceed to Europe on furlough on urgent private affairs :—

* * * * * *

Surgeon-Major F. J. Earle, of the Medical Department, G. G. O. No. 758 of 1874,—31st July 1874, from Calcutta.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 2347C.S.

The 27th August 1874.—Captain Edward Gordon Lillingston, B.A., Officiating Political Agent, Hill Tipperah, is vested with the powers of a Magistrate of the First Class in the District of Tipperah.

The 1st September 1874.—Mr. Marcus Burgh Rochfort, who has, under separate orders of this date, been appointed to act as Assistant Inspector-General of Railway Police, is vested with the powers of a Magistrate of the First Class under Section 6, Act V of 1861, along so much of the East India Railway line as lies within the Lieutenant-Governorship of Bengal.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 1st September 1874.—Under Section 5 of the Indian Registration Act VIII of 1871, the Lieutenant-Governor of Bengal is pleased to create the following registration sub-district, having the head-quarters and local jurisdiction shown opposite the name. The Lieutenant-Governor is also pleased, under Section 7 of the Act, to appoint the person named below to be Sub-Registrar of the said sub-district :—

DISTRICT.	Name of new sub-district.	Head-quarters.	Thana included in jurisdiction.	Sub-Registrar appointed.
Howrah	Ampta ..	Ampta ...	Ampta ...	Munshi Aman Ali, *alias* Abdul Bari.

This change will take effect on and from the 15th of September 1874.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The following notification received from the Government of India, in the Foreign Department, is published for general information :—

The 14th August 1874.—Under instructions received from Her Majesty's Secretary of State for India, it is hereby notified for general information that protection may, on application, be afforded by German Consular Officers to Swiss people residing abroad.

C. U. AITCHISON,
Secy. to the Govt. of India.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 25th August 1874.—In supersession of the Notification dated 31st December 1868, published in page 5 of the *Calcutta Gazette* of the 6th January 1869, it is hereby notified that the boundaries of the Town of Kushtea in Nuddea shall be as follows:—

On the north, the old Pudma river and the village Jugra; on the east, part of the Khal Kaligunga and part of the river Goraie; on the south, Rahini, *alias* Lahini, Hari Sankurpore, Molla Teghari, Kumar Garer, and Bartoil; and on the west, the villages Jugra, Kabarbari, Meenparah, and Dhoka, Phulbari, and Chenchera.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 13th August 1874.—The Lieutenant-Governor has been pleased to approve of the following revised boundaries of the Berhampore Municipality. So much of the notification of the 20th February 1869 as relates to the limits of this Municipality is hereby cancelled.

The Municipality is divided into two blocks—Block A or the Berhampore Block, and Block B or the Gorabazar Block. Block A of the Municipality is bounded on the west by the left bank of the Bhagiruttee river, from a point opposite Kotwallee thana on the road, about 154 yards to the north of the north-western corner of the hospital boundary wall up to a point due west of Mekraj Baboo's house at Koonjoghatta.

The other boundaries then run east along the Koonjoghatta Rajbarree Lane, up the Radhabullhubpara Lane, down the Girjatollah Lane, till it meets the Dayanuggur pucka road; it then runs south along the Dayanuggur road for about 110 yards to a small culvert, thence direct to the tank on the north side of the Chattra Bheel, thence along the north and east bank of that Bheel, down to Joy Chand Khagra Lane, thence westward along the Joy Chand Khagra Lane to Baboo Radhica Churn Sen's garden, thence direct to Sooreeparra, and on to the pucca bridge over the Kalkapore Bheel. The southern bank of the Kalkapore Bheel then forms the boundary, winding round up to the junction of the Jhoukholla pucca road and the Kalkapore pucca road. It then runs north along the Kalkapore pucca road up to a point near the Dutch burial-ground, where five roads meet, then north along the Sahebghatta Lane to the bank of the Adigunga, thence east along the south bank of the Adigunga to a large tank at Dhungurparra, thence direct to a point where three roads meet at the old cemetery, thence along Cossimbazar outpost road, along the southern bank of the Katigunga to a cross road leading to the Nijsripore road, thence westward along the Nijsripore road to Moharanee Surno Moyee's dwelling-house, thence south along the Baboolbona pucca road, thence west along the Punchanund Tollah pucca road to Grant Hall corner, thence north along Khalassibazar road, and west along Berhampore bazar road to Kotwallee thana.

Block B is bounded on the west by the Bhagiruttee river, from a point opposite Koylaghatta at the north-west corner of the College as far as Ojoodhyanuggur Lane, thence east along the Ojoodhyanuggur Lane, north up the Poora Pookur Lane, west along the Wakeelpara Lane to the south of the Judge's Cutchery, thence north along the Koolee Bazar road to the soldiers' cemetery, and thence east along the Koylaghatta road, south of the Military Cantonment, to the north-west corner of the College.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

DECLARATION.

The 21st August 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the expense of the Durbhunga Municipality for a public purpose, viz. construction of a public Ghaut or landing-place in the Town of Durbhunga, Pergunnah Howlie Durbhunga, Zillah Tirhoot, it is hereby declared that for the above purpose a piece of land measuring, more or less, 18 cottahs 16 dhurs of standard measurement, and bounded on the North by Duktour Chowdharie's house, Gollohara Chutty, on the South by Mohesh Singh's house, the Mosque, and public Road, on the East by the road leading to No. 4 Police Station, and on the West by the river Bagmuttee, is required within the aforesaid Town of Durbhunga.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Third Publication.]

DECLARATION.

The 12th August 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by the Government at the public expense for a public purpose, viz. for the excavation of a tank in the village of Shyambazar, pergunnah Jehanabad, thana Goghat, district Burdwan, it is hereby declared that for the above purpose a piece of land is required measuring, more or less, 8 beeghas, and bounded on the north by Sridhar Dhurn's dwelling-house, south by Rai Churn Day's dwelling-house, east by Radhai Kolu's and others' dwelling-house, and west by Sitaram Das's and others' dwelling-house.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Third Publication.]

DECLARATION.

The 15th August 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction of a dispensary at Piplee, for pilgrims to Juggernath, in the villages of Siriapoor, talook Pipleenour, and Nayahat, talook Kotesahi, pergunnah Kote Rahang, zillah Pooree, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 man 16 goonths 2 biswas of local measurement, equal to one acre and 10 poles, and bounded on the north by the ryoti waste land of mouzah Nayahat and the confirmed lakhraj deoter land of the Gramdebti Sri Pullaisooni with a banyan-tree; on the south by the ryoti land of mouzah Nayahat with a banyan-tree, and the cultivated land of that mouzah; on the east by the latter land and the mango-grove in that mouzah belonging to the zemindar of talook Kotesahi; and on the west by the Trunk Road, is required within the aforesaid villages of Siriapoor and Nayahat.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Third Publication.]

DECLARATION.

The 15th August 1874.—Whereas it appears to the Government of Bengal that the land, particulars of which are noted below, is required for a public purpose, viz. for the police-station of Comercolly, in district Nuddea. it is hereby declared that for the above purpose a plot of land, measuring 2 beeghas and ten cottahs, is required. The land is situated in the district of Nuddea, pergunnah Mohammedshahee, thana Comercolly, village Sherkandi, and is bounded on east and north by the lands of the Eastern Bengal Railway Company and of Debendra Nath Tagore; on the west by the lands of Debendra Nath Tagore; and on the south by the old silk filature moat.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

RIVERS THOMPSON.

COMMR.'S OFFICE, ORISSA DIVN., CUTTACK, the 21st August 1874.

EDUCATIONAL NOTICES.

UNDER Rules 11 and 12 of the Junior Scholarship Rules, promulgated by the Government of Bengal in October 1872, it is hereby notified that a preliminary examination of candidates for Junior Scholarships will be held on the 5th and 6th October next, at the following places in the Patna Division :—

1. Patna Collegiate School.
2. Gya Zillah ,,
3. Arrah ,, ,,
4. Mozufferpore Zillah School.
5. Chuprah ,, ,,

The subjects of examination are—

1. Physical Geography
2. Drawing and Surveying.

The Committee for conducting the examination will consist of the District Education Committee, the Deputy Inspector of Schools, and one or more European and one or two more Native officials whom the Vice-President may select.

The Secretary to the District Committee will make all the necessary arrangements for conducting the examination.

The following gentlemen are to be the examiners, and they will set papers in the subjects mentioned against their names :—

Mr. J. K. Rogers ... ... Physical Geography.
Mr. J. Macnamara ... ... Drawing and Surveying.

Candidates should apply for enlistment to the Secretary to the District Education Committee at least 15 days before the day of examination, with certificates from their teachers and specimens (certified by the teachers) of their survey work and drawing. A fee of one rupee will be required from each candidate for enlistment

DURGA GATI BANERJEA, *Personal Asst. to Commr., for Commissioner.*

The 29th August 1874.

1874.

PHYSICAL GEOGRAPHY AND SURVEY EXAMINATION.

CIRCULAR.

IN accordance with paragraph 10 of the Junior Scholarship Rules promulgated by the Resolution of His Honor the Lieutenant-Governor, dated 5th October 1872, an examination of candidates for Junior Scholarship, who desire to obtain the certificates of qualification in Drawing, Surveying, and Physical Geography, will be held in the Kishnaghur College, Jessore Zillah School, and Senate House, Calcutta, on the 6th October 1874.

2. There will be set one paper in Surveying and Plotting at 10-30, and one paper in Physical Geography at 2, on the same day. Two and a half hours will be allowed for each paper. Specimens of the Survey work and of the Drawings done during the year will be submitted as directed in paragraph 5 below. There will be no separate examination paper set in Drawing.

3. A fee of one rupee will be paid by each candidate to the Head Master of the School to which he belongs; the Head Master will send nominal lists of candidates who have paid the fees to the Inspector of Schools, Presidency Circle, No. 22, Chowringhee Road, on or before the 20th September.

4. The candidates must be furnished with certificates of having paid their fees, and produce them to the Officer in charge of the examination at each centre, in order to be admitted to it. But the Officer in charge may admit any other boys he thinks fit to the examination.

5. Each candidate will deliver in the course of the day (at such time as may be convenient to the Officer in charge of the examination) the specimens of his Survey work and Drawings done during the year. The Officer in charge of the examination will see that each sheet of the specimens submitted is signed by the Head Master of the candidate's school, which will be understood as the Head Master's certificate that the sheet so signed is the genuine work of the candidate.

6. For the Surveying paper, each candidate will be allowed to bring into the examination hall a scale, a ruler, a protractor, and a pair of compasses with pencil leg.

7. The examination at each centre will be superintended by the following officers :—

SENATE HOUSE ... Babu Mahendra Nath Ray, Deputy Inspector of Calcutta.
,, Radhikaprasana Mukerjee, Deputy Inspector of 24-Pergunnahs.
,, Mahendra Nath Datt, a Sub-Inspector of Alipore, and Babu Braja Nath Lahiri.

KISHNAGHUR COLLEGE ,, Rajkrishna Ray Chowdhuri, Deputy Inspector of Schools, Nuddea.

JESSORE SCHOOL ... ,, Jagat Chandra Banerjee, Deputy Inspector of Jessore, and Head Master, Jessore School.

PURULIA ... ... Deputy Inspector and Head Master, Zillah School.
RANCHI ... ... Ditto ditto, ditto.

C. B. CLARKE, M.A., *Offg. Inspr. of Schools, Presidency Circle.*

No. 22, CHOWRINGHEE ROAD, the 26th August 1874.

UNDER orders of the Government of Bengal dated the 5th October 1872, a preliminary examination in Physical Geography, Surveying, and Drawing, of candidates for Junior Scholarships will be held on Monday, the 5th, and Tuesday, the 6th October 1874, at the Government Schools at Monghyr, Bhagulpore, Purneah and Deoghur. Candidates from the Moheshpore and Pakour Aided Schools will have the option of appearing either at Bhagulpore or Deoghur.

Candidates should apply for enlistment to the Secretary to the District School Committee in their respective districts at least one month before the day of examination, and should furnish from the Head-Masters of their schools certificates regarding the specimens of their survey work and drawing. The examination fee of one rupee should be realized by the Head-Masters before granting the certificates.

S. P. CHATTERJEE, *for Offg. Commissioner.*

IN accordance with the Resolution of Government, published in the *Calcutta Gazette* of 7th January 1874, paragraph 26, a special class will be established at the Presidency College for a (4) four months' Course from 15th September to 15th January next, provided 25 candidates enroll themselves for admission before the former date. An entrance fee of Rs. 5, with a monthly fee of Rs. 3, is required to be paid by each candidate on admission. No admission to this special class can be made after the 15th September.

CHARLES H. TAWNEY,
Offg. Principal, Presidency College.

The 22nd August 1874.

CANDIDATES for admission to the special class of the Native Subordinate Civil Service, to be opened on the 15th of September next, are requested to apply to the undersigned before the 10th September, and to furnish certificates showing the number of years they have been in Government employ.

PATNA COLLEGE, the 22nd August 1874. J. W. MCCRINDLE, *Principal.*

THE 6th and 7th of October are the dates fixed for the examination of Candidates for Junior Scholarships, who are prepared to qualify in Physical Geography, Surveying, and Drawing.

The following instructions are issued for the guidance of Masters and Candidates:—

1. Candidates from schools in the districts of Hooghly, Howrah, and Burdwan, will present themselves for examination at the Hooghly Normal School. Candidates from schools in the districts of Midnapore, Beerbhoom, and Bankoora, will present themselves at the Midnapore High School and the respective zillah schools.

2. A fee of one rupee will be paid by each candidate to the Head Master of the School to which he belongs. The Head Master will send a nominal list of candidates who have paid fees to the Inspector of Schools, Western Circle, Chinsurah, before the 10th of September, and will credit the fees collected to the school funds.

3. Each Candidate presenting himself for examination must be provided with a certificate of having paid the prescribed fee, and of having studied twelve months at the school from which he presents himself.

4. Head Masters on or before the 1st of October will despatch to the address of Mr. W. H. Wells, C.E., Chinsurah, in registered covers, specimens of each Candidate's survey work and drawing. Each set of specimens should consist of two sheets of drawing, and three specimens of survey work executed with (1) the chain only, (2) with the compass and plane table, and (3) with field-book and compass. The signatures of the Head Master and Survey Master must be attached to each specimen, and it will be understood that the specimens so signed are the genuine work of the Candidate.

5. For the survey paper each Candidate will be allowed to bring into the examination room a scale, a ruler, a protracter, and a pair of compasses.

6. The examination will commence at 11 A.M. each day, and three hours will be allowed for each paper.

KALI PUDDO MOOKERJEE, *Offg. Persnl. Asst. to Commr., for Commr.*

NOTICE.

SALT Merchants are hereby informed that salt exported from Bombay for Calcutta will in future be packed in bags for removal from the salt pans, and will be reweighed on board the exporting ship; the bags being there emptied and returned to be refilled.

By order of the Board of Revenue, Lower Provinces,

T. B. LANE, *Offg. Collector of Customs.*

CUSTOM HOUSE, CALCUTTA, the 27th August 1874.

NOTIFICATION.

No. 943B.

IT is hereby notified that the Custom House will be open during the Doorga Poojah Holidays for the transaction of business as usual on the following dates :—

October 15th.	October 23rd.
,, 16th, up to 2 P.M.	,, 26th.
,, 22nd.	

Any persons having payments to make on those dates are informed that they must deposit with the Collector of Customs, by noon of October 14th, either a receipt or guarantee from the Bank of Bengal for a specific amount, beyond which credit will not be given to them.

No cash can be received on any account.

A further guarantee will be taken from all merchants, firms, and other persons using the Custom House on the dates in question, that they will each bear such share of the additional expenditure required for keeping open the Custom House on the said dates as may be adjudged by the Collector, the total expenditure required being estimated at about Rs. 2,000.

OPIUM NOTIFICATION.

No. 836B.

NOTICE is hereby given that the Ninth Sale of Opium, the provision of 1872-73, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Monday, the 7th September 1874, at 11 A.M., and will comprise 3,750 chests, viz.—

	Chests.
Behar Opium	2,185
Benares ,, ...	1,565
Total	3,750

2. The general conditions of the sale now advertised will be the same as usual; they may be ascertained by reference to the Notification issued on the 8th November 1873, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3. The latest dates for deposit and clearance will be the 12th and 22nd September, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other Public Securities, that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the Sale-room, will be received after 4 P.M. of Saturday, the 12th September 1874, and no Bank of Bengal Receipts in full payment of lots will be accepted after 4 P.M. of Tuesday, the 22nd September 1874.

4. In addition to the quantity above advertised for sale, the following quantities, more or less, of Behar and Benares Opium will be brought to sale in the present year on or about the dates specified below. The Member in charge of the Opium Department, however, reserves to himself the right of altering these dates, should circumstances render it expedient to do so :—

Dates.	Behar, about Chests.	Benares, about Chests.	Total, about Chests.
On or about Wednesday, 7th Oct. 1874 ...	2,185	1,565	3,750
On or about Friday, 6th Nov. ,, ...	2,185	1,565	3,750
On or about Thursday, 3rd Dec. ,, ...	2,185	1,565	3,750
Total ...	6,555	4,695	11,250

By order of the Member in charge,

W. H. GRIMLEY, *Offg. Secretary.*

BOARD OF REVENUE, L. P., FORT WILLIAM, the 4th August 1874.

OPIUM NOTIFICATION.

No. 915B.

NOTICE is hereby given that the Tenth Sale of Opium, the provision of 1872-73, will be held at the Government Opium Sale-Room, No. 2, Bankshall Street, on Friday, the 2nd October 1874, at 11 A.M., and will comprise 3,750 chests, viz.—

BOARD OF REVENUE, L. P., FORT WILLIAM, the 25th August 1874.

The Calcutta Gazette.

WEDNESDAY, SEPTEMBER 2, 1874.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated in the district of Patna, will be put up to sale at the Collector's Office at Bankipore at 12 o'clock on Monday, the 7th September 1874, corresponding with 23rd Bhadro 1281 *B.S.*

The purchasers of these plots will be subject to the following conditions:—

1st.—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

2nd.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3rd.—The plots will be sold revenue-free to the highest bidders.

4th.—The purchasers shall be put in possession on receipt of the orders of the Collector confirming the sales. But such possession shall be liable to be disturbed in case the final sanction of the Member of the Board of Revenue in charge should not be accorded to the proceedings.

The Hymns of the Rig-Veda, in the Samhita and Pada Text, by Professor F. Max Müller, M.A., in two Volumes. *Price Rs. 24; packing and postage, Re. 1-12.*

*** The Rig-Veda, the oldest book of Indian literature, has very properly been made one of the principal class-books for those who study Sanskrit in the schools and colleges in India, and though at present a scholar-like knowlege of the Vedic hymns is in the examinations required of the more advanced students only, yet, as soon as editions, translations, grammars, and dictionaries shall have rendered the study of these ancient documents more accessible, I doubt not that the time will come when no one in India will call himself a Sanskrit sholar, who cannot construe the hymns of the ancient Rishis of his country.—*Extract rom Preface.*

In Two Vols., foolscap folio.

Correspondence relating to the Famine in Bengal and Behar, from October 1873 to May 1st, 1874. *Price Rs. 2-8 per vol; packing and Postage Re. 1-4 extra per vol.*

CALCUTTA, the 22nd September 1873.

Postal Notice.

As it is believed that some public uneasiness is felt in consequence of the discovery in the River Hooghly, on the 6th instant, of a packet of overland letters, the accompanying specification of them is published for general information.

There were thirteen letters in all. The address of the thirteenth was not kept. It was posted at Chittagong. None of the letters had been opened, though the postage labels on all had been removed.

They were transmitted at once to Bombay to be forwarded to their addresses in England with a covering letter directing that no postage was to be levied on them. The stamper who stole the labels has been traced and dismissed.

M. GRIBBLE, *Offg. Post Mr. General, Bengal.*

REPORT ON THE CALCUTTA MEDICAL INSTITUTIONS FOR THE YEAR 1873.

RESOLUTION.

POLITICAL DEPARTMENT,

MEDICAL.

Calcutta, the 31st August 1874.

READ—

The report on the Calcutta Medical Institutions for the year 1873.

THE Lieutenant-Governor has again this year to thank the Surgeon-General for a clear and comprehensive report on the medical institutions of Calcutta. The inclusion of the report and returns, which in compliance with His Honor's request the Governors of the Mayo Hospital have been good enough to furnish, enhances the value of the present compilation, and renders it a complete medical history of the town and suburbs for the year.

2. The Surgeon-General in setting forth his figures and in drawing inferences has been careful to compare notes with the results obtained from the municipal statistics of health. These do not always bear the same testimony as the hospital returns and are more favorable as regards the public health generally, shewing fewer cases of cholera. The statistics of the in-door patients treated in the various hospitals establish that, including all diseases, the rate of death was 143 per thousand, and excluding cholera cases 132 per thousand, and that either way it was higher than during the three previous years. Taking the whole population into account, the municipal returns show a death-rate of 23·4 per thousand compared with 26·4 in the previous year. That there was really an improvement in public health during the past year would seem to be proved by the diminished number, both of persons admitted to hospital and of persons treated as out-patients,—the difference being 1,909 of the former and 8,473 of the latter. This result is conspicuous, chiefly in the returns of the Mayo Hospital, and is accounted for by the absence in the past year of dengue—a disease which in the previous year sent over two thousand persons into hospital.

3. The conclusion which the statistics of last year tended to establish to the effect that the cold weather months are the most adverse to public health is fully borne out by the present report, and is confirmed by a reference to the municipal returns. The largest number of deaths continue to be attributable to diarrhœa, dysentery, and similar bowel complaints. Dropsy was very fatal last year. The cases of consumption and bronchitis were numerous. In proportion to the number of persons attacked, tetanus was the

most deadly disease, and remittent fever the next; 492 cases of cholera were admitted into the hospitals, nearly double the number in 1871. The ratio of deaths was 536, or higher than any previous year up to 1868. The number of cases of debility, and the number of deaths arising from it, were large, especially in the Campbell Hospital. In comparing the figures of the present with those of the past year, the Lieutenant-Governor does not fail to bear in mind that the orders passed last year regarding moribund patients has very greatly increased the number of admissions to hospital as well as the death-rate in the present returns.

4. The acknowledgments of Government are due to the officers in charge of the various hospitals for the increased care with which they have endeavoured to trace cases to the locality where the evil originated. Much light may thus eventually be thrown upon the medical topography of Calcutta, and the best results are to be anticipated from the quickened intelligence with which it will be possible for the sanitary authorities to direct their efforts, as year by year the plague spots of the town are more clearly defined. The Lieutenant-Governor will watch with interest the effects, which it will rest with the medical authorities to trace, of the efforts which are now making to improve Chitpore and Burra Bazar, and other parts of the town, which the figures given in paragraph 7 of the present report would prove to be the peculiar haunts of cholera. Reflection on the blessings which would result if these dark places were to be transformed into healthy abodes should stimulate the efforts of all concerned. His Honor has already requested the Suburban Municipality to give their careful attention to the sanitation of Entally and Garden Reach and other places, the insalubrity of which has been clearly demonstrated by the statistics collected under the orders of the Commissioners.

5. *Medical College Hospital.*—The total number of persons treated during the year was 48,439. Of these, excluding those in the eye-infirmary, 4,203 were in-patients, 540 of whom died, giving a mortality of 128·5 per thousand. This result is less favourable than in the preceding year, when the rate of mortality was 115·8 per thousand. While 108 European and Eurasian patients died out of 1,813 treated, no less than 432 natives succumbed out of 2,390 treated. Bad as these results are, Dr. Chevers shows that in the interval since 1863, there has been but one year, 1872, in which any better results were attained. Indeed, the whole report he has to give this year is such as might cause the well-wishers of this hospital to despond, were it not for two considerations; first, that results are better in those Calcutta hospitals where the air is comparatively pure; second, that as the drainage works advance, the air round the Medical College Hospital will be rendered purer than it is now. Despite the admitted improvements effected in the sanitary condition of the city generally for the past few years,—a pure water-supply, and the money spent on drainage,—the death-rate in this central city hospital is excessive, and especially in cholera cases, notwithstanding the established fact that the last three years have been non-choleraic years. It would seem premature to assert that permanent good has yet accrued to this particular institution from the general material improvements in the city and suburbs, and against all that has been done for this institution; "the influence of sewer-tainted city air in a malarious tropical climate" still prevails. Interpreted by the light of Dr. Chevers' long professional experience, the array of technical names recording the deaths of those unfortunate patients who died after operations suggests melancholy considerations. At the Medical College Hospital, it would appear that under existing circumstances out of four men operated on, one at least must die; of two men who die thus, one might be saved—saved that is if the conditions under which he was treated could be changed—if he could be fed with pure air and be removed from among the sick and the dying around him. It is distressing that after all the endeavours adopted for improving the hygienic condition of patients admitted into the surgical wards the results are so deficient, and that the warning is held out that even a separate surgical hospital in a city like Calcutta would not be free from the pernicious influences which must exist so long as the surrounding atmosphere is tainted by exhalations from open drains. The remedy can be found only in the completion of the drainage works. Meanwhile the Lieutenant-Governor is satisfied that the men into whose hands the care of this institution is committed are unremitting in their endeavours to combat disease despite grave disadvantages. To Dr. Chevers and to his able colleagues the Lieutenant-Governor looks to do what may be done to arrest the progress of "hospitalism" by a due application of the means which Government can

place at their disposal. One object to be kept in view must be the separation of the surgical from the medical and the obstetric cases. Six lakhs of rupees have been promised by Government for the improvement of the school and of the hospital, and this is no small sum. Financial exigencies, it is true, have caused the grant to be deferred till next year; but, meanwhile, it rests with the medical authorities to come to a conclusion as to how the money is to be applied, and the Lieutenant-Governor would be glad to know that all such preliminaries have been settled, so as to admit of the early application of the funds for the objects in question.

The Lieutenant-Governor notices with pleasure the high character for efficiency and ability given to Drs. McConnell and Crombie, the resident Physician and the resident House Surgeon. The best testimony to their success is the increasing popularity of the medical and surgical out-dispensaries. In the former 14,340 persons and in the latter 10,418 persons were treated in the course of the year.

The Lieutenant-Governor desires to join in recording his sense of the loss which the hospital and the public have sustained by the death of two such devoted men as Drs. Colles and Cutcliffe.

6. *Presidency General Hospital.*—Dr. Ewart has submitted an interesting report, accompanied by elaborate statistics, which attests the intelligent interest he takes in the working of the institution under his charge. It shows that the total number of persons treated was 2,723, or some 720 less than in 1872, which was marked by the prevalence of dengue fever. There were 106 deaths only, including 18 fatal cases of cholera, out of 53 treated. The death-rate was 38·9 per thousand, which is very considerably below the average (60·46) of eight preceding years. The daily average of sick in hospital was 163·89. The number of days for which, on an average, each patient was detained in hospital was 21·9 against 19·3 in the previous year. This would indicate a slight increase in the severity of the diseases treated. In the case of cholera, however, the death-rate was unusually low, being only 339·6 per thousand, or less than in any of the eight previous years. Most of the cases were received from the shipping or from near the river. Dr. Ewart would seem to attribute their occurrence to the unsanitary condition of the river bank, though admitting that much has been done of late years, and that much is being done to improve this. When the town sewers have been completed, their mouths are so trapped that nothing can pass out of them into the river. The works in the northern part of the town are being rapidly pressed to completion, and this done, it is hoped beneficial results will follow. The question of conservancy in the Fort is the subject of a separate correspondence, and it has been determined to institute a series of observations for the purpose of determining whether the system adopted there has any effect on the health of the shipping. One remedy which is pressed upon Government is the construction of an embankment along the whole face of the Hooghly. The Lieutenant-Governor would remind the medical authorities that this very measure is being carried out by the Port Commissioners. The completion of this work will occupy time, but the progress is constant and satisfactory. Meanwhile the medical reports show that rigorous conservancy is needed all along the bank. The appointment of a Port Surgeon to supervise the sanitary condition of the river and of its banks, and to watch the outbreak of disease among the large floating population in the Port, is under the Lieutenant-Governor's consideration.

There are few parts of Calcutta—to all appearance at least—more insalubrious than some of the "bustees" or collections of huts adjoining the General Hospital; yet the major surgical operations performed there last year were uniformly successful,—a just subject for congratulation to Dr. Ewart and his colleagues. It is still more a subject for rejoicing that operations had to be performed in seventeen cases only.

The memoranda which Dr. W. J. Palmer has furnished on the cases of fever treated by him are very valuable. Dr. Ewart renews the application made by him in 1872 for the appointment of an officer for the express purpose of investigating the nature of the different forms of fever admitted to the General Hospital. With the able staff already at his disposal, the Lieutenant-Governor concurs with the Surgeon-General in thinking that it is not necessary to depute any special officer for the purpose of making these observations. An officer has already been appointed to the duty of making a special scientific inquiry into the nature and causes of Burdwan fever. Till the results of

his work are seen, it will be sufficient that Dr. Ewart should use the means at his disposal, and they are ample, for the purpose of collecting, under his own supervision, the materials for any further independent inquiries which it may eventually be determined to set on foot.

The Lieutenant-Governor is pleased to learn that Mrs. Hickey, the Matron, has given such satisfaction in the performance of her duties, some of them self-imposed. He has no objection to the grant to her of a diploma in midwifery, but he would prefer were this to be done through the Council of the Medical College.

The sanitary and dieting arrangements, and the plan adopted for the distribution of work among the officers attached to the hospital, appear to be highly satisfactory. It will be desirable that a special representation be made to the local authorities regarding the open drain to the north of the quarters occupied by the medical subordinates, referred to in page 46 of Dr. Ewart's report; and as regards the suggested improvement in the dietary, noticed in paragraph 31 of the Presidency General Hospital report, the Lieutenant-Governor has no objection to the Surgeon-General sanctioning a departure from the strict scale. The Lieutenant-Governor is glad to learn that so much has been done under Dr. Palmer's supervision to improve the library. Acknowledgments are due to the Editors of the Calcutta newspapers and the other gentlemen who have so kindly contributed to the relief of the sick by the supply of papers and periodicals.

To Dr. Ewart and his colleagues the Lieutenant-Governor tenders his thanks for the efficient manner in which they have discharged their duties during the year. Government and the public are not a little indebted also to the ladies forming the Committee of the Calcutta Hospital Nurses Institution, without whose aid much suffering would have remained unalleviated from the want of efficient nurses. The Lieutenant-Governor understands that the arrangements have been completed under which a Home for trained nurses will be at once built by the Committee of the Lady Canning Memorial Fund, in close proximity to the General Hospital; and that it will be ready for the two ladies who are coming out from England under the Committee's auspices by the commencement of next year.

7. *Mayo Native Hospital.*—The report on this hospital shows that its finances are in a satisfactory condition. It has now at its credit Rs. 3,95,390-2-4 in landed and funded property, besides Rs. 1,62,289-0-4 which have been put to the account of the building fund. The returns appended show that in this hospital, and in its various dispensaries, no less than 1,503 in-patients and 1,29,925 out-patients were treated. The rate of deaths among in-patients was only 49·3 per thousand treated. Of major surgical operations 14·4 per cent. proved fatal. The Lieutenant-Governor would be glad if the Governors of the hospital would favour him in future years with somewhat more detailed information regarding the out-patients, and the dispensaries at which they were treated. This year they numbered more than half of the whole patients, both in and out, treated at all the Calcutta Medical Institutions, and it is most desirable that the returns regarding them should be given in such detail as to allow some test of their accuracy to be applied.

8. *Campbell Hospital (Sealdah).*—The death-rate at this hospital was 288·7 per thousand,—a painful contrast to the alleged rate prevailing at the Mayo Hospital (49·2); even deducting moribunds the ratio was distressingly high. Dr. Woodford labours under a great difficulty in this respect as long as the hospital is used as the last refuge of those in the final stages of disease and suffering. The average number of patients under treatment daily was 295 and the average time spent by each patient in hospital was 22 days. The cost of dieting was moderate, being 2 annas 6 pie per head per diem. This hospital has now been brought under the direct management of Government, with a view to its forming a school of clinical medicine for the students of the Campbell Medical School.

9. *Police Chowkeedar Hospital.*—A great deal has been done to improve the sanitary condition of this hospital, but much remains to be accomplished, and the Lieutenant-Governor hopes that the matter may continue to have the attention of the Municipality. In all, 1,985 patients received treatment at this institution. The daily average number of sick was 93·08, slightly less than in the preceding year. The death-rate was only 21·6 per thousand—a surprisingly low figure, had it not to be considered, as the Surgeon General points out, that many men feeling their health giving way leave the force altogether. The

figures he gives show that the health of the police force, so far as it is possible to compare them, is better than that of the Native Army; the admissions to hospital, the daily number of sick, and the death-rate, all attest this.

10. These institutions call for no special remarks; each conferred extensive benefit on the poor in its neighbourhood, especially the North Suburban Hospital, where 682 in-patients were treated. It is hoped that the new building for this hospital will soon be completed. The large and comparatively well-to-do population of Bhowanipore should be urged to do something towards the attainment of a better building for the dispensary.

Sukea Street Dispensary.
North Suburban Hospital.
Bhowanipore Dispensary.
Allpore Dispensary.
Aratoon Apcar Dispensary.

11. *Howrah General Hospital.*—Dr. Bird has submitted a valuable report on this institution. It is evident that he has its welfare thoroughly at heart, and that it is prospering under his management. In the course of the year 1,493 in-patients and 13,364 out-patients were treated, the numbers being considerably in excess of those in the previous year. This Dr. Bird attributes to a renewed connection with the shipping, to the admission of moribund patients under the orders of last year, and to the increasing attention shown to native out-patients. There seem to be some doubts with regard to the correctness of the registers kept of the attendance of European out-patients. The Lieutenant-Governor hopes that the means taken to remedy this will prove effectual. The average number of in-patients under treatment in the hospital daily was 70, the number of Europeans and of natives being pretty equally divided. While the death-rate among Europeans, however, was unusually low (40 per thousand), that among the natives was very high (277·7 per thousand); even excluding moribund cases, it was somewhat higher than in the previous year.

Fever was very prevalent during the year, both among natives and Europeans, and was very fatal in its form. In the earlier part of the year, endemic fever prevailed extensively and had to be met by special measures; about March, however, it disappeared.

The Lieutenant-Governor learns with pleasure that the financial position of the hospital has become comparatively secure, and that there is a prospect of a new ward for natives being opened shortly.

12. *Calcutta Lock-hospital.*—The report on this institution has been separately dealt with.

13. In conclusion, Sir Richard Temple has to thank Dr. Campbell Brown for effective control exercised over these institutions during the year under review.

By order of the Lieutenant-Governor of Bengal,
RIVERS THOMPSON,
Secretary to the Govt. of Bengal.

ADMINISTRATION REPORT OF THE MUNICIPALITY OF THE SUBURBS OF CALCUTTA FOR THE YEAR 1873-74.

RESOLUTION.

MUNICIPAL.

Calcutta, the 24th August 1874.

READ—

A letter No. 9M.M. of the 10th ultimo, from the Commissioner of the Presidency Division, submitting the Administration Report of the Municipality of the Suburbs of Calcutta for the year 1873-74.

Income.—The year under review has been financially one of steady prosperity, the total income being Rs. 3,59,060, or Rs. 1,560 more than the estimate. The collections of the house-rate were punctually realized, the outstanding balance at the close of the year being only Rs. 18,468-12, the greater part of which was on account of the last quarter of the year. There was less success in dealing with the tax on horses and carriages. Receipts from this source are apparently decreasing, Alipore being a less favored residence for Europeans now than formerly, and at the close of the year the somewhat large balance of Rs. 5,594 was outstanding, Rs. 2,496-4-6 were received from pounds, Rs. 3,904 from ferries, and Rs. 4,972 from fines. The receipts on account of fees for the licenses for trades, which have shown great fluctuations during the last seven years, are considerably less than they were in 1869-70, and, compared with last year, show a decrease of Rs. 550. This latter is directly traceable to the diminution in the number of the wood depôts and from failure in

business when trades, such as that of dyeing or cloth-printing, are brought in competition with European manufactures. The receipts from fees came to Rs. 11,978-8.

Expenditure.—The actual expenditure for the year amounted to Rs. 3,15,061, being Rs. 42,439 less than was estimated, and Rs. 44,000 less than the actual revenue and receipts. The heads under which there was the largest outlay are—Police, Rs. 80,503; Roads, Rs. 50,345; and Conservancy, Rs. 48,383. For general charges, too, a heavy expenditure of Rs. 30,574 was incurred.

The roads have generally been looked after in most directions, but from a scanty supply of metal, and an unfavorable season from the drought, thorough repairs were not carried out in the Northern Division of the town. The attempt to improve the back lanes and bye-paths in the suburbs is commendable, and one that can probably be effected at no great expense. With a saving of Rs. 31,771 under this head in the year the Commissioners should have ample resources at their disposal for road improvements during the current season. Work extending to 10 miles of road, the greater part of which has been only under partial repair, is not much for the Suburban Municipality.

Nothing apparently has been done to improve the manner of lighting the town, but this is a luxury which must be deferred till the more pressing needs of the Municipality are supplied. The chief of these is a supply of pure water. Too much dependence seems to have been placed hitherto on a prospect of participating in the Calcutta water-supply. The day when this can be extended to the suburbs seems yet distant. Meanwhile something should be done in the way of providing tanks. The provisions of the Land Acquisition Act may be had recourse to in case of obstruction being placed in the way of the Municipal Commissioners, and the negotiations which are being carried on to obtain a site at Tollygunge should be pressed to a conclusion as rapidly as possible, so that at the close of the rains there may be no delay in carrying out the work.

The expenditure on Conservancy during the year was Rs. 7,730 beyond the year's estimate. Despite much that has been done amid the special difficulties of a widely scattered suburban district, interspersed with overgrown native *bustees* in a very insanitary and offensive condition, the Commissioners recognise the fact of a great deal that yet remains to be accomplished. They should endeavour to reduce as much as possible expenditure in every other direction, to allow of more extensive improvements in this direction. The Municipal laws and bye-laws would seem to be enforced with insufficient strictness when it is possible that such dens of filth should continue to exist as those described in paragraph 75 of the Report now under review. Some of these *bustees* abut on the General and Military Hospitals, and it is of the utmost importance that the measures for their improvement, which have been now commenced, should not be relaxed. A special report should be submitted as to the proceedings which should be adopted to bring the Mahomedan burial-ground lying to the south of the Circular Road within the Municipality. In the meantime cleanliness should be enforced by proceeding against the persons found to be in possession of it.

The new system of house scavengering which has been introduced has hardly yet had a fair trial. Opposition was to be expected, and as long as the means taken to overcome it are legitimate and proper, the Municipal authorities may rely on the support of Government.

The thanks of Government are due to the Commissioners who have sat on the Municipal Benches during the year to dispose of conservancy cases. The fines imposed by them appear to have been generally small in amount.

By Act IV (B.C.) of 1873 the registration of births and deaths was made compulsory throughout the suburbs. The Commissioners have made the necessary arrangements to give effect to the law, with a fair amount of success. The figures given show a very high death-rate in certain quarters of the town, more especially in Matiabrooze (Garden Reach), Soorah, and Entally. The attention of the Commissioners should be given to the improvement of these places.

Ordered that a copy of this Resolution be forwarded to the Commissioner of the Presidency Division, for the information and guidance of the Municipal Commissioners of the Suburbs of Calcutta.

By order of the Lieutenant-Governor of Bengal,

RIVERS THOMPSON,

Secretary to the Govt. of Bengal.

REPORT ON THE WORKING OF THE JUTE WAREHOUSE ACT IN HOWRAH.

No. 277, dated Burdwan, the 20th June 1874.

From—C. T. BUCKLAND, ESQ., Commissioner of the Burdwan Division,

To—The Secretary to the Government of Bengal.

I HAVE the honor to submit, for the orders of Government, a report on the working of the Jute Warehouse and Fire Brigade Act in the Howrah Municipality, submitted by the Chairman of the Municipality with his No. 220A of the 16th May, under the provisions of Section 31, Act II (B.C.) of 1872.

No. 220A, dated Howrah, the 16th May 1874.

From—J. B. WORGAN, ESQ., C.S., Chairman of the Municipal Commissioners of Howrah.

To—The Commissioner of the Burdwan Division.

IN accordance with the provisions of Section 31 of Act II of 1872, I have the honor to submit the following report on the working of the Jute Warehouse and Fire Brigade Act in this Municipality, for the official year ending 31st March 1874.

2. The Act was extended to Howrah on the 1st of August 1872 by Government notification dated 27th July 1872.

3. In the instructions which accompanied the notification, it was ordered that the provisions of Section 6, which provides for the licensing of warehouses existing at the time the Act came into operation, should not be enforced until one year after the extension of the Act, in order to allow the owners to carry out such alterations to their warehouses as would be deemed necessary by the Commissioners. Accordingly, as stated in the Annual Report of the Municipality for 1872-73, page 3, para. 12, a Special Committee was appointed on the 15th of August 1872 to inspect the existing warehouses. All the warehouses were carefully inspected by the Committee, and notices were served on the owners calling upon them to carry out the alterations which the Commitee considered necessary to render the warehouses more safe against fire. Practically, therefore, the Act came into operation from 1st August 1873.

4. During the year 53 warehouses were registered, of which 30 were licensed. A classified statement of these will be found in the Appendix A hereto. The remaining 23 were not licensed as they were not used.

5. During the year plans were submitted in accordance with Section 7 of the Act for the establishment of three new warehouses, which were scrutinized by the Commissioners and passed.

6. The total income under this head was Rs. 6,939-8-9, which is made up as follows :—

	Rs.	A.	P.
License fees	6,137	8	9
Fines	802	0	0
Total ...	6,939	8	9

This is for the portion of the year from 1st August 1873 to 31st March 1874.

7. The expenditure was Rs. 3,137-7-0, which is made up as follows :—

	Rs.	A.	P.
Special Committee's inspection fees	864	0	0
Inspection establishment	1,491	0	0
Fire Brigade	512	2	0
Contingencies	270	5	0
Total ...	3,137	7	0

The balance in hand therefore at the close of the year amounted to Rs. 3,802-1-9.

8. Appendix B contains the prosecutions instituted under the Act.

9. Although Part III of the Act, which provides for the maintenance of a Fire Brigade, has not been extended to Howrah, yet the Commissioners felt it their duty to enlarge their brigade, as it was very inadequate for the requirements of the town, especially as the trade in jute and cotton is increasing. With this view one small Fire Engine was purchased during the year, and an order was sent to England for three more, which are expected to arrive shortly.

10. In conclusion, I have to request, with reference to your letter No. 46 of the 11th March 1873, that the orders of Government may be solicited as to the manner in which the Commissioners can appropriate any surplus that there may be, since Part IV of the Act, which provides for the placing of the balance of funds to the credit of the Fire Brigade account, has not been extended to Howrah. The year under report closed with a balance of Rs. 3,800, after meeting the expenditure in the inspection and superintendence of, and the granting of licenses for warehouses. This balance will, however, be expended in the purchase of the engines which have been indented for, but a considerable balance is anticipated at the close of the current year.

APPENDIX A.

R. KNIGHT,

Asst. Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 29th August 1874.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.				
		Western Districts.		
BURDWAN DIVISION.	1	Burdwan, 31st* Aug. 1874	·85	Rainfall at Jehanabad nil, at Cutwa ·42, at Culna ·24, at Bood-bood 2·74, at Raneegunge 3·99. The accounts of the crops are very unsatisfactory indeed. If heavy showers do not fall soon, another failure of the late rice crop in the north and east of the district may be apprehended. Fever as before.
	2	Bankoora, 29th „ „	1·72	Showery up to the 27th; fine since that date. The very early rice crops, such as "*chalt*," "*tilka*," are being reaped. The outturn is good. The aous or early rice crop is doing well. The amun or late rice cultivation nearly closed, with probably ¾ths of the whole planted out. Other crops progressing favorably. Telegraphed on the 31st August. Heavy showers to-day at head-quarters is very beneficial. Prices falling slightly.
	3	Beerbhoom, 29th „ „	4·59	Showery. State and prospects of the crops continue good except in Burwan Division, where there has been no sufficient rainfall; more rain wanted still in the east of the railway. No export by rail during the week. Prices stationary.
	4	Midnapore, 29th „ „	1·45	Very little rain has fallen since Sunday, but the fall at the end of the last week was amply sufficient for the present. Prospects continue to improve, and a full aous or early crop will be reaped in a few days in the west, though rather under an average crop in the north-east. Unfortunately the heavy rain at the end of last week caused the Cossye to overflow and break its embankments; one of the breaches, half a mile below Panchkoora, is likely to cause much damage. Prices indicate a tendency to fall.
	5	Hooghly, 29th „ „	1·32	Passing clouds, little or no rain. Wind chiefly from south-east. At Serampore the rainfall has been 2·38. Prospects of the amun or late rice bad over three-fourths of the district. Aous or early rice damaged in parts; a fair crop expected; reaping about to commence. Jute good.
		Howrah, 29th „ „	2·89	There has been some rain during the week throughout the district. Weather sometimes clear and sometimes cloudy. Wind from south and east. The District Superintendent reports that there has been some rain throughout the district. Lands are being prepared for transplanting amun, or late rice seedlings, and in most parts of the district transplanting has commenced, but the general cry is for more rain. Aous or early rice crop in Jugutbullubpore is suffering. The jute and sugarcane are good.
		Central Districts.		
PRESIDENCY DIVISION.	6	24-Pergunnahs, 31st† Aug. 1874.	0·89	Very warm, with occasional light showers. The harvesting of the aous or early rice crop is progressing fairly. Its outturn will probably be rather below the average. Amun or late rice continues to be planted out, but more rain is required, and much anxiety is felt at its continued holding off. Fever still prevailing in the Diamond Harbour, Barripore, Busseerhat, Satkhira, and in part of Baraset Sub-division.
	7	Nuddea, 29th Aug. 1874	0·97	Slight and partial showers over the greater part of the district. The weather has of late been favorable to the aous or early rice crop. The outturn will generally be from 10 to 12 annas, except in the distressed part. There has not been nearly enough rain for the amun or late rice, and in many places transplantation is not going on well, though in the Kooshtea Sub-division it has been finished. The rain has, however, done good everywhere. The harvesting of the early rice is going on, and in the north of Kooshtea the new grain can be had for Rs. 1-12 per maund. There has been also a marked fall in Meharpore. In Bongong and Ranaghat and the Sudder, however, the price is still very high, *i.e.*, Rs. 2-12 to Rs. 3-12 per maund.
	8	Jessore, 29th „ „	6·69	Heavy showers have fallen in the central portion of the district, and in the rest there have been seasonable falls. The rain has done much good to the amun or late rice crop, particularly that on the higher ground known as *chatna amun*. It has also been favorable to transplanting, which had been delayed much by the drought. The prospects are good. The rivers are rising again, and some anxiety is felt on that account in Narrail, where the people are making haste to reap such of the early rice as remains likely exposed to inundation.

* Telegram of the 31st August, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 31st August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)				
		Central Districts.—(Contd.)		
RAJSHAHYE DIVISION.	9	Moorshedabad, 29th Aug. 1874.	1·36	There has been no heavy rainfall since Sunday in the Sudder Sub-division, but several fair showers on Monday, Wednesday, and Thursday have caused some improvement in the prospects of the late rice crops. Irrigation, facilitated by floods from the rivers, has saved a large area of crops in Bhurutpore; the portion of the crops reported to be still very badly off, being that lying between the villages of Bhurutpore and Talebpore. Kalliangunge has also been benefited, but most of the high lands remain still unsown. Some heavy showers fell at and about Mirzapore on the 27th; much good will be derived from them. In the remainder of the Jungypore Sub-division and on the greater part of the Rampore Haut and Lallbaugh Sub-divisions prospects are at present good. The time is, however, fast passing for transplantation in parts where it has not been completed, and there is no appearance of immediate rainfall.
	10	Dinagepore, 28th Aug. 1874.	1·55	Showers throughout the district; in some places a good fall. There has been generally a sufficiency of rain to prevent damage to winter crops; in some places there has been heavy rain; such falls are required all over the district now. Most of the bhadoi or early crops gathered. Now heavy rain cannot harm that.
	11	Maldah, 29th Aug. 1874	0·98	Cloudy, stormy, and drizzling. The harvesting of the bhadoi or early crops is going on. Prospects of the amun and hymunti or late rice crops are fair, although more rain is wanted to complete transplanting the latter.
	12	Rajshahye, 29th „ „	1·59	There has been moderate rain throughout the district during the week; more rain is necessary to secure a good crop of ropa or transplanted rice. The aous or early rice crop in the Nattore Sub-division has been better than usual. In Pootea a good deal of aous or early and amun or late rice has been submerged owing to the breaking of a dam in the Nundangatcha Khal. Other crops, such as ruhur (pulse), sugarcane, &c., are doing well. The jute crop in the north has been a good one. Prices stationary. Public health good.
	13	Rungpore, 28th „ „	1·18	Heavy showers at intervals, but very partial; slight showers very often. Weather cool. Transplantation everywhere retarded by want of sufficient rains. Much land yet uncultivated, and some of the rice planted out is drying up Prices rising all over the district.
	14	Bogra, 29th „ „	2 89	Weather has been upon the whole seasonable and no harm has been done. Aous or early rice with an excellent yield is still being cut. Amun or late rice sowings are fast approaching completion. The young plants everywhere are looking well. The rain that has fallen this week has been of great benefit to the crops.
	15	Pubna, 29th „ „	2·30	Weather cloudy, with more or less rain during all the days of the week. Most of the aous or early rice is harvested. Some amun or late rice in the jurisdiction of the Pubna Station is reported to have been injured by a partial inundation. Jute is being harvested, and has been a good crop. Prospect of sugarcane good. Fever increasing, and some cases of small-pox reported from Maldah outpost.
COOCH BEHAR DIVN.	16	Darjeeling, 28th „ „	6·96	There has been rain nearly every day, but not heavy until the last two days, when the downpour has been great. There is sufficient rain both in the terai and the hills, and the prospects of the crops are very good; the seedlings of hymunti or late rice are being transplanted. The bhadoi or early rice is being reaped and is reported to give a fair outturn.
	17	Julpigoree, 28th „ „	2·94.	During the past week there has been rather short rainfall for the time of the year, the usual steamy close August weather is not experienced. So far the rain has been sufficient, and a good rain next month is needed to ensure bumper crop of cold weather rice.
		Cooch Behar, 27th „ „	0·87	Cloudy; rain on five days. The prospects of the amun or late rice crop continue to be excellent, except in some tracts in the south where more rain is wanted.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca, 31st* Aug. 1874	2·29	Seasonable weather. Prospects of crops improving. Rain has done much good, but more still is wanted. Much paddy remains to transplant.
	19	Fureedpore, 29th „ „	·70	Drizzling rain, with occasional heavy showers, alternated by sunshine and clear sky during the week. The rivers are rising gradually all over the district, and the amun or late rice crop is thriving in consequence and promises to be a good one. The price of coarse rice has fallen at Madareepore and Bhangah, and is stationary at Fureedpore, Goalundo, and Gopalgunge.
	20	Backergunge, 27th Aug. 1874.	·44	Rainy weather. Prospects of crops good.
	21	Mymensingh, 28th Aug. 1874.	1·98	Showery. Rain fell six days out of the seven. Prospects of crops improved since previous report. There has been a material fall in the price of rice.
	22	Sylhet, 25th Aug. 1874	3·30	Cool and showery. State of the amun or late rice crop good. Katorea not so promising from want of sufficient rain. The price of rice has risen on account of exportation. Few cases of cholera and fever still prevalent.

*Telegram of the 31st August, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Concld.*)			
	Eastern Districts.—(Contd.)		
CHITTAGONG DIVN. 23	Chittagong, 29th Aug. 1874.	3·79	Cloudy and breezy with a fair quantity of rain. From Cox's Bazar 6·52. Reaping of the aous or early rice continuing, and the late rain has been favorable to transplanting of the amun crop, which is again progressing actively. No cholera reported during the week.
24	Noakholly, 27th „ „	3·74	Cloudy, rainy, and strong south-easterly wind. The reaping of the aous or early rice has nearly been completed, and in high lands the outturn is reported to be somewhat less than expected. Transplantation of the late rice is in progress.
25	Tipperah, 28th „ „	1·49	Cloudy and showery, high south and south-east winds. The aous or early rice is being harvested; the outturn will be a good one. The late rice (amun) wants more rain and inundation.
26	Chittagong Hill Tracts, 25th Aug. 1874.	1·83	Cloudy and sunny alternately throughout the whole week; slight showers every now and then. The paddy is ripening in the Jooms, and the early crop has been gathered. The outturn is said to have been an average one. The cotton plants are thriving well. Slight falls of rain during the week have been beneficial to the plough cultivation. Transplanting operations are nearly over. The prospects on the whole are good.
	Hill Tipperah, 27th Aug. 1874.	1·44	Rainy and cloudy all throughout the week. Ploughing and transplanting still vigorously carried on. More rain wanted.
BEHAR.			
PATNA DIVISION. 27	Patna, 31st* Aug. 1874	1·17	Weather sometimes clear and sometimes cloudy. Both the Sudder and Dinapore Stations completely flooded owing to rise of rivers. Prospects of the bhadoi or early crops continue to be favorable, but the floods are likely to cause some damage. Health of the district generally good.
28	Gya, 29th „ „	5·84	Seasonable weather. Heavy rains on the 23rd and 26th. The crops are excellent throughout the district. Health good.
29	Shahabad, 29th „ „	2·06	High east wind, with heavy showers at intervals. No report has been received from Sasseeram and Bhubooah Sub-divisions. In the Buxar and Arrah Sub-divisions the crops are everywhere very favorably reported on. The Ganges and Soane in the north and the Doorgautee and Koodra rivers and hill streams in the south of the district are in high floods. Any injury that may be done to the crops thereby can only be ascertained after the waters have subsided. The District Engineer, who is at Jehanabad, says that he has never seen finer crops in that part of the district; his experience extends over some 15 years.
30	Tirhoot, 28th „ „	1·39	Hot and cloudy at times. About Hajipore the inundation has done a considerable amount of damage. The crops in the upper lands are remarkably fine. The sub-divisional officer believes the dhan is still holding out and he has heard that the Baya river is filling. Everything depends upon rain within the next fortnight, of which there seems to be a reasonable prospect. In Durbhunga showers, more or less heavy, have fallen during the week in various parts of the sub-division, improving the condition of the late sown murwa, and though insufficient for general transplanting, sufficient to keep in fair condition the rice that has been transplanted. Those showers have fallen in Waresnagore, in which circle the condition of affairs is better than it was last week. Heavy rain, four inches at once, is much needed. In the Mudhoobunnee Sub-division, murwa and makai are still being harvested. Gamrhi has been a complete failure Paddy, except where artificial irrigation is going on, is suffering very much for want of sufficient rain. Transplanting has made scarcely any progress owing to the continued drought. The period is nearly over during which transplanting can be effected, and the worst is anticipated. In the Seetamurhee Sub-division there is no material change in the prospect of the crops since last report. The murwa (millet) and makai or Indian-corn are being harvested. The *sathi* is suffering from want of rain. The winter rice crops are also in need of rain to bring them on. The report from Tajpore has not been received. The prospects of the crops in the Sudder Sub-division continue much the same as reported last week. Want of rain is much felt. Public health good.
31	Sarun	.....	Return not received.
32	Chumparun, 28th Aug. 1874.	·17	Strong east wind with showers, and sunny intervals and heavy general rain in the north and north-west. The weather has been very favorable to the autumn crops and in the north and north-west of the district to the late rice also, which elsewhere is healthy, but wants rain to render it safe. In the greater part of the district, a bumper bhadoi or early crop is now secure unless for excessive rain or floods.

* Telegram of the 31st August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.—(*Contd.*)				
BHAGULPORE DIVN.	33	Monghyr, 29th Aug. 1874	4·32	Weather changeable. Alternate rain and sunshine. The prospects of the bhadoi or early and late rice crop continue satisfactory. There have been seasonable showers during the week.
	34	Bhagulpore, 31st* „ „	2·01	Rainfall at Soopool ·78, Muddehpoora 1·, Banka 1·91. Crops promising. Soopool reports bhadoi or early paddy very good, but would be benefited by a little more rain. Murwa (millet) on the whole very good, and harvesting general. Heavy rain badly wanted for aghani or late rice; with a good fall of rain now, and favorable weather in September and October, the outturn may still prove a very fair one. In Muddehpoora, all crops are in a most promising state. Banka reports more rain than fell at head-quarters has fallen in the interior, which has greatly benefited the paddy and assisted the completion of transplantation. Heavy rain is required for the aghani or late rice, which, however, up to date looks good and promising. General health very good.
	35	Purneah, 29th „ „	1·18	Cold east wind accompanied with rain at intervals. The yield of the bhadoi or early crop has quite come up to previous anticipation, unless the Ganges rises very high during the next few days, the crop in the south will be magnificent. It is reported from the great aghani or late rice-growing country in the north that the weather is admirably suited for the transplanting operation.
	36	Sonthal Pergunnahs, 29th Aug. 1874.	3·41	Clouds and rain all the week till the 28th, in Doomka. On the 28th the weather seemed to change, and on the 29th there appeared a bright hot sun with hardly any clouds. Rainfall at Rajmehal 1·8, at Godda 2·71, at Deogurh 4·16. This week's reports are the best all round that have been received. Godda has had a good fall of rain. Transplanting going on fast, and will soon be finished. Janera (Indian-corn) harvest begun. In Rajmehal much mischief has been done by the rising of Ganges. In Deogurh the unusual rain is said to be too much for the rice. They probably have a share of the sunshine. Crops all excellent in Doomka.
ORISSA.				
ORISSA DIVISION.	37	Cuttack, 31st* Aug. 1874	3·85	Occasional storms alternating with sunshine. Rivers in flood. Crops in many places under water. Loss is apprehended in low lands. Elsewhere crops excellent. Cholera disappeared; low fever prevalent.
	38	Pooree, 28th „ „	4·05	Cloudy and rainy. The early rice crop continues to be weeded and has commenced to come into ear. The late rice crop is being transplanted and also weeded. There have been high floods which still continues. Crops in some parts are still submerged Breaches in embankments have occurred in some places. The continued flood is likely to cause damage. Sugarcane is doing well. Cotton has been harvested; outturn fair. Mandea and arhur (pulses), castor and teel seeds are growing well. Prices stationary, though rice is being sent to Cuttack from this district, especially from the Government estate of Khoordah. Cholera has ceased.
	39	Balasore, 28th „ „	·59	Cloudy skies and drizzling rains have prevailed with occasional intervals of bright sun. Altogether the weather has been highly favorable for the growth of the crops, which are fast making up for time lost through want of rain earlier in the season. A fresh inundation of the Subarnorekha has caused some damage.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
	40	Hazareebagh, 28th Aug. 1874.	9·63	Very heavy rain. Latterly windy and cold. The crops are in excellent condition and nothing could be better than the prospects. The excessive rain of the week has, it is said, done some very slight damage to the ripe millet crop, but it has been excellent for the rice. Cholera and small-pox have greatly decreased, but typhoid in the regiment continues.
	41	Lohardugga, 29th Aug. 1874.	4·05	Quite seasonable; light rain all through the week. The prospects at present in Chota Nagpore are excellent. A good goondli (millet) crop has been reaped, and the early rice, which will now shortly be cut, promises to be a full one. The late rice promises well. The Palamow report has not been received, but the latest accounts are that though the bhadoi crops have suffered somewhat from continued rain, the prospects of the late rice are very good. Prices easy and the general health on the whole good.
	42	Singbhoom, 28th Aug. 1874.	3·36	Seasonable. Rain and sunshine. All that could be wished. Everything progressing well. Condition of the people satisfactory. Public health good.
	43	Manbhoom, 29th Aug. 1874.	3·79	Favorable. Rain began falling again on Saturday afternoon last, and has continued to fall during the week, but there has not been quite sufficient to fill the fields on the higher lands. The prospects of the late crops have, however, very much improved since the date of last report, and they may yet give a good outturn, if the weather continues favorable. All depends on enough rain falling in September and October. The early crops on the high lands are now being cut and are everywhere giving a good outturn. Health good.

* Telegrams of the 31st August, received on the same day, shows rainfall during the seven days immediately preceding.

Published for general information.

CALCUTTA, STATISTICAL DEPT.,
The 1st September 1874.

* Velocity of wind in miles per hour.

CALCUTTA,
The 29th August 1874.

W. G. WILLSON,
Offg. Meteorological Reporter to the Government of Bengal.

Abstract of the Results of the Hourly Meteorological Observations taken at the Surveyor-General's Office, Calcutta, in the month of July 874

LATITUDE 22° 33′ 1″ North. Longitude 88° 20′ 34″ East. Height of the cistern of the standard barometer above the sea level, 18·11 feet.

MONTHLY RESULTS.

	Inches.
Mean height of the barometer for the month	29·589
Max. height of the barometer, occurred at 10 A.M. on the 13th	29·739
Min. height of the barometer, occurred at 5 P.M. on the 28th	29·339
Extreme range of the barometer during the month	0·400
Mean of the daily max. pressures	29·645
Ditto ditto min. ditto	29·525
Mean daily range of the barometer during the month	0·120
	°
Mean dry bulb thermometer for the month	84·0
Max. temperature occurred at 4 P.M. on the 20th	94·2
Min. temperature occurred at 3 P.M. on the 31st	78·2
Extreme range of the temperature during the month	16·0
Mean of the daily max. temperature	89·5
Ditto ditto min. ditto	80·3
Mean daily range of the temperature during the month	9·2
Mean wet bulb thermometer for the month	80·5
Mean dry bulb thermometer above mean wet bulb thermometer	3·5
Computed mean dew-point for the month	78·0
Mean dry bulb thermometer above computed mean dew-point	6·0
	Inches.
Mean elastic force of vapour for the month	0·940
	Troy grains.
Mean weight of vapour for the month	10·07
Additional weight of vapour required for complete saturation	2·10
Mean degree of humidity for the month, complete saturation being unity ...	0·83
	°
Mean max. solar radiation thermometer for the month	136·5
	Inches.
Rained 24 days,—max. fall of rain during 24 hours	3·37
Total amount of rain during the month	8·89
Total amount of rain indicated by the gauge* attached to the anemometer during the month	7·79
Prevailing direction of the wind	S. by E. & S.

* Height, 70 feet 10 inches above ground.

GOPEENAUTH SEN,
In charge of the Observatory.

The 27th August 1874.

GOVERNMENT OF BENGAL.

PUBLIC WORKS DEPARTMENT,—IRRIGATION BRANCH.

KHUREEF SEASON 1874, COMMENCING ON THE 1st JUNE 1874.

Irrigation Operations of Lower Bengal during the month of July 1874.

Circle.	District.	Canal.	Supply of Water in the Canals.		Rice Irrigation.				Sugarcane and other perennial crop irrigation.			Grand Total of area leased up to the end of the month (total of columns 9 & 12).	Grand total of corresponding period of last year.	Rainfall.			Remarks.
			Estimated full discharge in cubic feet per second.	Average discharge in cubic feet per second throughout the month.	Area leased on or before the 1st June 1874.	Area leased subsequent to the 1st June 1874 and up to the 1st of the month.	Area leased during the month.	Total area leased up to date (total of columns 6, 7 & 8).	Area leased up to the 1st of the month.	Area leased during the month.	Total area leased up to date (total of columns 10 & 11).			Inches during month.	Inches during khureef season.	Average of ten previous years for the same period.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUTENANT-GOVERNOR OF BENGAL.

REVENUE AND GENERAL DEPARTMENTS.

No. 2380C.S.

GENERAL.—*The 29th August* 1874.—Mr. Charles Miller, Barrister-at-Law, Magistrate of Police, and Coroner of Calcutta, is allowed leave for three months, under Section 21, Chapter VI of the Civil Leave Code, with effect from the 22nd October 1874, or any subsequent date on which he may avail himself of it.

Mr. Frederick John Marsden, Barrister-at-Law, is appointed to act as a Magistrate of Police, Calcutta, during the absence on leave of Mr. Miller, or until further orders. Mr. Marsden is also appointed to act as Coroner of Calcutta and Judge of the Court for the trial of Pilots.

The 4th September 1874.—The services of the following officers employed on relief duty are replaced at the disposal of the Government of India in the Military Department, viz.—

Colonel A. Mackenzie. Lieutenant G. L. Eliot.

The 5th September 1874.—Moulvi Mohamed Abdool Kadir, Deputy Magistrate and Deputy Collector, Pooree, is transferred to Cuttack.

Baboo Monmotho Kumar Bose is appointed to act as a Sub-Deputy Collector of the Second Grade, and is posted to the Sub-division of Satkhira, in the 24-Pergunnahs.

The 7th September 1874.—Mr. Edward Augustus Bradbury, Manager of the Cooch Behar Zemindaries in Rungpore and Julpigoree, is allowed leave for three months, under Section 21, Chapter VI of the Civil Leave Code, with effect from the 10th instant, or any subsequent day within one week from that date.

Baboo Gour Das Bysack, Deputy Magistrate and Deputy Collector, is vested with the powers of a Collector under Act X of 1870 for the purpose of acquiring land required for opening out a new burial-ground for the use of the Mahomedan population of the Union of Jehanabad, in Burdwan.

Mr. William Fitzpatrick Meres, Acting Joint-Magistrate and Deputy Collector, Hooghly, is allowed leave for two months and twenty-six days, under Section 21, Chapter VI of the Civil Leave Code.

Mr. Andrew William Cochran is appointed to act as Joint-Magistrate and Deputy Collector of Hooghly during the absence on leave of Mr. W. F. Meres, or until further orders.

Mr. John Arthur Hopkins, Inspector of Schools, Western Circle, is appointed temporarily to act as Joint-Magistrate and Deputy Collector of Midnapore in addition to his other duties.

The 8th September 1874.—Mr. William Henry Grimley, B.A., C.S., is appointed to be Secretary to the Central Examination Committee.

The following officers are vested with the powers of a Collector under Act X of 1870 for the purpose of acquiring lands for relief roads in the districts of Dinagepore and Rungpore, viz.—

Dinagepore.

Lieutenant A. W. Proudfoot.
Mr. J. Pollen, C.S.
,, Herbert John Hamilton Fasson, C.S.
,, W. H. Horsley, C.S.
,, Michael Finucane, C.S.
,, A. W. Scanlan.
,, J. P. Sneyd.
Mr. T. W. Tweedie.
Baboo Huri Mohun Chunder.
,, Jadub Chunder Gossami.
,, Huro Kali Mookerjee.
,, Poorna Chunder Gupta.
,, Jogodish Nath Roy.
,, Surendro Narayan Roy.

Rungpore.

Mr. Guybon Henry Damant, C.S.
Baboo Brojo Kant Roy.
,, Rutton Lall Ghose.
Baboo Okhoy Coomar Sen.
,, Brojo Mohun Roy.

The following promotions are sanctioned in the Subordinate Executive Service:—

To the First Grade.

Mr. William O'Reilly, *vice* Baboo Obhoy Churn Mullick, retired.
Baboo Brojo Soonder Mitter, *vice* Mr. W. R. Pogson, retired.

To the Second Grade.

Baboo Sreenath Ghose.
Baboo Hem Chunder Ker.

To the Third Grade.

Baboo Kristo Chunder Roy.
Baboo Kanti Chunder Chatterjee.

To the Fourth Grade.

Baboo Jadub Chunder Ghose.
,, Kristo Chunder Dutt.
Moulvie Mofizooddin, *vice* Baboo Chunder Mohun Roy, retired.
Mr. Haldane Rattray, *vice* Baboo Brohmonath Sen, appointed Head Assistant of the Revenue Department of the Bengal Secretariat.

To the Fifth Grade.

Mr. William George Black.
Moulvi Ahmed.
Baboo Shitulnath Bose, B.A.
Mr. William Brown Martin.

The following officers are confirmed in the Sixth Grade of the Subordinate Executive Service:—

Baboo Kalinath Dé.
,, Rajendronath Roy.
Baboo Troylokhonath Sen.
,, Bepin Behary Mookerjee.

In supersession of the orders of the 23rd June last, granting to Mr. Christopher Henry Vowell, Acting Joint-Magistrate and Deputy Collector, Shahabad, one month's leave under Section 10 (*a*), that officer is allowed eighteen days' leave under Section 21, Chapter VI of the Civil Leave Code, in extension of the leave granted to him under orders of the 26th May 1874.

[Second Publication.]

The 27th August 1874.—The following Circular, issued by the Comptroller-General, is published for general information :—

No. 533, dated Calcutta, the 3rd August 1874.

From—H. A. MANGLES, ESQ., Officiating Comptroller-General,
To—All Accountants-General.

From replies which have lately come to hand from various parts of India, it appears to be advisable to put before District Treasury Officers, in a concise form, the various concessions which have been granted by the Government of India in order to make the Paper Currency more generally convertible and so more popular.

2. They are—

(1) That the notes of a Paper Currency Circle should be cashed at every Treasury (district or sub-divisional) within the Circle up to the available means of the Treasury, *i.e.*, to whatever extent they can be cashed without embarrassing the Treasury.

(2) That notes of all Presidencies and Circles should be received at every Treasury (district or sub-divisional) in payment of Government demands, and should be cashed at every Treasury (district or sub-divisional) for the convenience of travellers.

(3) That notes which in this way or otherwise reach a Government Treasury should be freely issued in exchange for coin or in discharge of Government obligations.

3. It has frequently been represented that difficulties have been thrown in the way of persons desirous of obtaining cash for notes at treasuries, and even that commission has been demanded for the accommodation. To prevent any possibility of such complaints in future, a form of notice in English and the Vernacular should be hung in some conspicuous place, so that all may see whether the accommodation is available.

4. To remove all possibility of complaint on the part of Officers in charge of sub-divisional treasuries of the risk incurred in cashing notes to the public, it is suggested that each subordinate treasury be provided with a new home circle note of each denomination with which to compare all notes presented for encashment. These notes would of course form part of the Officer's cash balance, but they should not be considered as available for issue to the public or for remittance to the Sudder treasury.

5. Treasury Officers should be reminded that although it is the rule and is desirable to register the name of the person from whom a note of Rs. 50 or upwards is received, or to whom it is paid, yet that the rule should be complied with only when the name of the presenter or receiver is known or is voluntarily given. The Government of India has directed that Treasury Officers must not demand such information, nor put any questions to parties tendering or receiving notes.

6. In the Resolution of the Government of India on the operations of the Paper Currency Department during the year 1871-72, the President in Council noticed "with satisfaction" the remarkable increase of note transactions at Government Treasuries in the interior during that year. It should, however, be remarked that though considerable progress was made in that year's transactions as a whole, yet that little has been done as yet in this direction out of Lower Bengal and Madras, and that, therefore, great opportunities are still open to Treasury Officers in the North-Western Provinces, Oudh, Punjab, Bombay, Central Provinces, and British Burmah, to meet the wishes of Government.

7. By the latest published figures the increase during the last four years has been—

At Treasuries under Government of India	...	2	lakhs.
" " in Lower Bengal ...	...	412	"
" " in N.-W. Provinces	...	73	"
" " in Oudh ...	...	14	"
" " in Punjab ...	...	22	"
" " in Madras ..	...	153	"
" " in Central Provinces	...	24	"
" " in British Burmah	...	9	"
" " in Bombay, a decrease of 87 lakhs.

NOTIFICATION.

The 29th August 1874.—Under Section 2 of the District Road Cess Act (X B.C. of 1871), the Lieutenant-Governor is pleased to direct that the cesses leviable under the said Act shall take effect in the district of Manbhoom from the 1st October 1874.

Under Section 70 of the aforesaid Act, the Lieutenant-Governor is pleased to determine that the month in which the District Committee of Manbhoom shall meet to prepare estimates of income and expenditure for the cess year next ensuing, as in the said section provided, shall be September 1874.

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 26th August 1874.—Under the provisions of Section 11 of Act VII of 1864, the Lieutenant-Governor of Bengal has been pleased to direct that the following rule be substituted for Rule 32A, at page 8 of the Salt Manual, issued under date the 13th July 1870. The present rule is therefore notified for general information :—

Rule.—" If salt originally intended to be taken out of the excepted limits described in clause 4 of the Government Notification at page 2 of the Manual under a special pass be landed in such limits for the convenience of the trade, the alteration in the destination must be reported to the Board's Office, and the special Rowannah returned within 48 hours from the time that the salt was landed. The owner, however, shall be at liberty to refer to it in taking out protective documents for such portion of the salt as he may subsequently determine on removing within limits. Should a portion only of the salt originally covered by the special Rowannah be landed or sold in the aforesaid excepted limits, an exchange Rowannah, after the manner provided in Section 28 of these rules, must be taken out to cover the remaining portion of the salt which goes out of such limits. Any person failing to comply with the provisions of this rule as regards the return, within the period of 48 hours, to the Office of the Board of Revenue, of the special Rowannah in the case hereinbefore mentioned, in which this document is no longer required as a protection for the salt specified therein, shall be liable to a fine not exceeding Rs. 500."

" Certificates taken out for the removal of salt from shipboard, or from bonded golas, to places within the excepted limits, must also be returned to the Board's Office within 48 hours from the time the salt is landed in such places ; and the holder of any certificate who fails so to return it, shall be liable to a fine not exceeding five hundred rupees."

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 31st August 1874.—It is hereby notified for general information that the following readjustment of the Moonsiffee jurisdictions in the District of Gya has been sanctioned, and will take effect on the reopening of the Courts after the next Dusserah vacation:—

Instead of three Moonsiffees as heretofore, there will be only two Moonsiffees in the District, viz.—the Sudder Moonsiffee of Gya and the Moonsiffee of Aurungabad. The Moonsiffee of Nowadah will be abolished.

Thana Sherghotty will be included in the Sudder Moonsiffee of Gya, which will make the jurisdiction of that Moonsiffee conterminous with that of the three following sub-divisions :—

Sudder Sub-Division. Jehanabad Sub-Division. Nowadah Sub-Division.

Thana Daoodnaggur will be included in the Moonsiffee of Aurungabad, which will make the jurisdiction of that Moonsiffee conterminous with that of the sub-division of Aurungabad.

RESOLUTION.

GENERAL DEPARTMENT.

SECTION B.

Calcutta, the 22nd August 1874.

READ—

Resolution in the Financial Department of this Government, dated 22nd April 1873, regarding the provision of executive establishments to sub-divisions.

Rules for the Instruction and Examination of Candidates for the Native Civil Service, dated 22nd April 1873.

Report by the Superintendent of the Subordinate Civil Service Examination of the result of the examination held in March last at Hooghly, Patna, Dacca, Cuttack, and Gowhatty.

This office letter to the Director of Public Instruction, dated 10th October last, prescribing the revised rules for the Native Civil Service Examination of 1865, and for the regulation of the Native Civil Service Classes.

LISTS of the candidates who passed at the Native Civil Service Examinations which were held during the month of March last at Hooghly, Patna, Dacca, Cuttack, and Gowhatty, have already been published in the *Calcutta Gazette.*

2. Of 423 candidates who obtained permission, 385 actually appeared and were examined. Of these 67 were declared by the examiners to have passed in the higher grade and 132 in the lower grade. One more candidate has been passed in the lower grade on the recommendation of the Superintendent of the Examinations. The total number of passed candidates is 200.

3. Of the candidates who passed in the lower grade, nine having passed with distinction, have been placed, at the special recommendation of the Superintendent of the Examinations, in the higher grade, making a total of 76. Of these 38 having fulfilled the requirements of paragraph 4, Part II, of the Rules for the Instruction and Examination of Candidates for the Native Civil Service, dated 22nd April 1873, have been placed in Class I and declared eligible for all appointments in the Subordinate Civil Service. The remaining 38 candidates have been placed in Class II, and will become eligible for all such appointments on their serving for one year in appointments of less value than Rs. 100 per mensem, for which they are now declared qualified.

4. The remaining 123 who passed in the lower grade, and the one who has been specially so passed, have been placed in Class III, and are declared qualified to hold appointments of less value than Rs. 100 per mensem.

5. The Commissioners to whose divisions the second class men of the examinations of 1873 were allotted, have been desired to report on their qualifications. If they are found deserving, they will be declared to be eligible for all appointments.

6. Two of the candidates who have passed in the first class are natives of Assam, and are anxious for employment in that province. Their cases will be brought to the notice of the Chief Commissioner of Assam, and a copy of Mr. Grimley's remarks regarding these two candidates in paragraph 6 of his report will be forwarded for the information of the Chief Commissioner.

7. Baboo Nundkishore Dass, Deputy Magistrate and Deputy Collector, and Bhoonya Abdoor Ruhman Khan, Sub-Deputy Collector in Orissa, who were appointed to their respective offices subject to passing the Native Civil Service Examination, and have passed in the higher grade, are now confirmed in their appointments.

8. The Superintendent of the Examinations recommends that a silver medal be awarded to Baboo Lolitmohun Dhur, the first on the list of the passed candidates. The Lieutenant-Governor has already, in recognition of the merits of this native gentleman, conferred on him an appointment of acting Deputy Magistrate and Deputy Collector, and he considers this, under the circumstances, the more appropriate form of reward.

9. Another passed candidate of this year, Baboo Omoollo Churn Mullick, who was formerly a member of the Subordinate Executive Service, but removed for failure to pass the departmental examinations within the prescribed time, has, in accordance with the promise held out to him at the time of his removal, been appointed to act as a Deputy Magistrate and Deputy Collector.

10. Forty other canditates have been appointed temporary Sub-Deputies or Relief Superintendents in connection with the present famine relief operations, since the date of the examination.

11. The following is an abstract of the allotment which has been made of the passed candidates, exclusive of the two passed candidates who will be recommended to the Chief Commissioner of Assam :—

Division.	1st class candidates.	2nd class candidates.	3rd class candidates.
Burdwan	5	5	14
Presidency	6	6	13
Rajshahye	6	8	13
Cooch Behar	1	0	4
Dacca	4	4	12
Chittagong	2	4	10
Patna	5	3	25
Bhagulpore	3	3	15
Orissa	2	2	7
Chota Nagpore	2	3	11
Total ...	36	38	124

12. A list showing the names of the candidates allotted to the different divisions has been already circulated with this office Circular No. 12E, dated the 14th instant. They are recommended to report themselves to the Commissioners of the divisions to which they are assigned. Any candidates who wish to exchange by mutual arrangement with other candidates placed in the allotment list, may jointly apply to Government for permission to do so within a month of the publication of this resolution. Commissioners who have exhausted their own lists may select men from the other lists with the consent of the Commissioner to whom the candidate has been allotted.

13. The attention of Commissioners is drawn to the following extract from the Native Civil Service Examination Rules now in force :—"Lists of successful examinees will be published in the *Gazette*, so that Commissioners, Magistrates, and Educational Committees, may select for ministerial or other appointments passed candidates for whom vacancies in the Native Civil Service may not be immediately available."

14. Detailed lists showing the past service, the University or other attainments of each candidate, and the special subjects in which he passed, will be forwarded to Commissioners.

15. Unpassed candidates who were temporarily admitted to appointments pending the result of the late examination, or who were appointed subject to passing at that examination, and have failed to do so, should be now replaced

by passed men. The attention of all Commissioners of divisions is requested to this order.

16. It is to be understood that the appointments which have been made or may be made of men who have never before served Government are on probation for a year, and that their confirmation will depend on the practical efficiency shown by them. The District Officers will report on this point through the Commissioner after the expiry of a year. Their attention is drawn to paragraph 18 of the Resolution in Financial Department of 22nd April 1873. The reports now overdue should be submitted at an early date to the address of the Secretary to this Government in the General Department, Section B.

17. The Superintendent of the Examinations has recommended that thirty-seven of the candidates who have failed, but who have attained the passing standard of marks in certain subjects, may, if they appear at the next examination, be exempted from examination in those subjects. The proposal is, however, opposed to the principle on which these examinations have been hitherto conducted, and does not commend itself to the Lieutenant-Governor.

18. Mr. Grimley has also suggested that Messrs. Swinden, Babanau, and Lloyd, be considered qualified for appointments in the Opium Department, as they have succeeded in passing in some of the subjects which are obligatory for opium candidates. There are, however, other considerations which regulate the special nominations required under the rules for opium appointments, and the Lieutenant-Governor is not prepared to adopt the proposals made in favor of these gentlemen. Their success in the subjects in which they have passed qualify them for the general service, but gives them no claim to be admitted to the Opium Department.

19. As explained in the letter to the Board of Revenue, No. 1157G, dated 28th October 1872, candidates for opium appointments are required to pass in—

1. English.	4. Law (opium laws and rules, &c.).
2. Vernacular.	5. Chemistry.
3. Surveying.	6. Botany.

They are not required to pass in engineering or drawing. Apparently there has been some confusion from a misunderstanding of the rules in the recent examinations. In future when special permissions are given to candidates for the Opium Department, they will be informed of the rules which regulate their examination.

20. Mr. J. W. H. Dalrymple Clark, who was appointed to act as Assistant Superintendent of Police, subject to passing the examination for police appointments, has passed very successfully in criminal law, but has failed in other subjects. He was only nominated in November last, and has had but little time for preparation. He has lately been employed on distant duty in connection with the famine relief operations in Julpigoree, and under these circumstances will retain his present acting appointment subject to the results of the next examination.

21. The total amount of fees received from candidates at the late examinations is Rs. 9,060. The sum of Rs. 3,704-5-3 has already been disbursed, debitable to the receipts on account of fees. The propositions submitted by Mr. Grimley for remunerating the examiners and other gentlemen who have assisted in the late examinations are sanctioned. In addition, it is necessary to provide some remuneration for Mr. Grimley for his share of the work performed by him as Superintendent of the Examination subsequent to the date of his assuming charge of the office of Secretary to the Board of Revenue on the 13th April, when the special allowance, which he had drawn at the rate of Rs. 1,000 a month from the 15th January last, ceased. Mr. Grimley's labors have not been light, and he has performed the duty very satisfactorily. The Lieutenant-Governor is pleased therefore to pass to him a further remuneration of Rs. 500 a month for two months from the 13th April last. The further expenditure thus sanctioned amounts in all to Rs. 4,503, and is shown in detail in the statement appended to this Resolution.

22. The thanks of Government are due to Mr. Grimley and to the gentlemen who were associated with him in conducting the examination; and the Lieutenant-Governor has much pleasure in acknowledging the services which have been again rendered in the matter by Messrs. Sutcliffe and Thwaytes and by other gentlemen in the Educational Department.

23. The Lieutenant-Governor regards the general outturn of these examinations with satisfaction, as showing that the system is duly appreciated by the educated classes, and that increasing numbers are endeavouring to qualify themselves by study and experience.

24. But it must be borne in mind that the result of the past examination, and of those which were held on two previous occasions, has been to render 376 gentlemen eligible for appointments. The appointment to sub-divisions for the first time of subordinate executive officers has enabled Government already to provide almost all those passed on previous occasions with suitable posts, and in this year the necessities of the famine have rendered available a considerable number of appointments for the men who have passed this year's examination. In the future, however, the requirements of the Government service will be on a much smaller scale. Including temporary and officiating appointments, the approximate number of officers of the higher grade in the services for the supply of which these examinations were specially organized is 375, as in the margin. Excluding temporary posts, there are only 100 appointments of the lower grade of such a character as passed candidates would be likely to accept in the sub-divisional establishments. To these must be added whatever appointments Magistrates and Educational Committees may put at their disposal. Taking all these into account, it is not likely that the number of vacancies in appointments of both grades will exceed 15 on an average yearly. And it is to be remembered that under the rules it has been distinctly laid down that a passed candidate is not entitled by his success to an appointment under Government, but is only eligible for such appointments as vacancies arise. It is not. therefore, absolutely obligatory that all the appointments which may fall vacant shall be conferred on the gentleman selected from among the passed candidates. The selection of Government is not entirely limited to the list of those who have succeeded at these examinations. The Lieutenant-Governor though quite desirous of maintaining the principle of the existing rules, yet deems it expedient to state these circumstances, lest expectations should arise to an extent which Government may be unable to fulfil.

Deputy Magistrates and Deputy Collectors ...	232
Sub-Deputy Collectors	114
Subordinate Executive Service in Non-Regulation Provinces	29
Total ...	375

25. From what is above stated, it appears that already there are many more passed candidates for appointments on the Government lists than Government can ordinarily hope to provide for in the next two years. In the rules which have already been published for the examination which is to be held in the early part of next year, some provision has been made with a view to reduce the number of those who can present themselves for examination, and further proposals have been made for effecting this in a greater degree eventually. The Lieutenant-Governor apprehends that it may become necessary to make some limitation of the rule under which candidates obtaining a certain number of marks on different subjects are qualified for appointments, or to adopt for the future the competitive system (with such modifications as may be found expedient), and to limit the number of successful candidates to the number of vacancies which may be previously notified to exist in the several grades. Before finally determining the course to be adopted, His Honor will await the result of the next examination under the rules which have already been published. In the meantime, the standard of proficiency to be exacted at the next examination must be raised; and while candidates who gained one-third marks in each paper and half marks on each subject were passed on previous occasions, on this one it will be an instruction to the examiners to require two-third marks in each paper and subject from the candidates for both the higher and the lower grades.

Statement showing the Remuneration sanctioned to the Examiners and the other Gentlemen who assisted in the late Examination.

Name.	Amount of remuneration.	Subject of examination.

DISTRIBUTION LIST OF CANDIDATES WHO HAVE PASSED SUCCESSFULLY AT THE NATIVE CIVIL SERVICE EXAMINATION HELD IN MARCH 1874.

BURDWAN DIVISION.

Class I.

1. Lolitmohun Dhur.
2. Saradaprasad Sirkar.
3. Kedar Nath Ghose, B.A.
4. Mohendra Nath Bhuttacharjee, M.A., L.L.
5. Mr. Owen.

Class II.

1. Shivaprosunno Sen.
2. Uma Churn Laha.
3. Suttyatarun Mookerjee.
4. Poorno Chunder Guho.
5. Kumal Narain Chuckerbutty.

Class III.

1. Sreenath Sen.
2. Prosunno Kumar Chuckerbutty.
3. J. T. Bobanau.
4. Denonath Ghose.
5. Govind Chunder Mookerjee.
6. Umesh Chunder Mookerjee.
7. Krishna Chunder Bose.
8. Sityakant Biswas.
9. Noni Lal Mookerjee.
10. Afzuluddin Ahmud.
11. Ramdyal Nag.
12. Bedhubhoosun Mookerjee.
13. Jogendro Chunder Chuckerbutty.
14. Romanath Mitter.

PRESIDENCY DIVISION.

Class I.

1. Monomatha Coomar Bose, B.A.
2. Gunganarain Roy, B.A.
3. Jogendranarain Gupta, (*a*.)
4. Dwarkanath Mookerjee, (*b*.)
5. Khoodiram Poddar.
6. Gopal Chunder Banerjee, B.A., B.L.

Class II.

1. Rojonikant Mookerjee.
2. Sachitanund Mookerjee.
3. Beni Madhub Chatterjee.
4. Bhoobun Mohun Gupta.
5. Jogendranath Mookerjee.
6. Jogendranath Gupta, (*c*.)

(*a*.) Son of Gour Hurry Gupta.
(*b*.) Son of Umaprashad Mookerjee.
(*c*.) Son of Isser Chunder Gupta.

Class III.

1. Prankissen Gangooly.
2. J. C. Lloyd.
3. Amrit Lal Banerjee.
4. Kali Coomar Roy Chowdhry.
5. Kumad Chunder Mookerjee.
6. Bishumber Das.
7. Sriram Gangooly.
8. Rojonikanto Bhuttacharjee.
9. Rakhal Chunder Ghose.
10. Kasi Chunder Roy.
11. Gopal Chunder Mookerjee, (*d.*)
12. Khadem Hossein.
13. Poolin Behary Mut.

RAJSHAHYE.

Class I.

1. Gogan Chunder Banerjee, B.A.
2. Gopal Chunder Mookerjee, (*e.*)
3. Nilamber Pal.
4. Abdool Wahab.
5. Abdool Khalek, B.A.
6. Bhoobun Mohun Banerjee, B.A., B.L.

Class II.

1. Iswar Chunder Mozoomdar.
2. Sookmoy Banerjee.
3. Peary Mohun Bose.
4. Sreenath Chatterjee.
5. Gossaine Dass Hazra.
6. Nundolal Mookerjee.
7. Shuja-ut Ali Ahmed.
8. Myeeuddin Ahmed.

Class III.

1. Sreenath Gupta.
2. Potiram Banerjee.
3. Golap Lal Das.
4. Kadernath Banerjee.
5. Abinash Chunder Sen.
6. Jodunath Dey.
7. Nebarun Chunder Mookerjee.
8. Mohima Churn Roy Chowdhry.
9. Abdul Huq.
10. Umanath Mozoomdar.
11. Aghorenath Chatterjee.
12. Kaliprosunno Dutt.
13. Kali Kumar Das.

COOCH BEHAR.

Class I.

Bhabotosh Banerjee.

Class II.

Nil.

Class III.

1. Gour Chunder Das.
2. Taranath Bose.
3. Hem Chunder Dutt.
4. Aghore Nath Roy.

DACCA.

Class I.

1. Petamber Banerjee.
2. Dwarkanath Bose.
3. Ramnarain Banerjee, B.A., B.L.
4. G. Dias.

Class II.

1. Annadaprasad Chatterjee.
2. Brojonath Bhuttacharjee.
3. Bunwari Lall Ghose.
4. Mohendra Nath Seal.

Class III.

1. Nobin Chunder Sen.
2. Anand Chunder Bose.
3. Chunder Mohun Mozoomdar, M.A., B.L.
4. Gyanada Sunker Bose.
5. Bholanath Das.
6. Kanye Lal Nag.
7. Abinash Chunder Neogee.
8. Prosunno Coomar Dutt.
9. Hemunt Coomar Roy.
10. Gostobehary Koondoo.
11. Beer Chunder Das.
12. Kaliprosunno Mookerjee.

CHITTAGONG.

Class I.

1. Hurry Mohun Sandyal
2. Kalisunker Sen.

Class II.

1. Poorno Chunder Sen.
2. Doorganand Das.
3. Gobind Chunder Das.
4. Jogendranath Seal.

Class III.

1. Juggurnath Das.
2. Hurrypuddo Ghose.
3. Nundolal Paramanick.
4. Rajcoomar Sen.
5. Keshub Lal Chatterjee.
6. Shoshi Mohun Talookdar.
7. Kuleemuddin Ahmud.
8. Udoy Chand Palit.
9. Bhugwan Chunder Bose.
10. Kalipuddo Chakravarti.

(*d.*) Son of Hurish Chunder Mookerjee.
(*e.*) Son of Goopee Mohun Mookerjee.

PATNA.

Class I.

1. E. R. T. Tiery, B.A.
2. Sivanundun Lall Roy, B.A.
3. Toolsoepershad.
4. Beepinbehary Paramanick.
5. H. Bradbury.

Class II.

1. Grish Chunder Sirkar.
2. Syed Moojibur Ruhman.
3. Abdur Ruheem Khan, (*f.*)

Class III.

1. Syed Ali.
2. Gopeekrishna.
3. Ramnirunjun Pershad.
4. Mohammed Mostanser Billah.
5. Rai Bishen Dutt.
6. Bikramjeet Lal.
7. Nowrungee Lal.
8. Shewshunkur Sing.
9. Bansidhur Pershad.
10. Mohammed Abdul Huq.
11. Sheik Abdool Guni.
12. Syed Basharaut Hossein,
13. Sheikh Hushmut Hossein.
14. Syed Waris Ali.
15. Sheikh Abdool Rahoman, (*g.*)
16. Syed Hasan Rezakhan.
17. Mohammed Waliullah
18. Remat Lal.
19. Sheikh Abdul Rahman, (*h.*)
20. Syed Mahomed Nazir.
21. Syed Golam Mahiuddin.
22. Syed Jowad Hossein.
23. Rameshur Sahoy.
24. Sheik Magfoorul Huq.
25. Kishoonpershad.

BHAGULPORE.

Class I.

1. Sha Mohammed Azim.
2. Omullo Charan Mullick.
3. Daviprashad.

Class II.

1. Imdad Ali.
2. Nujeemuddin Ahmed.
3. Mr. C. H. Swinden.

Class III.

1. Moti Lal.
2. Sajebun Lall.
3. Golam Lillahi.
4. Hurridas Roy.
5. Khoob Lal.
6. Emamoddin Khan.
7. Parmeshwar Dyal.
8. Malik Lateef Hossein.
9. Syed Muxood Hossein.
10. Syed Ahmed Hossein.
11. Sheikh Ahmedoollah.
12. Syed Koowal Ali.
13. Sheikh Nizamut Ahmed.
14. Rahamut Ali Khan.
15. Abdul Aziz.

ORISSA.

Class I.

1. Bhooya Abdur Ruhman.
2. Nund Kissore Das.

Class II.

1. Umacharan Chakravarti.
2. Kumudnath Mookerjee.

Class III.

1. Mohim Chandra Dass.
2. Opendro Chandra Mozoomdar.
3. Golokenath Mookerjee.
4. Doorga Dass Mookerjee.
5. Narain Chandra Naik.
6. Sreenath Banerjee.
7. Mohendranath Mullick.

CHOTA NAGPORE.

Class I.

1. Mr. P. T. Rebello, B.A., L.L.
2. Shamacharan Moitra, B.A.

Class II.

1. Fatic Chandra Das.
2. Hurrynarain Banerjee.
3. Bhoobendranath Roy.

Class III.

1. Prosunno Coomar Moitra.
2. Mohammed Kabeer.
3. Mohammed Medni.
4. Mohammed Furuk.
5. Mohammed Haneef.
6. Buriar Sing.
7. Burmeshurpershad.
8. Syed Fazeelut Hossein.
9. Shumsool Huq.
10. Sheikh Ali Hossein.
11. Goneshpershad.

(*f*) Son of Fuziee Ruhman Khan.
(*g.*) Son of Manwar Ali.
(*h.*) Son of Keramut Ali.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[First Publication.]

DECLARATION.

The 3rd September 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the public expense for a public purpose, viz. for the 2nd Section of the Tamore feeder road starting from the village of Saipara in pergunnah Dhomin, district Rajshahye, and terminating at the village of Dhorsa, in pergunnah Tegatchee, district Rajshahye, it is hereby declared that for the above purpose a strip of land running generally from west to east, passing through the villages as per margin, and measuring more or less 5 miles in length and 120 feet in breadth = 221 beeghas, is required.

Saipara.	Taspara.
Bhaloreea.	Nownugger.
Khourtee.	Hazrapara.
Taighree.	Badee Hazrapara.
Chandopara.	Pakoorea.
Jehanabad.	Baroeepara.
	Dhorsa.

This declaration is made under Section 6, Act X of 1870, to all whom it may concern.

J. F. K. HEWITT,
Offg. Junior Secy. to the Govt. of Bengal.

[First Publication.]

DECLARATION.

The 7th September 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up for the public purpose at the public expense, viz. for the construction of the Rungpore Station, in the villages of Shâjapore, Asruthpore, and Alumnuggur, pergunnah Koondee, in the district of Rungpore; also for the construction of the Overseer's houses and store-yards, &c., in the villages of Ramvadrapore and Badan; for the construction of a hospital and Executive Engineer's office in the village of Benodpore; for the construction of the Overseer's houses and store-yards in the village of Gopalpore; and also for the construction of the Buddergunge Station and the rice depôt in the village of Sunkerpore, it is hereby declared that for the above purposes pieces of land measuring 11*a.* 2*r.* 17*p.* in the villages of Shajapore, Asruthpore, and Alumnuggur; 1*a.* 6*p.* in the villages of Ramvadrapore and Badan; 1*a.* 1*r.* 38*p.* in the village of Benodpore; 8*a.* 1*r.* 12*p.* in the village of Shampore; 2*r.* 3*p.* in the village of Gopalpore; 9*a.* 2*r.* 34*p.* in the village of Sunkerpore, respectively, are required in the aforesaid villages, in the district of Rungpore.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

J. F. K. HEWITT,
Offg. Junior Secy. to the Govt. of Bengal.

JAIL DEPARTMENT.

The 5th September 1874.—Surgeon Gregg received over charge of the Dinagepore Jail from Surgeon F. C. Ghose in the forenoon of the 2nd December 1873, and again made over charge of this Jail to Mr. F. V. B. Webber in the forenoon of the 26th June 1874.

S. S. LYNCH,
for Inspector-General of Jails, Bengal.

HIGH COURT NOTICES.

Orders by the High Court of Judicature at Fort William in Bengal.

NOTIFICATION.

LEAVE OF ABSENCE.

The 5th September 1874.—Moulvi Abul Monseer, Moonsif of Bhotmari, in the district of Rungpore, is allowed sick leave of absence for four months from the date on which he may avail himself of it under Section 3, Supplement F of the Civil Leave Code.

The 7th September 1874.—Moulvi Dadur Buksh, Second Moonsif of Arrah, in the district of Shahabad, is allowed fifteen days' leave of absence *without pay* from 1st September 1874, under Section 9, Supplement F of the Civil Leave Code. The Moonsif's Serishtadar will remain in charge of the current duties of the office.

Moulvi Syud Imam Ally, Moonsif of Buxar, in the district of Shahabad, is allowed privilege leave of absence for one month from the 26th August 1874, under Section 21, Chapter VI of the Civil Leave Code. The Moonsif's Serishtadar will remain in charge of the office till relieved by the new Moonsif.

Baboo Bhugman Chunder Chuckerbutty, Moonsif of Bulpore, in the district of Beerbhoom, is allowed privilege leave of absence for seventeen days within the ensuing Dusserah vacation, under Section 21, Chapter VI of the Civil Leave Code. The Moonsif's Serishtadar will remain in charge of the current duties of the office during the Moonsif's absence on leave.

By order, &c.,

HIGH COURT, the 7th September 1874. H. J. S. COTTON, *Offg. Registrar.*

NOTIFICATION.

UNDER Rule 8, paragraph 2 of the Rules for the qualification, admission, and enrolment of Pleaders and Mooktears in the Mofussil Courts, the High Court direct that an attendance upon a full course of lectures in law at the High School, Midnapore, shall, during the incumbency of the present Law Lecturer, Baboo Kartick Chunder Mitter, M.A., B.L., qualify a candidate for the certificate therein mentioned.

By order, &c.,

HIGH COURT, the 8th September 1874. H. J. S. COTTON, *Offg. Registrar.*

Sheriff's Office, the 11th August 1874.

NOTICE is hereby given that the Eighth Criminal Sessions of the year 1874 of the High Court of Judicature at Fort William in Bengal, for the Town of Calcutta and Factory of Fort William and the places subordinate thereto, will be holden at the Court-House, in the Town of Calcutta, on Monday, the fourteenth day of September next, at 11 o'clock in the forenoon, and so on from day to day until the said Session be over. And it is hereby proclaimed that all persons who will prosecute any of the prisoners to be brought up for trial at the said Session be then and there to prosecute.

EDUCATIONAL NOTICES.

UNDER Rules 11 and 12 of the Junior Scholarship Rules, promulgated by the Government of Bengal in October 1872, it is hereby notified that a preliminary examination of candidates for Junior Scholarships will be held on the 5th and 6th October next, at the following places in the Patna Division :—

1. Patna Collegiate School.
2. Gya Zillah „
3. Arrah „ „
4. Mozufferpore Zillah School.
5. Chuprah „ „

The subjects of examination are—

1. Physical Geography
2. Drawing and Surveying.

The Committee for conducting the examination will consist of the District Education Committee, the Deputy Inspector of Schools, and one or more European and one or two more Native officials whom the Vice-President may select.

The Secretary to the District Committee will make all the necessary arrangements for conducting the examination.

The following gentlemen are to be the examiners, and they will set papers in the subjects mentioned against their names :—

Mr. J. K. Rogers ... ... Physical Geography.
Mr. J. Macnamara ... ... Drawing and Surveying.

Candidates should apply for enlistment to the Secretary to the District Education Committee at least 15 days before the day of examination, with certificates from their teachers and specimens (certified by the teachers) of their survey work and drawing. A fee of one rupee will be required from each candidate for enlistment

DURGA GATI BANERJEA, *Personal Asst. to Commr., for Commissioner.*

The 29th August 1874.

1874.

PHYSICAL GEOGRAPHY AND SURVEY EXAMINATION.

CIRCULAR.

IN accordance with paragraph 10 of the Junior Scholarship Rules promulgated by the Resolution of His Honor the Lieutenant-Governor, dated 5th October 1872, an examination of candidates for Junior Scholarship, who desire to obtain the certificates of qualification in Drawing, Surveying, and Physical Geography, will be held in the Kishnaghur College, Jessore Zillah School, and Senate House, Calcutta, on the 6th October 1874.

2. There will be set one paper in Surveying and Plotting at 10-30, and one paper in Physical Geography at 2, on the same day. Two and a half hours will be allowed for each paper. Specimens of the Survey work and of the Drawings done during the year will be submitted as directed in paragraph 5 below. There will be no separate examination paper set in Drawing.

3. A fee of one rupee will be paid by each candidate to the Head Master of the School to which he belongs; the Head Master will send nominal lists of candidates who have paid the fees to the Inspector of Schools, Presidency Circle, No. 22, Chowringhee Road, on or before the 20th September.

4. The candidates must be furnished with certificates of having paid their fees, and produce them to the Officer in charge of the examination at each centre, in order to be admitted to it. But the Officer in charge may admit any other boys he thinks fit to the examination.

5. Each candidate will deliver in the course of the day (at such time as may be convenient to the Officer in charge of the examination) the specimens of his Survey work and Drawings done during the year. The Officer in charge of the examination will see that each sheet of the specimens submitted is signed by the Head Master of the candidate's school, which will be understood as the Head Master's certificate that the sheet so signed is the genuine work of the candidate.

6. For the Surveying paper, each candidate will be allowed to bring into the examination hall a scale, a ruler, a protractor, and a pair of compasses with pencil leg.

7. The examination at each centre will be superintended by the following officers :—

SENATE HOUSE ... Babu Mahendra Nath Ray, Deputy Inspector of Calcutta.
„ Radhikaprasana Mukerjee, Deputy Inspector of 24-Pergunnahs.
„ Mahendra Nath Datt, a Sub-Inspector of Alipore, and Babu Braja Nath Lahiri.
KISHNAGHUR COLLEGE „ Rajkrishna Ray Chowdhuri, Deputy Inspector of Schools, Nuddea.
JESSORE SCHOOL ... „ Jagat Chandra Banerjee, Deputy Inspector of Jessore, and Head Master, Jessore School.
PURULIA ... ... Deputy Inspector and Head Master, Zillah School.
RANCHI ... ... Ditto ditto, ditto.

C. B. CLARKE, M.A, *Offg. Inspr. of Schools, Presidency Circle.*

No. 22, CHOWRINGHEE ROAD, the 26th August 1874.

IN accordance with the Resolution of Government, published in the *Calcutta Gazette* of 7th January 1874, paragraph 26, a special class will be established at the Presidency College for a (4) four months' Course from 15th September to 15th January next, provided 25 candidates enroll themselves for admission before the former date. An entrance fee of Rs. 5, with a monthly fee of Rs. 3, is required to be paid by each candidate on admission. No admission to this special class can be made after the 15th September.

CHARLES H. TAWNEY,
Offg. Principal, Presidency College.

The 22nd August 1874.

THE 6th and 7th of October are the dates fixed for the examination of Candidates for Junior Scholarships, who are prepared to qualify in Physical Geography, Surveying, and Drawing.

The following instructions are issued for the guidance of Masters and Candidates:—

1. Candidates from schools in the districts of Hooghly, Howrah, and Burdwan, will present themselves for examination at the Hooghly Normal School. Candidates from schools in the districts of Midnapore, Beerbhoom, and Bankoora, will present themselves at the Midnapore High School and the respective zillah schools.

2. A fee of one rupee will be paid by each candidate to the Head Master of the School to which he belongs. The Head Master will send a nominal list of candidates who have paid fees to the Inspector of Schools, Western Circle, Chinsurah, before the 10th of September, and will credit the fees collected to the school funds.

3. Each Candidate presenting himself for examination must be provided with a certificate of having paid the prescribed fee, and of having studied twelve months at the school from which he presents himself.

4. Head Masters on or before the 1st of October will despatch to the address of Mr. W. H. Wells, C.E., Chinsurah, in registered covers, specimens of each Candidate's survey work and drawing. Each set of specimens should consist of two sheets of drawing, and three specimens of survey work executed with (1) the chain only, (2) with the compass and plane table, and (3) with field-book and compass. The signatures of the Head Master and Survey Master must be attached to each specimen, and it will be understood that the specimens so signed are the genuine work of the Candidate.

5. For the survey paper each Candidate will be allowed to bring into the examination room a scale, a ruler, a protracter, and a pair of compasses.

6. The examination will commence at 11 A.M. each day, and three hours will be allowed for each paper.

KALI PUDDO MOOKERJEE, *Offg. Persnl. Asst. to Commr., for Commr.*

NOTIFICATION.

No. 943B.

IT is hereby notified that the Custom House will be open during the Doorga Poojah Holidays for the transaction of business as usual on the following dates:—

October 15th.	October 23rd.
,, 16th, up to 2 P.M.	,, 26th.
,, 22nd.	

Any persons having payments to make on those dates are informed that they must deposit with the Collector of Customs, by noon of October 14th, either a receipt or guarantee from the Bank of Bengal for a specific amount, beyond which credit will not be given to them.

No cash can be received on any account.

A further guarantee will be taken from all merchants, firms, and other persons using the Custom House on the dates in question, that they will each bear such share of the additional expenditure required for keeping open the Custom House on the said dates as may be adjudged by the Collector, the total expenditure required being estimated at about Rs. 2,000.

BOARD OF REVENUE, L.P., Fort William, the 2nd September 1874.

OPIUM NOTIFICATION.

No. 915B.

NOTICE is hereby given that the Tenth Sale of Opium, the provision of 1872-73, will be held at the Government Opium Sale-Room, No. 2, Bankshall Street, on Friday, the 2nd October 1874, at 11 A.M., and will comprise 3,750 chests, viz.—

	Chests.
Behar Opium	2,185
Benares „	1,565
Total ...	3,750

2. The general conditions of the sale now advertised will be the same as usual; they may be ascertained by reference to the Notification issued on the 8th November 1873, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3. The latest date for deposit will be the 7th, and that for clearance, owing to the intervention of the Doorga Poojah Holidays, will be the 28th October 1874, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public Securities, that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the Sale-room, will be received after 4 P.M. of Wednesday the 27th October 1874, and no Bank of Bengal Receipts in full payment of lots will be accepted after 4 P.M. of Wednesday, the 28th October 1874.

4. In addition to the quantity above advertised for sale, the following quantities, more or less, of Behar and Benares Opium will be brought to sale in the present year on or about the dates specified below. The Member-in-Charge of the Opium Department, however, reserves to himself the right of altering these dates, should circumstances render it expedient to do so:—

BOARD OF REVENUE, L. P., FORT WILLIAM, the 25th August 1874.

CENTRAL RELIEF FUND.

Proceedings of the 21st Meeting of the Executive Committee of the Central Relief Committee, held on the 29th July 1874.

PRESENT:

The Hon'ble John Inglis, C. S. I., *Chairman.*

The Hon'ble J. R. Bullen Smith.
The „ T. M. Robinson.
The Hon'ble Rajah Jotendro Mohun Tagore.
Monshee Amir Ali, Khan Bahadoor.

1. The proceedings of the last meeting were read and confirmed.

2. The Chairman read a letter from His Honor the Lieutenant-Governor of Bengal, accepting the proposals of the Committee as contained in their resolution of the 6th of July last, on the question of the applicability of their funds to the purchase of Government grain expended in charitable relief in the very distressed districts.

Resolved—That as the Government's letter was written before the resolution of the 14th July had been communicated, His Honor be asked whether he would wish to make any further suggestions with reference to the later resolution which renders the Committee liable to a much heavier expenditure than does that of 6th July. The Committee are unwilling to pledge themselves to the expenditure called for under His Honor's letter till they know the extent of their liabilities under the resolution of the 14th July. The Committee trust that His Honor will favor them with information on this point.

3. The Chairman read a letter from the Government of Bengal to the address of the Commissioners of the divisions concerned, intimating that the Committee's funds will not bear the cost of Government grain expended in charitable relief in the districts of Tirhoot, Chumparun, North Bhagulpore, Dinagepore, Rungpore, and Maldah.

Resolved—That the letter be recorded.

4. The Chairman produced the latest cash accounts and statements of persons relieved in the following districts, viz.—

Bankoora.
Howrah.
Chumparun.
Gya.
Hazareebagh.
Lohardugga.

Also forecasts of requirements from the Relief Commissioner in the Rajshahye Division; the Bhagulpore Division, the Patna Division, the Rajshahye District, the Manbhoom District.

Resolved—That these be abstracted.

5. The Chairman read two applications for aid for the destitute in Calcutta. Mr. Stuart Hogg applied for Rs 50,000 in behalf of the District Charitable Society, and His Grace Archbishop Steins applied for Rs. 3,090 to enable him to carry on 3 charitable institutions for the next 3 months. In both applications it was represented that owing to

the famine the number of persons seeking and requiring relief was very considerably increased, while, owing to high prices, the societies' means of affording relief were materially contracted. Thus, while the number of the destitute in the metropolis was abnormally great, the amount of relief afforded was abnormally small, and many people in great need of help had to be sent away without it. As this state of things was immediately due to the famine, application for relief was made to the Famine Relief Committee.

Resolved—That the sum of Rs. 1,030 be remitted to His Grace Archbishop Steins, with a request that he will apply again should he need further sums after this amount was expended.

That the sum of Rs. 10,000 be remitted to Mr. Hogg for the District Charitable Society, with a request that he will favor the Committee with a further account of the extent and scope of the Society's operations, when the question of making a further grant will be considered.

6. The Chairman also read applications for aid in money from Mr. Hills, of Banda, in the North-Western Provinces, and from the Commissioner of Fyzabad, in Oudh.

Resolved—That these gentlemen be referred to the Central Committees in the North-Western Provinces and Oudh, respectively, and that if those committees consider the relief asked for to be necessary, and have not funds available for the purpose, this Committee will, in accordance with their resolution of the 11th May 1874, at once remit what is required.

7. The Chairman read an application from the Revd. Mr. Delplace, of the Roman Catholic Mission in the Soonderbunds, for the relief of certain villages in his neighbourhood.

Resolved—That the Revd. Mr. Delplace be asked to make his application through the Relief Committee, or the Commissioner of his district.

8. The Chairman read a letter from the Commissioner of Burdwan showing the measures adopted by that officer in the case of the fever-stricken poor of his division. The Commissioner mentioned that he had been ordered to observe, as a genaral rule, that when relief was required in the form of subsistence only, that subsistence was to be given in food, and not in money to buy food. He expressed a hope that the Committee would ask Government to relax the restriction as to cash payments sufficiently to allow him to make them at his discretion.

Resolved—That the Commissioner be informed that it does not come within the Committee's province to address the Government on such a subject.

9. The Chairman read a letter from the East India Famine Relief Fund Sub-Committee of Bombay advising a remittance of Rs. 20,000.

Resolved—That the remittance be suitably acknowledged.

Proceedings of the 22nd Meeting of the Executive Committee of the Central Relief Committee, held on the 5th August 1874.

PRESENT:

The Hon'ble John Inglis, C.S.I. | The Hon'ble Rajah Jotendro Mohun Tagore.

1. The proceedings of the last meeting were read and confirmed.

2. The Chairman read a letter from the Collector of Monghyr, forwarding the sum of Rs. 8,845-9-3 in part payment of a contribution of Rs. 9,000 from Koomar Shew Prosad Sing. The Collector asked the Committee to remit Rs 5,000 of the amount to Tirhoot, in accordance with letter of the Government of Bengal No 235T.F., dated 14th May 1874.

Resolved—That the Collector be informed that the money is returned to him, as it is not contributed to the funds at the disposal of the Committee, but for the special purpose of relieving the people of the Tirhoot and Monghyr districts. The money therefore should have been remitted to the Local Relief Committees at Monghyr and Mozufferpore.

3. The Chairman read a letter from the Government of Bengal supporting a recommendation of the Commissioner of Patna that grain expended in charitable relief by the Hutwa Estate, in Sarun, should be charged against the Committee's funds at the following rates, viz.—Rice at 9 seers per rupee, gram at 11½ seers, and mixed grain at 12½ seers.

Resolved—That the Commissioner of Patna be asked to explain on what principle the Committee's funds are to be charged for grain charitably expended by the estate of the Hutwa Rajah.

4. The following applications were laid before the meeting, viz.—

		Rs.
From the Collector of Midnapore	...	2,000, for August.
,, ,, of Tirhoot ...	...	50,000, for July.
,, ,, of Sarun ...	...	1,00,000, for August and September.
,, ,, of Chumparun	...	15,000
,, ,, of Beerbhoom	...	16,000, for August.
,, ,, of Bankoora	...	33,000, for July and August.
,, ,, of Burdwan	...	1,50,000, for August.
,, Commissioner of Patna	...	500, for August.
Total	...	3,66,500

The Collector of Tirhoot intimated that he would require Rs. 50,000 a month for three more months.

Resolved—That these applications be granted.

5. The Chairman laid before the meeting the cash accounts and statements of persons relieved during June in the districts of Midnapore and Beerbhoom.

Resolved—That these be abstracted and recorded.

6. The Chairman read a letter from Colonel Puckle, of the Bangalore Relief Committee, enclosing, as a further contribution to many previously received, a transfer receipt for Rs. 214-7, being the closing remittance.

Resolved—That the Secretary convey to Colonel Puckle the thanks of the Committee for the exertions of himself and other members of the Bangalore Committee.

7. The Chairman laid before the meeting a bill for Rs. 3-1 incurred for postage in transmitting the Committee's correspondence.

Resolved—That the bill be passed.

JOSEPH ARMSTRONG, C.S., *Collector.*

COLLECTOR'S OFFICE, POOREE, the 15th August 1874.

Notice

Is hereby given that the sale of the lot of waste land consisting of about 697 acres, situated in mouzah Teliachaporee, in the District of Nowgong, which was advertised at page 21 of the *Assam Gazette* of the 9th May 1874, to take place on the 2nd of September 1874, at the Office of the Deputy Commissioner of Nowgong, will not take place, the applicant for the lot having withdrawn his application.

The 27th August 1874. J. F. SHERER, *Deputy Commissioner of Nowgong.*

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the Office of the Deputy Commissioner of Cachar, will be sold by public auction at the said Deputy Commissioner's Office at 12 o'clock on the 2nd December 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste land) or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Cachar.

SCHEDULE.

A lot of waste land consisting of about 538 acres 3 roods and 39 poles, situated in mouzah Captainpore, pergunnah Rupaibalee, known as Digur Telka, in the district of Cachar, and bounded as follows:—

North.—A line from pillar A, at Indrokhall, to pillar B at a distance of 1,276 yards, thence to pillar C at a distance of 896 yards.

West.—A line from pillar C to pillar D at a distance of 876 yards, thence to Cheetulkhall at a distance of 486 yards.

South.—A line from Cheetulkhall to pillar E at a distance of 806 yards, thence to pillar F at Chikurmattee Khall at a distance of 1,190 yards.

East.—A line from pillar F to a point touching Indrokhall at a distance of 152 yards, thence to pillar A along the bank of Indrokhall at a distance of 712 yards.

O. G. R. MCWILLIAM, *Offg. Dy. Commissioner.*

The Budge Budge Jute Mills Company, "Limited."

AN Extraordinary General Meeting of Shareholders will be held at the Registered Office of the Company, No. 7, Clive Row, at noon on Wednesday, the 23rd instant, when it is intended to propose the following Resolution:—

A Special Resolution that the Articles of Association of the Company be added to by inserting the following clauses:—

"The Directors may, with the sanction of a Special Resolution of the Company previously given in general meeting, increase its capital by the issue of new shares, such aggregate increase to be of such amount and to be divided into shares of such respective amounts as the Company in general meeting directs; or if no direction is given, as the Directors think expedient.

"Subject to any direction to the contrary that may be given by the meeting that sanctions the increase of capital, all new shares shall be offered to the members in proportion to the existing shares held by them, and such offer shall be made by notice specifying the number of shares to which the member is entitled, and limting a time within which the offer, if not accepted, will be deemed to be declined; and after the expiration of such time, or on the receipt of an intimation from the member to whom such notice is given that he declines to accept the shares offered, the Directors may dispose of the same in such manner as they think most beneficial to the Company.

"Any capital raised by the creation of new shares shall be considered as part of the original capital, and shall be subject to the same provisions with reference to the payment of calls and the forfeiture of shares on non-payments of calls, or otherwise, as if it at had been part of the original capital."

Dated this seventh day of September 1874.

By order of the Directors,

(350—3) ANDREW YULE AND CO., *Agents.*

Cocheella Tea Company, "Limited."

The Hymns of the Rig-Veda, in the Samhita and Pada Text, by Professor F. Max Müller, M.A., in two Volumes. *Price Rs. 24; packing and postage, Re. 1-12.*

*** The Rig-Veda, the oldest book of Indian literature, has very properly been made one of the principal class-books for those who study Sanskrit in the schools and colleges in India, and though at present a scholar-like knowlege of the Vedic hymns is in the examinations required of the more advanced students only, yet, as soon as editions, translations, grammars, and dictionaries shall have rendered the study of these ancient documents more accessible, I doubt not that the time will come when no one in India will call himself a Sanskrit sholar, who cannot construe the hymns of the ancient Rishis of his country.—*Extract rom Preface.*

In Two Vols., foolscap folio.

PART V.

Act of the Legislative Council of India.

Government of India.

LEGISLATIVE DEPARTMENT.

[First Publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 2nd September 1874, and is hereby promulgated for general information:—

ACT No. XII OF 1874.

An Act to provide for the exercise, in Sylhet, of the powers of the Lieutenant-Governor and Board of Revenue of Bengal.

Preamble.

WHEREAS the District of Sylhet is about to be transferred from the Lieutenant-Governorship of Bengal to the Chief Commissionership of Assam, and it is therefore necessary to provide for the exercise, within the said District, of the powers now vested in, or exerciseable by, the Lieutenant-Governor of Bengal and the Board of Revenue for the Lower Provinces of the Presidency of Fort William in Bengal, respectively; It is hereby enacted as follows:—

Powers of Lieutenant-Governor and Board in Sylhet transferred to Governor-General in Council.

1. All powers over the whole or any portion of the said District, which at the time of the said transfer are, under or by virtue of any law or regulation, vested in, or exerciseable by, the said Lieutenant-Governor or Board of Revenue, shall, on the said transfer, become vested in the Governor-General in Council.

Delegation of such powers.

2. The Governor-General in Council may, from time to time, delegate to the Chief Commissioner of Assam all or any of the said powers, and withdraw any powers so delegated.

WHITLEY STOKES,
Secy. to the Govt. of India.

BENGAL FAMINE.

TWENTY-FIFTH SPECIAL NARRATIVE OF THE DROUGHT IN BENGAL FROM THE 21ST AUGUST TO THE 3RD SEPTEMBER 1874.

Weather and Rainfall.—The continued absence of rain throughout a considerable part of the country still causes a good deal of anxiety, especially in the Hooghly and Burdwan districts, and a small part of Beerbhoom. In Mudhoobunnee and the south of Tirhoot the rainfall of the last month has been very scanty; but a telegram received on the 1st September reported that three inches of rain had fallen that day at Durbhunga, and more was expected.* This will in all probability be more than a local fall, and must do much good. From the Rajshahye Division there still continue to be complaints of want of rain, chiefly from Rungpore. In the Moorshedabad and Rajshahye districts, and throughout the Presidency Division the prospects have somewhat improved. The rising of the Ganges is said to have benefited the rice crops in Fureedpore; and though it has caused damage in parts of Behar, yet the fertilising deposits left will insure a good cold weather crop in the inundated tracts; so that, on the whole, the good effected will probably more than balance the harm done.

Prospects of Crops.—The autumn crops, which are now being reaped throughout the country, are on the whole giving a more than average yield. The produce has been especially large in the Rajshahye Division, and the prospects of the crops throughout the Bhagulpore, Patna and Chota Nagpore Divisions, where the harvest is somewhat later than in Rajshahye, are generally reported to be exceedingly good; even in Tirhoot, where the produce is least, there seems to be likely to be, on the whole, little less than an average yield from the area sown.

* *Note.*—A later telegram reports two inches of rain at Mozufferpore on the 2nd. The fall is said to have extended to the South of Tirhoot.

Throughout the Burdwan and Presidency Divisions the crop has been, on the whole, a fair one; in the 24-Pergunnahs there is said to be somewhat under an average crop, but in Hooghly a fair outturn is looked for. These crops have been much more extensively sown this year than they usually are, and consequently their effect on the food-supply will probably be more marked than in ordinary years, though, even in the best districts, the relief thus given can be but temporary, and the state of the people during the coming year must in the main depend upon the late rice crop. The outturn of this crop cannot be predicted with any confidence for some weeks to come, but throughout the greater part of the country it may be said that the prospects are good, and in the larger part of the Chota Nagpore, Bhagulpore, Cooch Behar Divisions, and a large part of the Patna Division, there is good reason to expect, if the weather continues to be as seasonable as it has hitherto been, that the yield will be unusually large; on the other hand, in the Rajshahye and Presidency Divisions and the Tirhoot district, though there has been no actual damage done to the crops as yet, (except in a small area in Moorshedabad and in parts of Durbhunga and Mudhoobunnee,) the small rainfall of the last month has caused considerable anxiety, and if rain holds off for many more days, considerable loss will ensue. In the Burdwan Division, the crops in part of Howrah, the greater part of Hooghly, a large part of the Burdwan district, and those in a small tract in Beerbhoom, have certainly suffered from drought, and probably, even under the most favorable circumstances, the harvest in these districts will be a light one, as the transplanting season has all but passed away, and a considerable portion of the crop has not yet been removed from the seed-beds; but still much may be hoped from favorable rains throughout September and October even in the worst tracts, and irrigation which is being largely resorted to, especially in Hooghly, will give a crop in many places even should rain fail to fall. The jute crop generally promises exceedingly well, and the profits of the sale of the fibre will prove an important addition to the resources of the ryots in the eastern districts and those of the Presidency Division where it is largely grown.

Prices.—Prices are on the whole steady, and, as was to be expected from the uncertain character of the season, tend to maintain their high level even where a large autumn crop has been reaped, as in Dinagepore. Where prices had previously fallen owing to the yield of the autumn crops, anxiety for the coming crop has tended to cause a recovery in Rungpore, where prices have risen from 20-13 to 18 seers. Throughout the Patna and Bhagulpore Divisions enough of the autumn crop has not been reaped to affect the market in any marked degree, and prices remain much as before. They have fallen in Patna, Gya, Tirhoot, and Chumparun, and have somewhat risen in Monghyr, Bhagulpore, Purneah, and the Sonthal Pergunnahs. In Chota Nagpore the fall has been general except in Singhboom, where prices remain stationary; and in Lohardugga rice is considerably cheaper than it was at this time last year. In the rest of the country the fluctuations are as follows. Prices have fallen in Burdwan and Bankoora, and have risen in Midnapore, Hooghly, Howrah and Beerbhoom, but except in Beerbhoom, where the rise has been very great, from 12·8 to 9·12, the rise in the other districts has been insignificant. In the central districts, prices have fallen in Nuddea, Jessore, Maldah, Rajshahye, Bogra, Darjeeling, and Julpigoree, have risen in the 24-Pergunnahs, Moorshedabad, Dinagepore and Rungpore, and have remained stationary in Pubna. In the eastern districts, there has been a fall of prices in Chittagong and Tipperah, and a rise in Backergunge, Mymensingh, Sylhet and Noakholly. There is no change to record in Dacca and Fureedpore. In Orissa, prices are generally stationary with a slight tendency to fall.

Private Trade.—The usual note on the movement of food-grains will be found in Appendix A. Private trade has almost ceased; that on the railways shows a large decrease, and the river traffic is insignificant. The trade are evidently waiting till something more certain can be known as to the turn events will take.

Tirhoot.—The district statements show a considerable improvement in this district, but whether this is to be regarded as merely temporary or as a beginning

towards a return to a normal state of prosperity depends upon future prospects. At present the prospects of the district can only be described as uncertain. In the north-west, things promise exceedingly well, but they are more uncertain in the east and south, though there is probably only a very small area where a copious fall of rain would not suffice to turn the present somewhat gloomy outlook into one of the most hopeful character.

Chumparun.—The latest accounts given in a telegram received on the 1st September describe the prospects of the district as exceedingly good towards the north and west, but some anxiety is expressed about the rice crop in the south-east. Distress continues to decrease.

Sarun.—There is nothing new to report about this district. Distress still continues owing to the great poverty of the people rather than to a deficiency of food. There has been some damage done by floods in the south-east of the district.

South Behar.—The prospects continue to be excellent. Some damage from floods has been reported in the Patna and Shahabad districts, but there is no reason to believe that it is of a serious character.

Bhagulpore Division.—The general prospects of this division are most excellent, and distress is rapidly decreasing. More rain is wanted in the north of the Bhagulpore district, but there is nothing like drought, while the autumn crops are most excellent. In parts of the Sonthal Pergunnahs there are slight complaints of a superabundance of rain.

Rajshahye Division.—The autumn crop in the districts of this division has been reaped and has turned out most excellent. This has tended greatly to mitigate distress, and if the winter rice crop were secure all anxiety with regard to the division might very soon cease; at present, however, the prospects of the crop in almost all the districts are somewhat critical. The rainfall of the past month has been scanty and more rain is wanted, though it is only in a very limited tract in Moorshedabad that any damage has yet been caused. With a good rainfall in September and the early part of October a bumper crop would almost everywhere be reaped.

Chota Nagpore Division.—This has almost passed out of the category of distressed divisions. There is still distress in Manbhoom, but there it is decreasing, and in other districts it has almost disappeared. The prospects throughout the greater part of the division are unusually good.

Burdwan Division.—Though the numbers in the receipt of charitable relief have somewhat decreased in this division, yet the decrease is to be attributed to greater vigilance on the part of the relief officers, which has been rendered possible by the increase of the staff rather than to any actual diminution of distress. The prospects of the greater part of the Hooghly and Burdwan districts and those of a small part of Howrah are so critical as to leave but little hope of an immediate mitigation of distress, unless there be an unusually copious fall of rain sufficient to cause the mahajuns to open their stores. In the remaining districts, except in a small part of Bheerbhoom, there is reason to hope that as prospects are improving distress will soon decrease. The embankments of the Damoodah are being cut in Hooghly and water supplied to the fields wherever it is possible to do so.

Relief Works.—The following statement shows the numbers on relief works during the fortnight as compared with that preceding it:—

	Last fortnight.	This fortnight.
Patna Division	237,005	238,404
Gunduk Embankment	10,868	8,421
Soane Canal	26,874	24,088
Bhagulpore Division	54,252	47,658
Rajshahye Division	57,296	44,920
Northern Bengal Railway	5,537	4,851
Chota Nagpore and Burdwan Division ...	32,536	24,770
Cooch Behar Division	2,370	2,290
Total ...	426,738	395,402

The above returns show a decrease which is general except in the Tirhoot and Sarun districts of the Patna Division, the Moorshedabad district, and the districts of the Burdwan Division. In these last the increase appears to have been universal, for in Hooghly, which alone shows a decrease, the returns are imperfect.

The following tabular statement shows the numbers employed in each district with details as far as they are available of those employed on task or piece-work and on daily wages :—

Divisions.	Names of Districts.	Laborers under Public Works Department.	Laborers under circle officers.	Total laborers.	Task or piece-work.	Daily wages.

	Grand Total ...	196,232	199,170	395,402	.....	.....

(a.) Includes Seetamurhee laborers from returns received by telegram.

(b.) Only a few laborers are now employed on ordinary road-work. All strictly relief works have been closed.

(c.) Returns imperfect.

Gunduk Canal and Embankment.—Work is progressing on the 4th and 11th mile of the canal; 804,300 cubic feet of earthwork were excavated during the fortnight. Five miles of boundary road have been finished. On the embankment the principal work done has been raising the embankment, and turfing and dressing what had been previously completed. 1,683,070 cubic feet in addition to 743,334 square feet of dressing and turfing were completed. The demand for labor is said to have been very small.

Soane Canal.—Progress has been somewhat retarded by heavy rain. Twenty-five lakhs of cubic feet of earthwork were excavated in the Kurumnassa Division during the fortnight.

Northern Bengal Railway.—There still continues to be but little demand for labor on those portions of the line where work can be carried on, and the laborers in the flooded tracts though wanting work are not sufficiently eager for it to leave their homes to seek it. The total amount of earthwork completed up to date is 73,581,000 cubic feet, equal to 151½ miles of 4-foot bank with a top width of 15 feet. During the fortnight more than 18½ lakhs of cubic feet of earthwork were thrown up. 103 miles of feeder roads have been made. Sickness is very prevalent among the members of the railway staff.

Charitable Relief.—The following statement shows the numbers of persons in the receipt of charitable relief in each district as compared with the previous fortnight :—

Divisions.	Names of Districts.	Number of centres.	This fortnight.	Last fortnight.
Patna	Tirhoot, North	681	166,760	208,072
	Tirhoot, South		22,666	27,220
	Chumparun	47	10,970	11,732
	Sarun	71	97,528	44,337
	Patna	None.	None.	None.
	Gya	11	1,720	2,120
	Shahabad	15	4,213	5,520
	Total	825	303,857	299,001
Bhagulpore	Monghyr	16	431	10,771
	Bhagulpore	12	10,885	7,872
	Purneah	55	6,975	14,053
	Sonthal Pergunnahs	.....	3,511	3,365
	Total	83	21,802	36,061
Rajshahye	Maldah	78	7,384	9,415
	Dinagepore	447	27,245	39,423
	Rungpore	13	1,856	4,601
	Bogra	4	19,497	37,080
	Moorshedabad	44	23,397	19,787
	Rajshahye	44	18,791	25,655
	Pubna	.....	6,274	4,919
	Total	630	104,444	140,880
Chota Nagpore	Manbhoom	.....	13,576	21,948
Burdwan	Hooghly	.....	13,222	17,768
	Beerbhoom	.....	38,121	31,195
	Bankoora	.....	32,449	32,802
	Burdwan	.....	64,358	67,895
	Total	.....	148,150	149,660
	Grand Total	.....	591,829	647,550

The decrease in numbers is almost general, the only districts that show an increase being Sarun, Bhagulpore, Moorshedabad, and Bheerbhoom. In Bhagulpore the increase is only nominal, as the returns for the previous fortnight were imperfect. Had the full numbers been shown, the present fortnight's return would show a decrease. The total numbers on relief works and charitable relief for the present fortnight are 987,231 against 1,074,288, as shown in the previous narrative, being a total decrease of 87,057 persons.

By order of the Lieutenant-Governor of Bengal,

J. F. K. HEWITT,

Offg. Junior Secy. to the Govt. of Bengal.

APPENDIX A TO THE 25TH SPECIAL NARRATIVE.

Movement of Food-grains.

1. THE exports of food-grains from the Bengal Presidency during the first half of August were 4,437 tons.

The imports to Calcutta during the same period were 1,951 tons; of which only 4 were on Government, and 1,947 on private account. The bulk of the latter were from Balasore.

The total figures from the beginning of November 1873 to the middle of August 1874 are—

	Tons.
Exports from the Bengal Presidency	254,311
Imports to the Port of Calcutta	445,843

2. The following figures show (in tons) the quantity of food-grains "sent up from stations *below* Rajmehal and Jamooee, and down from stations *above* Mirzapore, which was delivered at stations between Rajmehal and Buxar (inclusive)" between the 9th and 22nd of August, compared with the figures for the previous fortnight :—

	This fortnight.	Last fortnight.	Decrease.
Up	4,263	4,301	38
Down	723	15,178	14,455
Total ...	4,986	19,479	14,493

The decrease is owing to the close of the Government transport operations and to the return to the ordinary rates of freight for private grain. The totals to date (from the beginning of November) of the returns on which the above figures are based, and which are for Behar only, are given below. The "up" figures are only approximately correct. Appendix B, however, shows in detail the destination of all the Government grain sent up from Howrah since the commencement of operations.

	Government grain.	Private grain.	Total.
Up	290,356	156,531	446,887
Down	39,330	215,327	254,657
Total ...	329,686	371,858	701,544

3. The importations of food-grains by the eastern canals from the 15th to 28th August were 1,617 tons (against 1,688 tons during the previous fortnight), making in all 205,243 tons since 1st October 1873.

4. The private traffic registered on the Ganges is as shown below:

Stations.	Date.	Direction.	Tons.	To date from 1st November 1873. Tons.
Sahebgunge	16th to 22nd August ...	Up the Ganges ...	452	43,142
Ditto	Ditto ...	Down the do. ...	861	24,952
Goalundo	2nd to 15th August ...	Up the do. ...	252	28,487
Kooshtea	Ditto ...	Down the do. ...	125	13,151

The grain sent upward was chiefly rice the greater part of that sent down was wheat and gram for the Calcutta market.

The 2nd September 1874.

G. TOYNBEE, C.S.,
On Special Duty.

APPENDIX B TO THE 25TH SPECIAL NARRATIVE.

Return of Grain despatched from Calcutta up to Monday, the 31st August 1874.—(*Gross Railway weight.*)

G. Toynbee, C.S.,
On Special Duty.

No. 1943F, dated Bankipore, the 22nd August 1874.

From—A. C. MANGLES, Esq., Collector of Patna,

To—The Offg. Secy. to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit the following narrarive for the fortnight ending Saturday, the 22nd instant.

A.—STATE OF THE COUNTRY.

2. The several bazars in this district continue to be abundantly supplied with food-grains of all sorts, and no deficiency is reported from anywhere. The importation from other districts has considerably fallen off, the figure for the week ending the 15th instant being only 12,687. This is owing to the exceedingly good prospects of the bhadoi crops.

3. The following were the prices of grain obtaining in the principal bazars towards the close of the fortnight:—

	Best rice.		Common rice.		Wheat.		Barley.		Maize.		Gram.	
	S.	C.	S.	C.	S.	C.	S.	C.	S.	C.	S	C.
Patna	12	0	17	0	17	0	19	12	17	0	19	12
Barh	10	0	10	8	13	8	16	0	15	0	19	0
Behar	10	8	11	8	13	8	18	0	27	0	17	0
Dinapore	10	0	12	8	16	0	.....		16	12	18	0

The Sub-divisional officer of Behar reports that "makie" (maize) is selling at 36 seers per rupee in the interior of the district and murwa 30 seers.

4. We had during the fortnight rainfall amounting to 2·67 inches at head-quarters, 5 inches at Dinapore, 6·03 inches at Barh, and 5·83 at Behar. The prospects of the bhadoi crops generally throughout the district are very favorable indeed, except in the Dearahs where the land is submerged by the floods every year.

Indian corn is coming into the market, and the demand for forign maize has almost disappeared. The Sub-divisional officer of Behar reports—

"I have now to add that on account of a larger area being this year sown with bhadoi seeds than is done in ordinary years, the outturn is 4 to 8 annas in excess of that of an average good year." Regarding the prospects of the rice crop he says—"It (the rain) has helped the transplantation of paddy to a very considerable extent. No one can now say that for want of water his field was not sown. It is really a pleasent sight now to see scores of women with bundles of green plants besides them singing at the top of their voices and merrily going on with their work." The other sub-divisional officers report equally favorably of the prospects of the rains and winter crops. One of my Sudder Station Deputy Collector who went to the south, and another who went to the west of the Sudder Sub-division, last Sunday, both speak very favorably of the prospects of the standing crops.

5. The condition of the people is reported upon as favorable throughout the district, and there was no case of misery or starvation reported from anywhere.

6. Five cases of grain theft were reported during the fortnight, all of ordinary description and none of robbery.

7. Twenty-three emigrants were registered and despatched to Calcutta for British Burmah during the fortnight and 48 for the Natal colony.

B.—RELIEF WORKS.

8. None.

C.—TRANSPORT OF GRAIN.

9. The following are the figures showing the importation of food-grain by private parties during the fortnight ending the 15th instant:—

	Rice.	Wheat, oat, and barley.	Maize.	Other grain.
By rail	5,833	51,677	7,251	67,770
„ river	9,000	300	25	5,505
Total ...	14,833	51,977	7,276	73,275

or a grand total of 1,47,361 maunds.

D.—STORAGE OF GRAIN.

10. I have since the submission of the last narrative found means for despatching the 1,139 maunds of rice stored in the Pallygunge gola of this district by boats to Doorugunge in the Sarun district, and the Kanoongo told off by me for the purpose has made good progress in the work.

11. The Commissioner has during the last week directed me to receive and despatch to Govindgunge in Champarun 20,000 maunds of rice, whereof 8,000 have arrived and been despatched by boats.

E.—ADVANCE TO PRIVATE PARTIES.

12. None.

F.—CHARITABLE RELIEF.

13. None in this district.

G.—FINANCIAL RESULTS.

		389 10 3
Grand Total ...	.....	2,73,234 15 3

No. , dated Gya, the 24th August 1874.

From—A. V. PALMER, ESQ., Collector of Gya,

To.—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my fortnightly report on scarcity and relief in the Gya district for the fortnight ending Saturday the 22nd instant.

A.—STATE OF THE COUNTRY.

2. All the bazars are fully supplied with food. The murwa crop, which has been most abundant, is now being cut, and a large portion of it has already found its way into the market. The low rate, 30 seers, at which this is selling, indicates that the agriculturists anticipate heavy bhadoi and khureef crops, and this they have every reason to do.

3. I annex the table of food-grains.

BAZARS.	WHEAT.		BARLEY.		RICE, BEST SORT.		RICE, COMMON.		MILLET.		MAIZE.		GRAM.	
	Week ending 22nd August 1874.	Week ending 8th August 1874.	Week ending 22nd August 1874.	Week ending 8th August 1874.	Week ending 22nd August 1874.	Week ending 8th August 1874.	Week ending 22nd August 1874.	Week ending 8th August 1874.	Week ending 22nd August 1874.	Week ending 8th August 1874.	Week ending 22nd August 1874.	Week ending 8th August 1874.	Week ending 22nd August 1874.	Week ending 8th August 1874.
	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.

Nowada ...	12 0	12 0	18 8	18 8	.....	.....	13 0	12 0	24 0	15 0	13 0	13 0	14 8	14 8
Jehanabad ...	13 12	13 0	17 0	16 4	10 0	9 4	14 8	11 8	.....	.....	15 0	15 0	17 0	15 8
Aurungabad ...	13 0	13 8	17 4	16 8	11 4	11 0	12 0	12 0	.....	.....	.....	.....	14 8	14 8
Daoodnuggur ...	12 8	12 0	18 8	18 0	10 0	10 0	11 0	10 8	.....	.....	.....	.....	15 0	15 0
Sherghotty ...	12 0	12 0	14 0	14 0	10 0	9 8	14 8	11 0	.....	.....	.....	.....	13 0	13 0

4. It will be seen that prices of food-grains have everywhere diminished, and they will be still further reduced during the ensuing fortnight.

5. Merchants who had acquired Government grain are now selling freely to the public. There is no longer a disposition to hoard; on the contrary, every one is desirous of getting rid of his stock before the next crop is cut, which being luxuriant, will still further cheapen food-grains.

6. I append in margin the rainfall at sub-divisional head-quarters during the fortnight. The rain has been sufficient, not too much, and has come at intervals, so that the crops have derived the greatest possible amount of good therefrom. The murwa is a very full crop throughout the district. The maize has turned out exceedingly well, and is now being rapidly cut. The transplanting of rice is now nearly over. The new plants have been invigorated by the alternate sun and rain, have taken strong root, and everywhere present a most healthy appearance. Up to the present I have never seen surer indications of a bumper rice harvest.

Gya	3·82
Nowada	7·92
Jehanabad	9·80
Aurungabad	5·18

7. The condition of the people, which never was seriously bad as a whole, has materially improved. The numbers receiving charitable relief under the Relief Committee, heading B, are sensibly diminishing, and those left on our hands are for the most part professional beggars and such like. No cases of misery or starvation have been reported, nor are such likely now to exist. Crime has decreased, and the entire district is flourishing and in a prosperous condition.

B.—RELIEF WORKS.

8. The labour statement having been discontinued under Bengal Government (Department Public Works) No. 5000, dated 3rd August, I am unable to submit a detailed statement of number of laborers employed.

9. It will probably be sufficient to state that work has been discontinued on the Purya and Warrisgunge roads; that the Myapore, Kootoomba, and Myabigha roads have been completed; and that the roads marginally noted alone remain under construction. With the exception of the last named, (Gobindpore, which is kept for an invalid gang under the Relief Committee, heading C,) the rest are all being done by piece-work, and the laborers are being paid in grain instead of in cash. The total number of laborers employed is 7,457, as against 17,013; and the daily average is 532, as against 1,215 in the preceding fortnight.

Kazi Serai, Imamgunge, Pukri Barwan, Obra, Maharajgunge, Deo, Gobindpore.

C.—Transport of Food-grains.

10. The annexed table will show that the local importations have been brisker during the ast fortnight than for some time past, and specially so in Jehanabad and Daoodnuggur.

Bazars.	Wheat.	Barley.	Rice, best sort.	Rice, common.	Millet.	Maize.	Gram.	Total.

13. Since my last report the Ruffigunge gola has been emptied. At Nowada there is still a difficulty about getting rid of the grain, although I have offered it for sale at a favorable rate. Mr. Beames assures me that the difficulty arises from the absence of speculation and large merchants, and not from any want of energy or interest on his part.

14. This I am glad to hear, and I trust that with the present terms the inducement will be sufficient to enable him to dispose of his stock.

15. I have, in the absence of any definite instructions, authorized sub-divisional officers to get rid of empty bags at a rate ranging from 4 to 8 annas a piece.

16. In Aurungabad the price has been lowered to Rs. 22-8 per 100 bags. I deemed this course expedient, as many of the bags were deteriorating from damp and vermin, and with the grain gone there is no good in keeping them.

17. The subjoined table exhibits the transactions up to date.

F.—ADVANCES TO PRIVATE PARTIES.

SUB-DIVISIONS.	Applications received.	Rejected.	GRANTED.			Pending.
			Number.	Cash.	Grain.	
				Rs.	Mds.	
Gya	100	48	46	4,758	2,682	6
Nowada	77	75	2	35	20	.....
Jehanabad		Not received.				
Aurungabad	228	225	2	..	223	1

18. The Aurungabad sub-divisional officer explains that on inquiry he found that the applicants were chiefly men of straw and of doubtful character, for whom neither their zemindar nor any of their acquaintances would stand security, and for such he considered it more prudent to give charitable relief than relief in the form of advance on insufficient security, which would be difficult, if not impossible, to realize hereafter, and in this, I think, he was right.

19. The few remaining applications will now be very quickly disposed of.

20. The deputy supervisors have been dismissed, and the supervisors (tehsildars) have, under instructions of Government, been sent to Patna.

21. I desire here to place on record my sense of the services of these officers.

22. Coming as they did from a different Government, and employed in a district and amongst a people with whom they had no previous acquaintance, they set to work with alacrity. I found them both intelligent and willing. They have been exceedingly well behaved, have done their work to my entire satisfaction, and they carry with them my best wishes for their future advancement.

F.—CHARITABLE RELIEF.

23. The subjoined statement shows a very marked diminution in the numbers receiving relief. This is especially observable under heading B; and when it is borne in mind that the diminution is amongst the numbers of the distressed poor, and not amongst the professional mendicants, the result is still more satisfactory.

SUB-DIVISIONS.	B.	C.	D	Total.	Daily average.
Gya	3,654	936	151	4,741	338
Sherghotty centre	2,306	816	.....	3,122	223
Nowada	1,655	1,028	137	2,820	186
Jehanabad	760	.....	406	1,166	83
Aurungabad	9,431	2,738	304	12,473	890
Total ...	17,806	5,518	998	24,322	1,720

24. The Aurungabad officer has been directed thoroughly to overhaul his poor-houses, which he has not yet done.

25. There will doubtless be many who should now return to their normal occupations.

26. I should be glad to know up to what point the Central Relief Committee desire to maintain these poor-houses. In another month's time they might, as regards the distressed poor, be closed without hardship.

27. The professional beggars will remain on as long as the houses are open. I am of opinion that the poor-houses should not be kept going beyond the commencement of the rice harvest.

G.—FINANCIAL RESULT.

	Rs.	A.	P.
28. The total expenditure shown in last narrative up to 10th August amounted to	1,33,434	4	2

29. The following is the expenditure incurred during the fortnight under report:—

	Rs.	A.	P.
Final payments made on account of—			
(a) Establishment and contingencies	971	8	8
Grants-in-aid for charitable relief	23	13	11
(b) Advance repayable	493	0	0
Total ..	1,34,822	10	9

No. 785F, dated Arrah, the 25th August 1874.

From—H. W. ALEXANDER, ESQ., Collector of Shahabad,

To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my 19th narrative for the fortnight ending the 22nd August.

A.—STATE OF THE COUNTRY.

Abundance or scarcity of supplies in the bazars.—The marts in all parts of the district are reported to be sufficiently stocked; no scarcity is said to exist anywhere.

Kinds and prices of grain selling at one or more specified principal marts.—In appendix A are given details of kinds and prices of grain selling in the different marts of the district.

In the Arrah Sub-division prices have remained steady except at Jugdispore, where a slight upward tendency is noticeable.

In the Buxar and Sasseram Sub-divisions the prices are not, on the whole, so favorable as when last reported.

In the Bhubooah Sub-division they are pretty steady.

Rainfall.—During the past fortnight rain has fallen at intervals in most parts of the district.

In Arrah 5·60 inches of rain have been registered. In Buxar 7·34, a fall of 2·7 inches has been registered in Sasseram, and of 8·59 in Bhubooah.

State of the crops.—Favorable reports have been received from all parts of the Arrah Sub-division in regard to the condition of the crops. In some few places more rain is still required for the rice crop. The Ganges has been gradually rising. During the last three or four days it has flooded the Dearah lands in the north of the sub-division; the crops that are immersed will be injured by this excess of water unless it rapidly subsides. From Buxar Mr. Armstrong reports that "the prospects of all crops are now excellent." In regard to the Sasseram and Bhubooah Sub-divisions, Mr. Eyre reports "the sawa and tangoon" are being reaped, the "serla" rice promises to be a good crop, and the weather generally favorable for the transplanted rice.

The condition of the people has improved.

In the Arrah Sub-division three grain burglaries and two thefts have been reported; in one of the former two maunds of grain were said to have been stolen.

In the Buxar Sub-division three grain burglaries and one theft are said to have occurred, the largest amount taken in one case being two maunds.

In the Sasseram Sub-division four house-breaking, in one of which 15 maunds of grain were stolen, and in the Bhubooah Sub-division two grain thefts are reported to have occurred during the fortnight.

B.—RELIEF WORKS.

Full particulars in regard to all relief works in progress and the number of laborers employed are given in Appendix C.

C.—TRANSPORT OF FOOD.

Private imports and exports by rail are given in Appendix C.*

The imports into Sasseram are—

	Mds.
By rail	527
Interior	1,082
Exterior	456
Total ...	2,065

Imports into Bhubooah—

By rail	199
Interior	368
Exterior	252
Total ...	819

As compared with last fortnight, a decrease is noticeable in both Sub-divisions.

D.—STORAGE OF GOVENMENT GRAIN.

Nil.

E.—ADVANCES TO PRIVATE PARTIES.

In the Arrah Sub-division 21 maunds of rice have been advanced to ryots, and in the Sasseram Sub-division advances aggregating in value Rs. 114-15-6 have been made to 13 ryots o the Government estate of Taraon.

F.—CHARITABLE RELIEF.

Steps are now being generally taken to carefully sift and thereby reduce the numbers of recipients of charity, and the services of some of the supervising relief officers will shortly be dispensed with.

* Will follow.

In the Arrah Sub-division, the charitable relief operations are as follows :—

HEADING B.—*Cooked Food.*

	Men.	Women.	Children.	Total.	Average.
Moulabag	252	25	503	1,009	67

Grand Total ...	2,634	7,780	1,008	11,651	776

During the fortnight the three supervising relief officers and the canoongo have visited in the—

Arrah Circle	40	Villages.
Beheea "	50	"
Peroo "	34	"
Nonore "	74	"

In the Buxar Sub-division the relief operations are as follows :—

HEADING B.—*Cooked Food.*

	Men.	Women.	Children.	Total.	Daily average.
Chousah	114	142	56	312	22¼
Buxar	335	696	199	1,230	88
Saraya	163	114	30	307	21

HEADING C.—*Rope making.*

	Men.	Women.	Children.	Total.
Chousah	28	...	...	28
Buxar	110	...	...	110
Saraya	42	...	...	42

Spinning.

	Men.	Women.	Children.	Total.
Chousah	...	29	...	29
Buxar	...	7	...	7
Saraya	...	9	...	9

HEADING D.—*Uncooked Food.*

	Men.	Women.	Children.	Total.	Average.
Chousah	400	800	20	1,220	87
Buxar	40	120	20	180	13
Saraya	440	620	180	1,240	88½

Mr. Armstrong reports,—" I consider that the time has come for putting an end to relief by uncooked food, and I have issued orders that no more tickets be given for this form of relief, except to the purdahnasheen women and any very helpless objects that may be receiving it, the rest being referred to the poor houses for cooked food. My Doomraon Relief Inspector reports having visited 98 villages, my Buxar Inspector 119 villages, and my Chousah

Inspector 85 villages, and all state that the prospects of the crops are excellent, the rainfall all that is required, and the condition of the people good. These appointments will cease at the end of the month."

In the Sasseram and Bhubooah Sub-divisions the relief operations are as follows :—

HEADING B.—*Cooked Food.*

	Men.	Women.	Children.	Daily average.
Sasseram	504	648	319	105
Kochus	59	42	38	9·9
Bhubooah	495	534	294	94·5
Total ...	1,058	1,224	651	209·4

Total number relieved under heading B—2,933.

Jehanabad...	7	32	3	42
Total ...	221	697	49	967

Total number of persons relieved under headings B C and D—7,003.

The Sub-divisional Officer of Sasseram further reports,—"A scrutiny of the registers of rope making, spinning and weaving relief is being made in view of reducing the numbers. During the fortnight the following work has been done by the supervisors":—

	Villages.
Sasseram	45
Nokha	39
Dungain	53
Bhubooah	63
Durgowti	78
Ramgurh	32

"The services of the Ramgurh supervisor have been dispensed with from the 15th current, and the discharge of the Dungain supervisor has been recommended, these being no longer necessary."

G.—The annexed returns show the financial results of the fortnight—

N B—The above total contains the Government grain for the Collector of Sarun received during the fortnight

ARRAH,
The 27th August 1874

JUDOONATH BOSE,
For Collector.

No. 2238F, dated Mozufferpore, the 27th August 1874.

From—C. F. WORSLEY, ESQ., Collector of Tirhoot,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative of scarcity and relief in the Hajeepore, Tajpore, and Sudder sub-divisions for the fortnight ending 22nd August 1874.

A.—STATE OF THE COUNTRY.

2. Prices have not varied much in any sub-division. In Mozufferpore sales of Government grain have very much decreased, owing partly to the large advances made in the Sudder and Chajun circles, and partly to the fact that some of the bhadoi crops are beginning to come into the market. In the Sahebgunge circle sales have been very brisk. The Government grain sold in the northern circles of the Sudder sub-division is all brought from Seetamurhee golas.

3. The subjoined statement shows the kinds and prices of grain selling at some of the principal marts on the 22nd instant—

NAMES OF MARTS.	Wheat.	Barley.	Rice, common.	Indian-corn.	Gram.	Murwa.
Hajeepore	13½	18¼	10	...	18	...
Lalgunge	14	19¼	11	.	19	...
Mhoweh	13	16	10½	...	16	...
Tajpore	18¼	17½	10	...	17½	18
Mozufferpore	13	16	13	16	17	...

4. The rainfall during the fortnight was as follows :—

Hajeepore	5·71
Tajpore	3·04
Mozufferpore	3·46

5. Regarding the state of the crops, the Hajeepore officer writes as follows :—

"There is no doubt but that a material alteration, I regret to say for the worse, has taken place in the state and prospects of the crops since my last narrative was written. The break in the rains, which has continued up to the present, has had a very bad effect. I have been all through the northern part of the sub-division myself, and all the circle officers, especially the Shapore and Chatwara ones, seemed to apprehend another failure of the crops here if we had not heavy rain within ten days from the date of my visit (the 12th and 13th). I have since heard from the Shapore officer that up to the present there has not been any change; but Mr. Smith says that at present it is impossible to form an estimate of the probable outturn. He says that 4 annas of the dhan crop remains as yet to be planted out. The Karhari officer estimates the crop in the ground as follows: The makai, 12 annas; the dhan, 16 annas, of which, however, only 6 annas are transplanted. The Chapta circle officer has written a very full report on the state of the crops in his circle, of which I quote the most important parts—

"'On making inquiries from ryots, they tell me that the probable outturn of the crops is doubtful just now; the paddy crop is greatly in want of rain; about 10 annas of the dhan has been planted out which is holding out pretty well, but the ryots are anxiously looking forward for the mugga or late heavy rains, to enable them to transplant the remaining 6 annas of their dhan. If these rains do not fall within the next ten or twelve days, the paddy crop will suffer greatly.

"'*Indian-corn.*—There is an 8-anna crop standing. The excessive heavy fall of rain in the middle of July did all the harm; the ryots could not weed their fields in time to prevent the jungle from choking the young plant.'

"'*Murwa and Sama* are not sown largely; this crop has fared well, being a hardy plant.'

"Besides visiting the north part of the sub-division myself, I sent my sub-deputy, Sadiq Ally, round the Lalgunge circle. That officer says that all the chours which depended upon water from the Bya are dry, and takes a rather gloomy view of the prospects of the crops; but I am not inclined to say at present that there is an absolute fear of failure. Much depends upon the next fortnight, and both from personal observation and the information I have received, I am inclined to believe that the dhan crops are at present holding out, but rain is much required to enable transplanting to go on. If within the next fortnight even the cultivators get a fair chance of transplanting, then all will be well. The makai crop in parts of the sub-division has suffered from want of rain, more especially that which was sown at first. The crop sown subsequently on the rain is, however, doing better."

6. With reference to the above remarks, I may observe that by far the greatest portion of the dhan crop in Hajeepore sub-division is sown broadcast, and that the drying up of the chours is a more serious evil than the suspension of transplanting operations. When I visited the northern parts (Shapore and Bhatoulia circles) of the sub-division about twelve days ago, I found the crops looking very well, and though the dhan prospects have no doubt become less favorable, I am inclined to think that the bhadoi harvest will still turn out very well.

7. On this subject the Tajpore officer writes:

"It is most difficult to form any general estimate of the probable outturn of the bhadoi crop. The rain has been so partial all along, that villages within a mile or two of one another have quite different crops.

"The rain came early enough after my last report, to secure, I think for certain, a 10-anna crop of makai. I have been over a good deal of country during the fortnight, and should say that perhaps half the sub-division has a 10-anna crop; the south-west I conclude, from Mr. Lloyd's reports, may yield a 12-anna crop; the south-east will certainly not yield more than 8-anna, possibly not as much. Setting these two corners against one another, I look for a 10-anna crop of makai all round.

"In my last report I wrote more hopefully of murwa than of makai. I am sorry to say that this crop, which strikes deeper than makai, and so wants more moisture, cannot have too much moisture when once weeded; has not benefitted so much as makai by the rain of the fortnight. It has nearly all now shot in its stunted condition. With very favorable rain now it may possibly yield 10 annas; but if the grain in the ear does not get moisture to swell it, I can hardly hope for more than an 8-anna crop. An early crop called maroe—seemingly just like murwa, but possibly named differently, as its method of cultivation is somewhat different—is just coming into consumption. There is little of it however, as the irrigation on which it depends for the start which makes it early, can only be practised on the clayey soils of the north-west of the sub-division and the banks of the Noon. What there is seems a good average crop.

"As to the less important crops, sama and kownee have varied as much as everything else. Mr. Lloyd says sama has been a marked success. Generally, I should think it had not been more than 10 annas; in places less. It is now coming into consumption. Kownee, which looked so well, yields ill when beaten out, and may be put at about 8 annas; kodo is very stunted, but it is not yet in ear, and may yet be a 10-anna crop. There is more of this than of kownee and sama.

"I regret to have still to write despondingly of the dhan. For some reason or other, possibly because the chours are shallower, this crop seems worse off in the south-west. Mr. Lloyd, writing from Shahpore Undi on the 18th, says—'The dhan is on its last legs; and yet in the south-east, where the bhadoi is much worse, the aghanee, though very backward and somewhat turned, was certainly not in such extremities when I was down there three days ago. I believe there has been twice, since Mr. Llyod wrote, heavy rains in his directions; so I trust things may get right themselves there and everywhere. Heavy rain, however, is urgently required for this crop. The chours have much less water in them now than last year this time.'

"I still hold to my opinion that transplanted rice has yet a better chance than that sown broadcast. That which has been put out looks fresher than the sown crop, and there are yet twelve or fifteen days more in which transplantation can be completed.

"Concerning the root crops, which you will remember are very important down here, I have at present little anxiety. The soothnees are rather backward, and there is good deal of the aluas still to be put out; but it is on next month's rain that they are chiefly dependent."

8. Of the Sudder sub-division, I may say generally that prospects in the northern and eastern circles are very good, but that in the western circle (excepting Chajun) the crops are in a most critical state. During the fortnight I have visited all the circles in this sub-division, and have been over most of them within the last week. From my own observations, and from what I have heard from the Superintendents, I think that the probable outturn or prospects of the various crops in each circle may be stated as follows:—

A.

Names of Circles.	Probable outturn or prospects of crops.				
	Makai.	Murwa.	Sama and kownee.	Sathee dhan.	Aghanee dhan.
Mozufferpore	8 to 10-anna crop	8 to 10-anna crop	6-anna crop	None sown	Only half of seedlings transplanted; one quarter died off. With early rain remaining quarter can be transplanted.
Chajun	14-anna crop	12-anna crop	12-anna crop	With immediate rain there will be an 8-anna crop.	Up to date a failure to a great extent. All depends on early rain.
Kantai ... ... } Regye ... ... }	8 ditto	Only a small area sown; will yield 8 annas.	All drowned by inundation ...	None sown	Is not likely to be more than 8 annas. One-fourth remaining to be transplanted.
Motipore	8 ditto	None sown	10-anna crop	4-anna crop	With good early rain there may be a 12-anna crop.
Sahebgunge	8 ditto	Nil	10 ditto	None sown	A great deal remains to be transplanted.
Dooria	12 ditto	6-anna cr p	6-anna crop (small area sown) ...	Ditto	The greater portion sown broadcast. Withering in places. One half of seedlings not yet transplanted.
Serraya	8 to 10-anna crop	10 ditto	Reaped and already quite consumed	Small area sown, crop doing fairly	Withering for want of rain. Only half the seedlings transplanted.
Jaintpore	9-anna crop	10 ditto	10-anna crop	Very little sown	Not yet transplanted in greater part of circle.
Toorkee	12 ditto	16 ditto	16 ditto	Ditto	Promises well, but backward in places.
Belsundh	14 ditto	16 ditto	16 ditto	Promises well	Backward, first sowings having been mostly drowned.
Rajkhund	16 ditto	16 ditto	16 ditto	Very good	Backward, and wants rain, which would give a good crop.
Kuttra	16 ditto	16 ditto	16 ditto	Good	Is all right at present, but wants rain.
Gaighattee...	10 ditto	12 ditto	10 ditto	Fair	Promises well at present.
Athar	12 ditto	13 ditto	8 ditto	With immediate rain there will be a 12-anna crop, otherwise only 2 annas.	With immediate rain there will be a 14-anna crop, otherwise scarcely a 2-anna crop.

9. The estimates of the outturn of the bhadoi crops (makai, murwa, sama, and kownee) may be considered quite safe; indeed, these crops (excepting makai) are now being reaped in many circles; but the dhan prospects wholly depend on good falls of rain in September. I annex a statement showing the fall of rain in most circles this year, and the fall in some circles for the years 1873, 1872, and 1871:—

B.

Names of Circles.	Distance from head-quarter.	Rainfall in 1874.				Rainfall in 1873.				Rainfall in 1872.				Rainfall in 1871.

Kuttra ...	18 „ E. ...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...§
Gaighattee ...	18 „ E. ...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...‖
Athar ...	10 „ S.E. ...	10·5	11·0	6·8	28·3	2·6	7·4	9·8	19·8	5·6	17·3	11·0	33·9	6·9	16·1	12·3	35·3

* No rain-gauge at Chajan.
† In Jaintpore there have been 25·3 inches from January up to date, of which only 2·8 inches have fallen this month.
‡ No rain-gauge at Toorkee.
§ No rain-gauge at Kuttra. Fall probably same as at Rajkhund.
‖ No rain-gauge at Gaighattee.

10. It will be seen that the falls this month have, as a rule, been abnormally low. In the year 1871 the fall in August at Kantai and Serraya was, it is true, almost exactly the same that it has been this year; but the short fall was then followed by very heavy rains in September. The experience of last year (though the August rainfall was considerably higher than it has been this year) makes it certain that the dhan crops *must* be a complete failure unless heavy rain falls very shortly. The weather of late has been very peculiar, bright mornings followed by cloudy noons, and little or no rain after all.

B.—Relief Works.

11. The number of laborers employed daily in the three sub-divisions is as follows:—

Hajeepore ...	2,570
Tajpore ...	9,942
Mozufferpore	69,964

In spite of the very low wages recently introduced, the number of laborers in the Sudder sub-division has been reduced by only 6,000 persons. The highest figures for the most part appear in the circles where prospects are bad, and I am assured that many men now come to the works who never came before. In the Kantai, Regye circle, where there are 20,000 laborers employed daily, the demand for work is caused by extensive loss of crops and an utter dearth of employment in the fields. In the Belsundh circle the relief works have been all closed, the people being no longer in want of employment; and in the Kuttra, Gaighattee and Chajun circles a like result may be shortly expected. In Sahebgunge circle numbers have fallen low; but I found on my visit there yesterday that they were likely to go up again.

C.—Transport of Food.

12. What grain remains to be transported is all being brought up by river to Mozufferpore from Monghyr.

The batch of 350 mules which I obtained from Colonel MacGregor have been of very great service in the Sudder circle, and I have lately applied for a second batch of 200 for the Toorkee circle.

D.—Storage.

13. The amount of Government grain that has been stored is as follows:—

	Mds.
Hajeepore ...	41,531
Tajpore ...	74,551
Mozufferpore ...	6,68,391

And the quantity expended is altogether 5,83,962 maunds, viz.:—

Hajeepore ...	30,801
Tajpore ...	64,548
Mozufferpore ...	4,88,613

E.—Advances.

14. There is still a very great demand for advances, but I hope to close operations under this head by the 15th proximo.

F.—Charitable Relief.

15. The number of recipients in the three sub-divisions is as follows :—

Hajeepore	3,034
Tajpore	5,843
Mozufferpore	13,789

There has been a very satisfactory decrease during the fortnight.

G.—Financial Results.

16. The subjoined table shows our expenditure for Hajeepore, Tajpore, and Mozufferpore sub-divisions during the fortnight under review :—

		Rs.	A.	P.
1.	Transport of Government grain	1,73,564	12	10
2.	Salaries, establishments, and office contingencies	8,710	4	3
3.	Purchase of grain by Government	721	12	0
4.	Relief works	17,313	11	6
5.	Storage	641	12	0
	Total ...	2,00,952	4	7

No. 1109, dated Durbhunga, the 24th August 1874.

From—C. T. METCALFE, ESQ., Additional Commissioner, Durbhunga,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative of scarcity and relief for the fortnight ending Saturday, the 22nd of August 1874.

A.—STATE OF THE COUNTRY.

1. The excellent prospects of the bhadoi in the earlier part of this season have not been fulfilled. At one time a monster harvest was expected, but the scanty rainfall has not only affected the bhadoi, but imperilled the rice crop. The general impression among agriculturists is that unless there is a seasonable rain within twenty days, the greater part of the rice will be lost. The water in the tanks is lower than it was at this time last year. The bhadoi crop, although cultivated over a large area, is less in its outturn. The private stocks are less, and there is a possibility that with a bad rice crop we may have to face another year of scarcity.

2. Many of the churs which should be four feet under water are quite dry, and the want of moisture holds out no prospect of a winter crop from these lands. The state of the country, then, is such as to give cause for great anxiety.

3. Government grain is being largely purchased, some of which is stored doubtless in anticipation of future scarcity. A native reads the agricultural horizon by watching for the rainfall in the different months, in which, according to the observations of years, there should be full or scanty rain. The present is the mugga nichatra, proverbially wet and seasonable for the rice crop; and yet, with the exception of a few scanty showers of from five-tenths to an inch, the weather has been fine. There yet remain the purba or eastern, and the utora or northern nichatra before the hutia or final close of the rainy season. If there is no rain in the purba, the chances of the rice in these sub-divisions will be *nil*, and as the purba is generally a fair time, the prospects are not encouraging. About one-third of the crop has still to be transplanted.

4. I extract the following from the sub-divisional reports :—

Mudhoobunnee.—" The apprehensions of the worst which were entertained in my last narrative were but too well founded. The period of drought has continued, broken only by a few insignificant showers; a total rainfall of 0·90 from the 23rd July to the 5th August has been followed by a further fall of 1·16 only up to the 20th of August, and there exist no indications of an approaching downfall. The bhadoi crop has been partially affected by the drought. Makaie and sama have yielded a full outturn, though it is to be regretted that the area of these crops is extremely limited. Murwa, again, in spite of the drought, will yield a 12-anna crop. The harvesting of this crop, as well as of the makai and sama, is everywhere being carried on, and the grain is already in the market. On the other hand, the early rice may be looked upon as gone; very little, if any, will ever be reaped. Broadcast paddy still holds out, and fortunately there is much of it. Transplanted rice is fast being ruined; not more than three-fourths have as yet been transplanted, and the time is fast passing by within which the work of transplanting can be performed. At present there is every prospect of another severe scarcity. In Kutchra there have only been three showers during the fortnight—two of which were very slight. Where floods had destroyed the crops, the lands have all been re-sown, but in some cases the growing crops have again been destroyed by the same cause when it was too late to sow a third time. Mr. Wight believes that on the whole only five-eighths of the paddy has been transplanted. The cultivators have begun irrigating by means of the *dhekul*. Little, if any, damage has yet been done to the standing paddy in his circle. In one tract he states—namely, 'the large tract included between Singra in the extreme south, Palee in the north-west, and Bisfi on the north-east'— there has been abundance of water, and in consequence the bhadoi crop will be magnificent; the paddy crop, too, is in good condition and is thickly sown out. All the transplanting being over.

" In Motipore as yet but little damage has been done to the rice crop, and with rain a 12-anna yield may be secured. In one or two places, however, the rice seedlings are beginning to turn yellow, and the transplanted rice is being dried up. Transplanting is, as elsewhere, delayed."

Mr. Magrath's own observations are as follow :—

" I have myself visited the Mudhoobunnee, Bukwa, Motipore and Jhanjharpore circles during the fortnight, and have found the crops suffering severely from want of rain, except along the Komla River and towards the east of the Jhanjharpore circle, where the supply of water is abundant. The Hathee pergunnah is at present the worst off.

" Irrigation has already been attempted to some extent, and will be promoted as far as possible; but irrigation can counteract but in a small degree the evil that is being caused by want of rain at this juncture."

5. As regards the Durbhunga sub division, the following statement will show at a glance the bhadoi prospects :—

	Durbhunga Sub-division.						Hathee Sub-division.					Remarks.
	Sudder Circle.	Mahomedpore.	Hyaghat.	Leyrah.	Bundhar.	Warisnuggur.	Dosowta.	Gungdah.	Rohur.	Hirnee.	Hussunpore.	
Indian-corn	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{2}{3}$	$\frac{3}{4}$	$\frac{1}{2}$	$\frac{3}{4}$	$\frac{2}{3}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	The fractions are part of 16 annas taken as a full crop.
Murwa	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{1}{2}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	There is but little sathee grown in the Durbhunga sub-division.
Sama	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{1}{2}$	$\frac{3}{4}$	$\frac{2}{3}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	

Of the rice prospects in Durbhunga, it may be said that in the Mahomedpore circle there is not much broadcast dhan; what there was, was destroyed by the inundations, and the land has not been re-sown. Transplanting stopped.

From Hyaghat the accounts are better. In the south-east and west of this circle the crops are excellent. Winter rice, both sown and transplanted, is looking well, though transplanting is checked.

In Leyrah the rice crop has not yet suffered from the drought, and the bhadoi is a two-third crop.

In Bundhar the dhan is still healthy.

The Warisnuggur circle is clearly the worst off. The relief officer reports that most of the low lands sown broadcast in the early part of the season have been re-ploughed and sown with janera, the rice having perished through want of moisture. The very lowest fields, where there used to be three to four feet of water, are as hard as they were in April and May. The seedlings in the nurseries have suffered to a great extent. In some the plants have died out; in others they appear yellow and sickly; even should there be a copious and seasonable rainfall, not more than a half crop can be expected. Half the murwa crop has gone. Mr. Macdonell writes: "The soil is parched; the Rahass plain and adjacent low lands, usually at this time of the year, I am informed, under water, are now quite dry. During my late visit I saw janera being sown in the bed of a khal where broadcast rice had through want of moisture died out. The blades of rice are dry and discolored, and spotted as if with blight. The seedlings are stunted and unhealthy. The fact that sales have greatly increased in that circle show that the people are alive to the danger, and are laying in stocks in anticipation of further scarcity. Of the other five circles of this subdivision, it may be reported that the bhadoi crop is a three-fourth crop, and that a two-third rice crop may be expected if rain falls.

6. The summary for the Seetamurhee sub-division is that the bhadoi crop and murwa have been reaped. The early sown crop has been a splendid and a full crop, the later sown about three-fourths; sathee, sama, and maize backward for want of rain; rice very backward. Mr. Tripe, an old resident in this district, reports that in his neighbourhood the early sown sathee may yield five to six maunds a beegha, but that the later sowings are utterly destroyed for want of rain, and considers, on the whole, that the prospects are worse than they were at the same time last year.

7. *Narayah.*—Murwa cutting is in progress everywhere. Rain has been much wanted as the dhan was turning yellow; but there has been a fall of $2\frac{2}{10}$ths, and the crop has revived. Mr. Mosley in his special report of the 20th of August writes as follows :—

"The murwa crop is now being cut, and though the yield is not so large as it would have been if we had had more seasonable rain, yet seeing that the area sown has been nearly double what it is in ordinary years, the outturn is much larger; double the average will, I think, represent it fairly. Indian-corn, &c., are also grown in parts, and though good, will have a purely local effect. Sathee or gumree is suffering from want of rain; but looking to the large outturn of murwa, a deficiency in this crop will not of itself do much harm. But the winter dhan crop causes great anxiety. We have had so little rain lately that the fields are drying and the crop is turning yellow in places. Planting out has not been quite finished, but only a comparatively small area still remains, part of which is being now filled, the rain of the day before last having been sufficient for that. About Narayah itself, where the land is comparatively high, the dhan, though at present perfectly safe, will, unless we soon have much heavier rain, dry up and give no outturn whatever. To the west we have the Balan, near which there will be a crop; but beyond it there will also be a failure if rain does not fall soon. To the east things look a little, but not much more, promising. To the south I think we are better off, at least for the present; the rivers (of course including the Balan) have in their overflowings thoroughly soaked the ground, and the dhan can get on for some time longer without rain. Irrigation, too, is slightly easier down there. I think the above gives a fair statement of present prospects, erring, if at all, on the gloomy side. On the other hand, if we get good rain shortly, the prospects for the winter rice crop will be magnificent."

8. From the Poopree report I extract the following :—"The crop which has felt the absence of rain most severely is the sathee; its case is now almost hopeless; fortunately the sowings have not been extensive. As regards the winter rice towards the north, very nearly

the whole of this crop has been planted out; about Poopree one-fourth still remains to be transplanted, and about Jaley a half. As regards the rice in the ground, it was put down under favorable circumstances, had a good start, and can, without injury, hold out for some time longer."

9. If the worst comes, I hope by bunding some of the rivers and streams that some portion of the rice crop may yield a good return. The relief officers have taken up this very important matter. Many bunds are being constructed in the different circles.

10. *Rainfall.*—Rainfall within the past fortnight—

Mudhoobunnee	1·16 inches.	Hathee	4·5 inches.
Bhukwa	1·30 "	Durbhunga	1·95 "
Motipore	1·50 "	Seetamurhee	1·$\frac{4}{10}$ "
Jhanjharpore	2·35 "		

The Magistrate of Durbhunga has with some pains collected the information for the following tabular statement, supplemented by the remarks below :—

MONTHS.	1870.	1871.	1872.	1873.	1874.	REMARKS.
June	5$\frac{1}{10}$	10$\frac{8}{10}$	4$\frac{2}{10}$	1$\frac{4}{10}$	14$\frac{1}{10}$	The average of the rainfall was 37 inches, but if 1871 be excluded as extraordinary wet, the average is about 32 inches. This year the average is 13½ inches short of the average of years 1870, 1871 and 1872, and 8½ if the average of 1871 be excluded.
July	14$\frac{6}{10}$	22$\frac{1}{10}$	19$\frac{6}{10}$	5$\frac{7}{10}$	6$\frac{4}{10}$	
August to 16th	13$\frac{4}{10}$	14	8$\frac{1}{10}$	8$\frac{6}{10}$	3	
Total ...	33$\frac{1}{10}$	46$\frac{9}{10}$	31$\frac{8}{10}$	15$\frac{7}{10}$	23$\frac{6}{10}$	

This year the whole rainy season seems to have been inverted. The heaviest fall was 14 inches in June, where, as ordinarily, it should have been a little over six inches.

11. The weather is cloudy and there are indications of rain; but this has been the constant state of the sky, with an occasional shower, which suddenly ceases.

12. *Price-current for the Fortnight under report.*

13. *Public Health.*—From Durbhunga Dr. Macdonell writes :—"I am happy to be able to inform you that complete immunity from diseases of a contageous or epidemic nature still pervades the entire sub-division. Prior to my last tour I received reports from the native doctors of outbreaks of cholera, but on proceeding to the spot, found the patients labouring under a severe type of diarrhœa."

The last case of true cholera reported was on the 28th of July.

In the Mudhoobunnee sub-division there has been much sickness during the fortnight, and the number of deaths have increased in every circle; fever has been the prevailing illness, and cholera has shown itself in a few villages. Eleven deaths are reported of persons on charitable relief, out of a total of 39,526 persons.

The Shewhur reports show thirty-six deaths from cholera within the fortnight.

14. *Relief Works.*

NAMES OF SUB-DIVISIONS.	Daily average of laborers on relief works.	PUBLIC WORKS.		CIRCLE OFFICERS.		COURT OF WARDS.	
		Task.	Daily.	Task.	Daily.	Task.	Daily.
Mudhoobunnee	16,140	4,820	1,786	3,582	5,952	.. ...	... .
Naraya	26,542	1,578	.....	...	24,232	672	.....
Seetamurhee	.....	2,000	.....	Not received.			
Poopree	1,927	353	.....	... ..	1,574	.....	.....
Durbhunga	2,165	771	.....	.....	1,394	.. ...	.. ...
Hathee	2,228	931	.....	. ...	1,297	.....	.. ...
Total ...	49,002	10,453	1,786	3,582	34,509	672	.....

There are in Mudhoobunnee Sudder circle 2,353 on daily wages, 1,354 at Jhanjharpore, and 1,569 at Oomgaon. At Matipore, Buckwa, and Kuchra, there are still a few daily wage laborers. Of the 3,582 task laborers, 3,143 are on two useful and necessary road works. In the Durbhunga sub-division works are open only at Durbhunga, Hyaghat, and Hussunpore.

In the Naraya circle there has been an increase of eleven thousand in the numbers on relief works. These numbers were almost exclusively confined to the Mudheypore circle; the relief officer being of opinion that the poorer classes of women required employment, opened out village roads so as to enable them to earn a livelihood till the murwa crop should be ripe. These numbers will now be reduced.

15. *Grain Sales and Consumption.*—The grain sales in Hathee as well as in Durbhunga show an increase this fortnight. The increase in Hathee is due to a greater demand in Hussunpore by purchasers from Monghyr. The greater increase has, however, been in Warisnuggur, where stocks are, it is believed, being laid in, in anticipation of scarcity next year. The largest cash credits have been at Mahomedpore, amounting to Rs. 2,18,911. Hyaghat is third, with credits Rs. 1,16,173; Durbhunga cash receipts Rs. 1,60,873. The total cash credits in Hathee sub-division have only aggregated Rs. 2,67,209.

The analyses of these figures is curious, although no definite conclusion can be drawn from them. Mahomedpore, with the largest cash sales, has also made the largest advances, viz., of Rs. 25,588. Hirnee, which stands fifth in the list as regards amount of advances, has sold the least of any circle. Hussunpore, which has advanced least of any circle, stands seventh as regards sales. Singhia, which received the largest money advances, is very low down in the list of cash sales. Mahomedpore received only Rs. 1,302 cash in advance, and sold the most.

The largest distribution of grain in charitable relief has been at Singhia, 29,630 maunds, and the smallest at Bunhar, 9,978 maunds. Warisnuggur, where the harvest prospects now are the worst, 60,758 maunds have only been given away in charity. Bunhar, with the smallest charitable distribution, has had insignificant sales. Hirnee, with a medium charitable distribution, has had the worst sales of all.

Statement showing the total Cash Credits from Sales of Grain.

Names of Sub-divisions.	Up to what date.	Amount credited. Rs.	A.	P.
Seetamurhee	.....	38,319	15	11
Poopree	.....	Not received.		
Mudhoobunnee	.....	Ditto.		
Naraya	.....	2,89,337	3	3½
Durbhunga	August 14th ...	6,37,528	0	0
Hathee	Ditto ...	2,67,209	0	0

16. Taking the cash sales as the criterion of the public demand, the Durbhunga circles in point of importance stand as follows :—

Name of Circle.	Balance in maunds in store.	Name of Circle.	Balance in maunds in store.
Mahomedpore	42,970	Singhea	16,064
Durbhunga	73,944	Gungdah	79,085
Hyaghat	75,928	Bandhar	29,051
Dosowta	78,288	Leyra	22,830
Warrisnuggur	33,042	Hisnee	24,805
Rohur	20,613		
Husunpore	6,662	Total ...	5,03,28

17. In Seetamurhee the heaviest expenditure has been at Murpah, Seetamurhee, and Shewhur, and on the frontier at Bootahee. The grain in this sub-division is fast disappearing, *vide* annexed statement in the Pooprec Division. The largest expenditure has been at Jaley and Seebnuggur, and more latterly at Chesout. In Mudhoobunnee the largest sales have been at Mudhoobunnee, Butwa, and Jhanjharpore. In Naraya, Mahadeomut shows the largest sales, then Mudeypore and West Putrahee. The Perozghur relief officer has paralysed his sales by the extent of his gratuitous distribution.

18. The grain is keeping excellently; here and there and in exceptional bags weevils have appeared. There is very little demand for empty bags. A few have been sold for Rs. 18 and 20 a hundred. In Mudhoobunnee there has been a considerable decrease both in sales and in total expenditure, due to the reaping of the bhadoi harvest, to the decline of advances, and the stoppage of giving grain presents to high-caste families; as also to the diminution of numbers on charitable relief.

The following amounts have been credited in the Naraya sub-division :—

Name of Circle.	Up to what date.	Amount credited. Rs.	A.	P.
Naraya	16th August ...	1,870	10	3
Mohadeomut	.....	9,488	6	6

* These figures, less than those shown in last return, result from transferring the quantities given to officers in charge of poney trains to column 9.

19. *Importations.*—Private importations are simply nil, no boats have been observed in the Karie, and the Durbhunga market has shown no increase of private trade. Prices are still very high of table rice; murwa is only at 18 seers.

20. *Transport.*—Grain is being removed from one gola to another as stocks are depleted; 7,000 maunds have been sent to Ghaighattee, 30,000 maunds are under transfer to Nagurbustee. The pulses from Narhah are being brought south and are being replaced by rice. The consignments for Deodah and Oomgaon are completed. Grain has also been sent from Baheyra to Dosowta, from Singhia to Hussunpore. To fill up the Seetamurhee golas grain is being despatched by boat from Durbhunga. The recently made allotment for Durbhunga has been safely stored.

CHARITABLE RELIEF.

21. In the Durbhunga sub-division the recipients of charitable relief have been during the past fortnight carefully inspected by the Civil Surgeon. Dr. Macdonell writes—"The time has come when the aged, sick, and children whose parents are unable to defray the cost of their maintenance should alone be in receipt of relief." The following percentages are given of persons examined:—

	Singhia.	Bahayia.	Rohar.	Durbhunga.	Mahomed-pore.	Hyaghat.	Bunhar.	Leyia.	Gungdah.
Normal	85	86	85	73	75	80	60	80	82
Weak	13	12	15	23	22	18	35	18	17
Emaciated	2	2	.....	4	3	2	5	2	1

Of the Bunhar recipients, all are either aged, sick, or children too young for work.

Writing of those receiving charitable relief from Nepal, Mr. Johnson writes:

"I should divide them into three classes—first those in want; second, those in great want; and third, those in a state of emaciation. Of the latter class I found but very few, but I imagine that there are more of them existing than we have any idea of, and that there is greater distress in the Terai than we know of. I came to this conclusion by the following circumstances: I noted that in every gola the worst cases come in last; for instance, at Sunbursa, where I delayed four days, on Sunday evening about thirteen people came in, one quite emaciated and the remainder in a very weak condition. Now, had I prolonged my stay at some central point on the border, each day would have doubtless brought in worse cases; and unless the people were stopped from crossing, like they were stopped at Ladeneah, some conception would have been formed of the actual state of the paupers in the Terai. Many, too, who came to me for relief have remarked that they had left relatives at such and such a place, too weak to come in. I have found several persons, to all appearance distressed, but still young and able-bodied; to such I have given a week's supply of rice, and urged them to seek for work; they replied they would be glad enough to do so, but that there was no work to be had. The numbers relieved at Sunbursa have as yet exceeded that at any other gola; the total being 1,000."

From Bengahee, on the right bank of the Bagmuttee, Mr. Johnson reports—"There is a great rush of Nepalese to the rice when given to those on the Nepal side; it is with difficulty that I can carry on the work of relieving the most indigent. I sent 100 paupers back from the other side yesterday to Bashita to be relieved; one Nepali Kunk died yesterday on the way to Bashita, being unable to reach the gola."

22. In the Perozghur circle the number of persons on charitable relief had risen to as high a figure as 20,761. On one of my visits to this circle, I took up this question as to why the figures should be so much in excess of those of other circles. As I was unable to devote sufficient time to the detailed enquiry, I appointed two other officers on the 23rd of July to overhaul the lists and inspect the recipients of charity

On the 28th of May there were 9,121 persons in receipt of relief, on the 9th of June 14,280, and on the 23rd of that month 19,643, and subsequently 20,761. The inquiring officers were unable to find 895 recipients borne in the books; these did not include purdah-nashin women. The total number inspected were as follows:—

Classes.	Number previous to inquiry.	Struck off.	Balance.	Remarks.
Men	2,544	1,548	996	Still further reduced to 13,255.
Women	8,309	1,458	6,851	
Boys	4,630	471	4,159	
Girls	4,703	277	4,426	
Total ...	20,186	3,754	16,432	

Within the fortnight there has been a total deduction of 49,179 persons from the charitable lists; and as the murwa crop ripens in each village, these numbers will be still more reduced.

23. The following statement gives the numbers at present in charitable relief:—

No. 4180F, dated Sarun, the 28th August 1874.

Memo. by—J. S. DRUMMOND, ESQ., Offg. Magistrate and Collector of Sarun.

FORWARDED to the Secretary to the Government of Bengal, Statistical Department, Calcutta, for information, with reference to his Circular No. 80 of the 17th October 1873.

Narrative of Scarcity and Relief in the Sarun District for the Fortnight ending 22nd August 1874.

A.—STATE OF THE COUNTRY.

Abundance or Scarcity of Supply in the Bazars.—During the past fortnight the private importations of grain have slightly increased both in the sudder and in the Sewan sub-divisions, and the supplies in the bazars have been sufficient to meet the demand on them.

2. The imports into the sudder sub-division were, at Chupra 8,750 maunds, of which 3,500 were rice; at Revelgunge 16,000 maunds, of which 3,100 were rice; and at Dooreegunge 5,389 maunds, of which 1,338 were rice.

3. On this head, Mr. Tonnérre writes, regarding the Manjhee sub-division:

"From returns submitted concerning four of the largest bazars in this sub-division, it appears that the supply is fully equal to the demand as it has been for a long time. On comparison with the stocks available in these bazars last year, there is a considerable deficiency visible. Imports are being effected by water now, as the rivers are full. Chainpore has received supplies brought up in boats on the Daha Nuddee.

"I am also informed that the demand on the bazar is lessening, owing to Government advances. This is but a natural consequence of the magnitude of the latter. Bazars will soon be replenished with local supplies of grain, which the approaching bhadoi harvest will afford.

"The fluctuation of bazar supplies has now ceased to be the indicator of the people's distress, because the latter are nearly independent of them, having received their advances for the most part."

4. Of Pursah, Mr. Barry reports:

"Everywhere there appears to be an abundance of supply, and nowhere is there any marked change in prices, which stand much as they stood a month ago. There is no cheena in the market, as the greater part of this crop in South Kusmer has been destroyed by the floods since my last report."

5. Mr. Bourdillon, who has just taken charge of the Sewan sub-division, writes:

"I have no reason to believe the bazars to be otherwise than well supplied. It is true that the police report some scarcity of grain at Bhorey and Kateya, but I have mentioned this to Mr. Hodgkinson, and he agrees with me in discrediting the report, explaining that though there may be a scarcity of rice, the coarser grains, which form the chief food of the people in that direction, are still abundant.

"According to returns received, the imports of grain have amounted to 7,323 maunds, principally barley and coarse rice, and the exports to 52 maunds only. The figures for the previous fortnight were imports 6,140 maunds and exports 96 maunds."

6. To these imports must be added 1,515 maunds received at Roopanchass, in the Burrowlee thana.

7. From Hutwah Mr. Hodgkinson reports thus:

"The supplies of food have been sufficient for the requirements of the people; importation into the sub-division has almost entirely ceased. The rates to-day are—

Description of grain.	Rate per Rupee. Hutwah Bazar.		Meergunge Bazar.	
Rice	11 $\frac{5}{8}$	Seers.	12	Seers.
Barley	16 $\frac{7}{8}$	"	18 $\frac{7}{8}$	"
Wheat	13 0	"	14 $\frac{1}{8}$	"
Peas	14 $\frac{3}{4}$	"	16 $\frac{1}{2}$	"
Gram	16 $\frac{1}{2}$	"	16 $\frac{1}{4}$	"
Makai	...	"	16 $\frac{3}{4}$	"
Dal	13 0	"	15 $\frac{5}{8}$	"

8. *Kind and Price of Grain selling at the different Marts.*—The kind and price of grain selling at the principal marts and at the thanas and outposts are given in the annexed statement.

9. Except at Goldengunge and Siswan, where prices have fallen, at all other places prices have risen, or are either stationary or nearly so. Prices are exceptionally high at Maharanee, Amnour, Sewan, Semurria, Goothanee, Burragaon, and Burrowlee, but even where prices are low, the fact does not, for reasons that are patent, necessarily indicate freedom from distress.

10. *Stock of Food in the hands of the People.*—On this head Major Jackson, in charge of the Chupra sub-division, reports:

"Further enquiries have elicited the existence of a certain quantity of grain reserves in various parts of the sub-division. These amount in all to about 26,500 maunds—no very large amount; but doubtless other stocks exist, of which no information has as yet been received. The above are in the hands of the more well-to-do inhabitants; of petty household stocks knowledge could only be obtained by instituting inquisitive researches, which it did not seem advisable to initiate. The Group Superintendents have orders, however, to report from time to time the result of their enquiries, which must necessarily be of a desultory nature. These will be communicated as may appear advisable."

11. The retention of stocks with the probability of a falling market proves how little dependence in many cases can be placed on these coming into the market until prices reach a point beyond the purchasing power of most.

12. From Ekma, the head-quarters of the Manjhee sub-division, Mr. Tonnérre writers:

"In one circle, Pursah, the existing private stocks of food are reported to be very slight, and in another, Ramgurh, there are none existing at all. In the other circles, rapid consumption is reported, and no doubt but that in short space of time all last year's grain stored up by ryots will have been consumed.

"They are already eating murwa and sawan from the present bhadoi harvest.

"Government grain now forms the chief staple of the food-supplies in the hands of the people; it was sadly needed, as I can testify to from what I have seen.

"All to-day I have had about 200 ryots from Jelalpore about my bungalow. They first relied on their malik, who now has ceased giving supplies to them. One and all, they say that they have nothing left to fall back upon; this shows whether the stocks are large or not. Throughout my rides but one complaint has been made—that of want of food; this is enough to show what a poor chance the ryots would have had had they been denied assistance."

13. Of Pursah, Mr. Barry reports:

"Ryots are eking out their petty stocks with the sawan and murwa, which are now being cut. In South Kusmer, it is reported—and the belief is general—that there are considerable stocks remaining from the last rubbee in the hands of cultivators, but it is extremely difficult to obtain accurate and trustworthy information on the subject; but I am doing what I can to ascertain the facts."

14. Mr. Hudson, in charge of the Musrukh sub-division, writes under this head:

"The Group Superintendents report about 2,000 maunds of grain in the hands of bunneahs, and 500 in those of petty maliks or cultivators, irrespective of that received as tuccavee."

15. *Rainfall and State of the Crops.*—The rainfall here during the fortnight has been 5·59, and we have had since 2·16 inches, making a total of 31· inches up to date. Except in portions of the Musrukh thana, where the yield will, it is anticipated, prove very deficient, and in part perhaps of the Burrowlee thana also, and except where destroyed by inundation, as in the Dighwara thana and in parts of the Chupra thana, the bhadoi crops are generally reported to be good, and are above the average in many parts. On the other hand, until quite recently, the situation as regards the aghanee rice crop has been most critical, and owing to deficient rainfall transplantation was completely at a standstill. Happily, recent heavy falls of rain have averted the general failure, which was imminent, and transplantation of the rice seedlings is now nearly everywhere going on; and though the yield may be deficient, the aghanee crops in most parts, at least in the low lands, may, with maturing rains, be considered assured. A tract along the Gunduk, extending westwards from the northern portion of Musrukh thana, and including Afradh Tuppeh, to the north of Hutwah, was, according to latest reports, an exception to this improved prospect, and there severe failure of the aghanee rice was anticipated without speedy rain. More rain is also still wanted to admit of transplantation in the higher lands in many parts. The Ganges is unusually high (being within a few inches of the flood of 1871), is still rising, and has again submerged the previously inundated tracts.

Note.—It has since risen seven inches above the flood of 1871, and the inundations have extended.

J. S. D.

16. Under this head, regarding the Chupra sub-division, Major Jackson reports:

"The beginning of this fortnight had given considerable uneasiness to the country side as regards the prospects of the rice crops. The continuous dry weather, day after day, interfered extensively with the planting out of the seedlings, and fears were entertained of even these, had the drought continued. The past week, however, has seen a change for the better, and rain has fallen freely in and about the environs of Chupra itself, though the showers have been intermittant and not very protracted in duration. The waters of the Ganges have of late been exceptionally high, and this has led to a good deal of inundation, which, it is to be regretted, has given rise to considerable injury. The floods increased to such an extent as to overtop the embankment of a nullah at the village of Mookrara, where, and also at the village of Rajmehal Pendaree, the waters poured in and very soon laid a large tract of country and the entire crops under water. Eleven villages suffered more or less. I give the extent as below:

	Acreage—Beeghas.	Inundated—Beeghas.
Rajmehal Pendaree ...	98½	97
Jokhova ...	174	169
Muthwalia ...	88	73
Mookrara ...	258	220
Jelalpore ...	153	136
Tihunwas ...	431	171
Mujlispore ...	386	149
Nynee ...	480	445
Fakoolee ...	81	18
Trikowlia ...	68	68
Mujhwallia ...	214	76
Total ...	2,431	1,622

"In many places the makai crops were neck deep in water, and would of course only be fit to cut down and use as fodder for cattle; but it would be premature to say that the destruction has been entire. The waters have drained off pretty rapidly, and I hear one or two of the villages will have benefited by the enforced irrigation. Those who have suffered

heavily will require assistance, to enable them to purchase seedlings to replace what has been drowned, and steps are being taken to recoup these losses. At present only one village has petitioned; the others will be attended to when they come forward. Everywhere the makai crops are most flourishing, and will shortly be harvested. The young green fruit is already in the market. In the east and northern parts of the sub-division, planting out of the rice is going on steadily, the rainfall having been sufficient for the low lands. A small portion of the higher rice lands still requires more water. In the west and north-west parts planting out is steadily in progress; not only have these parts (for the greater portion large rice 'chouwars') had their fair share of the recent rainfall, but they have benefited largely by the rise of the river, which has penetrated miles inland. By all accounts, the whole will be soon planted."

17. Of the Manjhee sub-division, Mr. Tonnérre writes:

"From all circles, excepting Bagowrah, about which Baboo Sadhsaran has submitted no reports, I am informed that the rainfall is not up to the requisite amount; nevertheless, dhan is being transplanted over large tracts; but to ensure a full aghanee harvest to allow of the transplanting of the entire dhan crop, as well as to promote the growth of that alraedy transplanted, more rain is certainly wanted. A little more of it would give the finishing touch to the bhadoi crops, which are everywhere in a flourishing condition. Makai averages six feet in height, and looks very well indeed; it will be ripe in about 15 or 16 days or even earlier, but in some parts only.

"Sawan and tangoonee, as well as murwa, promise well, and in parts of the country are being cut. The preparation of the rubbee crops is being carried on, and is in a forward state, but it cannot be completed through want of rain.

"While in camp in the village of Kolhooa, in the Bagowrah Circle, I noted but one good downpour: the ryots complained of want of rain; but wherever khals exist, the dhan is in firstrate condition.

"On the whole, the following comparison between this year's dhan and last year's will stand, viz., last year, at this time, *all* the dhan had been transplanted, but eventually dried up; whereas this year the quantity transplanted, though less, is of greater strength and of more promise; this is what I have been told by ryots.

"One of them told me that never to his recollection has the bhadoi promised so well as it has this year. Weeding is at an end for the present, as the bhadoi crops no longer require it, and the aghanee dhan is not sufficiently advanced to need it. Those previously employed in weeding are now busy in transplanting the dhan.

"The Daha River is rising, and will, in all probability, overflow shortly if the usual amount of rain now falls. This will do immense good to circles Chainpore and Ramgurh, as far as transplauting goes."

18. Concerning the Pursah sub-division, Mr. Barry reports:

"The weather up to the 18th August was clear and hot, with slight, almost daily, showers, insufficient to moisten the soil, so that the bhadoi crops were suffering from want of rain, and the planting out of the aghanee rice was seriously retarded; but on the 18th and 19th August rain fell heavily in floods, so as to fill all the fields with water, thus enabling the ryots to complete the planting out of the aghanee rice, which is rapidly progressing, and placing the safety of the bhadoi crops beyond any doubt.

"At the present moment, I never saw the bhadoi crops looking better; all weeding is over, and makai and massuriya are fast ripening. The sawan is being cut.

"The planting out of the aghanee rice will, I expect, be completed in a few days. The plants looks well, but everything depends on the latter rains. The indigo 'khoonti' is looking pretty well. About three-fourths of the crops in South Kusmer have been destroyed by the floods, particulars of which will be found further on.

19. And he makes the following special report of the inundation in Dighwara:—

"About the 7th August the Ganges began to rise, and the numerous watercourses in connection with it overflowed their banks, so that in the course of a few days nearly the whole of the South Kusmer was under water. A line drawn from Jhowa bridge to Sonepore *viâ* Dighwara and Sitalpore, and thence following the course of the Mahanuddee, pretty correctly indicates the boundary of the inundated tract. In short, the whole of the pergunnah south and west of the Mahanuddee is more or less under water. I have sailed about over many miles of villages, and the whole country is a sheet of water, streaked with high banks and dotted with trees and villages.

"I calculate that there are about 70 villages inundated, and that on the average three-fourths or more of the bhadoi crops, principally makai, sawan, and kodo, have been destroyed.

"The flood rose while the ryots were in the midst of cutting the cheena, and a half or more of that crop has been lost. Some few villages are totally submerged.

"The water is very still, and rose very quietly, and I have not heard of the loss of any lives. These inundations take place, I am told, almost yearly; the people are used to them and look out for them, and they are now chiefly engaged in swimming about from island to island and collecting the stalks of the still green makai, tying them into rafts, and swimming with them back to their villages. They do not seem to be at all distressed by the loss of their crops, nor to look upon it as a calamity, but rather as a matter of course. I am told that they trust principally to the rubbee crop, which is all the finer after an inundation; that they sow the bhadoi with the chance of its being spoilt; that if it is saved, well and good; if not, it is no great loss, viz., the seed only, as the labor counts for next to nothing. The soil is light and soft, easily ploughed; the bullocks are idle half the year, and the cultivator may as well run the risk. I am inclined to think that this view of the matter is correct, and it is corroborated by

the fact that since the floods rose there has been no remarkable increase in the number of applications for grain, as one would have expected; they come in by twos and threes daily, and are principally applications of individual ryots, not of whole village communities. Kusmer has been formed into a special relief circle, and Moulvi Mustausinbillah, Relief Superintendent, placed in charge. He is assisted by four experienced Group Superintendents, and between them they have visited the most of the inundated villages. Their reports confirm the views above expressed, and the Relief Superintendent is of opinion that the ryots have still considerable stocks in hand, and that few villages will require advances.

"But each village will be enquired into and reported on separately, so that if ryots are in want of advances, they will have an opportunity of stating their requirements. With four Group Superintendents I expect the Relief Officer to finish the enquiries in a very short time. The groups of the inundated tract have all been carefully reallotted to the Superintendents, so that each knows exactly what he has to do. Taking the number of inundated villages at 70, I find that advances have already been allotted to 20; and assuming that 10 will not take advances, this leaves 40 villages still to be disposed of; and allowing 100 maunds as an average for each village, this will give about 4,000 maunds as still required. But as there is likely to be a balance left in Pursah and Amnour golas, and as there is still a large quantity in Dighwara gola, I do not consider that it will be necessary for the present to indent for more grain; at any rate, as there is some reason to believe that the ryots will not require much assistance, I would be inclined to wait a week or two, in order to see what view the ryots themselves may take of the situation. Hitherto they have not come forward to ask for advances, but that may be because they have not had leisure to leave their villages.

"If, as is alleged, the stocks are at all considerable in the hands of the ryots, it is not likely that they will ask for or take assistance from Government. I propose to remain in the pergunnah until the whole of the villages are satisfactorily disposed of."

20. The ryots in this inundated tract had an excellent rubbee harvest this year, and will probably have a still better one next year; but as, this not being a rice-growing tract, they will have no crops till the end of March, it is to be feared that they will need support as soon as their stocks from the last rubbee harvest are exhausted.

21. Of the Musrukh sub-division, Mr. Hudson makes the following report:—

"There has been a fall of 4·95 during the past fortnight, making a total of 28 inches up to date.

"Favorable reports respecting the bhadoi crops have been received from all parts, except from the neighbourhood of Dhobowlee in the south-west and Maharanee in the north-east. The former is probably a local deficiency of trifling importance, but the latter is a case of serious loss, as details given under another heading will show. I myself on several occasions, in riding to and fro between Musrukh on the one side and Burooah on the other, as well as in an excursion made to the extreme north-east of the sub-division, have had opportunity of fully observing the present condition of the crops, and can hardly suppose that they were ever finer than they are this year. The millets will be all plucked now in a week or ten days, and Indian-corn and bhadoi rice will come into market within a month. There was some outcry lately about want of rain for the aghanee rice; but twice during the fortnight there has been a heavy fall just at the critical juncture, and the country is now so flooded that the aghanee cannot any longer be short of rain.

"At the commencement of the month I was directed to enquire into the damage done by an inundation said to have occurred in the north of the sub-division. At that time I rode along the banks of the Gunduk from Sutterghat to Bansghat, and ascertained that no unusual overflow had taken place within those limits, nor had the crops suffered any injury, except by the encroachment of the river, which is rapidly cutting away the bank between Sutterghat and Bundowlee. On the contrary, the zemindars of Oosree village and others with whom I spoke, informed me that the rice crops had benefited by such influx of the water as came under my observation, which was not greater than in ordinary years.

"On the 17th, however, I rode to Bansghat and thence along the bund to about half way between Doomurreea and Sullehpore. I found that the scene of the inundation here is between the two last-named villages. The country between the river and the bund is still under water; and I was informed that it had been so since June, that is, I suppose since the first heavy rainfall of the season. I spoke with the peon in charge of the embankment between the 65th and 71st milestones, and also with some cultivators, and I was told that the water covered an area of 3 square koss, and that all the crops beneath it had been destroyed. They said that these crops were of every kind. They attributed the inundation to the formation by the river of a 'sotee' or false channel, commencing at Sullehpore. This they said had been formed within the last three years; and similar damage had occurred last year and the year before. They could not estimate the extent of the destruction; but said that it affected 11 villages, of which they gave the names—Sullehpore, Banjarria, Rampore (with 5 tolahs) Oorianpore, Ammarpoora, Sitalpore, Doomurreea, Ramchunderpore, Birteea, Tundaspore, and Dippooh. A similar inundation, which used to occur yearly between Dippooh and Bansghat, had, they told me, been prevented this year by the bund erected with Government aid by the cultivators and zemindars. This last-mentioned spot is that which was surveyed by me in the dry season, and respecting which I obtained sanction for expenditure of Government grain in payment of coolies employed to erect the said bund. On my way back I made enquiries from the head constable in charge of the outpost at Maharanee, and he confirmed the information which I had received as to the extent of the area of damage. I desired him to forward me a brief report of the extent and nature of the injury to crops, and the report called for is now before me. It repeats what has been already stated respecting injury to villages north-west of the

outpost, and estimates the loss at 14 annas of the entire harvest between the river and the bund. In addition to this, it states that similar injury has befallen seven villages to the east of the outpost, viz., Sikatiya, Echipore, Pojhee, Khirodharputee, Sunouth, Motiharee, and Mahomedpore. Both bhadoi and aghanee crops have been destroyed. At Motiharee village, the old bund being broken through, the river has come up to the new bund, and an area of about 500 beeghas has in consequence been flooded, and the crops injured. Had I not, however, made a personal investigation into this calamity, in pursuance of instructions received, I should probably have remained up to the present time in ignorance of its occurrence, as no complaint have been made."

22. The following is Mr. Bourdillon's report of the Sewan sub-division :—

"Rain fell during the first part of the fortnight; rain was much needed, and the bhad and khareef crops were in a very critical position; during the last few days, however, rain h fallen heavily in the neighbourhood of Sewan,* and sparingly to the north and north-west the sub-division. For many miles around Sewan planting out has received a vigorous impu from this timely fall, and even where it has been slightest, I am confident that there has be sufficient to warrant the ryots in planting out their rice. The bhadoi is safe, and the r crop may be considered secured over the greater part of the sub-division.

23. From Hutwah Mr. Hodgkinson writes :—

"The rainfall during the fortnight has been 4·96, but the rain has not fallen on any d in sufficient quantity to enable the cultivators to put out th rice seedlings. It has, however, been very good weather for t bhadoi crops, which are everywhere magnificent. The rice grov in the western tuppehs of Bhorey and Dhobowlee is much of it bhad and it is a splendid crop. The aghanee rice in several villages this direction has been planted out on the chours, being filled a rush of water which came from Goruckpore in the north dov the Sone. Thus the crops in the west distressed tracts are like to yield well, but Afradh Tuppeh to the north, and some of the Sip villages to the east of Hutwah, will suffer severely if sufficie rain does not fall within the next ten or twelve days."

24. *Condition of the People.*—There has been no material change in the condition of t people except for the better in the case of those who have got their grain advances, and excep perhaps, for the worse as regards the condition of the laborers on the relief works. This ma be due to the low rates of wages, which are barely sufficient to support life; or it may be th as most of the able-bodied have found employment in the fields, and the feeble for the mo part only remain, these last now come more conspicuously into view. I am in hopes, howeve that most of the laborers may gradually be induced to undertake piece-work when the earning being more considerable, their condition will be materially improved; and under any circum stances, it is not, I think, advisable to raise the daily wages rates, so as to compete wi agricultural labor.

As the scarcity advances to its culminating point before the return of plenty with t promising bhadoi harvest, and as former stocks become more and more exhausted, the pressu on the people has become more intense, and the necessity for the grain advances to t cultivating class more patent. That the stress now is not less but greater, as it was reasonal to expect would be the case, is also shown by the steadily increasing numbers driven on charitable relief. Until the makai is everywhere fairly in the market, it would indeed unreasonable to hope for any decrease in the numbers receiving relief of different kinds, ar it will be at least another month before it is everywhere gathered.

25. Under this head Mr. Tonnérre, in charge of the Manjhee sub-division, writes:

"I have been for a few days in Kolhooa, in the Bagowrah circle, to ascertain accurate the causes of distress amongst the ryots of that place, noticed in my last report.

"I ascertained from the bunneah that whereas last year he used to import and dispose about Rs. 5 worth of grain per week, that is, about 4 maunds, kutcha weight, this year bought and disposed of about Rs. 4 worth of grain in the same space of time; that is, abo 2 maunds and 5 possaris, kutcha weight. This shows a diminution of food-supply requir for a not decreasing population, and consequently distress, eventual weekness, inability work, and lastly starvation.

"This is fully borne out by what the ryots and the bunneah told me. A strong m who last year consumed one pucca seer a day was reduced to three quarters of one, whereas h work remained as hard as ever.

"Then again, this bunneah sold a seer of 12 gundas for one 'taka' (2 Goruckpooree pic last year, and the same for one and a half this.

"It may be said that in this village the food-supply was diminished by 25 per cent while the price of the procurable quantity was raised 50 per cent.

"No doubt but that the same state of affairs must have existed in many other village The advances of Government grain have greatly benefited the people, as they themselves sa I have often heard them say, from the highest to the lowest, that numbers would have di but for the timely help afforded them.

"In the Burwar and Jaitpore circles the people are much better off. They as well those in Ramgurh, Pursah, and Chainpore, are reported to be engaged in agricultural work.

* The recorded rainfall for the fortnight being 7·43.

"From what I see and learn, I think that distress is fast abating owing to advances, and that in a short time general ease will prevail.

"This cannot, however, be expected till the cutting of the bhadoi crop.

"The ryots themselves say that as the bhadoi is such a fine one, their 'tukleef' will soon be at an end."

26. The village above referred to is on the borders of the Sewan sub-division, in the jurisdiction of the Maharajgunge outpost of the Bussuntpore thana.

27. From Pursah Mr. Barry writes:—

"The condition of the people in general shows no marked change either for the better or the worse since my last report. But the condition of the people on the relief gangs has, in my opinion, gradually declined from bad to worse. The men, women, and children in bad condition are now much more numerous than they were a month ago, and this I attribute to the subsistence wages, which appear to be insufficient to support the body in health."

28. Of the Musrukh sub-division, Mr. Hudson reports:

"The general report respecting the condition of the people is good; but some half a dozen villages are said to be still in need of Government assistance. Of my own observation I have nothing to add to my observations of the preceding fortnight."

29. The following is Mr. Bourdillon's report of Sewan:—

"The condition of the people is good. This is Mr. Rattray's opinion; and he points out, as will be seen from the following abstract from his report, that for more than one reason no fears need be entertained on this head.

"The autumn crops will be in the market within the next fortnight or three weeks, and there are the Government advances of grain still going on on an extensive scale; within the last fortnight, besides, over a lakh of rupees has been paid out to the villagers in advances for the cultivation of opium, and within the next three weeks two lakhs of rupees more will be paid out in similar advances, except amongst the class of professional beggars and the poorer laboring classes, who find the high prices prevailing a cause of anxiety; distress of a serious nature or to an alarming extent does not prevail.

"For myself, I may say that I was surprised at the uniformly excellent condition of the people here. How far this is due to the very liberal relief which has been extended to them or to their initial prosperity, I am not in a position to decide; with field employments and relief works for the able-bodied and charitable relief for the crippled or feeble, their position seems absolutely enviable."

30. I have no doubt that closer observation and enquiry will convince Mr. Bourdillon of the need that there was for help for the people of his sub-division, and enable him to perceive the probable consequences of withholding such help.

31. Mr. Hodgkinson writes as follows from Hutwah:—

"The condition of the people in most parts is much the same; it seemed to me, however, on my last visit to Sreepore, that a larger proportion of those I met looked under-fed, though I saw none in really bad condition.

32. *Known Cases of Misery and Starvation.*—It has recently been ascertained that one starvation death, which was not previously reported, occurred in Burhogah Circle of the Bussuntpore thana within the fortnight ending 25th July. The case was that of a Bind from the village of Mukooah, who had been suffering from a sore on one of his hands, which prevented him, he said, from working. He arrived in a starving state at the Burhogah Factory, and though every effort to restore him by relief was made, he was found dead one morning.

33. While a very complete relief organization is kept up for the express purpose of preventing such deaths, I cannot say that I feel by any means confident that other deaths by starvation may not have taken place here and there elsewhere, of which no information has been received. Both zemindars and police are afraid that they will be held responsible for such deaths, and have therefore the strongest possible interest not to report them; while, on the other hand, there can be no doubt of the efforts of some zemindars to throw obstacles in the way of their ryots obtaining relief, even to the extent, I have heard, of putting peons on them to prevent their applying for relief.

34. Under this head, Mr. Hudson, the Musrukh Sub-Divisional Officer, reports:

"None have been reported to me; but two instances of misery have come within my personal knowledge:

"(1.) Near to the village of Motiya Dhobowlee, in the north-east of the sub-division, I found a cultivator of low caste plucking the unripe ears of millet in his field; and on being questioned, he declared that he was driven to do so by hunger. He looked half-starved; and I directed him to apply to me here, and have since given him a small sum as charitable relief under clause (*d*) of the Relief Instructions.

"(2.) While inspecting the Burooah gola, I was appealed to by an emaciated Brahmin, a cultivator of Surjpoora, near Balah Factory, who begged me to expedite the delivery of his tuccavee grain, as he and his family were starving. I had this man's grain served out to him at once, and gave him a rupee for present necessity."

35. *Grain-thefts or Robberies.*—There have been 15 cases of grain-theft during the fortnight.

B.—Relief Works.

36. The annexed statements show the relief works in progress and the number employed thereon. The mean daily number employed during the fortnight was 127,560, and the

number on the last day was 110,119. The mean daily numbers both of the previous and of this fortnight, and the number on the last day of this fortnight, are shown below for each sub-division :—

Sub-Divisions.	Mean daily number of the previous fortnight.	Mean daily number of the fortnight.				Number of persons employed on the last of the 14 days.	Remarks.
		On-piece work.	On subsistence wages.	On charitable relief.	Total.		
1. Chupra	28,493	1,131	34,181	13,593	48,905	57,680	The numbers shown on the last day of the fortnight do not include those employed in the embankment works and under the general manager: hence the difference.
2. Manjhee... ...	10,290	200	3,531	17	3,748	2,750	
3. Musrukh ...	38,618	2,160	29,861	19,094	51,115	27,717	
4. Pursah	5,975	947	7,305	.....	8,252	8,068	
5. Sewan	8,737	4,051	9,107	.....	13,158	11,333	
6. Hutwah	1,976	.....	.....	.....	2,382	1,849	
Total	94,089	8,489	83,985	32,704	127,560	109,397	

37. It will be seen that with the falling off in the demand for agricultural labor consequent on the completion of weeding operations, there was a very large increase in the numbers on the works, and also that with the impetus to transplanting operations recently given by the late general rainfall, these numbers had again declined on the last day of the fortnight.

38. Under this head the Manjhee Sub-Divisional Officer writes :

"I have not received any complaints during the fortnight of the relief works interfering in any way with agricultural operations ; when out, I have noticed but small numbers engaged on them."

39. Regarding the Pursah sub-division, Mr. Barry makes the following remarks :—

"The number of coolies on the roads appears to have increased considerably, and this may have arisen from the facts that all weeding is over, indigo manufacture for the time stopped, and the planting out of the aghanee rice has been effected gradually and imperceptibly from time to time, and principally by the ryots themselves ; so that I infer that the numbers on the roads have not been much affected by this latter operation. It should also be remembered that comparatively speaking but little aghanee rice is grown in this sub-division, except about Makair.

"The condition of the coolies on the roads on daily wages is decidedly bad, which is illustrated by the report of the Assistant Surgeon. * * * I have given clothes freely to the poorer and more naked among them. I have not considered it safe or advisable to close any of the works."

40. With reference to the large numbers on the works in the Musrukh sub-division (mainly in the Bussuntpore thana) Mr. Hudson observes :

"I have before remarked that the ryots are much poorer as a rule, and employ much less labor in the Bussuntpore thana than they do in the Musrukh one; and I have certainly been surprised to find how little general demand has been occasioned, either by the weeding of the bhadoi or the transplanting of the winter rice."

41. *State Emigration to British Burmah.*—There are 32 emigrants in the depôt here awaiting transmission to Calcutta.

D.—Storage of Government Grain.

42. The usual statement accompanies. The transport and storage of the fresh consignments of Government grain have been progressing rapidly of late, notwithstanding the fact that the roads are now being much cut up. All transport, however, is at a standstill for the moment, owing to the non-receipt of further supplies from Calcutta in consequence of Mr. Toynbee doubting whether the orders of Government warranted his sending more grain. It is trusted that now that Mr. Toynbee has been made aware that I had the authority of the Lieutenant-Governor to indent on Calcutta for more grain, if required, he will at once proceed with his despatches so as to avoid the payment of further demurrage for boats and carts. I have asked for another half lakh of maunds to be sent for the present, but it is very possible that a further allotment of a lakh in all may be requisite.

43. Of the Manjhee sub-division, Mr. Tonnérre writes :

"No cases of grain being spoilt have come to my notice during the fortnight. The grain goes out as fast as it comes in, except in Manjhee gola, the goladar of which has been remiss in furnishing me with reports of his doings. I believe there is some grain now unused in it."

44. Under this head, the Musrukh Sub-Divisional Officer, Mr. Hudson, reports :

"During the fortnight I have paid three visits of inspection to the Burooah gola, and two visits of inspection to the Musrukh gola, and one to each of the golas at Maharanee and Gopalpore. At each place I have issued orders for the arrangement of the bags of grain in the manner prescribed by the late circular order of Government No. 4741—S.R. Hitherto the bags have been piled up in vast irregular heaps; but when I last visited the Burooah and Musrukh golas, on the 20th and 21st instant, I found them neatly rearranged in small stacks about 10 feet square, divided by small alleys wide enough to admit of a man's passing between

them, and allowing a free current of air in every direction. At all the golas I found the bags in apparently good condition, and the goladars reported that none of the grain had been spoilt while in store; but seven bags of the recent fresh supply arrived at the Musrukh gola in a damaged condition. I examined the bags in several parts of all the golas, but did not discover any symptoms of heating. I only saw insects (ghoon) in the Burooah golas; but the goladar said that the damage done had been slight."

45. From Sewan Mr. Bourdillon writes:

"The Sub-Divisional Grain Officer gives in the accompanying statment all the information required. He also reports (as required by Government letter No. 4741—S.R. of 31st July,) that the condition of the grain in seven out of the ten golas under his charge is all that could be desired. The last consignment of grain to the Sewan gola was wetted to some extent, and weevils had appeared in the grain at Gopalgunge and Mairwah. Orders were promptly issued for the immediate disposal of this grain, and I believe it has been parted with before this day's date."

E.—ADVANCES OF GOVERNMENT GRAIN.

46. The statement accompanying exhibits the advances of grain made up to date. Though in consequence of deficiency in the grain stores some of the ryots are only now getting their grain, it is to be borne in mind that the new harvest is not yet generally in; that the pressure must naturally be felt at the last, and that the quantities taken by individual ryots are small; and there being therefore reason to believe that the need is urgent in most cases, it would be unwise to check or curtail the grain issues on this account, because the period to be tided over is now happily short.

47. Regarding the Chupra sub-division, Major Jackson writes as follows:—

"In the Arwa Circle, about 30 more villages remain on the list to be dealt with, and many of these, it is anticipated, will not come forward. . The same may be said of the Gurkha and sub-divisional circles. During the fortnight only 5 villages have come for relief, and grain advances in this sub-divisional circle may be considered nearly to have come to an end."

48. With respect to the Manjhee sub-division, Mr. Tonnérre reports:

"Everywhere are advances rapidly being pushed on. All lists have been ready sometime ago and grain is being given out all day. I find that many villages, the ryots of which had previously refused Government help, preferring to rely on the promises of future support made by their maliks, are now being driven to ask for Government advances because their maliks have stopped supplies. The latter induce their ryots to trust to them, and then thinking that all Government advances are at an end, and that the time of making them has passed, refuse any further help to their ryots.

"This fact, as well as having to advance grain at more liberal rates, will necessitate the supplementing of the estimates for this sub-division; but both are absolutely requisite: the first because the royts are without help, and the second because all the zemindars are giving their security. I have not yet had one refusal on their part."

49. From Pursah, Mr. Barry writes under this head:—

"Now that fresh supplies of grain have reached the various golas, the work of distributing the advance sanctioned has gone on merrily again. I have already reported that the allotment to the villages in the Tehtee, Jelalpore, Arnah, and Nowadah circles, were virtually completed. I may now say the same of the Pursah and Sitalpore circles, and the villages in my own hands in Pursah thana. The work of allotment is over; the work of distributing the remainder of the grain alloted is gradually drawing to a close, excepting South Kusmer; applications for grain have almost ceased. The Moonsif of Pursah has nominally twelve villages to dispose of; and the Circle Officer at Sitalpore has 24. But probably few of these villages will take grain, or they would have done so long ago. The work of allotting the grain in Pursah thana, therefore, is, I may say, virtually completed, and as soon as they send in their estimates of the various crops, the Group Superintendents may be dismissed.

"During the fortnight I have advanced 1,305 maunds in 20 villages, which brings my total of advances to 20,625 maunds in 170 villages.

"The total amount advanced up to date in the sub-division is 67,041 maunds in 475 villages.

"The inundated villages in pergunnah Kusmer will now fully occupy my attention for some time to come."

50. Concerning the Musrukh sub-division, Mr. Hudson reports:

"The applications for grain advances have greatly fallen off during the past fortnight, and only 18 village indents have been granted. On the other hand, I have made 16 advances of money, under clause (*d*) of the Central Relief Committee's Notification of 4th March."

51. The following is the Sewan report:—

Mr. Rattray reports as follows:—

"Grain advances are still going on, and every endeavour is being made to dispose as quickly as possible of the allotments still due on the village lists. The want of grain up to within the last week, and latterly the heavy rains, have been a bar to the quick disposal of applications. The returns received up to the 20th show that 1,06,676 maunds 30 seers and 4 chittacks of grain have been actually given out to landholders and cultivators, leaving about 19,000 maunds remaining due; of the village lists there remain 64 for completion; the lists of 1,184 villages have been completed. The forms and papers are a formidable mass, connected

with these lists, and the papers connected with advances for wells, seed-grain, plough-cattle, &c., are being examined and indexed. The following are the advances made up to date:—

	Rs.
Seed-grain	4,539
Plough-cattle	3,400
Wells and tanks	2,335
Grain to landholders	11,020

F.—Charitable Relief.

52. The number receiving this description of relief is shown in the annexed statement. The total number is now 64,824. There is an increase in all sub-divisions, except in Musrukh, where there is a decrease concurrently with an increase in the numbers on the relief works. The large increase in Sewan is possibly due to the people having been driven off the relief works as noticed in the narrative for the fortnight ending 25th July, but has not been explained in the Sub-Divisional Officer's report. The matter is under enquiry. The numbers in the poor-house at Chupra have also increased.

53. Concerning the Manjhee sub-division, Mr. Tonnérre reports:

"The numbers receiving gratuitous relief are as follows: 3,867 who receive grain, and besides 1,437 women who spin cotton.

"76 persons have received cloth; the latter is being distributed more freely now that the rains have set in.

"All measures taken for charitable relief are working satisfactorily."

54. With regard to Pursah Mr. Barry notes:

"There were 8,447 persons on the registers this fortnight, against 7,157 of the previous period, showing a considerable increase of 1,290 persons. The principal increase is under the heading 'Gratuitous Grain;' while there is a slight falling off in the numbers of women, to whom cotton is advanced to be spun into thread."

G.—Financial Results of the Fortnight.

55. The financial results of relief operations are given below—

	Rs. A. P.	Total of each head. Rs. A. P.	Grand Total. Rs. A. P.
Total expenditure as previously shown	... ..	.....	24,63,283 1 0½

SARUN MAGISTRACY,
The 27th August 1874.

J. S. DRUMMOND,
Offg. Magistrate & Collector.

No. 2803F, dated Motiharee, the 24th August 1874.

From—W. B. OLDHAM, Esq., Officiating Collector of Chumparun,

To—The Secretary to the Government of Bengal, Scarcity and Relief Dep

I HAVE the honor to forward the fortnightly narrative of scarcity and relie Chumparun district for the fortnight ending on the 22nd instant.

A.—STATE OF THE COUNTRY.

Appendix A shows how the markets stand. In Ramnuggur wholesale sales of Go ment grain at favorable rates rule the local markets, and also affect those of the B sub-division into which large quantities of the Ramnuggur grain have found their way. Dhaka sub-division Government grain finds scarcely any sale, partly owing to the fav state of the bazars and in a great degree to the low prices at which it is sold in the Seetam sub-division adjoining. In the Bettiah and Motiharee sub-divisions sales have been st altogether at some golas and much restricted at the rest. In Gobindgunge Govern sales have been stopped altogether. Mr. Weekes reports from there that the bazars are poorly supplied. The price lists certainly contradict this opinion. It is true that Go ment rice is still very much in demand, but as a luxury rather than a necessity, and be it is almost the only old and seasoned rice left in the country, while as a general ru quality is excellent. But except at Ramnuggur, Government sales have ceased to rule markets, and the local stores are being largely augmented by the harvest which has begun.

The weather on the whole has been very favorable, and prospects have vastly in since my last narrative was sent In Ramnuggur there has been a general down rain, and in the west and centre of the sub-division all crops promise a bumper c The same may be said of the whole of the Nepaul border. Elsewhere there ha showers which, though partial at the time, have within the fortnight covered the whol district with falls of rain varying from 6 inches to ½ an inch; and though, ex Ramnuggur, more rain is wanted for the late rice, the fall has been quite sufficient t alive the transplanted plants, and to allow of transplanting going on; while this sh weather is the very most favorable for the bhadoi crops, which have been sown to an out of all proportion to the breadth usually cultivated with them. Except Mr. Weekes, has expressed no decided opinion on the point, the Relief Officers in the district are unanimous in the opinion that the bhadoi crops are secure for an outturn which wi large enough to put an end to the distress and to carry the population on till the w harvest, not of course, village by village, or even tract by tract, but as regards the g result for each sub-division. On this point Mr. Howe's views are the most emphat also the most unexpected, as his sub-division has been always considered the on depended in a peculiar degree on the winter crops. I quote his remarks in full:

"It is a fortunate circumstance that far more bhadoi than aughanee has this y sown. This is due to the fact that people, taught by last year's experience, fe possibility of a similar cessation of the rains in September, and also because there w bhadoi seed in the country and because the assamees were naturally anxious t crop as early as possible. The result is that the main standby of the people this yea not the winter but the autumn crop, and this I think is a most important and circumstance as *a return to the normal state of things, and the end of famine and d be anticipated by two months.* I think I am justified in this conclusion when it is rem that in many parts of the sub-division, where a hundred fields are sown with bhadoi, five only are devoted to the aughanee.

"The actually ascertained proportion is as follows:—

"'In the north of Tuppeh Ramgir' (writes Colonel Boulderson) 'aughane staple crop, but in the southern tuppehs the reverse seems this year to be the case.'

"The reason, I may add, why bhadoi is less sown in Ramgir is, that for some l there is an insect which attacks it, whereas it does not touch the aughanee. tuppeh there are means of irrigation, there is not the same motive which influence less fortunate localities to sow bhadoi.

"In Tuppeh Chumparun and downward, the proportion (after careful enqu fields of aughanee for 100 of bhadoi. In the tuppehs to the south of Ramnugg and Chankee, ⅔ is the proportion of bhadoi to ⅓ of aughanee; no reliable statis this point been received from Bughaha, but I have received reports which s tendency has been to sow a larger proportion of bhadoi, a fact which to a great be explained by the greater quantity of bhadoi seed in possession of the people, of last year having chiefly affected the winter crop.

"As this is a very important subject, and one which will considerably affe relief operations, I am having careful statistical enquiries made during the comi The next fortnight indeed will determine all, for by that time we shall be able of the bhadoi crop, and decide how far the condition of the people has been a outturn. In speaking of the bhadoi I refer of course to all kinds of crops makai, murwa, &c., with which the latter, as noticed in previous narratives, a la been sown. This proportion shows, I think, conclusively, that the usual state been reversed, and that the main food-supply of the people will be derived, no

from the winter, but from the autumn crop. As the latter is now almost everywhere secure and promises to be a magnificent one, as moreover it will soon be reaped, it follows that the end of the period of distress is close at hand, and far nearer than if the two great crops had been sown in their usual proportions."

I would not go quite as far as Mr. Howe in describing the state of Tuppeh Behar, the standard rice tract of the district, which is in the Motiharee sub-division.

The outturn, too, of the winter crops is of course very much greater in proportion to the area occupied by it, and its mere vegetation less than that of the autumn grains. But I, too, have no hesitation in saying that the autumn outturn is so far secure that it will carry on the population till the winter harvest.

The late rice gives most cause for anxiety in the Gobindgunge sub-division. Mr. Weekes has reported that the inhabitants of 20 villages there who have been accustomed hitherto to inundate their rice-fields from the Gunduk have been prevented from doing so this year by the embankment, and will lose their crop in consequence. The embankment of course affects the country within it and ultimately causes changes in the cultivation. Mr. Weekes wanted it cut in places to admit the water. I have applied to the Executive Engineer to do what he possibly can, and have reported the matter separately to the Commissioner. This is the only application which has been received for the admission of water, though there have been many complaints about the drainage being held in and thrown back on the country by the embankment.

The public health continues good. Cholera is still flying about. It has disappeared from Ramnuggur and from Dhaka, and suddenly appeared in the outskirts of Motiharee, where ten deaths from it occurred last week, since when it has not been heard of. Except in the Gobindgunge sub-division, the condition of the people is reported as satisfactory.

B.—Relief Works.

Relief works are still nominal and maintained as a precautionary measure only, except, perhaps, in Ramnuggur, where 1,531 persons are engaged under the circle officer, all of whom are said to be weak and emaciated. They are, however, engaged in carrying out special works.

The demand for labor has very slightly increased in the Motiharee sub-division; elsewhere there have been no indications of the sort. Except in Ramnuggur and the Dhaka sub-divisions, there are no laborers now employed under the circle officers; in Bettiah the persons so shown being engaged on the town works.

C.—Transport of Food.

The whole of the Bettiah consignment of 15,000 maunds ordered from Sarun has gone, and from Ramnuggur nearly 66,000 maunds, which were on their way when Mr. Howe received sanction to retain the rest of the amount originally ordered.

Two thousand (2,000) maunds have been moved down from the Motiharee to the Gobindgunge sub-division; 1,000 maunds are being received there from Seetamurhee. This consignment was despatched with great promptitude, having only been finally ordered eight days ago; 20,000 maunds more for Gobindgunge are now on their way up the river from Patna. No transport of private food is going on.

D.—Storage of Grain.

With these recent arrangements the grain stores are now ample, and the Gobindgunge sub-division in which stocks had fallen short is fully supplied. All the other sub-divisions have an ample reserve well distributed.

The wholesale purchase of Government rice by native merchants, and their eagerness to secure it in any quantities, still continue and form a somewhat curious feature in face of the approaching harvest. Their demand is for rice only, and when this is remembered it becomes at once explicable. Besides its present variety, the rice crop on the ground is unusually small and cannot yet be said to promise favorably.

The condition of the Government stores continues good. Wherever weevils appear the grain attacked is sold off.

E.—Advances to Ryots.

The non-realization of the general opinion that the relief works would be again resorted to this month, proves how effectual our advances have been; supplementary advances only to meet special cases are now being given.

F.—Charitable Relief.

The returns show large reductions in the number under this head, except for Bettiah and Ramnuggur. The special causes which tend to keep up the numbers in Bettiah were noted in my last narrative, and as Mr. Samuells says, with great reason, the town itself is so large and flocked to in ordinary years by mendicants in such numbers that he has great difficulty in throwing them back on the ordinary population which usually supports them. The same remarks apply to Ramnuggur.

Mr. Howe suggests that the test of cooked food be resorted to. It is high time to adopt it, and it will, I have no doubt, be found effectual. The Committee at Motiharee, whose independent and judicious exertions have been beyond praise, have applied this test all along and with the most excellent results. It has effectually kept down the numbers of those receiving gratuitous relief. Though by itself, and when given indiscriminately, the system has generally been found most demoralizing; when kept up side by side with a system of light-labor and home relief, and applied occasionally as a test on the principle followed by the Motiharee Committee, the distribution of cooked food is attended by the best results. Complete accounts and statements showing the expenditure and results from the beginning of the scarcity are now appended. These accounts have been carefully compiled and checked, and represent the amount with which the Central Committee's funds are chargeable up to the end of July. As appears from the accounts, the effects of the new rules are such, that in Ramnuggur, the most distressed part of the district, the incidence on the Central Committee's funds up to the end of July is only Rs. 753, while the local subscriptions with the Government equivalent come to more than Rs. 6,000, and the Committee's assignment to Ramnuggur has already been Rs. 6,000. The reasons for Mr. Howe's small expenditure are of course very obvious; when he began his operations there was scarcely any but Government grain to be had. His total expenditure under this head is estimated at a little over Rs. 11,000, and he urges that it should borne by the Committee. I will ask Mr. Howe to address the Committee separately himself as regards the adjustment of the Rs. 6,000 which they have already allotted to him.

G.—Financial Results.

These are fully shown in the appendix and require no comment.

Grand Total ...	120,922	132 14 6	2,340 7 3	

The total daily average of each Sub-division is as follows:—

Motiharee Sub-division ...	686
Dhaka ...	1,769
Govindgunge ...	1,961
Bettiah ...	3,246
Ramnuggur ...	3,308
Total average ...	10,970

These figures do not agree with the total of the columns of the recipients owing to the different principles which regulate the distribution. Some of those shewn getting only a pittance, others getting relief daily, and others getting a monthly supply at a time.

W. OLDHAM,
Officiating Collector.

Fortnightly Narrative of the District of Monghyr for the Fortnight ending the 22nd August 1874.

A.—STATE OF THE COUNTRY.

During the past fortnight seasonable showers have fallen all over the district, and the prospects of the crops continue good. The unusually early rain in June has brought forward the bhadoi crops, which are being cut and promise well. The various kinds of millet are giving a very good yield; five or six kinds may be seen growing side by side in the same field. The Indian-corn on the dearahs, flooded by the Ganges, has nearly all been lost; but as I have remarked on former occasions, this seed is only sown in the hope of securing a crop once in five or six years. The Ganges is very high just now, and the people living on dearahs must have a very unpleasant time of it. Indian-corn is now selling at 25 seers per rupee in Monghyr, and is even cheaper in the villages. Vegetables are remarkably cheap. The reports from the district are generally favorable.

Mr. Manson, at Bukhtearpore, reports:—"Everything is in a most promising condition; aghani dhan all planted out; keri nearly all cut; marwa being cut; late marwa and bhadoi dhan ripening fast, with the promise of a plenteous yield; light showers have fallen at intervals throughout the circle during the fortnight; keri sells in the hâts for one pice the seer, and the cleaned for three pice the seer; vegetables are also plentiful, and the health of the people continues good

"Where the keri has been cut, the land is again being ploughed up for the rubbee crop, which will be sown in Kartick. Sowings of chota jenerah have been made, and the young plants are a couple of inches above the ground, but this crop is little cultivated in these parts."

Mr. Money, at Jamooie, reports:—"Up to date things continue to look very promising, both with bhadoi and with the winter crops. During the past fortnight I have seen nearly all the south end of the sub-division, riding from Nawadih through a very pretty pass from Parasi to Karangadh, and thence to Chuckye, where I camped for three days, and back by Nawadih and Simultollah; and I also visited Gurparan and Narganjo, two villages in the midst of the hills between Nawadih and Simultollah. The jenerah everywhere is very good, and it is just ripening, and here and there the ryots have commenced cutting. There has been plenty of fine weather to ripen the Indian-corn. All the dhan in the south of the sub-division has been transplanted, and every available little patch of land being prepared and sown. The only exception to this was at Karangadh, where, owing to a pending butwarrah and disputes about the rents between the two parties, a good many good paddy-fields have been left fallow. In Mulleypore and towards Gidhour the few remaining beeghas are being rapidly prepared and the seedlings transplanted, and I have not seen a single instance of their failing to germinate. Moong and marwa are ripe and in the bazars. In Chuckye bazar the prospects being so good, the rates have fallen, and ryots have been producing stocks of rice which had been kept back religiously all through the scarcity. In Nawadih alone rates remain very high; why, I cannot say, as there is abundance both north and south of there. The weather has been very cloudy lately, but no rain. It was beginning to be urgently needed, though no harm had yet been caused. Yesterday and to-day it has been raining frequently here, and there are signs of plenty more rain:—

Bazar rates.	Chuckye.	Jamooie.
	Srs.	Srs.
Rice (best sort)...	...	8
Rice (common)...	12	11¾
Bunt ...	14½	22
Gihun ...	11½	14
Jenerah ...	...	32 new.

The ryots call their jenerah a fair average crop; about 12 annas. I consider it a *bumper* or 16 annas outturn.

Mr. Wilkins, at Begoo Serai, reports there is very little to report during the fortnight, the Ganges came in flood and destroyed a good deal of the crops in the Bullia pergunnah. The Sub-Deputy, who inspected the greater part of these crops, reported that 8 annas were destroyed between the 11 and 16 miles. I myself have inspected some miles of the crops.

The bund (Factory) at Moteeharee was broken by the same cause and the low lying lands flooded, the crops being destroyed. This will perhaps induce the maliks of the adjoining villages to make up their minds to help the factory next year in this work.

All the dearah crops were destroyed.

On the whole, I do not look upon this event as one of very great importance. A bhadoi crop in the lands thus flooded is hardly ever expected to be gathered in. A crop is not secured once in seven years. I fancy the ryots depend on their rubbee crop, and only sow a bhadoi on chance. The greatest loss will be that suffered by the laborer class, who expected to earn a good living by cutting the dearah crops.

In all other parts of the sub-division the crops are excellent. There is a large quantity of excellent dhan towards Dowlutpore, whence I returned to this place (Munjhool) this morning; marwa, sama, and kownie are good everywhere, and makai is plentiful and strong.

There has not been much rain during the fortnight. I cannot give the exact amount as I am away from head-quarters. A good rain now would be beneficial.

Mr. Currie, from Lukhee Serai, reports: "I have been in Sheikpoorah three days (at least at Durbeshpore) and am now at Choarah.

"The bhadoi crop almost all the way was looking perfect. Wilayat Hussein Khan, son of the Nawab Saheb at Sheikpoorah, called it a 16-anna crop, and it was a close, thick, heavy looking crop—marwa, kownie and maize. The people are very busy transplanting paddy, and the demand for labor is so great that the goladar here could not this morning get four coolies, men or women, to sort empty bags for sale. I saw a lean rag of a boy outside, and he agreed to work and bring three or four companions. The Lukhee Serai and Sheikpoorah road is greatly under water. It took me nine hours, from 4 A.M. to 1 P.M, with 12 bearers, to do the 18 miles from Lukhee Serai to Durbeshpore, this including a sail of 2½ miles; our coolies did not arrive till next day, about 11 A.M.; yet, on the whole, the prospects for the crops are excellent. All round Sheikpoorah and Choarah the bhadoi is a 16-anna crop, and the weather has been perfect for the rice transplanting. Malik Ally Nazir has just been with me, and tells me that if there is no more rain for a month, they have enough water stored behind the embankments to last them out; then rain would be necessary of course, but in all probablity we shall have plenty before that; meanwhile the whole country looks rich with crops."

Mr. Roberts, at Khurruckpore, reports that the bhadoi is not so good as he expected it would be, and that the rainfall had been so deficient, that unless abundant rain falls shortly the rice crops will be lost. This was written on the 21st; since that time we have had nearly 2½ inches of rain at Monghyr, and I believe there has been equally heavy rain at Khurruckpore.

B.—RELIEF WORKS.

The relief works are nearly completely stopped. A few persons are kept on in order to finish up what has been begun; but relief works, properly so called, are no longer required, as all wanting work can get it in their villages.

C.

No grain is coming into the district. What little we have left is being disposed of.

D.

No special remark is required under this head.

E.

The following advances of grain have been made:—

	Mds. S.	
Bukhtearpore Circle	610 26	
Jamooie Sub-division	Nil.	
Sudder Sub-division	Nil.	
Lukhee Serai Circle	76,605 20	These are from commencement.
Begoo Serai Sub-division	12,248 30	

F.—CHARITABLE RELIEF.

We are doing our best to close the poor-houses. I have been on several occasions with Colonel Murray to the relief centre in the town in order to decide what we should do. There certainly is some difficulty in refusing relief to the crowds assembled for a handful of gram or other grain. The number of blind and otherwise impotent persons is very great, and the wonder is how they manage to exist even in times of plenty. Baboo Ganga Persaud, a wealthy banker of this town, is very anxious for us not to close this centre entirely until the bhadoi harvest is all cut, and we are acting on his suggestion, although we have greatly reduced the numbers relieved. This same gentleman distributed cloth, dyed magenta, to some 400 people about a week ago, so that the bazar for some hours afterwards had a very gay appearance. In the district the poor-houses are nearly completely closed, the prospects of the harvest being such as not to warrant our continuing general relief any longer. Amongst the persons relieved was a woman of the fishing caste, whose case deserves perhaps especial mention. This person was sitting by the side of the Ganges, some 100 miles from here, in the Patna district, about day-light of the 16th; suddenly the bank on which she was sitting gave way, and she fell into the water, dragging with her a large bundle of caster-oil stick, which she was carrying at the time. She managed to support herself on these sticks, which formed a kind of life-buoy, and she was carried down by the current, which is now running at a great pace. As each village or boat was passed, she shouted to the villagers to help her, but no one came to her relief. In this way she was carried nearly a 100 miles, and fortunately for her, when she had been twenty-four hours in the water, she passed by Monghyr and was rescued by Colonel Murray, who, seeing her floating by, sent his private boat and rescued her. The woman did not appear much the worse for her prolonged stay in the water, but naturally was much impressed by the fact of her being rescued by an European, when so many of her own caste had declined to help her. She was provided with a railway ticket to Patna, together with food and clothing from the relief funds.

The return called for in Government letter No. 4640—S.R., dated 21st July 1874, will follow.

* The remarks given in the last return apply to this. I hope directly to ascertain whether this missing amount has been carried to North Bhaugulpore.
Figures under heading "Gratuitous Relief" and payment in kind to laborers given in previous returns were incorrect. Correct figures are shewn in this return.

Return called for under Government letter No. 3127, *dated the* 14*th May* 1874, *for the Fortnight ending* 22*nd August* 1874.

	Up to date of last return.	During the fortnight.	Total.
(1) By sale to laborers	14,766	219	14,985
(2) By sale to public	46,787	1,616	48,403
(3) In charitable relief	7,649	467	8,116
(4) Advances to ryots	1,32,949	6,813	1,39,762
Total ...	2,02,151	9,115	2,11,266

Figures under headings "by sale to laborers" and "in charitable relief" were incorrect in previous returns; correct figures are now given.

E. LOCKWOOD,
Offg. Collector.

No. 1000—SR, dated Bhagulpore, the 26th August 1874.

From—V. T. TAYLOR, ESQ., Collector of Bhagulpore,
To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the twentieth fortnightly narrative for this district.

2. The fortnight has been marked by a comparative absence of rain, the want of which, especially south of the Ganges, is beginning to tell upon the crops, particularly the aghani rice, the whole of which has by no means been transplanted, and what has been is beginning to wither; it has, however, been raining the past few days with every appearance of more, and I have hopes yet that no real damage will occur. The relief and sub-divisional officers tell their own tale as to present prospects, and their remarks are given below. Opinions appear to differ as to prospects, but as far as I can judge, I should say that *as yet* there are no serious grounds for any apprehension of failure.

3. The total rainfall to the 25th at Sudder has been ... 36·30
Ditto ditto 22nd at Banka has been ... 33·51
Ditto ditto 22nd at Muddehpoora has been ... 33·03
Ditto ditto 24th at Soopool has been ... 41·89

4. *Soopool.*—Mr. Kirkwood writes: "The rainfall (with the exception of a good fall of 3 inches at Pertabgunge) has been very short since I last reported. In the Bullooa circle and some of Simrahi, and I believe in the Muddehpoora sub-division, the murwa and bhadoi is being, or has been cut, and is a very good crop; but elsewhere there is a general want of rain even for this crop. Though nothing in the way of drought could damage three-fourths of the murwa, yet some of the late murwa and almost the whole of the bhadoi in Nareedigur, Soopool, Ekar, and Bungaon circles will be seriously damaged if there is not a good fall of rain within the next week. The feeling is that generally throughout North Bhagulpore the aghani crop is in a very critical state; not only will the area cultivated suffer much, but there will be a considerable area into which, unless heavy rain fall within the next ten days transplantation will be no longer possible; five inches of rain spread over two days would set everything all right. New murwa has not yet found its way into the Soopool bazar though small patches here and there have been cut for private consumption. It is not expected for another ten days in any quantity, and the new rice will not be in for ten days later; the Government rice is the only rice to be seen in the fifteen provision shops of Soopool. In the Bullooa circle, however, east of Beerbandh, the harvest is general, the new rice is eagerly purchased by ryots and dealers, and the sales at our golas have, at the end of the fortnight, been reduced to a very fine point. Health of the people everywhere good; condition improved. Children are getting to look much better."

5. Mr. Smith, the Sub-divisional Officer, writes: "The new rice and murwa are now coming into the market, though, except in the vicinity of Pertabgunge, not as freely as the state of the crops would lead one to expect. Hereabouts, however, the harvest is as yet not general, nor will it be for another ten days; old rice, other than that from the Government stores, is still unprocurable. To the north, murwa is selling at from 25 to 30 seers per rupee, and hereabouts and further north at from 15 to 18 seers. There has been but very little rain since that of the 7th and 8th, which turns out not to have been so heavy elsewhere as it was here. For the later murwa more rain is wanted, as also for the aous paddy, as without it the yield will be comparatively poor; for the aghani, both that in the ground and that remaining to be transplanted, a good downpour of 3 or 4 inches is urgently required, and unless we get it within the next day or two, I fear the area under this crop will prove deficient, especially in the country along the valley of the Tiljooga; in other places little remains to be transplanted. The murwa, of which an unusually large area has been cultivated, will, on the whole, turn out a good crop, as will also the bhadoi paddy, with favorable weather during the next ten days; for the aghani prospects, even with a good fall of rain now, but little can be said just yet, as everything as regards its outturn depends on the early or late cessation of the rains. The condition of the people is universally admitted to be rapidly improving."

6. Mr. Fanshawe, the Soopool Circle Officer, who travels about a good deal, makes these remarks, under date 15th August—"The crops along the Dimra defy all description; some murwa is cut and most nearly ripe, while the bhadoi is rapidly forming into ear and filling; but the picture consists of miles of aghani. I returned to Soopool *viâ* Loarah and the Luthighat, thus visiting the north part of the Dimrah crop, which, if anything, is somewhat finer than that to the south." Under date 17th—"The crop round Pathra is perhaps not as full as it should be, but such as there is, is good." Under date 19th—"During last night and this morning rain fell, which will be beneficial to the crops, though *not actually needed.*" Under date 21st—"To-day I left in the morning for Rutowlee, where I had to do distribution work. The crop all along the road is very good, the murwa being particularly forward and in some cases actually cut. I proceeded first to Simra and then to Rutowlee; there has been no rain lately on this side, and it would now be a great boon, though *hardly yet actually much needed in my circle.* The surface of the ground among the crops is still damp. The crop is very promising all round, and in the dhurs the aghani is of particularly strong growth."

7. The Ekar Circle Officer writes, date 22nd—"Some rain fell in the afternoon this day; this rain is not sufficient for the purpose of transplantation. Cultivation will go on. Murwa is being harvested. The bhadoi crop on the whole is good."

8. The Naridigur Circle Officer writes, date 16th August—"The crops about here are very fine so far, and nearly all the aous bhadoi is now in ear, but the grain has not yet filled properly, owing, I am told, to want of rain just now; in fact, the cultivators are all hoping for rain which, at this moment, gives life and soul to the aous crops, and if we do not get it as required, the bhadoi will be in a critical state." On 18th—"I remained at Bhaptiahi owing to heavy rain in the morning, which prevented my returning to Dugmurah; in the last two days the rain has measured 2·60, and the anxiety about the bhadoi prospects has now been dispelled, and we may almost say it is now secured." On 20th—"The rain has not been general, I regret to say, but where it has fallen, it has done immeasurable good to the crop,—more is required; and where it has not fallen, it is sadly wanted, or *portions* of the bhadoi crop still stand a chance of being spoiled.

9. The Muddehpoora Sub-Divisional Officer says—"The bazars are amply supplied. our sales are therefore falling off; the moodies decline to buy now at even the favorable rates, Rice (bhadoi) has been selling at 17 seers per rupee, (80 weight,) and kheri at 46 seers, murwa about 30 seers. We have had most favorable showers lately, and should they continue, a good aghani may be expected; the people say that even should the aghani fail as much as it did last year, no starvation need be feared, as the bhadoi is so wonderfully good. The health of the people is good; in fact, we have had but little sickness throughout the scarcity."

10. The Banka Sub-Divisional Officer says—"Food-grains are abundantly supplied in all the marts of the sub-division; wheat and barley are cheaper by 1 to 1¼ seers the rupee almost throughout the sub-division. Murwa, not yet well dry, is being sold in places at 20 to 26 seers. 33·51 inches of rain has fallen since the 1st January at head-quarters, although in the interior it appears to have been less, where a good shower of rain is anxiously looked for. It has rained sufficiently in some villages and not in others. The prospects of the *high land* are not good. I have heard that rain has yesterday fallen towards the north and east of head-quarters. The bhadoi, viz. the murwa, indian-corn, and goondli, are being reaped everywhere, but only the first has as yet appeared in the markets. Cholera is now disappearing."

11. In head-quarters the crops are most satisfactory; the only portion where rain is required is south of Colgong and Pointee. In the northern portion of the Banka sub-division the crops, I am told, are splendid. It is quite impossible for any one to form any correct opinion of the future of the aghani; everything depends upon the September and more specially on the hoped-for October rain. I presume Mr. Kirkwood, in writing of "North Bhagulpore," alludes to Ekar and Naradigur circles. The Pertabgunge side and the whole of Muddehpoora are most prosperous, both as regards the crops and condition of the people. The Soopool circle, from the circle officer's report, appears to be very far from being in a critical state. The people hardly have a right to look forward to a bumper crop, whether bhadoi or aghani, and I think I am justified in saying they have had the former in Pertabgunge and throughout the Muddehpoora sub-division. Mr. Kirkwood seems to admit that no drought could injure three-fourths of the murwa, and a very fine crop may fairly be looked for. It is, I consider, too early to talk of the aghani as being in a critical state, and it must be remembered that even an eight-anna crop is a very profitable one. The lands in the south are of a very different description, and the soil and the aghani may be short in area; but I hear, and have every reason to believe from the appearance of the weather the last two days, that the report is true that heavy rain has fallen just where it was wanted. The general condition of the people has very much improved; the general health is far better than it usually is at this season of the year, and the prices of food are falling rapidly in all directions; and, as will be seen from the statement given in the next paragraph, in Bullooa a man can get 50 seers of murwa for the rupee, where a few months ago he could get no more than 12. Murwa is plentiful and cheap, and is really *the* food of the poor and lowest classes. I trust that my next fortnightly will show that the required rain has fallen and dispelled all fears for the time at any rate.

12. I subjoin a comparative statement of the prices now compared with what they were on the 20th August 1866, a comparison that is much in favor of 1874:—

	Rice, common.		Pulses.		Indian-corn.		Wheat.		Murwa.	
	1866.	1874.	1866.	1874.	1866.	1874.	1866.	1874.	1866.	1874.
	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.
Soopool	7 0	10 14	...	...	...	...	8 0	11 0	...	13 8
Pertabgunge ..	11 0	24 0	...	...	...	...	10 0	13 8	...	30 0
Muddehpoora ...	10 0	16 0	6 0	...	...	...	9 0	14 0	...	20 0
Kishengunge ...	6 12	13 0	6 0	...	...	...	7 12	14 0	...	16 0
Banka	8 0	12 0	...	15 0	10 0	16 0	9 0	12 8	...	20 0

Head-quarters ...	8 3	12 0	8 13½	18 15	10 2	21 7	9 12½	15 2	...	...

Murwa selling at Bullooa, north of Pertabgunge, at 50 seers of 80 tolah weight.

B.—Relief Works.

13. The new system has been introduced since the 15th August; the average daily number employed is shown as, in the north—men 2,388, women 1,829, children 543; and in the south as men 97, women 22, children 9.

C.—Transport of Grain.

14. As I anticipated in my last report, the importations from up-country are at an end. The imports at the Bhagulpore railway station have been 980 maunds only; of this 643 maunds were local, and 337 maunds of gram said to have been booked prior to 1st of August; the exports were 1.097 maunds wheat to Howrah. There is no kind of importation of food-grains in the north or south of the district.

D.—Storage of Government Grain.

15. The usual statements are annexed. 6,000 maunds were taken from Byjnathpore gola in Muddehpoora to two golas in the Soopool sub-division; the minor golas I believe will be all emptied and closed by the time the next narrative is due; but I do not anticipate any further sales, certainly not to any extent, from any of the large golas. We shall have left in this case less than 1½ lakhs.

E.—Advances to Private Parties.

16. The following advances in grain have been sanctioned during the fortnight:—

Date of application.	Name of Applicant.	Profession.	Residence.	Amount.	Date of sanction.	By whom sanctioned.
4th Aug. 1874	Balajeet Singh	Zemindar	Pursurma	Rs. 400 worth of rice ...	21st Aug. 1874	Collector.
Ditto ...	Kishore Narain Singh	Ditto ...	Ditto ...	Ditto ditto ...	Ditto ...	Ditto.
Ditto ...	Mohendro Narain Singh ...	Ditto ...	Shookpoor	Rs. 500 ditto ...	Ditto ...	Ditto.
7th ditto ...	Bhugwunt Narain Singh ...	Ditto ...	Deehud ...	Mds. 100 of rice ...	Ditto ...	Ditto.
13th ditto ...	Laljeet Singh...	Ditto ...	Pachgachia	„ 110 of rice ...	Ditto ...	Ditto.
15th ditto ...	Thakoormun Singh	Ditto ...	Shookpoor	Rs. 1,000 worth of rice ...	Ditto ...	Ditto.
Ditto ...	Rodra Narain Singh	Ditto ...	Bhuloagote	Mds. 100-13 of rice ...	Ditto ...	Ditto.

F.—Charitable Relief.

17. *Sales.*—These show a considerable falling off, particularly in the Bullooa circle. Mr. Kirkwood remarks: "In the Soopool circle wholesale sales through moodies were during the fortnight 5,496 maunds as against 7,461 maunds in the preceding fortnight, or a diminution of 1,965 maunds; but the sales direct from the golas (which I attribute in some measure to the present Department Public Works 'token' system) increased by 442 maunds."

18. *Advances.*—Up to the 22nd August Mr. Kirwood reports that 21,502 ryots have received 2,381 maunds of seed-grain and 74,155 maunds of rice; and 124 zemindars have received 4,074 maunds of seed-grain and 37,189 maunds of rice, &c.

19. *Cooked Food*—"Up to date," Mr. Kirkwood reports, "all cooked food operations in the Bullooa, Simrahi, Bhowanipore, Kamp, and Bongong circles have been closed. In these circles hospitals and poor-houses have been abolished, the establishments dismissed, and the native doctors, after making over their stores to the sub-divisional native doctor, have been sent to Bhagulpore; the remaining patients have been collected at Soopool. Cooked food operations still continue at Soopool, Nowabakur, Dugmura, and Ekar."

The figures for the fortnight are (daily average)—

	Men.	Women.	Children.
Bullooa and Nathpore poor-house and hospitals	35	45	39
Bhowanipore ditto	21	13	25
Kamp ditto	1	4	5
Muddehpoora centre	9	11	12
Soopool poor-house and hospital	18	33	41
Nowabakur ditto	14	18	17
Dugmura ditto	20	40	50
Simrahi ditto	6	12	8
Ekar ditto	6	16	10
Bongong ditto	48	40	24

Total 641, or 41 less than shown in the previous fortnight.

20. *House-to-house Relief.*—The numbers have, I am glad to say, in every circle been much reduced, and next fortnight will show a still further and great reduction. Mr. Kirkwood reports as follows: "In the Bullooa circle I gather that the numbers who have received their month's allowance have been under 200; this relief has now been closed in the Bullooa circle, except on the Nathpore side, where probably about 200 people will receive a further allowance before the close of the relief. The numbers in Bhowanipore and Kamp circles have already been much reduced; during the fortnight 385 persons received their last monthly supply. Clothes have been given to some at the close of relief. Mr. Fanshawe reports that 1,293 persons have been struck off during the fortnight. The Simrahi Circle Officer reports that he is rapidly diminishing the amount given and the numbers relieved. Mr. Dennys and Baboo Anund Chunder Sen of Naradigur and Ekar circles report that they are effecting extensive reduction."

The following figures are given as average for the fortnight:—

BhowaniporeCircle	376	Ekar	7,883
Kamp	568	Naradigur	15,246
Bullooa	752	Simrahi	2,540
Soopool	5,402	Bongong...	1,600

showing a total average reduction of 14,267 persons.

21. *Light-labour.*—The following figures are given by Mr. Kirkwood:—

	Men.	Women.	Children.
Bullooa Circle	234	1,068	69
Bhowanipore	34	15	8
Kamp	56	30	9
Soopool	54	1,683	721
Naradigur...	157	1,826	895
Ekar	112	4,772	1,512
Simrahi	354	4,110	1,133
Bongong	76	2,234	291

Total 21,458, or 1,975 less than those shown in the previous fortnight.

Mr. Kirkwood under this head makes the following remarks: "It is to be hoped that (as in Bullooa so elsewhere) the cutting of the crops may draw considerable numbers from our relief who will not return again. The feature there has appeared which I think always marks the cessation of real distress; people in large numbers have voluntarily declined to receive further house-to-house relief, and have voluntarily left our works; such facts (they have also happened in Bhowanipore and Kamp) mark, to my mind, the cessation of distress, and refute, with more weight than a thousand arguments, the assertions of demoralization in which so many Indian journals deal."

In my mind there never was a doubt for a moment that when harvesting time arrived people would voluntarily go away for the employment they are annually accustomed to engage in, and at which they derive far greater profit than from even the more liberal rates of wages they have received on our works; and now that those rates are really bare subsistence, they will seek employment elsewhere as soon as ever they get the chance, and it is satisfactory to know that this is actually the case.

22. *Spinning and Weaving.*—Mr. Kirkwood, in giving the following figures, remarks: "This is one of the branches of relief which will be kept open the longest, being a labour relief, and, as such, an intermediate stage between native dependence and entire independence. The supplies of cotton have just been replenished by the arrival of 200 maunds of cotton from Bhagulpore; this ought to suffice for this relief to the end."

Daily Average.

	Spinning.	Weaving.		Spinning.	Weaving.
Bullooa Circle	848	275	Naradigur	1,126	193
Bhowanipore	295	63	Ekar	700	193
Kamp	133	57	Simrahi	400	96
Soopool	1,829	264	Bongong	848	170

Total of spinning 6,479, and weaving 1,311, showing an increase on the last fortnight of 527 and 73 respectively.

23. Mr. Kirkwood reports as follows on the reduction of establishments:—

"Three group superintendents have been abolished in the Bullooa circle, and two in each of the Kamp and Bhowanipore circles before the 20th instant. The other group superintendents in all circles, with the exception of a few in Ekar and Naradigur circles, will be abolished from the 31st instant. Hospitals and poor-house establishments, with the exception of those in the Ekar, Soopool, and Naradigur circles, have been dispensed with. Light labour establishments in Bhowanipore and Kamp will be abolished from the 31st instant; they will almost all be done away with in the Bullooa circle from the same date. Cotton relief

establishments at all the Bhowanipore and Kamp cotton depôts, and at two of the Bullooa cotton depôts, will be dispensed with before the end of the month ; all extra mohurirs as assistants to grain goladars have been abolished. Grain gola establishments at four golas have been entirely abolished on the closing of the golas. These are all small golas and their stores have been disposed of, viz., Moheshi, Nohutta, Dulgaon, and Bheemnuggur. The police guards have been reduced by about 60 men. Three native military officers have already left, and those remaining will leave North Bhagulpore on the 31st instant. Local Assistant Superintendents will be done away with in the Bhowanipore and Kamp circles from the 31st. The services of Mr. Paul, Relief Superintendent of Bhowanipore ; Baboo Ram Sunker Sen, Relief Superintendent of Bullooa ; Moulvie Fyzul Kadir, Relief Superintendent of Kamp, will I hope, be available after the closing of their accounts by the 15th September."

24. I have, since the above was written, received copy of the Lieutenant-Governor's telegram forbidding the dispensing with the services of any of those employed on relief prior to the 15th September ; what has been done, cannot, I regret, be now undone, as three Military Officers and some native doctors have already left the district ; but I can confidently state that their services were not dispensed with till there was absolutely nothing more for them to do. Mr. Kirkwood has been apprised of the Lieutenant-Governor's instructions, and all will be retained at their posts till further orders.

25. The general state of the people has greatly improved and continues to do so. There are some apprehensions, in which at present I do not share, of the future failure of the aghani. Nothing can be definitely stated as regards these crops for some little time to come, and if the same sort of weather as is now prevailing at head-quarters prevails generally, all fear up to date will be removed.

26. G.—FINANCIAL RESULTS OF THE FORTNIGHT.

No. 3138F, dated Purneáh, the 27th August 1874.

Memo. from—W. KEMBLE, ESQ., Magistrate and Collector of Purneah,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Department.

FORWARDS fortnightly narrative for the period ending Saturday, the 22nd August 1874.

Fortnightly Narrative for the period ending Saturday, the 22nd August 1874.

A.

THE prospects of the crops and the condition of the people are reported from all quarters to be excellent.

It appears that this year an extraordinarily large area has been sown with bhadoi, which is now being reaped and brought to every market in the district

Mr. Craven from Kishengunge writes: "The markets are full of the new bhadoi rice The weather has been just what was wanted—warm, sunny days with alternate showers. The prospects of the aghani are most promising" He says: "Distress seems to have put fresh life into the people; for wherever it is possible to get a second crop off the same land, we find them busily engaged in transplanting aghani a day or two after the cutting of the bhadoi crop"

Baboo Ram Chund Setya, the active and energetic agent for Rae Luchmeput Sing, reports that he "does not apprehend the recurrence of the distress unless some unavoidable providential causes intervene." He has stopped all his relief operations, and sent me in a final report of the really good work which he has been doing for his employer in this district. This will be noticed at the proper time.

The prices at which rice is now selling are generally 18 seers for new bhadoi, 14 to 15 seers for old rice. Unhusked paddy is, in Kishengunge, sold for one rupee per maund.

B.

Work has now entirely ceased on almost all the roads in this district. I notice that in the last return it was stated that the 13,139 persons employed under relief officers were on daily wages. This was a mistake, as for the last month they have all been on task-work.

Except in Kusba Amour, where from the very first there has been a very large number of women and children employed on our roads, the numbers fell off early in the month. In the Sudder, Dengra, Kudbah, Bulrampore, and Kalliagunge circles, work has entirely stopped On the last day of the fortnight there were 148 people employed in finishing a tank at Kishengunge, 968 in Bahadurgunge, and 874 in Arrareah ; total 1,990.

In Kusba Amour the works were not closed till the 15th, when the demand for labour in the fields was so great that Mr. Gouldsbury was satisfied that no harm could arise from the closing. Special inquiries were made, and Mr. Gouldsbury, by subsequently riding through the villages in the neighbourhood of his late works, has seen himself that his people have found employment It is now only the professional "beldars" who can be induced to work on Mr. Cordner's north road.

C. & D.

All transport work has now ceased. Captain Anderson is engaged in preparing a report upon the pony power of the district.

The grain which remains unsold is being carefully stored in central places in case of future emergency, and all accounts are being looked into and discrepancies reconciled.

E.

Blank.

F.

The lists of persons in receipt of charitable relief have been carefully scrutinized, and the result is that the numbers have fallen off considerably.

To those persons who were considered worthy objects of charity a month's supply of food has been given, and they have been struck off the lists. These people are known, and will of course be watched, and reports will be sent in by the relief officers who have not yet left their stations.

Baboo Ram Chund Setya states that he thinks the continuance of charitable relief will now have a demoralizing effect, and increase the number of professional beggars.

The only circle in which the numbers on charitable relief are large is Bahadurgunge, where apparently my orders were misunderstood.

The sub-divisional officer, Mr. Craven, states that he doubts whether relief was needed to the extent it was given, and was making inquiries into the matter.

Mr. Gouldsbury says that most of the persons in receipt of relief from here were professional beggars.

Mr. Thornton at Dengra has issued relief tickets up to the end of the month, after which time he thinks operations may be closed. There will still be need of care that people so long dependent on charity are not thrown too suddenly on their own resources.

In the extreme north of Arrareah, where the crops are more backward, Mr. Rattray is still issuing tickets, but he has not given in the numbers.

In the Sudder relief is required owing to the larger number of beggars and other incapables who congregate here.

At Kudbah all necessity for charitable relief has long ceased.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

The expenditure reported last fortnight amounted to Rs. 8,32,716-2-6 + 3,321-15-3 = 8,36,038-1-9.

PURNEAH,
The 27th August 1874.

W KEMBLE,
Magistrate and Collector.

No. 819—S.R., dated Doomka, the 25th August 1874.

From—JOHN BOXWELL, ESQ., C.S., Officiating Deputy Commissioner, Sonthal Pergunnahs,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit a narrative for the fortnight ending the 23rd instant.

A.—STATE OF THE COUNTRY.

Mr. Grant writes from Godda: "I have nothing to report as to any material change in the condition of the people." There was a very decided improvement when the rains first set in, but since then things have remained much in the same state without any noticeable change for the better or for the worse." This is in striking contrast to our fears that the condition of the people would become very much worse after the rains began, and get worse and worse down to September or October. Mr. Grant has made us able to see how it came about. The country was not so bare of food as was thought; and when harvest prospects began to look good, mahajuns and rich cultivators brought out their stores. The large advances and relief works helped of course. Mr. Grant goes on: "With the exception of the recipients of charitable relief at the different relief centres, the health of the general population seems good. There is nothing in their appearance to indicate suffering from want." On supplies Mr. Grant writes: "In fact the bazars are now more abundantly supplied with food stuff than they have ever been since the commencement of the relief operations. A coarse red rice is imported from outside the district. This rice is being sold at Belbadda and Ferozpore at from 14 to 15 seers. Janera of last season appears to be more plentiful at Moraro and the other markets at the foot of the hills. It is selling at from 15 to 18 seers for the rupee." This is not bad for the week that ought to be the worst of the year in the pergunnah the worst off in the district. It seems to me to be pretty good evidence that all danger is over; and that we should at once stop all relief, make up our accounts, and turn to our ordinary business.

From Rajmehal Mr. Stewart reports damage done by the Ganges on the dearas. There is a sort of compensation in this low, river-bank cultivation. If the river rises the early crop is lost, and there is a great rubbee crop on the silt. If the river does not rise there is a double crop, but the rubbee is poor. Mr. Stewart puts down the average of the bhadoi at 12 annas. The condition of the people continues good.

The zemindar of Ambar, Baboo Gopi Lal Paure, writes to me that transplanted rice wants rain badly, but that the early crops are all good and are being harvested.

From Jamtara Mr. Hand writes: "We have had enough rain for the present. Transplanting is rapidly proceeding towards completion. We have had in the first of the new Indian-corn."

From Moheshpore Mr. Wood writes: "We have had fairly seasonable weather the last fortnight. The greater portion of the winter dhan has been planted out. A few heavy showers would do it every good. The Indian-corn is being gathered, and cobs are sold at three or four for the pice, according to size. Bhadoi dhan is well in ear and promises well."

From Deoghur Mr. Wilmot reports that all crops are excellent. The Indian-corn is particularly fine and is giving a great yield; sathi dhan is both good and widely sown; and the small grains are being gathered and are yielding very well.

In Doomka we are a little later than Deoghur. Bhuttas are sold at from four to six, while in Deoghur they are as cheap as eight for a pice. We have had great rain here, and all the crops are doing as well as possible.

Our present condition is therefore this: over two-thirds of the district we are gathering an unusually good bhadoi harvest; in one-sixth, Rajmehal, it will be a trifle, and in the remaining sixth, Godda, considerably below average.

The people are in good condition everywhere, and are over the worst.

The prospects of the late rice are generally good. Weather is perfect in Deoghur, Doomka, and the south generally. Rain is wanted in the north; but if the Rajmehal 5 inches on Friday is a true reading, it is probably coming. There ought to be nothing to report in any future narrative.

B.—RELIEF WORKS.

The Commissioner has ordered stoppage within the month of all civil officers' relief works. I don't see that the order is being carried out fast enough.

Mr. Grant has increased his numbers by 1,700 persons. He says he was driven to it by the weather, which did not let the people work in their rice fields.

C.—TRANSPORT.

Nothing to report.

D.—STORAGE.

Nothing of importance.

E.—ADVANCES.

Three thousand three hundred and fifty-three máns have been given in advances.

F.—CHARITABLE RELIEF.

Numbers are given separately.

G.—FINANCIAL RESULT.

Figures are given separately.

E. J. MEARA, C.E.,
Offg. Executive Engineer,
Sonthal Pergunnahs District.

Narrative of Scarcity and Relief in the Moorshedabad District for the Fortnight ending 22nd August 1874.

A.—STATE OF THE COUNTRY.

1. *Abundance or Scarcity of Supply in the Bazar.*—The supply of food-grains in the bazars and hâts of the Head-quarters sub-division is still reported as being sufficient for the daily wants of the people, and the early rice-crop now being cut will, of course, considerably increase it. In the Lalbagh sub-division the markets of all the thanas except Bhadurihaut, where deficiency still prevails, are sufficiently supplied with food-grains. Advances of Government grain have been again made to the shopkeepers of a few villages in Bhadurihaut. In the Jungipore sub-division the markets of Dhulian and Rughoonathgunge are very well supplied with rice. Mirzapore and Notungunge have also a good supply. The sub-divisional officer reports that there is scarcely any demand for Government cargo-rice at 14 seers. In the Rampore Haut sub-division the supply has been reported to be insufficient, but still the sub-divisional officer reports there is no want yet felt for the daily requirements of the people. The early rice-crop of the north-east of thana Pulsa will very soon be in the market, and will replenish supplies in the northern part of the sub-division at any rate.

2. *Kind and price of grain selling at one or more principal marts.*—The average price of common rice in the sudder sub-division is slightly lower than at the date of the last narrative. It is now 11$\frac{10}{12}$ seers per rupee. It is cheapest at Gowas, Jellinghee, and Dowlutabad, where the prices are 16, 16, and 14 seers per rupee for new "aous" rice, and it is dearest at Gokurn and Kallyangunge, where the prices are 9 and 9½ seers per rupee. Wheat and grain are at nearly the same price as before. In the Lalbagh sub-division the prices of best, common, and "bhadoi" rice in the several markets vary from 9½ to 11, 9½ to 12, and 12 to 14 seers per rupee respectively; those of wheat, barley, and gram from 12½ to 14½, 20 to 24, and 10½ to 18½ seers per rupee respectively; common rice is dearest at Sagurdigee, where it is 9½ seers per rupee. The markets will no doubt fall during the present fortnight on account of the coming in of the "aous" harvest. In the Jungipore sub-division, in the Rughonathgunge bazar "rahri" rice is selling at 12½ seers per rupee, at Mirzapore at 12 seers; at Dewanserai "bhadoi" rice is at 14 seers, and "purbi" at 12 seers; in Shumsheregunge, at 12 seers; at Sooty, 12¾ seers; and at Hazarpura, 11 seers per rupee. On market days "bhadoi" may be had at Jungipore at 14 seers per rupee. In the Rampore Haut sub-division the prices of coarse rice vary from 10½ to 12 seers, and those of best rice from 8½ to 9½ seers per rupee. It is somewhat strange that prices did not rise more during the past month of long continuance of dry and very unfavourable weather in so considerable an extent of the district; and now that at the very end of the period for which this report is written, and on Sunday (yesterday), we have had some heavy showers, which there is every reason to believe have been general, it may be expected that there will be a fall in the price of rice owing to the improved prospects of "amun," and the coming into the market of the outturn of an "aous" crop, which, taken all round, is probably not much below the average.

3. *Any information obtained regarding the amount and kind of grain believed to be in stock in the hands of zemindars, traders, ryots, and others.*—There is no fresh information as to the amount of stock of food-grains in the hands of mahajuns, zemindars, and others. The merchants at the important marts have, I believe, sufficient supplies, and the prices which now prevail all over the district do not seem to betoken any great scarcity of supply. Fairly abundant supplies of the "aous" rice are being brought into the market from the low lands on the face of the Ganges, where the crop was naturally much earlier than inland.

4. *Rainfall, if any.*—There has been rain in every station in the head-quarters sub-division during the fortnight up to the 21st instant, but little more than passing showers, insufficient to thoroughly soak the ground and leave a few inches in the rice-fields, which is so necessary for the growth of the plant. But there has been copious rainfall at head-quarters for the last two days, which I believe to be general; and this fall will greatly alter the prospect of the crops for the better. I have just heard from Mr. Jones, relief sub-divisional officer of the Bhurtpore and Gokurn thanas, that there were heavy showers on Saturday during the day, and a splendid downpour during the night in the part of the Bharathapore thana where he was, and there is reason to believe that this was general in the thana. I have also heard that there was heavy rain in Khurgaon on Friday, and that on Saturday night it came down very heavily in the country between Nulhattee and Azimgunge. In thana Kallyangunge, too, there have been showers during the past week, but I have not yet heard whether the rain of Saturday night was heavy there. The part of the district about which there is the greatest anxiety on account of deficient rainfall is the high line of country from some 12 miles or so to the east of the East Indian Railway to the Bhagiruthee, comprising parts of thanas Sooty, Mirzapore, Bhadurihaut, Kallyangunge, Gokurn, and Bhurtpore. If heavy rain has fallen in this tract of country, as there is reason to believe has been the case, our prospects are much better than when my last narrative was written. The rainfall at Jungipore was 1·42 of an inch up to the date of the submission of the sub-divisional report, and 1·93 inches of rain fell at the head-quarters of the Lalbagh sub-division. The rainfall in the Rampore Haut sub-division during the fortnight was very scanty, being only 2·24 inches. It is, however, almost certain that the late heavy showers must have fallen in that sub-division also. The appearance of the sky has this year been so often deceptive that I hesitate to predict from former experience; but there is at any rate good reason to believe that there will be more rainfall in the course of the day or night.

5. *State of the crops.*—The relief sub-divisional officer of Kandi reports that the continued drought has damaged much of the "amun," and, it is feared, beyond recovery, while it has also lessened the expected outturn of the "aous". The slight showers, the good effects of which have almost immediately been counteracted by the intense heat, have been utterly insufficient for the wants of the winter crop. The country, however, between Kandi and Bharathapore, and, it is believed, the greater part of the country lying on the western side of the Bharathapore thana, have been planted out. The crop is reported to be an exceedingly good one, and the present rainfall will, I trust, conduce to the yield of an abundant crop. The sub-divisional officer of Jungipore reports that the prospect of the "hymunti" rice is decidedly gloomy. In Western Sooty, the villages of Amdoul and Sidhore are the only ones where a fair amount of transplanting has been done. In the villages of Olian, Bangshabati, and Dain, not a cottah has been transplanted; and in the first-mentioned of these villages, the sub-divisional officer found seedlings in two nurseries getting parched—a thing which has not yet happened in any other village except at Ramva, in Central Mirzapore. This unfavourable state of affairs has, however, probably undergone a change if the late heavy rain has fallen there. Even now with seasonable rain a fair crop might be obtained, though the outturn will not be so good as if transplantation had been effected some two or three weeks ago. A good harvest of "bhadoi" is being reaped and the prospect of the "hymunti" rice is pretty fair in the part of Mirzapore bordering on the Bhagiruthee. The sub-divisional officer of Lalbagh reports that the prospects of the "amun," especially in the Bhadurihaut thana, however, are far from satisfactory. Transplantation has been much checked owing to want of rain. On the other hand, the "aous" crop in thana Bhugwangolah bears a most satisfactory aspect, and the outturn is likely to be large. The River Bhoyrub rose suddenly last week and almost submerged a portion of the crop, which had to be cut unripe in some places. It is always expected that a certain proportion of the crop near the Ganges should be submerged; and I believe that on the whole, the damage done in this way to the crops has been less during the present than in ordinary years. The "aous" crops that I have very recently seen in parts of the Dowlutabad, Bhugwangolah, and Goas thanas were certainly up to the average. The sub-divisional officer of Rampore Haut reports that the state of the crops is not satisfactory from want of sufficient rain. Accounts from Khurgram were unfavourable, inasmuch as it has been reported the new seedlings now planted have begun to wither. His narrative was, however, written before he could have heard of the rainfall, which has probably altered the condition of the crop for the better. In the other thanas of this sub-division the prospects of the crops were better, though in tracts here and there damage had been caused to the transplanted seedlings by insufficient rainfall. The falls of rain have probably been less at Berhampore and in the parts of the district south of it in the Burwa thana than elsewhere. Some of the crops near Berhampore have been irrigated and saved by means of water let into the Bishtopore bheel from the river through the sluice-gates, and thence down the northern drainage cut, which was dammed at a convenient place. Further south the embankment of the Bhagiruthee has been cut, in some cases without permission being sought, in others under the orders and supervision of the Executive Engineer of the Nuddea Rivers Division or of his subordinates. It is now necessary to close the breaches, as the river is again rising; and it is to be hoped that the rainfall may now be sufficient to preserve and mature the crops. The prospects of the crops, in short, depend upon the weather of the next week or ten days; for though the present rainfall may have saved much for a time, it cannot preserve for long. The soil is so parched that it could take in inches of rain. The tanks are in general lower by some feet than their ordinary level; and if there be not really heavy rain during the next six weeks at seasonable intervals, not only will the failure of the winter crop be greater than it was last year, but the water-supply will be most dangerously inadequate.

6. *Condition of the people.*—There is no improvement in the condition of the poorer classes, who are still severely pressed by the high price of food. The long drought, the increasing anxiety caused by the great uncertainty as to the crops of this year, have undoubtedly had a depressing effect upon many, and have also beyond doubt led to exaggerate representations and alarms, for which there is at present at any rate no foundation, whatever may be the case should there be a recurrence of the drought of the past month. The sub-divisional officer of Jungipore states that the distress in Mirzapore and Western Sooty is being actively relieved by the sub-committees in those stations, and uncooked rice is being distributed at Jungipore twice a week; the poorhouse for cooked food having been closed since the plentiful supplies of "aous" rice have come into the market. The sub-divisional officer of Lalbagh reports that there is nothing to indicate greater distress than has prevailed for the last few months. Within the municipality there is abundant work for the labouring classes, and those who cannot, or are not able to work, are provided for by charitable relief in a manner better perhaps than they are accustomed to in ordinary years. The population of the Bhugwangolah thana will be well off after the present "aous" harvest; and indeed this part of the country was the most favoured last year with a fair crop. The population of thana Bhadurihaut have been most pinched; and though prices have remained high, the people have had work on the numerous relief roads which would not exist in ordinary years. The sub-divisional officer of Rampore Haut reports that the sufferings of the poorer classes, and those of respectable females among whom distress is observable, are being relieved by the numerous poorhouses established in this sub-division, and by gratuitous relief. There will not be any change for the better as regards the condition of the people until there be sufficient rainfall to render the prospects of the winter crop more promising, and to put the people in better heart.

7. *Actual facts as to any known cases of misery and starvation.*—No such cases have come to light.

8. *Grain-thefts or robberies.*—Eighteen cases of petty theft of rice were reported in the head-quarters sub-division during the fortnight under report. In the Jungipore sub-division the occurrence of a grain-robbery has been reported attended with murder. The robbery took place on the 9th instant, at a village named Birthumlia, in thana Mirzapore. One Jogu Singh, one of the accused, confessed before the sub-divisional officer that he was privy to the plot. He stated that one Braja Lall Mukherjia wanted to borrow Rs. 4 worth of dhân and Rs. 2 in cash of the deceased Modhu Datta, the zemindar's gomashta; that he was refused the loan; that he broke into the granary at night, and being discovered was taunted by the deceased with two thefts previously committed by him (and apparently excused), and vaguely threatened with legal proceedings; that on this he (Braja Lall) murdered and robbed the deceased with the assistance of another. Braja Lall does not, however, confess. There have been three cases of grain-theft in the Lalbagh sub-division, and six such cases in the Rampore Haut sub-division. There has been a somewhat considerable increase of crime in all the sub-divisions except Jungipore, as will be seen from the crime statement annexed. This is probably due in great part to the dearness of rice and to the absence of field-labonr on account of the unseasonable drought.

9. *Condition of any special tracts.*—In the head-quarters sub-division cholera has again appeared in a mild form in Sujagunge (part of the Berhampore municipality), but that is a place which is rarely free from the disease for more than a short time. Small-pox has also been more prevalent in the same place, but no deaths are reported. The relief sub-divisional officer of Kandi reports that the health of the people in his sub-division has been remarkably good; it is reported, however, that cholera is reappearing in Kandi. The sub-divisional officer of Jungipore reports that nowhere in this sub-division is there any sickness prevailing. There is nothing special to remark as regards the Lalbagh sub-division, except that there have been a few isolated cases of small-pox within the municipality. In the Rampore Haut sub-division cholera and small-pox prevail in some parts, but in a mild form, it would appear. The statement submitted by the Civil Surgeon is herewith sent.

(B.)—Relief Works.

The average number of labourers employed on relief works during the fortnight has been 9,200. There has been a very considerable increase on some roads in the west of the district, evidently on account of the cessation of agricultural operations in consequence of the deficient rainfall and of the bad prospects of the crops. I am about to proceed in this direction in order that I may satisfy myself whether it is necessary to retain so many labourers, and trust to find that the numbers have decreased since the late falls of rain. Until more work is available for labourers in completing the transplantation of the winter crop, it will not be possible to reduce the numbers who resort to these works for subsistence.

(C.)—Transport of Food.

It is reported that a good deal of rice is imported into the Kandi relief sub-division from the Synthea railway-station. During the fortnight under report "purbi" rice has been imported into the Roghoonathgunge market. From the returns furnisned by the Traffic Manager, East Indian Railway, at Jamalpore, it appears that 21,949 maunds of food-grains have been imported to, and 859 maunds of food-grains have been exported from, the jurisdiction of the Rampore Haut sub-division during the fortnight.

(D.)—Storage of Government Grain at Relief Works.

The arrangements originally made for the storage of grain and management of Government golas are still adhered to.

The following figures show the quantity of grain received into district—

From—Calcutta	... ...	56,519
Godagari	... ...	7,467
Maldah	... ...	10,470
	Total ...	74,456

Annexed is a statement showing the storage and consumption of Government grain for the past fortnight.

(E.)—Advances to Private Parties and their Results.

There were 36 applications pending at the close of the last fortnight in the head-quarters sub-division; 246 fresh applications have been received during the fortnight under report. Out of the total 282, orders for payment have been passed in 37 cases, and the remaining 245 cases are either under investigation or have been rejected. Cheques for payment in rice have been issued to the aggregate amount of Rs. 1,897-8-0; of this sum, Rs. 1,812-8-0 relate to advances of grain to zemindars, and Rs. 85 to ryots. The relief sub-divisional officer of Kandi reports that orders for advance of 373 maunds 10 seers have been passed, and other applications are still pending. About 70 maunds have been advanced during the fortnight. The sub-divisional officer of Jungipore reports that 676 maunds 30 seers have been advanced to 490 ryots during the fortnight. In the Lalbagh sub-division advances have been made to zemindars and ryots, and also to the village chowkeedars of thana Shahanuggur, on the same condition as reported in the last narrative. Advances of grain for sale have also been made to a few shopkeepers in thana Bhadurihaut, in villages where grain was procured, but with great difficulty. In the

Rampore Haut sub-division numerous applications for advances have been received. In some orders have been passed, and many are under investigation. The statement under heading D shows the aggregate consumption of grain in advances of this kind.

F.—CHARITABLE RELIEF.

The statement prescribed by Government No. 1251—SR, dated the 5th March last, is annexed.

Notwithstanding that the relief centres of the east of the district, with the exception of those at Choa and Beldanga, have been closed, the numbers obtaining relief are very considerable, as will be seen by the return, which however is incomplete, as returns have not been received from all the sub-committees. As before, the women and children largely predominate; and until future prospects are better and more assured, it will not be possible to reduce the numbers to any considerable extent. Nor can the numerous relief works be closed at present, as owing to the unfavourable character of the weather, field-work has been very much impeded, especially in the parts where there was distress before; and as most of the labourers have others to support besides themselves, it would not be expedient to reduce their wages to those of bare subsistence. I feel sure that our works do not interfere with agricultural operations, and that heavy falls of rain will cause the numbers to diminish very considerably.

In the special sub-division of Kandi the numbers seeking charitable relief have increased owing to the drought and unfavourable state of the crops. The most notable increase has been at Saktipore, where the daily average, according to the return of the first week, was 1,110, and according to the second week 2,652. At Kandi, too, great numbers resort to the poor-house for relief.

In the Lalbagh sub-division the Hindoo and Mahomedan cook-houses are still continued in Shahanuggur and Mohimapore. Of the total number of persons relieved shown in the statement, 3,415 were relieved under heading (*b*), 1,059 under heading (*c*), and 786 under heading (*d*). Those relieved under heading (*c*) were at work on 19 different relief works under the sub-divisional relief committee. The total receipts of the sub-divisional relief fund amount to Rs. 4,259-2-5, and the total expenditure Rs. 920-7, leaving a balance of Rs. 3,338-11-5.

The total receipts of the Rampore Haut sub-divisional relief fund amount to Rs. 872-6, and the total expenditure Rs. 712-7-2½, leaving a balance of Rs. 159-14-9½ at the close of the fortnight.

In addition to the number shown in the statement as regards the Jungipore sub-division, 42 persons on an average daily were relieved by work on three embankments, and 47 coolies daily for cleaning rice. The persons at work were paid in rice. The total receipts of the sub-divisional relief fund amount to Rs. 4,083-8-4, and the total expenditure Rs. 3,904-6-5, leaving a balance of Rs. 179-1-11.

(G.)—FINANCIAL RESULTS OF THE FORTNIGHT.

Vide accompanying statement.

No expenditure in money has been incurred in any of the sub-divisions from Government funds during the fortnight under report.

W. Wavell,
Offg. Magte. and Collr. of Moorshedabad.

No. 1758—SR., dated Dinagepore, the 24th August 1874.

From—E. E. Lowis, Esq., Offg. Magistrate of Dinagepore,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I have the honor to submit my narrative for the fortnight ending 24th August 1874.

A.—State of Country.

During the past fortnight the prospects and condition of the people have improved. A considerable portion of the bhadoi has now been cut, though some still remains standing; as pointed out in a previous report, this crop was sown at different periods, and is only gradually becoming fit for the sickle. The ripening of the bhadoi has had great effect upon prices, causing a considerable fall all over the country. Orders had been issued to all circle officers to stop sales of Government rice as soon as the markets were supplied with country grain, and in consequence sales have ceased in almost every circle; but in truth there was no need to warn the officers to stop sales, for as soon as there was a sufficient native supply in the hâts, the demand for Government grain at once fell off of itself, and sales dwindled down to next to nothing. Bhadoi will continue to be gathered up to the 8th or 10th of September, and there will, up to that date, be an ever increasing supply in the market, which should continue until the end of October, *i. e.*, unless absence of rain causes anxiety to be felt respecting the winter rice; if there is the least fear of failure in that crop, everyone will keep what he has, to guard against contingencies, and the markets will not be freely supplied. Whether the bhadoi will suffice to bridge the gap between its first appearance, and the gathering of the winter harvest is a question which it is only possible to guess at; there is no doubt that in ordinary seasons the bhadoi does not suffice to supply the market till the coming in of the hymunti, and that old stocks have to be fallen back on. But this year there has been a very unusual amount of bhadoi gathered, and though there is little or nothing in the shape of old stock to fall back upon, I do not anticipate any great demand during November and December; however, if there is, we have stock in hand sufficient to supply any deficiency that may exist. The demand after all cannot be very great, for most of the ryots have under cultivation some bhadoi lands, more or less; most of them therefore have grain in their houses of which they will keep enough to afford subsistence for themselves and their families for the next few months, the surplus only being disposed of. If the prospects of the hymunti, then, continue favorable, there is no probability of any further distress making its appearance. As regards the hymunti, the weather has been, on the whole, not unfavorable; we had, just at the proper time, *i.e.*, just before the season for transplanting, heavy rain in the district, and at the same time rain along the foot of the hills, which flooded the rivers; the ryots were thus enabled to flood their fields, and carry on

transplanting operations successfully on all except high lands near villages; in some places three-fourths, in some places half, and in many nearly the whole of the transplanting has been finished. Since then we have had showers, more or less, which have sufficed to keep the newly planted rice alive, but has not sufficed to permit the transplanting to be finished, where it had not been completed; the break, however, has had no ill effects. A little more rain may have been desirable in a few localities, but no damage has been done, and the comparatively fine weather has enabled the villagers to cut and store bhadoi. The time has now come when heavy rain is again wanted; the transplanted rice on the lower lands is now well grown, and able to survive in a greater depth of water, while water is wanted for the higher lands to enable them to be successfully cultivated. The transplanting season has not past; operations may be carried on up to the 8th or 10th September, so there is plenty of time yet for the rain to come. If we have no heavy rain during the next ten days, prospects will look gloomy, but much rain has fallen to the north of the district, and will, I hope, soon be general. The people themselves are, I am happy to say, not anxious; the damage done as yet has been very small, and with favorable weather now we may still expect a good crop. The way in which the bhadoi is coming into the market is in itself a sign that the people are not anxious; if they had the least fear as to the future, they would not, especially after the experiences of the past year, sell even a surplus stock. Everything depends on the next six weeks; if we have heavy showers up to the first of October, the winter crop may be considered safe, even though it should not rain after that date. Rain in October ensures a finer crop, but heavy rain in September ensures there being a fair crop, if not a bumper one. Prices still continue to fall, old country rice being brought for sale in small quantities at 13 to 14 seers per rupee, new rice ranging from 15 to 20 seers. In a few hâts in Thakurgaon rice still fetches 8 seers per rupee, but the sales of Government rice have fallen off there, which shows that the demand is being met. The health of the people continues good; fever of course there is, that being an ailment from which the district is never exempt during the rainy season, but cholera and small-pox seem to have disappeared.

B.—Relief Works.

Very little is being done now on the roads; a few coolies are employed here and there in finishing off some uncompleted lengths of road, and a few are employed in putting up temporary bridges, while light-labor gangs of women and children are employed in turfing the slopes of embankments, and carrying out petty repairs; the numbers of laborers of every description, however, are constantly decreasing, and every one who can, exchanges the subsistence allowance of rice given by the circle officers for the food and money to be gained by field labor.

C.—Transport.

No transport operations are now going on.

D.—Storage.

Now that our sales of rice have ceased, circle officers will be requested to take stock, and ascertain exactly what amount is in store in each gola; they will also see that what grain remains is properly secured and stacked, so as to keep good to the end of the rains. The grain is in general in a good condition; a supply lately taken over from the Railway authorities however, some 8,000 maunds in weight, is reported to have been received in an unsatisfactory state; the rice is said to have been attacked by weevils, and partly wet; it is doubtful whether this lot will be preserved in a good state up to the end of the rains. The sufficiency of our stocks is a subject I have discussed in former reports and in the previous portion of this narrative; I need not therefore recapitulate.

E.—Advances.

The following report on advances has been submitted by the District Relief Officer:—

"During the past fortnight the amount given out in advances has been but small, being in most instances merely the delivery of grain which had been previously promised. Of the amount shown in the subjoined statement as issued in the first week from Tambooli, nearly 900 maunds were taken by ryots of the Kaliagunge circle merely as a matter of convenience.

"In Gungarampore circle at the outset only half of the total amount of the advances were given out, and by the time the second instalment came to be issued, it was found that the people could do with less than was at first promised. The present issues are on account of the second instalment, as also is the case in the Patiram and Putnitolah circles. In Durgapore it has been found necessary to make additional advances, on the earnest recommendation of the zemindars, to their ryots, who at first took too little to last them till the reaping of the bhadoi. The zemindars concerned are becoming sureties for both the new and the previous advances.

"In one part of the Churamon circle, where advances were at first rarely asked for, it has been found that the stocks in the hands of the ryots have become exhausted, and help necessary to tide some of them over the two or three weeks remaining till the harvest comes in. In Luskerhat also it is found that the people when first estimating their requirements, in their anxiety to avoid incurring debt, took too little to last them, and further advances now have to be given. These instances apparently prove that much care was from the beginning exercised in respect to advances, both by the people and the circle officers, and no extravagance allowed.

ct of the registration of agreements given in connection with these advances, tely represented to the Government.

eems to be a marked desire on the part of the recipients in many quarters to obligations to Government honestly, and as early as possible. The following r. Fasson regarding his circle (Bindol) illustrate this :—

people generally appear somewhat anxious to free themselves from their debt to t, and many of them have expressed a wish to repay part of their advances out ceeds of the present bhadoi crop. I have agreed to take payments in part or in ne village has already paid up about two-thirds of its small advances. Villages ely indebted generally ask to the end of this month in order to realize the proceeds crop. If the present prospects are fulfilled, about one-half of the villages that have e will pay up during the first days of September from one-third to one-half of their s; perhaps more than this * * * The zemindars have not to the matter yet, and they may have much influence which they would probably prevent the payments. There is certainly not much love lost between the people and mindars, and the former seem, as far as I can see, more inclined to pay their Govern- debt than to pay their rent; but the zemindars are certainly prepared to enforce the r more energetically than the Government to induce the other. * * * * Most of them borrowers) are, I believe, fully prepared to carry out their agreement (to pay in full e 1st Bysack next), and most of those who are going to pay up part out of the present stipulate only that they shall not be asked for the remainder until they have harvested hymunti, when they volunteer to pay the remaining instalments.' From Habra again s reported: 'Many of the persons who received advances in previous months are ready pay the money, and I request authority to collect the money from those who are willing repay.' There seems to be a probability that several zemindars of influence will yet me forward to undertake the responsibilities of all their ryots."

Advances during the Fortnight.

F.—Charitable Relief.

Regarding charitable relief, Mr. Nicholls observes as follows :—

"At the end of the previous fortnight the total number of persons in receipt of relief gratuitously, by employment in manufactures, and on light-labor out-of-doors, stood at 53,881. It was stated that a decrease of 20,000 might be looked for in the coming fortnight, and this has nearly resulted. In the first week of the past fortnight the numbers fell to 49,198, and in the second week, when the bhadoi crop began to find its way into the markets, the numbers fell to 35,243, or 18,638 less than were on our pauper rolls a fortnight ago.

"A still further decrease in the ensuing fortnight may safely be reckoned on. Manufactures may now be safely curtailed, and in most places closed, and the light-labor gangs will be almost broken up in a few days, without any fear of distress being occasioned thereby.

It will be necessary to be a little patient with those on the gratuitous relief lists, for they are generally the blind and infirm, and the friendless. The autumn crops do not mature in every circle at the same time; where the harvest is later, the reduction cannot safely be made so early as elsewhere. A relief officer, reporting on one of the earlier circles, observes—'The numbers diminish rapidly, the ryots who have cut their bhadoi at once resuming the support of their aged and helpless relations, while the interrupted stream of village charity has at once resumed its flow to the maintenance of blind and crippled beggars. The people seem to look on gratuitous Government charity, and particularly on the tickets, with no small suspicion and rid themselves of it with an alacrity which certainly suggests that only real need led them to accept of it.' The case of the Habra and Phulbari circle may specially be noticed. Only 174 paupers now remain, blind or infirm. The professional beggars have gone off. There are no road-works or manufactures, and all the work to be done is the distribution of grain to these 174 people. It might be as well to give them out a month's or two months' supply, and close operations.

"ere are two circles in the south of the district—Porsha, where there is almost no d Luskerhat, where the cultivation of this crop is but small: in these two circles there will be a steady increase in the demand for relief and in the number of l the cutting of the hymunti. Up to the present reductions have been effected rcles scarcely less than in others, but with particular care, and the relief officers watch for the first symptoms that the scope of relief must again be enlarged.

reduction of minor establishment is being carried on simultaneously with that of r rolls. Arrangements are being made for the disposal of all manufactured articles Calcutta through respectable brokers or through the Alipore Jail, or in the district il and State Railway Departments.

"During the course of these relief operations, the manufacture of clot
been introduced to classes and localities where it was before unknown or un
is questionable whether the new learners will continue to work at it after the
of distress shall have passed away.

"I regret that I have not yet received all the returns required from the o
the compilation of accounts recently prescribed by Government. These should
course of the next week."

G.—Financial Results.

DINAGEPORE, M...

No. 1018F., dated Maldah, the 24th August 1874.

—F. Wyer, Esq., Offg. Magistrate-Collector, Maldah,

The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

e honor to forward my Narrative for the fortnight ending the 22nd instant.

A.—State of the Country.

eather has been most favorable for harvesting the bhadoi crop which is giving a yield, in many places ten maunds and even more a beegah. In Chanchal rice has gone ughout the whole of the sub-division. Mr. Reily tells me that a large quantity of now being exported from his division into Dinagepore, and that the prospects of the most excellent. The people admit that they have a sixteen-anna bhadoi crop, so uld hardly be better.

oo Sitakant Mukerjee has just been round the south-west and south and middle of ict, and gives an equally good account of those parts. There has not been much caused by the inundation. I went down the Pagla to Kaliachuck and back on the d found that in that direction the damage was very little indeed.

he eastern part of the district there is a general complaint of want of rain for trans- hoimanto. Baboo Hem Chunder Kerr reports that owing to this want there has isplanting in eight villages in his circle. However, rain has been falling during days, so that I hope that the hoimanto will turn out very well; in fact if we have s within the next fortnight there is every likehood of its doing so.

antity of rice and paddy imported to head-quarters is much less than during the rtnight, being only 1,533 maunds and 280 maunds. This falling off is only ce the bhadoi is now coming into the market.

llowing tables give the latest prices of paddy and common rice at the principal e district, and the quantity imported to English bazar and Maldah during the past

	Paddy.	Common rice.

Rainfall.

During the fortnight the rainfall recorded at head-quarters was 3·11 inches; at Chancha— inches.

B.—Relief Works.

There has been a great falling off in the number of persons on relief works. This is ng partly to employment having been furnished in reaping the bhadoi, and partly to the ction of the rates of wages, for these rates though quite sufficient for subsistence are now er than the usual rates in the district. There is a chance of an increase in the numbers the end of the bhadoi harvest, though the increase will probably not be great, since the ers will earn during harvest time almost enough to support themselves till the winter vation and harvest begin. It will be seen from the following table that the total number loyed during the fortnight under the Department Public Works was 13,427, and under le officers 18,267, showing a total decrease of 20,710 on the number working during the ceding fortnight, i.e., 1,479 a day:—

C.—Transport of Government Grain.

There is nothing to report under this head.

D.—Storage of Government Grain.

There are now 4,130 maunds 4 seers at English Bazar.

The following table shows the places within the district to which grain was the Fortnight :—

	Amount. Mds.	Srs.	Chs.
Loan given to the zemindars by the orders of the district relief officer ...	200	0	0
Ditto by the order of Baboo Hem Chunder Ker, circle officer ...	100	0	0
Sent to the charitable relief centre, English Bazar, by the order of the district officer	200	0	0
Ditto ditto Centre Maldah	48	8	0
Sent to Maldah Jail	15	25	0
Ditto to the Department of Public Works	37	0	0
Sold for tokens	19	4	0
Total ...	619	37	0

E.—Advances to Private Parties.

There have been no advances of money during the fortnight, and the quantit advanced was for the Sudder 1,325 and 87 maunds for Chanchal Sub-division. Th quantity advanced up to date is 25,358 maunds.

F.—Charitable Relief.

There has been a decrease in the number of persons charitably relieved in all th except at Gazole and Gomashtapore, where there has been a slight daily increase of 71 respectively. In the Sudder Sub-division the greatest falling off has been in the Sudder The total daily decrease in the Sudder Sub-division was 1,436 and in Chanchal division 638.

During the fortnight 4 centres have been closed in the Sudder Sub-division and 1 Chanchal. In Chanchal Mr. Reily finds that it is no longer necessary to keep up the g superintendents ; he has accordingly discharged them. He thinks that he will be able to relief operations by the end of next month ; by that time I hope to be able to do so throug the whole of the district. The following table shows the number of people in each c charitably relieved during the fortnight :—

Names of Circles.	Number of people relieved.	Rice distribution.	Names of Circles.	Light Work. Number of people relieved.	Light Work. Rice distribution.	Remarks.

Returns in forms A and B have been received only from two circles. They will follow when complete.

No. 2287, dated Beauleah, the 25th August 1874.

From—W. H. D'Oyly, Esq., Collector of Rajshahye,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department,

I have the honor to submit my narrative for the fortnight ending 22nd instant.

A.—State of the Country.

Importations have continued to keep the markets generally well supplied. A large quantity of aous or autumn rice has come into the market. The Nattore sub-divisional officer reports that "the early rice crop, as far as it has been gathered, is spoken of as such as has not been seen for years." In one part of his sub-division, *viz.*, in the south-eastern portion of Singra thana, the aous crop has not been so good, and this is the only part of the sub-division where there is any distress. Both the aous and amun rice crops have been flooded in that part.

The rainfall has been lamentably deficient, and this has caused considerable anxiety, but towards the end of the fortnight there was a fair fall, which has improved the prospects again; but much more rain is still required. In the North Bhurind a good outturn of jute has relieved many; but in the southern part of that sub-division, the aous rice crop is backward, and the silk bund has not been a good one. In the west of the district the winter rice (transplanted) is the staple crop; there is very little aous or autumn rice; in the south-west there is a fair amount of maize. It is expected that the condition of the people in this part, the Burhind, will be worse in October than it is now. The group system has been introduced in the Northern Bhurind. The centre of the district is the part where distress has been, and still is, most severe. The numbers of the poor-houses have decreased considerably, and I have instituted strict inquiries to ascertain whether floods have in any way prevented people from coming to the poor-houses.

A dam put up in the Nundungatchee Khal has burst, and a considerable portion of the country in Pootea has been inundated; not much damage, however, has been done as yet. There have been no cases of starvation.

B.—Relief Works.

See Statement.

C.—Transport.

See Statement.

D.—Storage of Government Grain.

No rice has been damaged by heating.

E.—Advances and their results.

Only 16 maunds of rice were advanced by the Nattore sub-divisional officer during the fortnight. Of advances made to traders to import rice, Rs. 3,966-8-3 were recovered to end of the previous fortnight. During the fortnight under report Rs. 1,160-11-11 have been recovered, making a total up to date of Rs. 5,127-4-2.

No. 875.

BEAULEAH,
The 26th August 1874.

J. J. O'FLAHERTY,
Executive Engineer, Rajshahye District.

No. 20, dated 24th August 1874.

From—E. G. GLAZIER, ESQ., Offg. Magistrate and Collector of Rungpore,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

Narrative of Scarcity and Relief of Rungpore District for the Fortnight ending 22nd August 1874.

A.—STATE OF COUNTRY.

The prospects of the amun crop are critical owing to the want of rain. There have been slight showers almost daily in every direction, but sufficient only to keep alive the planted out shoots and the seedlings, and not always for that, and further transplantation on the high lands has altogether ceased. In Govindgunge especially the state of the crops is worse than elsewhere. Taking the thana as a whole, not more than six annas have been planted out; but it is satisfactory to observe that on the red lands more progress has been made than elsewhere, and around Kamdia 12 annas have been transplanted. Coming further northwards through Pirgunge and Molung we find, as a rule, half the lands planted out, but most of the high lands left; and in one case a ryot was seen to be utilising his seedlings which were fast withering by causing his cattle to feed on them. The centre of the district, Mahigunge and Kumargunge, gives about the same result, half transplantation done, but with better prospects for the completion of the work. Northwards and all along the eastern border prospects are favorable. From some parts the report comes of 'no rain,' but, as a rule, the rainfall has been, if not sufficient, yet better than elsewhere.

The crop will, in the best case, be far from an average one; but unless it is very short indeed, with the exceptionally good aous crop that has been reaped everywhere, there need be little fear of distress. The state of the weather during the next fortnight will decide whether nearly half of the amun land will be left unplanted.

In case any large quantity of land is thus left, it may be well to consider whether we cannot encourage the cultivation of kalae, wheat, potatoes, and kawn. The relief officers will be able to do much in this way by their personal influence; it may be necessary to advance seed in some cases, but, as a rule, the people must be sufficiently well off to do without extraneous aid.

Jute is being cut in Sadullapore, and is good elsewhere; it is fair except in Govindgunge, where there is a want of water for steeping. Sugarcane is favorable. The rainfall registered at the sudder station for the fortnight is 2·66. This includes a good fall of ·85; to-day again we had a fair shower and the skies promise more rain.

Prices are rising as the people keep back supplies owing to the uncertain prospects of the amun crop. As a rule they have risen 2 to 4 seers, and head-quarter markets are now quoted at 18 seers instead of 20 seers per rupee. Exportation still continues on the increase. Prices would be still higher, but the zemindars are pressing for rent, and thus a large quantity of grain is thrown on the market which the ryots would have preferred to keep in store.

Market Quotations.

	OF 80 TOLAHS WEIGHT PER RUPEE.	
	Last fortnight.	This fortnight.
	Seers.	Seers.
Head-quarters	20	18
A. Govindgunge	15 to 16	17 to 18
B. Pirgunge	20	16
C. Sadullapore	20 to 24	20 to 24
E. Molung	18 to 22	21
F. Mahigunge	23	20
G. Kumargunge	17 to 21	16
I. Durwani	24	20

Distress is steadily decreasing to a minimum, now that the aous crop has been everywhere gathered. In Molung and Govindgunge all relief has been closed. In Pirgunge the number supported in villages has been reduced to 800. In Sadullapore only two diseased persons are left who are about to be otherwise provided for, and in Mahigunge the recipients of relief have been reduced from 2,020 to 1,250.

The expenditure has been as estimated 15,000 maunds. That for the next fortnight may be 3,000 maunds. The Julpigoree reserve has now been added to the statement. It has been taken over from the Julpigoree officer, and proper arrangements have been made against heating. Mr. Blair, who was deputed on this duty, thus reports his proceedings:

"The rice is stored in golas about 40 cubits long, and each gola holds about 5,000 maunds. The roof is water-tight and the walls are made of two layers of mats. The floor consists of large logs of wood over which bamboos are thickly spread, and over these again are mats. There are two large doors to each gola, and the rice is so stored as to leave a clear passage of about one foot all round. I have now had two transverse passages cut, one opposite each door, and a large window at the opposite end of each passage, and I have given special orders to keep both doors and widows open whenever the weather is fine so as to have a thorough draught. I completed the ventilation of one gola in this way, and left orders with the sub-divisional officer there to finish the rest.

"I had nearly 300 bags of this gola examined and did not find in any instance any appearance of heating, and from this I conclude the rice is at present in good condition; all the other golas will be examined in the same way. Some of the rice, the outer bags, had been attacked by weevils, but very slightly, and no damage to speak of done; but the longer the rice is kept, the more numerous of course the weevils will become."

The Deputy Magistrate of Gyebunda has completed the arrangements thus set on foot. I have examined the stock of rice at Chillakhal. I found it to consist of about—

3,000 maunds good Backergunge and Mymensingh rice.
1,000 „ red country rice.
1,500 „ Burmah clean rice.
6,500 „ cargo rice.

There was no trace of any heating, but the ventilation was defective, as the grain officer had not attended to the recommendations of Captain Conolly on this subject. I made arrangements for the remedying of the defects, and for the classifying of the different qualities of rice in different golas. In Durwani also there has been no heating, though, as reported, weevils have appeared and are increasing. I expect all the rice stored will be subject to the attacks of these insects, and I do not know that there is any way of obviating it. The small stock at Rungpore is in good order, so are those of Govindgunge and Mahigunge.

E.—Advances to Private Parties.

	Rs.		Rs.
A. Govindgunge	4,500	H. Borobari	13,600
B. Pirgunge	4,000	I. Durwani	2,550
C. Sadullapore	16,000	Fouranbari	27,800
E. Molung	27,750	Julohatia	600
F. Mahigunge	38,360		
G. Kumargunge	40,890	Total ..	1,86,050

The registration of documents in which immovable property has been pledged for advance is proceeding. In Mahigunge only is there any work of advancing remaining to be done.

F.—Charitable Relief.

(Prepared by the District Relief Officer.)

Four Government food relief centres were closed at the end of the last fortnight, and nine remained open at the beginning of this fortnight. All of these have now been closed with the exception of that at Sankamarie, at head-quarters, which will be temporarily retained, and two in the Mahigunge circle, for the closing of which arrangements have been made. In Mahigunge donations of 405 maunds of grain have been made to needy agriculturists

and laborers, and clothing has been given up to the present date to 885 persons in that circle. The gangs on light village-work are being broken up, and will probably be dispersed during the present fortnight.

The total number relieved is 5,433, against 10,980 in the last return, showing a reduction of 5,547.

The Form A returns of charitable relief expenditure have not yet been sent in by all relief officers, and some of those received are incorrect. The submission of the district return, Form A, has been unavoidably delayed in consequence.

Statement showing the Daily Progress of Charitable Relief for the Fortnight ending 22nd August 1874.

No. 2041, dated Bogra, the 24th August 1874.

From—E. J. BARTON, ESQ., Offg. Magistrate and Collector, Bogra,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit the fortnightly narrative of relief operations which is now due.

1. *State of the country and condition of the people.*—From one or two localities there have been complaints that a deficient rainfall is interfering with the transplanting of the amun crop, but there can be no doubt that this state of things is very exceptional, and is confined to places which are peculiarly unfavourable or unfortunate. For the season of the year, the rainfall is certainly somewhat short. We have showers, some of which are very heavy, and secure the continuance of moisture at the roots of the young amun plants. The rainfall at the Sudder during the last fortnight amounts to 5·15 inches. Generally there is water in the fields, although here and there I have seen a field where the water had dried up. It is unanimously reported that the transplanting of the amun is almost completed, and that the young plants have a most vigorous and healthy appearance. The country, in fact, is one sheet of dark green. A very large area of land has been cultivated and set out with amun rice. The fields from which

a plentiful aous harvest has just been reaped have been again ploughed and planted with amun seedlings. The fertility and capabilities of the soil are marvellous, and if the rains do not fail us, we shall doubtless get this year so large a crop that Bogra will resume its former position as an exporting district. The jute crop, which is an important and profitable one, and brings much money to those ryots who cultivate it, is very good.

2. I may say that the aous harvest has been now almost completely cut and removed from the ground. For some weeks back the aous rice has been getting into the market, and generally over the district this description of grain may be bought at from 16 to 20 pucca seers the rupee. In a similar way the general average price of good clean amun rice of last December's harvest may be set down at 14 pucca seers the rupee, the same grain which was selling four months ago at from 7 to 10 seers the rupee. There is, however, a brisk trade in exporting the aous rice. Lines of boats may be seen moored along the banks of rivers where there are hâts. Enquiries show that they are almost all on the same errand, viz. the quest after grain. The great majority come from the district of Rajshahye.

3. Prices of food do upon the whole still continue to maintain that downward tendency which has been their characteristic for so many weeks past. This is shown by the comparative statement which I append in the margin. It may be now said that the bazar rates are such that the worst remunerated of the labouring community can, if they are industrious, obtain for their earnings as much food as is necessary for their subsistence. I beg, however, to repeat an opinion which I have given in previous narratives, viz., that our present prosperity does not rest upon a very stable foundation; that it may be easily disturbed; that its continuance depends altogether upon our having a favourable season, and that any threatened failure of the amun crop would probably make the prices of food rebound up to, if not beyond, their former high figure. If such should unfortunately prove to be the case, undoubtedly the necessity would arise for resuming the administration of relief with the utmost energy; for the people, especially the poorest classes of them, having been to a great extent exhausted and impoverished by the scarcity through which they have not yet completely passed, would be in a worse position to meet the clamity than they were at the beginning of the year.

Panchbibi	15	not given
Khetlal	14 to 16	21 to 24

4. Therefore, as I stated in the 11th paragraph of my last fortnightly narrative, we have entered upon a policy of economizing our stocks. The relief works have been stopped, the labourers have returned to their homes, and there is no grain expenditure under this head. Similarly, we have greatly contracted and diminished our expenditure under the head of rice loans and gratuitous distribution. The only form of expenditure which still continues active is that of sales to the public, either directly or through mahajans. Of these sales I shall speak in their proper place in this narrative.

5. *Relief works under the Executive Engineer.*—These, as previously reported, were completely stopped a month ago, and the labourers upon them were restored to their homes and villages, each receiving such an allowance of rice as would feed him or her till other means of maintenance could be secured. Similarly, all work on tanks, village roads, jungle-cutting, and other miscellaneous projects under the relief officers has ceased. The thousands who so lately crowded every road in the district have disappeared, and have been re-absorbed into the population. They have doubtless obtained other employments.

6. There still remains a balance of pay due to the numerous supervisors, hajri navishes, and others who were engaged in the superintendence of the labourers upon the roads. Some cash expenditure will still be required in this direction, and must appear in my accounts.

7. The land for these relief works must be formally taken up under Act X of 1870. Some time ago I submitted my scheme for carrying this out, and nominated certain of the relief officers for the work. It is a pity that these gentlemen have not yet been duly empowered and cannot begin operations, for at present they could energetically engage in land acquisition duty, owing to a lull in their relief work. The zemindars of this district have as a rule (though there are exceptions) done very little—I might say almost nothing—for their ryots, and it is to be hoped that they will at least surrender without compensation such rights as they have in the land which has been taken for relief roads. Already, however, there have been applications for recompense, and very lately I received one from the agent of Baboo Debendra Nath Tagore of Calcutta for Rs. 700, which he claims for 21 bighas of land alleged by him to have been used for the road from Bogra to Adumdighi. I have written to him on the subject.

8. *Transport and Storage of Government grain.*—Under this head there is little to be said. The late heavy expenditure of grain quite emptied the Bogra gola and many of the interior ones, while it brought down to a very low figure the contents of the rest. This necessitated the calling up of an additional 30,000 maunds from the reserve at Chandanbasia. This large quantity of grain was safely conveyed to Bogra in boats. Out of it were replenished those of the interior golas whose stocks ought in my opinion to be increased.

9. Twenty thousand maunds of grain were, in the beginning of this fortnight, ordered rom Chandanbasia to the Burral, in the Nattore Sub-division. I heard from the Commissioner that there was a probability that the Collector of Rajshahye would not require all this. I have always been desirous of a reserve, to be ready for what may happen in October and November next. The heavy expenditure of past fortnights, and the extensive purchases of grain which are now being made out of our golas, have very materially reduced my stocks, and have indeed brought them down to a figure which may almost be described as inconveniently low. I therefore asked the Collector of Rajshahye not to take more than 10,000 maunds from me, and he has consented. These 10,000 maunds have already been despatched from Chandanbasia to those places on the Burral where the Collector of Rajshahye wishes them to be laid.

Names of Circles.	Names of subsidiary golas in it which have been shut up.
Panchbibi	1 Shirrati. 2 Kalandarpore. 3 Mirgao. 4 Hismi. 5 Mitapore.
Adumdighi	1 Baria.
Khetlal	1 Hatshaha.
Bogra	1 Chanchaitara. 2 Dargarhat. 3 Mahincha. 4 Nungola. 5 Narnamala. 6 Gokul. 7 Sabrul. 8 Chandmua.
Total ...	15

10. It may not be out of place here to remark that as the state of the country improves, I am gradually shutting up the golas. I give in the margin the names of those golas which have been emptied of their contents and closed, and whose establishments have been discharged.

Names of Circles.	Amount sold last fortnight.	Amount sold this fortnight.
	Mds. S. C.	M. S. C.
Bogra	110 2 4	437 27 12
Adumdighi	399 10 4	11 0 4
Sherpore	88 39 12	1,502 1 6
Shibgunge	275 32 0	578 34 12
Khetlal	253 22 14½	49 8 0
Panchbibi	3,347 16 4	1,455 2 7½
Total ...	3,475 3 6½	4,033 34 9½

11. *Sales of Government grain.*—The marginal figures will show that in all circles, save that of Sherpore, sales have been languid this fortnight. The cause of this is that the bazars are well supplied with clear indigenous rice, amun and aous, old and new, which is generally offered for sale cheaper than the retail rates which are fixed for our golas.

12. The sales which I have referred to in the previous paragraph to the Nattore bunneahs and dealers of grain out of the Shariakandi, Chandanbasia, Dhunat and Madhupore golas in the Sherpore relief circle during this fortnight have been so extensive, that the circle officer, who is personally superintending the weighing and the delivery of the rice at the golas, has not been able to finish the transaction in time to include it in his report for this fortnight. The sales and delivery are now approaching completion, and an account of them will appear in the next narrative.

13. These large and extensive sales form the most important transaction of the fortnight. Rice to the value of Rs. 31,889 has been sold to these men, who have deposited this sum in the district treasury. They take it in boats from the golas at Chandanbasia, Shariakandi, Madhupore and Dhunat, and sell it to the public in the localities where they reside themselves at retail rates, which are fixed by us. There has not been much distress hitherto in the country commanded by these golas. The people have been harrassed with floods and will be liable to severe distress if their amun does not prosper. I have therefore resolved on keeping a moderate reserve in each gola as noted in the margin. I shall sell down the contents of each gola till they reach the figures I have fixed for the reserves, and the sales will cease.

Names of Golas.	Amount originally stored in it.	Reserve ordered to remain in it.
	Mds.	Mds.
Dhunat	3,000	1,500
Madhupore	3,000	2,000
Chandanbasia	59,108	3,000
Shariakandi	26,500	3,000
Total ...	91,608	9,500

14. There is, as will be seen from the marginal record of the previous paragraph, a large difference between the figures of original storage and the figures of the reserves. It must not be supposed that all the rice, represented by the difference between these figures, is lying at the golas for sale. Thirty thousand maunds, for example, of the Chandanbasia reserves were brought into Bogra.

Names of Circles.	Amount lent last fortnight.	Amount lent this fortnight.
	Mds. S. C.	Mds. S. C.
Bogra	7,957 32 0	537 0 0
Shibgunge	188 19 0	462 37 0

Khetlal	379 1 0	28 21 0
Panchbibi	1,686 28 0	1,330 10 0
Adumdighi	1,284 30 0	.....
Total ...	12,977 10 0	4,857 7 4

15. *Rice Loans.*—The marginal figures will show a very general and large decrease in these transactions. I am not sorry at this, for I wish to keep as much as possible of that rice which is stored in the interior as a reserve for October and November next. The circle officers are using the greatest caution in distributing this form of relief. Indeed, the people do not as a rule require loans now, and all who were necessitous have already obtained them.

Names of Circles.	Grain given away last fortnight.	Grain given away this fortnight.
	Mds. Sr. C.	Mds. Sr. C.
Bogra	15,667 39 8	293 27 4
Adumdighi	1,475 13 14	750 10 14½
Panchbibi	1,421 32 5	920 36 9½
Sherpore	742 7 14	570 34 12
Khetlal	727 31 8	433 28 8
Shibgunge	2,276 17 0	553 19 12
Total ...	22,311 22 1	3,522 37 11¾

16. *Gratuitous Relief.*—This only is given in thoroughly deserving cases. The marginal figures will show a great diminution in the expenditure under this head. The large expenditure of the last fortnight was caused by the payment of subsistence allowance to the laborers, which was fully explained at the proper time in my previous narrative.

17. *Relief by spinning and weaving.*—I said in my last narrative that the time had now come for discontinuing at present this mode of relief, and for discharging those employed upon it with an allowance of grain. This has been done. The manufacture of cotton-yarn and jute-twine will cease. As, however, we have large quantities of cotton-yarn upon our hands, which is only saleable when made into cloth, weaving will continue. Moreover, there can be no doubt that the weavers as a class still require relief. In Bengal there is no class of men so poor as the weavers. Their trade has been as good as ruined. In the best of years they can scarcely live. In times of scarcity it is a wonder how they escape starvation.

18. *Village Visitation.*—The relief officers still continue to move about in their circles with activity. Their returns show that they have been much in the interior. The general tenor of their reports is to the effect that distress has disappeared for the present.

19. *Annachatras.*—During the last fortnight nine annachatras were at work, and they have been all closed in this fortnight. Beggars only resort to them, and the state of the country is such that they can, if they are active, professionally earn their own living. In fact, I dare say they do so now, for they beg all day and come for a meal to our relief kitchens at night.

20. *Total grain expenditure.*—I show below, fortnight by fortnight, the total grain expenditure till about Wednesday, the 19th instant—

						Mds. Srs. Chs.
(*a*)	Total amount of grain consumed in the district up to 2nd May 1874				...	487 34 0
(*b*)	Total grain expended in the fortnight ending 16th May			...	...	6,772 34 0
(*c*)	Ditto	ditto	ditto	30th " ...	...	8,656 11 0
(*d*)	Ditto	ditto	ditto	13th June ...	...	13,702 9 0
(*e*)	Ditto	ditto	ditto	27th " ...	...	17,164 0 0
(*f*)	Ditto	ditto	ditto	11th July ...	...	32,487 39 13½
(*g*)	Ditto	ditto	ditto	25th " ...	...	46,640 33 15
(*h*)	Ditto	ditto	ditto	8th August ...	...	39,039 27 11
(*i*)	Ditto	ditto	ditto	8th " ...	...	12,494 31 7¼
				Total	...	1,77,445 26 14¾

The total grain allotted to, and deposited in, the district amounted to 2,48,390 maunds up till now we have a total expenditure of 1,77,445 maunds 26 seers 14¾ chittacks, leaving an unexpended balance of 70,944 maunds 13 seers 1¼ chittacks. Some kinds of expenditure, such as sales, still continue, and there is no great balance for them to feed upon.

21. *Condition of the golas and the grain.*—The golas and grain still continue sound and good. There is an enormous accumulation of empty gunny bags, most of which are of excellent quality. There is no adequate market here for them. I have been trying to sell them for a month back. One native merchant offered to take 12,000 good bags off my hands at Rs. 12 the hundred. Good, new two-maund bags cost I believe from Rs. 24 to 28 per hundred in Calcutta, and I consider that those I have are worth more than Rs. 12. The orders of Government would seem to be necessary on the point. Probably it might be worth while to send all the serviceable bags to Calcutta where there is an unlimited demand for them, and have them sold there.

22. *General.*—As relief work is not now so onerous as it was, I have been cutting down the establishments of all kinds. Golas have been shut up, goladars, mohurrirs, peons, constables and others, whose services were no longer required, have been discharged. In each circle only such an establishment as is required for the transaction of current business will be retained. At the same time the circle officers should not be removed, nor should the general organization of the relief system be interfered with. I am of opinion that both should be continued till the prospects of the amun rice are assured.

23. Although the direct relief operations which most of the officers appointed to this district have carried out with much intelligence, energy, devotion to duty, and efficiency are not now on so extensive a scale as formerly, it must not be supposed that they have little to do. There remains a large balance of work still undone. The accounts have to be wound up. If haply a good amun crop should render the continuance of relief unnecessary, the closing and completing of these vast transactions will entail much labour. Also the land occupied by our relief roads and other works must, under the orders of Government, be taken up strictly in accordance with Act X of 1870. I have nominated those relief officers who are in the Covenanted Civil Service as persons fit to exercise powers under that Act. It is a pity that they have not yet been empowered, as at present they could devote much of their time to the work. For these reasons it seems to me that I am not yet in a position to dispense with the services of any of the circle officers.

Financial Result.

Balance showing the wholesale grain available for Bogra	.....	2,48,390 0					

(a) As previously explained, a very large proportion of the rice which has been gratuitously distributed represents the subsistence allowance given to the laborers when they were turned off the relief works.

APPENDIX E.

Statement showing the daily average of Men, Women and Children employed on relief works in the District of Bogra for the Fortnight ending the 22nd August 1874, and the amount expended in Money and Grain upon the payment of Laborers.

Remarks.—This statement is blank for the fortnight, because every relief road under the Executive Engineer has been closed.

APPENDIX F.

Statement of relief by work on Cotton and Jute in the District of Bogra from the beginning of operations up to date.

CIRCLES.	JUTE.				COTTON.				Expenditure of grain in the payment of those working at jute and cotton.

Remarks.—The figures in columns 5 and 9 are very low for this fortnight, as we are discontinuing this form of relief.

No. 1444, dated Pubna, the 24th August 1874.

Memo. by—W. V. G. TAYLER, Esq., Magistrate of Pubna.

SUBMITTED to the Secretary to the Government of Bengal, Scarcity and Relief Department, for information.

Fortnightly Narrative ending the 24th August 1874.

A.—STATE OF THE COUNTRY.

The state of the Sudder Division remains satisfactory. Prices are still falling, and no distress is reported anywhere notwithstanding that all gratuitous relief has been stopped. The rivers have been receding and there has been a want of rain, but had this continued, the prospects of the amun-crops would have been somewhat less favorable; happily the former have again risen, and within the last two days we have had rain, which I fancy has been pretty general all over the district. Below are given the present prices—

	Srs.		Srs.
Pubna	16½	Dulai	13⅛ "
Arankola	18¾	Sujangar	13¾ "
Ataikula	13½	Nazirgunge	16½ "
Chatmore	16½	Mathura	15 "
Fureedpore	15	Bera	15 "
Handial	13½	Maldah	14¼ "

B.—RELIEF WORKS.

Relief works have been stopped everywhere and the works made over to the Public Works Department.

C.—TRANSPORT OF GOVERNMENT GRAIN.

None.

D.—STORAGE OF GOVERNMENT GRAIN.

We have now in store maunds 979-18-4 of rice, but little, if any, of which will be required I hope.

E.—ADVANCES TO PRIVATE PARTIES.

No advance has been made during the fortnight.

F.—CHARITABLE RELIEF.

Gratuitous relief has been stopped altogether.

G.—Financial Results.

Of the unrealized subscriptions, only Rs. 3 have been realized in this fortnight. Expenditure as detailed below—

	Rs.	As.	P.
Deputation allowance of Golam Nabby, native doctor, deputed to Ryegunge ...	20	13	0
Boat hire incurred by Ishan Chandra Mitra, supervisor, in bringing kodalies from Sujanagar	2	0	0
Contingencies and boat hire incurred by Tarini Charan Sen, supervisor, in bringing kodalies from Fureedpore	6	0	0

	Mds.	Srs.	Ch.
Paid for the arrears of wages due to the coolies of Bhowanipore road	20	21	12

Fifteenth Fortnightly Narrative af Scarcity and Relief in Serajgunge Sub-division from 6th to 19th August 1874.

A.—State of the Country.

The supply of grain in the bazars has been everywhere sufficient during the fortnight. The price of rice has fallen as will appear from the following table :—

State.	Number of seers procurable per Rupee.	
	Last return.	Present return.
	Seers.	Seers.
Serajgunge	15⅜	16¼
Ullapara	12¾	14¼
Raigunge	13½	13½
Taras	11¼	12

Nowhere in the district is grain as cheap as in Serajgunge mart. From this I infer that the harvest in neighbouring districts has been better than that which we have reaped, for the price of rice in a large market like Serajgunge depends on the general state of eastern Bengal, while the rate is influenced in small places, such as Taras, by local causes.

The rainfall has been scanty—1·34 inches. The river has been very low, and its sudden fall after an unusual flood has done harm. The amun crop wants water badly. A few days ago some of the villagers in the immediate neighbourhood of the station cut a channel to bring in water from the river to their fields, thus showing that at present they had too little of what was lately so excessive. It is impossible to say what may be the amun harvest.

The people generally have derived some benefit from the fall in prices. Those who have lost their aous crop in the flood are not improving in position, and cannot but get more and more distressed until the amun harvest.

D.—Storage of Government Grain.

On the 10th August, the date of the last periodical return, we had 12,061 maunds of rice in store. The consumption of the previous fortnight was 2,064 maunds. Our present position is shown in the following table :—

Name of gola.	Date of last return.	Maunds of rice in store.
		Mds.
Serajgunge	19th August 1874	3,050
Ullapara	18th ditto	1,714
Raigunge	Ditto ditto	3,740
Taras	.....	2,602
	Total ...	11,106

Our current disbursements are made from the three golas first mentioned. At Taras, rice is simply stored as a reserve for that, out of every neighbourhood, where there are many villages which may require assistance later on, and where prices are very high. Deducting the stock then we have 8,810 maunds to meet our charitable relief disbursements and to advance to zemindars. It may suffice, but I think it highly probable that I may have to indent on Bogra for about 5,000 maunds.

E.—Advances to Private Parties and their Results.

During the fortnight ending 10th August 1874 rice was given in loan to the extent of 1,050 maunds. Of this, 850 maunds was advanced to the ryots on the Jamoona churs under khas management, men who had to bear the burst of the flood and have, as tenants, peculiar claims on Government and its revenue officers. Two hundred maunds was lent to zemindars.

F.—CHARITABLE RELIEF.

In my last report I stated that the number of persons in receipt of charitable relief was 4,415. I added that relief officers had been busy distributing tickets in the flooded tracts, and that I expected an increase under this head. The number now in receipt of relief is 6,274. They are classified as follows:—

Persons receiving gratuitous relief in uncooked food after enquiring into their circumstances...	3,491
Casual paupers receiving cooked food	237
Respectable persons assisted by loans	364
Workers in cotton and jute	2,182
Total ...	6,274

I do not think that this number can be largely reduced. The lists were thoroughly weeded and reduced from 13,000 in June and July, when the cutting of the *kaon* and *aous* crops earlier in this district than elsewhere gave us an opportunity for so doing. Such additions as have been since made come exclusively from the flooded tracts.

G.—FINANCIAL RESULTS.

During the fortnight Rs. 782-8-7 has been expended. It is classified as follows:—

	Rs.	A.	P.
Price of raw material for manufacture, viz., cotton and jute	460	14	3
Expenses incurred by sub-committees...	123	8	4
Distributing cooked food	1	0	0
Repairing gola	18	9	0
Transport charges	105	10	0
Office contingencies	17	8	0
Copying fees for drafting manuscript ticket forms	51	12	0
Postage	3	13	0
Total ...	782	8	7

Remarks.—Putting aside persons to whom loans are granted and workers in cotton and jute, there are still 3,728 persons on gratuitous relief; half of this number belong to the flooded tracts and have been added during the fortnight, but it has not been clearly stated how many of the remainder also live within those tracts. In future reports this should be specially noted, and grounds for granting such relief to persons outside them should be specified. It is satisfactory that prices seem to be steadily falling.

No. 244—SR, dated Burdwan, the 27th August 1874.

From—C. T. BUCKLAND, ESQ., Commissioner of the Burdwan Division,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit herewith, in original, the district narratives for the fortnight ending Monday, the 24th August.

2. *Beerbhoom*—The Collector's report is more favorable than I had expected, but it will be seen from the Special Relief Officer's letter, which the Collector encloses, that the prospects of the crops in thana Barwan are very bad, and that considerable distress exists in that part of the district, and also in the adjoining part of the Kandi sub-division, in the Moorshedabad district.

3. There has been a marked rise in the price of common rice in some places, especially at the sudder station of Sooree, where it has risen from 12 to 10 seers during the fortnight. The rise has been still larger in Doobrajpore, from 14 to 11 seers. In Barwan the price has risen from 11 seers to 10½ seers. The exports of rice have fallen off, showing only 587 maunds against 4,178 maunds of the preceding fortnight.

4. The statement C, giving the number of persons employed on public relief works, shows that the daily average was 8,912. The Magistrate will be requested to explain if these laborers are being paid in Government rice or in cash, as the remarks in the last column of the statement refer only to cash payments. The Appendix Return No. 2 shows that 4,980½ maunds of rice had been expended in payment in kind to laborers.

5. The number of persons receiving charitable relief as shown in statement 3 of the Appendix gives a daily total of 38,121, against 31,195 of the previous fortnight. Out of this number 6,821 were employed in spinning and weaving, and 3,286 were employed in light-labor, leaving a daily average of 28,014 in receipt of purely gratuitous relief, against 23,897 in the previous fortnight.

6. The Collector questions the policy of instituting a formal enquiry into the cases of alleged deaths from starvation, but I am of opinion that it is both necessary and desirable that a strict enquiry should be promptly made in every case. All these charges have hitherto fortunately turned out to be false, and it is better that the imputation of neglect should be at once disproved than that it should be allowed to remain unheeded, to be raked up and repeated to the discredit of the officers of Government hereafter by any person whose convenience it may suit.

7. *Bankoora.*—The Collector's report, taken with that of Mr. Macaulay, as Relief Officer, is generally favorable, and shows that the prospects of the crops and condition of the people,

are good, and that distress is now almost entirely confined to pergunnah Moheshra, where it originally appeared, after a successive recurrence (as Mr. Macaulay observes) of three seasons of comparative drought. Government grain is now provided for sale in pergunnah Moheshra at the rates laid down by Government, but the Collector ought to have stated precisely what these rates are.

8. The statement of laborers employed on public relief works shows a daily average of 4,721, against 3,810 in the previous fortnight, which is explained by the Collector.

9. The Collector has omitted to send the detailed statement of charitable relief in the form in which he has hitherto sent it, so that he affords no means of ascertaining what further reductions have been made during the fortnight in the number of persons receiving charitable relief. He will be called on to submit it. The printed form B gives the information regarding charitable relief for the whole month of July, but it affords no basis of comparison with the return of the last fortnight.

10. Mr. Macaulay appears to have discovered some very serious malpractices on the part of a representative sub-committeeman of the Gogra relief centre, which, it is to be hoped, will meet with their reward.

11. *Hooghly.*—The Collector of Hooghly gives a very unfavorable account of the prospects of the amun rice-crop of the district, which has been planted out in very small quantities owing to the failure of the rain. The details which the Collector gives of the rainfall show how frequent and how disappointing the light showers have been. The appearance of the clouds from day to day has indicated heavy rain, but the appearance has been only sufficient to tantalize the cultivators. The Collector has gone over a great part of the district, where the prospects of the crops are most unfavorable, and he writes his report from the impressions thus created, and from the unhopeful character of the people by whom he has been surrounded. He may be right; but I do not think that it is yet time to give up all hope, especially as from the tables of the Government Meteorological Reporter up to the 31st of July, and from such a forecast as can be derived from them, there seems reason to hope that the monsoon rains may be prolonged as in 1870 and in 1872, and that there may be a plentiful and favorable distribution of rain in September and October.

12. The Dhankoony drainage works have again this year been utilized for irrigation purposes, instead of for drainage.

13. The Collector has been authorized to carry out all the relief works which he has proposed for my sanction. The special report of the Serampore Sub-Divisional Officer, and the Collector's reply, to which he refers, have not yet reached me.

14. The returns compiled by the Collector show a daily average of only 1,490 persons employed on relief works, against 2,671 in the previous fortnight. It is to be expected that the next returns will show a considerable increase

15. The daily average number of the recipients of charitable relief has fallen from 17,768 in the previous fortnight to 13,222 in the present fortnight. But the omission of the Serampore returns prevents any correct conclusion from being formed from these figures.

16. *Burdwan.*—The narrative of the Collector is written in a gloomy tone; but from the very latest accounts and information which I have received through my special assistant, Mr. Larymore, up to this morning (27th), I know that a very favorable change has occurred the prospects of the Raneegunge sub-division, in consequence of a heavy fall of rain, nd that the greater part of the Bood-bood sub-division, and of the sudder sub-division, and of the Culna sub-division, have shared in this improvement.

17. The particulars which the Collector has given from Dr. French's report as to the state of the health of the district, are remarkably interesting, and although what is called "the fever season" has now begun, the general health of the people has much improved. But there still remain, as I have so frequently represented to Government, the remnants and relics of the previous years of fever—the orphans and widows, and people too debilitated to work, and the sufferers from old chronic diseases and the sequelæ of fever. For all these people we endeavour to provide medical treatment through the agency of the forty-six Government dispensaries which are established wherever required throughout the district, whilst nutritious diet and clothing are also given wherever needed, on what may be called "medical considerations."

18. The daily average number of persons employed on relief works was 5,452 during the fortnight of report, against 4,566 in the previous fortnight, which return showed an increase from 3,334, the number of the preceding fortnight; though the figures are not large, they show a tendency to increase.

19. The daily average of the recipients of charitable relief as shown in statement No. 4 is 64,358, against 67,895 of the previous fortnight. The Collector says that though active measures have been taken to turn out and to prevent the admission of undeserving applicants for relief, the moment a reduction is effected by one officer "strong representations come in from another that the thing has been carried too far, and that relief operations must be again expanded." These remarks seem to indicate a want of proper organization and supervision of the relief officers under the control of the Collector, who should so dispose of them as to prevent any conflict of authority.

20. The narratives from Midnapore and Howrah are herewith submitted. In both districts some apprehensions are entertained regarding the prospects of the crops in those parts of the country which adjoin the parts of the Hooghly district where the rainfall has been so deficient.

No. 600, dated Soory, the 24th August 1874.

From—R. D. HIME, ESQ., Officiating Collector of Beerbhoom,

To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit my district narrative for the fortnight ending 22nd August 1874, together with copy of the report of the district relief officer, Mr. O'Donnell, for the same period.

A.—STATE OF THE COUNTRY.

There is no marked change to record under this head. The crops generally promise well, though local failures in the north-east of the district, due to deficient rainfall, are apprehended. No deaths from starvation during the fortnight have been reported, and the two reported from Krinnahar, noticed in the narrative of last fortnight, turned out on inquiry to be deaths from natural causes, which the villagers were endeavouring to make capital out of. The policy of inquiring into such reports at all seems open to question, as the practice appears to stimulate imposture; and I fear that every discarded pauper, who may die from any cause whatever during the next four months, will be reported by his relatives and friends to have died of starvation in consequence of his being deprived of relief The chief markets continue sufficiently supplied; but prices have risen a seer during the fortnight, and have now almost reached famine rates. One grain robbery occurred during the fortnight, and pauperism has increased lamentably.

B.—RELIEF WORKS.

No new works have been opened during the fortnight; existing works give employment to some 10,000 laborers. The reduction of the works has, I fear, much increased the numbers of the paupers.

C.—TRANSPORT OF GRAIN.

Only 587 maunds of rice have been exported by rail, against 4,178 maunds of the preceding fortnight. The Government imports of the fortnight are over 13,000 maunds, against 16,714 maunds in the preceding fortnight (not 7,127½ maunds, as erroneously reported in my last narrative).

D.—STORAGE OF GRAIN.

The imports of the fortnight have been stored.

E.—ADVANCES TO PRIVATE PARTIES.

Are shown in Appendix, Statement II.

F.—CHARITABLE RELIEF.

Vide Appendix, Statements III, IV, and V. The efforts made to reduce the numbers at some of the relief-houses have been attended with considerable success, but are much more than counterbalanced by increases at others. The present being at all times the most trying month of the year in this district, no general reduction could be effected without danger.

G.—FINANCIAL RESULTS.

Rs. 653 have been paid to Messrs. Farquharson and Campbell on back accounts connected with the road from Ilambazar to Doobrajpore; Rs. 3,617-13-6 have been disbursed in the purchase of cotton, and Rs. 452-7-6 in transport and storage.

No. , dated Beerbhoom, the 24th August 1874.

From—C. J. O'DONNELL, ESQ., District Relief Officer,

To—The Collector of Beerbhoom.

SINCE the date of my last fortnightly report I have been engaged almost entirely in inquiring into the condition of the cultivating ryots of the Barwan thana, in order to the making of grain advances. I also gave some time to a more detailed examination of the circumstances of recipients of charitable relief, and was able to take a two days' run over some parts of the Mouressur thana.
